Send for Catalogue

Mercantile Summary.

THE old established wholesale and retail drug firm of G S Hobart & Sons in Kingston are reported to be in difficulties, and have called a meeting of their creditors for the 21st inst.

A DISSOLUTION is announced of the wholesale woolen firm of McDougall, Barrett & Co., Montreal. Mr. Reddy withdraws from the firm to resume the practice of his profession as notary, and the business will be continued under the old style by Messrs. McDougall & Barrett.

JOSEPH PELLETIER & FILS, general store, of St. Jean Port Joli, Quebec, have made assignment of their estate. The senior partner has been long in business, but failed before in 1892 ——A. Fauvelle, storekeeper and peddler of Rigaud, Que., recently insolvent, is offering his creditors 25 cents cash; he owes $2,927, with nominal assets of $1,648 ——E Catudal, carriage maker, East Farnham, makes a proposition to pay his creditors 25 cents on the dollar, half cash, and half in four months, secured.

WE note the following minor failures in Montreal. E. M. Glauberson & Son, a small dry goods firm of recent establishment, have been served with a demand in insolvency.—— G. Brown & Co., tailors, reported failed last week, are offering ten per cent. cash, on liabilities of about $3,000.——Joseph Dupont, grocer, is arranging liabilities of $3,100 at 40 cents in the dollar.——P. Murphy & Co., grocers, have assigned on demand, owing $3,300 —— Larue & Pouliot, tailors, whose creditors held a meeting last week, made an offer of 15 cents on the dollar, owing $2 600. —— H J Dreyfus & Co., jewellers, propose a settlement at 20 cents

REFERRING to an item on page 1479 of last issue, the Watson Manufacturing Company, limited, in liquidation, sends us the following memorandum, which it affords us gratification to print: "The Watson Manufacturing Company was formed in 1882, and took over the business of John Watson, who established it in 1847, and had most successfully operated it continuously up to date of formation of company In beginning of 1891 the Watson Mfg Co., Ltd., got an extension of three years from a number of their creditors, not including the bank. Those creditors who granted the extension have since been paid 66⅔ per cent. of their claims. The bank account was fully covered with customers' notes, out of which at this date about 80 per cent of the company's indebtedness to the bank has since been paid

THE Montreal wholesale grocery firm of Lightbound, Rolston & Co. have decided to liquidate and go out of business.

THE Ætna Life has issued a four-page sheet containing a large number of comparisons of the cost of insurance with other companies. A number of these are to be found on page 1523 this issue.

—IT is proposed to incorporate the dry goods business of S. Carsley, Montreal. A charter is being sought, authorizing a capital of $600,000, and the corporate name is to be "The Carsley Company." The directors are Samuel Carsley, Wm. F. Carsley, A. Porter and Samuel Carsley, jr.

THE Sherbrooke *Gazette* is informed that a rich chrome iron deposit has been recently discovered in the Wolfestown Mountain, five and a half miles from Coleraine Station, on the Quebec Central Railway. The owner, Mr. Alfred Bouchard, of Garthby, has just begun operations on it, with a few men, and the yield is proving highly satisfactory.

PREPARATIONS are in progress for the Pan-American Congress of Religion and Education, which convenes in Toronto in July next. Side trips are being arranged with steamboat and railway lines in Canada to convey the delegates to leading points of interest in Quebec and the Maritime Provinces. There will be probably some thousands of visitors on this occasion, and it will be our own faults if they do not stay some weeks in Canada.

THE Intercolonial Railway of Canada puts its big moose-head upon every advertisement, and few things are more striking. This popular device appears upon the little metal plate, or stand, or cigar holder, or whatever it is that the company has lately sent out to its patrons and friends. The route "To the Maritime Provinces along the shore of the St. Lawrence River and the Baie des Chaleurs" is indicated upon it.

THE little town of Farnham, in the Eastern Townships, has furnished rather more than its proportion of recent failures. J. A. M. Davignon, reported in trouble last week, has now assigned. The liabilities foot up to $11,880, with assets apparent of about $9,000.——E. Donahue & Co., lately reported failed, have effected a settlement at 40 cents, cash, and sold out to J. Seale.——A. N. Ouimet, the third late failure in the town, is seeking a compromise, offering his creditors 25 cents cash.

ON Friday evening last in Winnipeg a number of members of the Board of Trade, of the N.W. Commercial Travellers' Association and some personal friends gathered to do honor to Mr. M. R. O'Loughlin, for eighteen years a merchant of that city, who is leaving for New York. They presented him with a flattering address and a silver service. The address was signed by R. T. Riley, R. J. Whitla and D. W. Bole on behalf of the Board of Trade; by J. Y. Griffin, A. S. Binns, and J. Mundie, Commercial Travellers' Association; by E. Powis, R. F. Manning, and D. W. McDermid on behalf of personal friends. Mr. O'Loughlin made a suitable reply.

THE following recent failures are reported in Nova Scotia: Mark Farrell, a grocer and jeweller of Barrington, has assigned. He moved thither in 1892 from Liverpool, where he had been unsuccessful.— J. S. Graham, of Economy, is a carpenter by trade, who began a small general business three years ago. He has been under considerable expense through sickness in his family, and is now reported insolvent. — W. A. Smith, trader, Truro, has assigned, with small local liabilities.——The shipping firm of J. V. & J H. Dexter, of Liverpool, and J. H. Dexter, individually carrying on a grocery business, have made assignment of their estates. Liabilities not yet ascertained.

ALTHOUGH he has been in the jewellery business in this city for fifteen years, and possessed at one time a good trade with fair profits, F. Crumpton now finds his effects seized by bailiff. Although he claimed in Jan. last a surplus of several thousand dollars, he has for some time been slow pay, resulting as above stated.——In the early part of this month, G. McDavitt, dealer in flour and feed, in Toronto, died, and his estate is much involved through real estate operations. In February last he gave a chattel mortgage for $1,044; since then a judgment for a smaller amount has been obtained against him. Now, it looks as if the $13,000 cash and land that his father is said to have given him has all been swept away, and his estate will prove a poor one.

A FEW years ago Frank T. Allan was in business at Clearville, where he failed to pay his creditors in full. Becoming tired of clerking in Chatham, he opened, in the fall of 1893, a general store at Muirkirk in the name of his wife, M. F. Allan. After sometime he sadly neglected her business and allowed her debts to increase, until September last, when she was burnt out and her creditors received $1,000 insurance, which was about 40 per cent. of their claims. Since then a judgment has been obtained against her. An assignment has been made. In view of these facts it is folly for her husband to talk of resuming business as a merchant.——A. Currie, trader, Jackfish Bay, has assigned.

FRANK POND, Woodstock, has assigned. He has carried on a small business as a tailor for fifteen years, but never made much, and has generally been slow pay.——A long-established grocery firm in St. Catharines has again come to grief. It is that of John Nay & Co. (John Nay sole owner), who commenced business many years ago. In 1883 the firm assigned with liabilities amounting to $92,000, which they settled at 50 cents in the dollar. Five years later the business was transferred to Mrs. John Nay. In 1890 the stock was sold under a landlord's warrant. A short time after Nay started again, having raised some money by a chattel mortgage, and now he has assigned. ——E. Derusha, hotel-keeper at Uxbridge, has arranged with his creditors a compromise of fifty cents on the dollar.

How dreadful a thing an uncontrollable fire may be is shown in the following incident, which we find in last week's Sherbrooke *Gazette*: "Keene's mills, built and run by Judd Brothers since last autumn, located near Lake Megantic, were totally destroyed by fire on Saturday. The fire began in the morning, spread through the woods, doing terrible destruction to trees and large quantities of sawn lumber, and nearly surrounded the village by seven o'clock in the evening. Four farm houses and buildings were completely consumed, and their inmates left in utter destitution. Some of the C.P.R. track was also destroyed. Mr. Ladd's house near Keene's mills during the progress of the fire became completely hemmed in by the flames. Mr. Ladd and his wife and children were obliged, in order to save their lives, to take refuge in the river, where they remained for two hours before they could be rescued. A horse perished; two others were saved by driving them into the river."

IN March, 1894, Matt. Robertson, dealer in furniture, Seaforth, assigned to the sheriff, with liabilities of $3,700, and nominal assets, $2,378. An offer to compromise at 25 per cent. being refused by creditors, the stock was sold to his wife, Mrs. M. Robertson, and her son, realizing 40 per cent., which netted creditors about 10 per cent.

on their claims. In this purchase Mrs. R. had the assistance of a private banker, who was secured. Being under the same management, their chances were no better than before, and now we hear that creditors are closing their premises.——After being about six months harness making, etc., at Shelburne, Little & Morrow assign. Poor business ability, with but little if any capital, is the cause of their trouble.——In Harwich, Campbell & Hutchinson keep a small store, but did not possess the elements of success. The habits of the former, who is the latter's stepfather, are not good. Beside this, their little capital has been loaned to them by his wife. Now they assign, and it will not be surprising to hear that their principal creditors, who are in London, will get a small, if any, dividend. They want to compromise liabilities of $1,000 at 30 per cent.

CANADIAN FLEECE WOOL.

The 1895 wool season is now in full swing, and the Ontario clip is being marketed, for the most part, in a nice bright condition. Merchants are not in unison as to the price to be paid for the new clip, and this hesitancy to make definite quotations has thrown the market back somewhat. Some of the wool merchants consider that 20 cents per pound is a fair price for good combing fleece They base their opinion upon the fact that the market is completely bare of Cotswold, Leicester, Lincoln, and in fact, of anything in the shape of choice combing fleece. But there are many arguments against paying so high a price as 20c. for the new clip. The following extract from the letter of a Philadelphia firm to a Toronto merchant is interesting in this connection: "You say you can sell us Canada fleece at 22c. delivered in Philadelphia. Of course, you know that is the price manufacturers pay us. We will charge you 1½c. commission, which, having paid freight, nets you 20c." In view of this statement, and we have every reason to believe it true, it is difficult to see how merchants can pay 20c. for wool delivered in Toronto.

In May, 1894, there was a shortage of woo of 100,000,000 lbs. in the United States, which made it possible for American manufacturers to absorb the best part of two Canadian clips. To-day there is in the United States 100,000,000 lbs. more wool than at this time last year. And it is reasonable to conclude that there will be less demand for Canadian wool. However, our coarse long wools are likely to be in demand for the manufacture of lustre goods, and lustre goods have a strong hold at present upon the American market.

The market does not open with very bright prospects for the ranchmen of the North-West Territories. Territorial wool must now compete with wool grown in Montana, Oregon, and the Dakotas Short stapled heavy wools from these States has sold as low as 7 cents a pound, and in consequence the Canadian product has been a drug upon the market. A Toronto merchant has 175,000 lbs. of Territorial wool, which, in the absence of a remunerative market, must be carried over into the new season. Wool buyers should proceed with extreme caution at the beginning of the season, and never more cautiously than when purchasing wool from the Territories.

DIPLOMACY.

In 1871, when the Government of M. Thiers was at Versailles, and before the National Assembly had decided whether the new Constitution was to be monarchical or republican, the late Comte de Paris visited the palace at Versailles.

As he was about to enter the door, M. Jules Simon met and recognized him. Bowing politely, M. Simon said:

"If we are a republic, you are in my house and I shall be delighted to do the honors. If, we are a monarchy, I am in yours."

The Count laughed, took his arm and replied "Let us go in together"

—At the International Convention of the Y.M.C.A. in Springfield, Mass., on Wednesday, Mr. J. E. Irvine, of St. John, was elected one of the vice-presidents. The biennial report shows there are 1,431 associations in existence, with a membership of 244,000, compared with 1,439 in 1893, with 2450,89 members. The falling off is due to the hard times. The associations own $16,000,000 in buildings; in 1893 they owned but $12,591,000.

Business Chance.

We are retiring from business and offer our Factory Buildings and Machinery for sale. This is an unusually good opportunity to acquire a well established business thoroughly organized in every department. J. H. BOTTERELL & Co., Quebec, Que., Boot and Shoe Manufacturers.

THE SITUATION.

Leave has been given by the Judicial Committee of the Privy Council to Ontario to appeal against the decision of the Supreme Court of Canada, in the matter of prohibition. In all these State cases between the Dominion and a province, it is usual to exhaust every judicial resource open to the parties. On this ground, the application for leave to appeal is intelligible; it had to be made in the line of duty, how remote soever may be the prospect of the appeal being successful. Sir Oliver, it is easy to conceive, felt it his bounden duty to ask the right to appeal, and now that leave has been given, it is not improbable that he will be present at the hearing and argue the case himself. There are really only two points to be considered: Whether the province which has authority to grant licenses has a right to refuse to issue any, and what effect the decision would have on the traffic; whether prohibition could be assured in this incidental way, or whether the attempt would not open the door to unrestricted traffic in the articles of which it was desired to prohibit the sale. Control over commerce is in the Dominion; the right of licensing the sale of liquor is in the provinces. If the right to prohibit exists, it is most reasonable to suppose that it is an incident of the right to control commerce; in other words that it resides in the Dominion. The appeal may or may not give the Dominion Government a breathing spell, before it declares its policy on prohibition. However this may be, the report of the Prohibition Commission is, in accordance with the practice in such cases, an indication of what that policy will be. Ontario has declared for prohibition in case she shall be found to have the necessary legislative power.

Crowner's 'quest law has long been a standing subject for sarcasm in England. But it is at the expense of the juries that the wits amuse themselves. In Ontario we have minimized resort to the coroner's jury, for economic reasons. The Hyams' case shows that this economy is liable to be ill-placed, and that the latitude given to the coroner to decide that an inquest is not necessary is liable to produce results more serious than the scandal of rival coroners quarreling for the possession of the corpse. The coroner decided that no inquest was necessary in the Hyams' case, over which lawyers have, with the aid of the police magistrate first, and a superior court judge and jury afterwards spent something like three weeks. How is a coroner to know, in a given case, that no inquest is necessary? He cannot know without some enquiry, which he must conduct alone. We now know that such enquiry may be very superficial and inadequate; may have no effect except to mislead and create a false impression. There is some danger that murder may in this way pass into oblivion without the necessary enquiry; suspicion, if there be ground for it, might never be developed or scrutinized; if it had begun to dawn, it might be lulled by a hasty conclusion of a coroner, based upon an entirely inadequate personal enquiry. There are people who, from the first enactment of the law, have had misgivings as to its efficiency. Its defects, and the possible mischief it may work, are now patent to all.

One result of the change of policy by which the sealing of arms by sealers in Behring Sea will no longer be recognized as necessary by England, will be a conflict of instructions between the cruisers of the two nations; those of the United States having gone out under the impression that the old rule is still in force. A despatch from Washington says that the American Government will still act as if the sealing of arms was necessary. Each nation is thus acting on its own responsibility, as it has presumably a right to do. The arrangement was purely conventional, and not at all obligatory under the Paris award. What is obligatory is, that there shall be no sealing at specified times and places, and anyone transgressing the rule will be liable to the penalties provided. But a contention may arise over the question whether the possession of unsealed arms by a sealer in Behring Sea will constitute a valid cause of capture. If the Americans should contend that it does, and England that it does not, a case for another arbitration may unhappily arise, preceded by captures and national irritation resulting therefrom. We trust, however, that the possible ground of contention will not become real.

From present appearances, the negotiations for the admission of Newfoundland into the Confederation of Canada have definitely failed. The breakdown came in the attempt to arrive at a financial basis of union. Newfoundland wanted Canada to assume a debt of nearly sixteen millions ($15,829,834). By putting in at their face value, $4,078,465, assets which would prove unproductive, and perhaps entail a serious expense in working railways, Newfoundland tried to show a relatively less debt than that of Canada, and demanded an annual subvention of $203,673 to square the account. No business man would value the railway assets at the cost of the roads: the true value is to be deduced from their revenue-producing power, if any, though on political grounds some departure from this sound rule might possibly have been allowable. Canada was asked to pay for the folly which has landed Newfoundland in bankruptcy. If these assets were good for the amount, why could not Newfoundland keep them and the railroad property which they represent? The reason is plain: the revenue from the main road across the Island when completed, would not pay the interest on the bonds. If the Island could not afford to keep the road and its revenue, neither could Canada accept, at a fictitious figure, assets which would have no assured revenue-earning power, though it can scarcely be said that no ground for compromise exists. We can understand that Newfoundland could not join Canada and undertake to finish the railway. The contractors have agreed to take the bonds of the Island Government; but it does not follow that they would be bound to do so after confederation. If Sir Charles Tupper once, as Mr. Bond points out, agreed that Canada should give $8,000,000 to the railroad across the Island,

$484,000 more than it is now ascertained that it will cost, Canada is, happily, no longer bound by the improvident proposal. It is easy to understand how the Newfoundlanders figured on the basis of an old offer which they had had the folly to reject, and Canada the good fortune to escape the consequences of. It is quite natural, perhaps, that each party to the negotiation should be unable to fall in with the views of the other. Newfoundland is now to try the effect of retrenchment and to go on alone; but it is not certain that she will not be obliged to retrograde to the position of a crown colony. Mr. Bond came to Canada to try to raise a loan of $2,000,000, and when the inevitable failure came, he went to Boston and New York to try his fortune there.

American whalers push their way through Hudson's Bay to the north of the mainland of Canada, and to that arctic region they carry arms and intoxicants to the Indians, in violation of our revenue and other laws. They visit the rich whaling grounds near the estuary of the Mackenzie and Bathurst Rivers in the capture of the whale. They use the deadly bomb lance and the swivel gun. War upon the walrus is made by these visitors at the same time. If these animals are to be preserved from destruction, some regulations for the purpose ought to be provided. Beyond the limits allowed to the shore line, Canada has no right of control; but there ought to be some agreement, as in the case of seals. Governor Schultz, who brings the matter officially before the attention of our Government, thinks that some effort should be made to limit the catch of whales. These animals are easily driven from their accustomed grounds, and, if much troubled, they take refuge among ice, where man cannot follow. If an agreement could be come to not to use the bomb lance or the swivel gun, a distinct gain would be made. The means of enforcing any agreement, if made, would present a difficulty, and the cost of the operation might overbalance the profit of the trade. Time was when whale oil was of much greater value than at present, and when it was indispensable for many purposes for which it is not now needed. On this account, the whale fishery can never again have the importance that attached to it in the seventeenth century, when it was largely in the hands of the Dutch.

THE UNITED STATES INCOME TAX DECISION.

The second decision of the Supreme Court of the United States on the income tax, in which its previous judgment is confirmed, as to the points then decided, goes to the extent of setting aside the whole law. The tax on real estate or the rents or income thereof was at first declared to be a direct tax, and as it was not proportioned to the representation in Congress, of the different States, it is unconstitutional. In the second judgment, taxes on personal property or on income of personal property are declared to be direct taxes. When these deductions are made, there remain only a tax on occupations and labor; and the court is of opinion that so one-sided a tax was never intended to be levied. Congress could tax productive real estate, not unproductive, the court points out, as well as personal property, or the income arising therefrom, if it made the burden proportionate to the representation. But this would be the worst and most inequitable way of levying an income tax, for the richest sections of the country would pay no more than the poorest. Still, from a national point of view, it is important to know that the State is not absolutely debarred the resource of an income tax in time of extremity. In Canada, the taxing powers are similarly distributed. Here the right of direct taxation rests with the Provinces; there, with the several States. But it does not follow that what constitutes direct taxes in the Republic would necessarily be the same here; they go upon what was understood at the time of the adoption of the constitution; we, who cannot go back to any such source, have only the authority of the economists for our guidance.

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of April, which bears date Ottawa, 17th May. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES	April, 1895.	March, 1895.
Capital authorized	$ 73,458,685	$ 73,458,685
Capital paid up	61,699,493	61,688,839
Reserve Funds	27,328,174	27,350,674
Notes in circulation	29,152,152	29,414,796
Dominion and Provincial Government deposits	8,416,046	9,543,430
Public deposits on demand	65,578,633	63,452,044
Public deposits after notice	114,457,027	114,417,688
Bank loans or deposits from other banks secured	105,153	80,153
Bank loans or deposits from other banks unsecured	2,415,699	2,791,222

From all quarters there come signs of improvement and evidences of a hopeful feeling of better times. The London *Economist* discusses the question from an English point of view, and comes to this conclusion for a variety of reasons. The signs of improvement in the United States are marked and general. It is impossible that there should be a revival of business in England and the United States without the wave of improvement breaking upon Canada also. And certainly Canada needs it. Our columns have referred only too often to the times of depression through which we were passing, and to the fact that profits of business had diminished in many cases to a vanishing point, and in others to a lower point still, viz., to a point at which

the result of a large year's business had been loss instead of profit. So all are looking out for a change.

With improvement in England there must come a better market for our large export of timber and deals, and all the great interests dependent thereon. And with improvement in the United States must come a better demand for our lumber, and more confidence in sending it across the line.

Our banking discounts are already reflecting this revival in the increased amount which the banks are carrying in that shape, for there can be little doubt that as banking is carried on in Canada at present, by far the greater part of the increase represents increased activity in mercantile and manufacturing operations of a *bona fide* character.

It is fortunate for us at present, and has been so for many years, that not only the restraints of sound banking traditions, but the restraints of law itself, have prevented our banks from locking up their funds in advances resting on real estate, or fixed property of any kind. There can be no doubt of the wholesomeness of these restraints; for nothing can be more clear as the result of experience, than the fact that banking advances, when diverted from their proper channel of mercantile operations, result in inflated values of fixed property, which inflated values have a tendency invariably to grow by what they feed upon, until that most disastrous calamity supervenes, a general "boom," as the phrase is, with its consequent reaction and ruin.

Banking has suffered along with business, in reduced profits. Our greatest banking institution has managed to earn the steady dividend of ten per cent., which it is the policy of its board of directors to pay. But it has barely earned this amount; indeed the bank is to be congratulated on the fact that the dividend has been maintained without the necessity of drawing upon the large fund of profits accumulated over and above its Rest.

Similarly, the Dominion Bank only barely earned the twelve per cent. dividend which its board of directors have concluded to be their policy to pay.

It is somewhat doubtful whether it is wise, under all the circumstances, for a bank, considering the uncertainties of business in this country, to commit itself to a policy of high dividends frequently paid. Events are apt to develop themselves of a very unsuspected kind, and even such as to interfere with the hopes and prospects entertained for the future. This bank has had a sad experience of the truth of this during the last half year, and in a manner which has called forth universal expressions of regret and sympathy. That sympathy has also been accompanied by a hope—which is equally universal—that the new general manager may, in his administration, prove a worthy successor to the gentleman whose loss the banking community has deplored.

It is to be regretted that so far the negotiations for a union between Canada and Newfoundland have not been brought to a satisfactory termination. There can be no doubt that such a union would be beneficial on both sides, but especially to the ancient colony itself. Had Newfoundland cast in its lot with Canada at the time of Confederation, there can be no doubt it would have obtained a far higher degree of development than has fallen to its lot, and that the terrible revulsion which has overtaken it of late would never have taken place. The colony would have come under the influence of a wise and well administered system of banking, finance, railways, post-office and other matters of the greatest import to its permanent advantage.

The Imperial interests involved are of the first magnitude. Great Britain with its interests on the North Atlantic, would never allow an island situated as Newfoundland is to pass into the possession of another power. Her empire of the seas, as she knows very well, is vital, and could by no means be compromised. Half the value of Halifax as a great naval station, and also of Bermuda, would disappear, if another power could make a great naval station of the harbor of St. John's. All this no doubt is duly appreciated, and it is to be hoped that negotiations will be resumed, and that by mutual concessions a satisfactory conclusion may be arrived at. Meantime it is fortunate that at the very outset the banks which represent Canada on the island have demonstrated their strength. They went to the assistance of the colony in a time of sorest need, and it is a pitiful business that virulent party spite—if it was party spite—should vent itself on benefactors. For the credit of the mercantile community of St. John's, it is to be said that they had no part in the senseless run that took place.

ANCIENT ORDER UNITED WORKMEN.

The seventeenth annual session of the Ontario Grand Lodge of this insurance fraternity was held in Toronto in February last, and its proceedings are worthy of a passing reference. The Order seems to be in a general state of eruption, as to some matters once deemed constitutionally settled, if we may judge by the expressions of views held on various points by its prominent members. The ancient special features or landmarks of the society, such as "uniform assessments," and "reserve in the pockets of the members," and "$2,000 to the widow," and "international brotherhood through the Supreme Lodge," are in immediate danger of being discarded, in this province at least. A reso-

lution offered at the meeting was almost unanimously adopted, insisting upon having the right granted to Ontario, at the next session of the Supreme Lodge, of issuing $1,000 certificates, and of being relieved from the onerous action of the present Relief Call business, and also of adopting a graded assessment, and establishing a reserve. It is true the form of the demand is that of a memorial, or petition, but it is the expressed understanding that if home rule in these matte s, or at least some of them, be not granted to Ontario, there will either be secession from the control of the parent body entirely, or at the least independent action by Ontario on some of the above subjects.

It is the intention of the brethren in this province to proceed to offer $1,000, as well as $2,000 certificates, immediately after the parent body has adjourned, whether it approves or disapproves of their petition for Supreme Lodge sanction thereof. And the Grand Lodge decided to proceed at once with the formation of a reserve fund. On the 1st day of June, in each year, every member of the Order in this province is to be assessed $1 until he shall have paid in $10, and this special annual assessment, with interest, is to be accumulated until $500,000 of a reserve fund shall be thus provided. How very crude the scheme is may be seen from this clause in it, viz.:

> The said Reserve Fund, so created, shall not be drawn on for the payment of death claims, until the death rate of this Grand Lodge jurisdiction shall reach EIGHT per 1,000 in any one year.

What will happen if the death-rate should hereafter stand permanently above $8 per $1,000, as it is pretty sure to do within a very few years at most? It would only need to be $8.50 per $1,000 each year, to consume the $1 a year per member which it is proposed to collect towards the $500,000. This shows what lack of wisdom these Ancient Workmen bring to bear in providing for their rapidly ageing membership. A gentleman of Peterboro', Brother Dumble, said:—"The A.O.U.W. in the United States is not on a sound basis. Our executive is not composed of scientific men who spend their time making insurance tables, and calculating as to the hour of death of a thousand men in it. Who has passed on our figures? No man has done it. To be safe, members must pay more, and we must have a reserve. I do not want to join any society that will not last the life-time of any man that joined it. We have been changing our laws all these years. Are we on a sound basis now? It is my opinion we were not now paying our way." Then Mr. Leubsdorf, of St. Catharines, followed with a remarkable speech in favor of laying up something for a rainy day. He was afraid the money would stay in the members' pockets when wanted, if the calls were to become heavy—as in the case of the Canadian Relief Society, and the Canadian Mutual Aid, of Toronto, and the Provincial Provident Association, and London Masonic Benefit, for instance. He was prepared to say that the A.O.U.W. will most likely pay 18 calls in 1895, and 20 in 1896. And he continued, "We have not grown sufficiently to keep down our assessment rate." And so went on the discussion, resulting, as we have stated, in the resolution to abandon the ancient "pocket reserve" idea and accumulate $500,000. But it is evident that to accomplish this, nothing must be drawn out of it to settle a death rate exceeding eight per 1,000, or else $5 annually instead of $1 will have to be collected for the purpose. The eighteen or twenty calls mentioned by Mr. Leubsdorf mean of themselves nine or ten deaths per 1,000 members.

The increase of members in Ontario the past year or two has been very small in proportion to the whole membership—a net increase for the year of only 1,161 members. The number in good standing Dec. 31st last, was 25,516 These collectively, if they should all survive, would be 25,516 years older a year hence than they are now, and 1,161 members will only represent 1,161 years, if they were each one year younger than the usual average of 35 years, at which most people join insurance companies. The effect of this must be a rapid increase in the death losses arising from old age, in the near future; and it is a question if the idea of forming a reserve fund has not arrived too late to be of any use in saving the Order from ruin. There will be a great transformation, and it will hardly know itself as the same A.O.U.W., if it succeeds in making all the innovations resolved upon at the recent session. If it not only issues $1,000 certificates, as well as the standard $2,000, but does this on an assessment graded according to age, and forms a $500,000 reserve fund, and separates from the parent body in order to escape the oft-recurring relief calls, it had better then change its name to the Modern Order of Sensible Workmen, and unite all the provincial grand lodges in a Canadian Supreme Modern jurisdiction.

THE LOCAL IMPROVEMENT SYSTEM.

THIRD ARTICLE.

Several years ago, the writer remonstrated with a leading member of the Board of Works Committee concerning some reckless local improvements that were then going through. The alderman replied:—"It is none of our business whether the improvements are judicious or not. All we look into—and we look into it very carefully—is the value of the property. If we are quite sure it is worth the amount of the proposed assessment, we let the thing go on. If a lot of fools want to tax themselves for block pavements, we are very glad to see them do it. It finds employment and keeps things lively," etc., etc. It would be interesting to have that same alderman's opinion now, as to whether it was an act of wisdom on the part of the City Council to load the community up with debt incurred for unnecessary and premature works.

Let us take now a few concrete instances in which vaulting ambition has o'erleapt itself.

Against Pape avenue from Queen to Danforth there are the following assessments for local improvements:—

Pape Avenue,	street widening	$22,096
"	cedar roadway	24,855
"	sewer, Queen to G.T.R.	5,334
"	" G.T.R. to Danforth	11,893
"	sidewalks, not less than	4,000
		$68,178

The assessments for sidewalks are not obtainable separately. The "city's share," amounting to about one-quarter to one-third of the above sums, is not included therein. In this case $88,000 is assessed against a mile and a quarter of street, 13,200 feet frontage—$6.66 per foot front. To pay this off with interest at four per cent. in ten years would require a tax of about 80 cents a foot per annum. Now 80 cents a foot per annum does not seem a very high price to pay for a block-paved roadway, sewer, and sidewalks, when it is assessed against a single lot of 25 feet with a house upon it. It amounts in that case to $20 a year. Supposing the house and lot are assessed at $2,000 and the general taxes amount to $36, the local improvements add 55 per cent. to the taxation. Stated in another way, the local improvements take two dollars a month from the rent. Where good rents can be obtained, say $18 a month for a $2,000 investment, this is not an impossible tax. But such a tax on vacant land is a crusher. A couple of hundred feet of land with local improvement taxes of $160 a year against it would be an impossible load for a small investor. Under the local improvement system

it is no longer possible for the thrifty citizen of small income and rural tastes to go out into the suburbs and cultivate his garden while settlement comes around him and makes him rich. The local improvement taxes for roadway, sewer and sidewalk against an acre of land 290 x 150 feet would amount to $232 a year, which, with the general taxes, would pay the rent f a good house in the heart of the city and pay for all the vegetables a family could eat as well.

And let nobody run away with the notion that these local improvement taxes will run out. In this Pape avenue case, the only assessment that will disappear is that for the street opening, which will run out in Nov., 1897. The other assessments are for works of a temporary character, wooden sidewalk, wooden pavement, and tile sewer, which will hardly endure as long as the assessment has to run. As soon as these works are worn out, one of two things must follow: The land must relapse into pasture, or new roadways, sewers, and sidewalks must be built and new assessments made. Consequently we must look to see a permanent charge of at least sixty cents per foot per annum running against all streets equipped with these improvements. Now having to pay sixty cents per annum per foot for local improvements amounts to just the same in money as having to pay six per cent. per annum on a mortgage of $10 per foot. It is therefore correct to describe all land abutting on block-paved and sewered streets as under mortgage to the city for $10 per foot. That amounts to about $2,900 per acre if the lots are 150 feet deep; to $4,356 per acre if the lots are 100 feet deep. It will be remembered that a short time ago, on hearing appeals against the Pape avenue assessments, Judge MacDougall reduced the assessments to $600 and $700 an acre.

From the new City Directory, it appears that there are on Pape avenue between Queen and Danforth, on a frontage of 2½ miles, 94 houses, of which 13 are vacant This is a vastly better showing than is made by some other streets that have been furnished with these costly improvements and have not a single house upon them.

At the recent tax sale more than twenty lots fronting on this street were offered. In some cases the unpaid taxes charged against them amounted to more than $6 a foot. There was no one willing to take them at the price, and the lots had to stand over till the adjourned sale held on the 10th March, when many of the lots were knocked down at less than one-half the taxes due.

THE TORONTO RAILWAY DIVIDEND.

During the first three years of its existence the Toronto Railway Co. paid no dividend; for the first half of the fourth year, which will end with the month of June, it has declared a dividend of 1¾ per cent. A little over one month of this period has to be covered by an estimate, but if the figures are only put at those of the corresponding period of last year, no over-estimate need be feared.

On a previous occasion we asked the question whether the mileage annually paid by the company to the city had been deducted from the net income, without venturing any positive statement on the point. Our surmise, then mildly suggested, was correct. This amount had not been deducted, but made its appearance under the head of "pavements, $202,424.18." In our view of the matter, the mileage is an annual payment for the franchise, which extends over thirty years, and which is in gradual process of exhaustion, leaving nothing behind it at the end of the year, in respect of the time elapsed, except what may have been saved out of earnings. The company does not accept this view. But, after making allowance for the necessary deduction for mileage, we are assured that the earnings of the current half year are sufficient to warrant the dividend declared.

There is, however, one omission which, so far as we can see, prevents this conclusion being incontestable. No sinking fund has been provided for the redemption of the surplus stock, which there will be nothing to represent after the bonds have been paid. Whatever the road, when taken over by the city, at the end of the thirty years, will bring over the amount of the bonds, will be available for distribution among the stockholders. That amount is likely to be very far short of the six millions of the capital, and there ought to be a sinking fund provided to meet the deficiency. Otherwise the difference will be a total loss to those who may be stockholders when the franchise expires.

CANADIAN COLORED COTTON COMPANY

The annual meeting of the Canadian Colored Cotton Mills Company was held at the offices of the company, Notre Dame street, Montreal, on Thursday last, May 16th, in the afternoon. Among those present were Messrs. Robert L. Gault, D. Morrice, T. King, of Boston; C. D. Owen, of Providence, R.I.; J. H. R. Molson, James Crathern, S. H. Ewing, Captain Shepherd, D. Morrice, jr., A. B Crombie, J. Wilson, Mayor Villeneuve, ex-Mayor Grenier, Hon. A. W. Ogilvie, Wm. Morrice, Ernest Gault and others. The report was read and appeared to be regarded by the meeting as on the whole satisfactory. The fact was admitted that owing to sharp competition in the United States the business of the company had fallen off considerably, but the directors expected that the incoming year would show more satisfactory results than last year in the direction of increased sales. There is now a sufficient stock of raw cottons in the company's hands at low prices to keep the mills going until the first of November. A large sum of money has been expended during the year to secure improved machinery, which is one of the necessities of the business, and the directors believe the properties to be in a better shape now to produce goods cheaper than ever they were before. The board of directors chosen were A. F. Gault, president, C. D. Owen, of Providence, vice-president, T. King, of Boston, D. Morrice and R. L. Gault

MANITOBA FARMING.

Some letters have been placed in our hands which, while they describe some of the hardships of prairie life, also throw light upon the features which distinguish the wide-awake, thrifty farmer from the one who pursues routine and keeps his nose so close to the furrow that he cannot see beyond the passing day. At the first sentence or two the reader of the first letter is apt to say, "Good gracious! 38 to 39 cents for wheat; and only 16 to 20 for oats," and to sigh for the sad fate of the Manitoba farmer. But the next sentence shows us that this group of farmers—a co-operative group of brothers, it would seem—by waiting a little, got 50 to 51 cents for their wheat. Further, they say, cattle generally thereabout sold early at 1½ cents the pound and sheep at 2¾ cents, but "we have never sold our stock at these prices. We got 2¾ to 4½ cents for cattle and 5½ cents for sheep" The second, about stock feeding, and so on, makes it clear that the writer knows a thing or two about farm economy. Besides, the letters are throughout indicative of the spirit that pervades the hardy and indomitable settler, the man who is bound to get on We copy two of the letters —

STAR MOUND, MAN., Jan. 7th, 1895.

DEAR SIR, - I have taken the liberty to write to you after so many years, thinking I would like to hear from you, hoping it finds you all well, as it leaves me at present. Things are very flat here; crops were light in general. The bulk of the wheat was marketed early at 38 to 39 cents per bushel, some as low as thirty, and oats from 16 to 20; there was not enough barley to establish a price. Cattle sold at 1½c. and sheep at 2¾c. We have never sold our stock at these prices. We get ours fat for spring Last spring we sold 28 sheep at 5½ cents per pound, which made us $10 60 each they were nearly all tallow We fed 16 cattle, and sold them to Gordon & Transides, exporters, 14 for 4½ cents and 2 for 2¾ cents the fourteen went on 23rd of April, for them we get $800 24; the other two made little over $100. This winter we have 18 feeding, but I don't think prices will be so good this year.

As regards the crops, we cannot complain much. Our wheat and barley were good, but the oats was light, but they turned out better than we expected. 2,700 bushels, about 8,000 grain all told We held our wheat for better price, and it happens to come we have got 50 cents for the most of it now I am getting 51c I drive two teams myself I have missed only two days in three weeks, and one day it was down to 40 below zero It was not safe for me to turn my nose to the wind 57½ is the coldest I have known it We have 15 miles to draw our grain to

Pilot Mound. We have 70 cattle, 121 sheep, 18 horses and colts; horses has got to be very cheap; can't hardly sell one; we sold two in summer for $120.

From yours truly,

FRED. SHILSON,
Snowflake P.O., Manitoba

STAR MOUND, MAN., Feb. 15, 1895.

DEAR SIR,—I was very pleased to hear from you; I excuse you of any question you might ask about my wife being about, as I haven't any. I am not sure where I could get one without learning to dance and spend about half my time with a nice horse and rig, with a good display of watch chain. Last winter we fed our cattle all wheat; this winter we are feeding all barley, except about 150 bushels of wheat. We think wheat far the best, but we feed what we think cheapest. We grind it for the cattle, not for sheep; we feed them all they will eat of it four times a day and turnips once, hay three times, water once. Some of them will eat a gallon and half at one feed, some more, some less; we keep the stable clean with a bit of clean straw twice a day, and I tell you, sir, we can make fat beef that way.

We have some fine beef now. We expect to keep them till some time in April. Our taxes for 1894 was $39.25, that is on 800 acres of land. I have 320, father has 160, brother 160, and we bought 160 that we three work together. We live on my place. We had about 280 acre of crop last year and summer fallowed about 70. I have three brothers three miles west of us, and we have a twelve horse-power threshing machine betwixt us; we only thresh our own with it. We threshed 15,900 bushels in eighteen and half days; all it cost us for hired help was $91.50. We could not get a "steamer" to do it for less than 3 cents a bushel.

I was surprised to hear that Mr. Brown's two boys as turned out the way they have. I am pleased to say that I have only invested fifty cents in drink since I left Toronto, 16 years next April. We have not kept hogs for years any more than for our own use; we never sell a calf or lamb unless there is something wrong with it. I alter all the lambs, calves and colts. We keep our wethers until coming two years old. We have few nice ones feeding now. I spoke of things being flat here in my letter to you; I did not mean to say that we are likely to starve this winter, although our potato crop is not so good this year. We have over 100 bushels in the cellar now, and I was at mill and got thirty bushels of wheat ground for flour, and I bought a ton of flour since, as we found it cheaper than grinding. I paid $1.45 for 100 lbs. from the Ogilvie Milling Company. We are counting it to do till fall. Then I killed a nice 450 lb. heifer first January, so I think we have enough to put us over winter. Things are very much cheaper than they were when I first came here. The first binder we bought, not being able to pay cash, cost $340; that was in 1882, but we have been able to pay cash for all we have bought since 1883. In 1891 we bought our last binder for $140; the first binding twine we got we paid 28 cents per lb. for; last year we paid for Massey-Harris best twine 8¾c. cash; it was 11 on time, with interest at 8 per cent. I received your second letter yesterday, but I do not fully understand what you wish for me to write, nor how to go at it. I would like to hear from you again. Please excuse my many mistakes and bad writing.

Yours truly,

FRED. SHILSON,
Snowflake P.O., Man.

CONFLAGRATIONS.

"The Fire Fiend's Sunday" is the heading of a daily paper column on Monday last, describing the great fire at St. Albans, Vermont, and the second fire at the Halifax railway wharf on May 19th. By the explosion of a lamp at which a woman was heating her curling-iron, five hundred people were rendered homeless at St. Albans on that day. The fire destroyed forty business houses and nearly a hundred tenements. A high wind was blowing, which carried firebrands about the town half a mile, and owing to the fierceness of the flames, fanned by the wind, the firemen could do little. In fact it was a conflagration such as beset the Esplanade in Toronto ten years ago, and which is liable to happen any place when the conditions exist. At Halifax, the property destroyed was the long wharf and freight sheds at Richmond, cars of coal, and, more shocking than these, cars filled with live cattle, sixty of which were burned to death. Business men in towns cannot be too often reminded of the duty of providing fire appliances, and as such reminder we quote from THE MONETARY TIMES of 18th July, 1884:

"Respecting the sweeping fire at Port Perry on Thursday, 3rd July, 1884, a circular asking for assistance was issued by N. F. Peterson, Q.C., on behalf of the citizens. Describing the fire, it proceeded: 'When day dawned 62 business places and 15 residences, with all their contents, were in ashes. One hundred persons were direct losers by the fire and 300 more were thrown out of employment. But one small grocery store is left in the place. A careful estimate puts the loss at $345,000, on which the insurance is $152,000. Many of the citizens have lost the earnings of a lifetime. The assessed value of the village is $360,000, so that property exceeding in value the whole assessment has been swept away by this fire and the one in November previous.' The buildings in Port Perry were mostly of wood, and as there were no fire extinguishing appliances in the village, the fire had to burn itself out."

The Canadian fire record of the *Insurance Chronicle* of Montreal shows how fiery 1895 has been thus far compared with four months of 1894. In April it reports forty odd fires with a loss of $823,800. For the four months the following is the record:

SUMMARY FOR FOUR MONTHS.

	1894.		1895.	
	Total Loss.	Insurance Loss.	Total Loss.	Insurance Loss.
For January	$469,560	$323,520	$1,970,760	$1,438,280
" February.....	718,560	331,620	1,543,320	400,920
" March	422,400	289,500	1,073,760	880,560
" April	895,680	564,720	823,800	246,960
	$2,506,200	$1,509,360	$5,411,640	$2,966,720

Evidently fires are likely to continue, and we commend to residents of country villages as a warning the conclusion of the Port Perry item, which says: "As there were no fire extinguishing appliances in the village, *the fire had to burn itself out.*"

TRADE WITH AUSTRALASIA.

(*Special correspondence of* THE MONETARY TIMES.)

The first request invariably made of Canadian travellers who are offering goods in Australia for the first time is, that they shall show samples. Fortunately, nearly all the representatives who have yet come here have brought with them a good line of samples, so that the demand to see "what you make" is at once met. In some cases, sales have been lost because the traveller had nothing further to show than an illustrated catalogue. As most lines of Canadian manufactures are entirely unknown to Australian merchants, it is not surprising that they should ask to see before they can feel enough confidence to give an order.

Mr. H. Cockshutt, of the Cockshutt Plough Co., Brantford, Ont., is expected here in a fortnight. He is on the way out from England. In a letter received from him, he states he has taken some very good orders in Britain. The firm show confidence in their ability to make sales here by forwarding a carload of their goods in advance. Mr. Cockshutt will represent the bicycle, windmill and flannel industries of Brantford.

Reports, no doubt, have long since reached you, acquainting you of the successful results of an experimental shipment of frozen salmon from British Columbia to England by way of the Canadian-Australian steamers, transhipping at Sydney into the English mail steamers. To establish a permanent business in this product, Messrs. Cleve Bros., who are Canadians, but now doing business in England and Ireland, and who made the experimental shipment referred to, have sent an agent to Sydney who will place the salmon on the Australian market, and look after the transhipment of future lots intended for English consumption.

At the agricultural exhibition held here during Easter week this year the Massey-Harris company of Toronto were large exhibitors. Two Peterborough canoes were shown by a local hardware firm and were one of the novelties.

Progress in the movement towards getting a Canadian Pacific cable is slow here, owing to the peculiar condition of political affairs. New Zealand and Queensland are strongly anxious to have this cable connection made. If Canada and Great Britain join, these two colonies may undertake the Australian portion of the responsibility, should the other colonies refuse, but there cannot be much doubt that the two chief colonies, New South Wales and Victoria, will yet come into line.

Mr. A. T. Higginson, of R. C. Jamieson & Co., Montreal, varnish manufacturer, was a passenger to Sydney by the steamer "Miowera," and will remain several months in Australia and visit the principal consumers of paints and varnishes. His firm has sold largely in the West Indies, but Australia is new ground for Canadian-made varnishes.

A large issue of a special winter number of an Ontario journal has been placed on sale in the Sydney news stores. Fortunately the illustrations are not confined to winter scenes, as fair engravings are given of scenery in which snow and ice are not the predominating features.

A general impression seems to prevail among even well-informed shippers that Canadian manufacturers can only reach Australia by one route, and that the rates charged prevent the export from the eastern provinces of goods in which the proportion of bulk to value is large. This is a great mistake. The Vancouver line is indispensable for the finer classes of merchandise, for goods wanted for immediate consumption, and for quick communication, and the rates charged are unprecedentedly low, considering the long land carriage; yet for goods in which cheap freight is a strong consideration there are several routes open. One is by way of steamers from the St. Lawrence to Liverpool or European ports, notably Hamburg, from where the goods can be transhipped to the Australian mail steamers or the cheaper cargo boats. Probably for very bulky goods no route can compete in price with the sailing vessels from New York. Three to four months are consumed in the voyage, but the transportation from New York to Sydney can be made at a less cost than is charged on most goods from Montreal to

Toronto. Sailing vessels leave St. Lawrence ports at irregular intervals with lumber for Melbourne, and steps are being taken to have the sailings made at regular periods, when no doubt advantage would be taken to send general merchandise by this way. If the North German Lloyd line enter into the European trade from the St. Lawrence, as it is reported, they will no doubt give special attention to this traffic, for their vessels will also reach the principal Australian ports, and are carrying freight at lower rates than British boats.

The Sydney commercial papers have been commenting on the way that boots and shoes from the United States are beginning to displace those from Great Britain in this country. The manufacturers of footwear in Eastern Canada should be able to compete in price with the Americans, and with their proximity to the freight route alluded to above should make an effort to open trade here. It should be practicable for two or more factories making different lines of boots to combine and send out an efficient traveller with full lines of samples. That he would do a large business at first is not to be expected, but if the goods are once taken hold of and prices and quality are found satisfactory, it will be easy to obtain connections which will lead to annually increasing sales. In Sydney rain is very frequent, and as rubbers are but little used, boots are, as a rule, heavier than are used in Canada, with thicker soles. As the sidewalks are largely stone, soles are worn out very rapidly, and a traveller would probably find a good deal of attention would be paid to this part of the shoes. From appearances it would seem that the number of tan boots worn is not as large proportionately as in Canada, black being more worn. The general price charged at retail for a good boot, such as used by business or professional men, is one guinea, although prices go up to thirty shillings. Working men's common boots sell at six shillings sixpence upwards. While stout wearing boots are demanded by all classes for both men's and women's wear, this does not imply that no attention is paid to appearances, as neat designs and fine finish are probably as much appreciated here as elsewhere.

Efforts which have been put forth by an enterprising Ontario furniture factory to dispose of its product out here are likely to begin to reap results. It is learned that the designs of these goods have been much admired wherever shown here, and as a "feeler" a sample order goes forward this month from a firm with whom the company was brought in contact by the Canadian Commissioner. Austria ships chairs largely to this market, especially bent wood patterns, and China furnishes the larger share of rattan goods, but there seems to be an opening for many of the other lines which are turned out in Canada.

* * *

Sydney, New South Wales, 18th April, 1895.

DRY GOODS JOTTINGS.

"Our values are sure to be felt," advertised the hatter.

The Waterloo Knitting Co. are adding new machinery to their plant, and will make blankets.

Double satin ribbons are now being made by Messrs Belding, Paul & Co. They are being favorably received by the trade.

There is a by-law in Hamilton prohibiting merchants from exposing goods on the street, and the police are instructed to enforce it.

Some necessary repairs are being made to the St. John cotton mill while the establishment is closed down through a strike of the employees.

The Sarnia woolen mills, which have been closed down since the failure of Smith Bros., are again in operation under the management of Mr. John Newton, Georgetown.

The hat works of Craig & Mahoney, at Truro, N.S., were closed down one day last week, but a rush of orders compelled them to begin operations again within a few days.

The carding mill on the St. Lawrence near Caughnawaga, and that near Iberville, Que., are being advertised for sale by R. C. Montgomerie, St. John's, Que.

For some time it has been generally known that a Brussels carpet factory was to be established in Canada. The site of the factory has been a matter of doubt until Mr. Talbot, the projector, finally selected Elora, Ont. The factory starts with 13 looms.

The proportion of journeymen and apprentices to be employed in a shop has, since the beginning of modern commerce, been a source of labor troubles. Adam Smith deals with the subject at length in his "Wealth of Nations" and seeks a solution. Since the time of this distinguished economist many other writers have sought to solve the problem, but without avail. There is to-day as much misunderstanding in regard to the subject as ever. The Brantford Tailors' Union have enacted a rule that there shall be only one apprentice employed to every journeyman in the same shop. Recently an employer broke this rule and was fined, the penalty being $25, in default of paying which his union employés went out on a strike. It will be interesting to see who is running the shop, the proprietor or the union.

FOR GROCERS AND PROVISION DEALERS.

Towns up the Ottawa River welcome the opening of navigation.

Hamilton fruit vendors are obliged to wear badges as guarantee of license.

Produce merchants in the Ottawa valley are shipping turkeys to England.

The Montreal Grocers' Clerks Union recently gave a very successful concert.

Messrs. Waugh & Steeves have opened a new grocery store in Summerside, P.E.I.

There is a reported reduction of 14 per cent. in the sowing of beet roots in Europe this year

Chatham, N.B., retail grocers are attempting to come to an agreement whereby sugar will be sold at a living profit

An elevator, with a capacity of 100,000 bushels, is to be erected this summer in Winnipeg by the Northern Elevator Co.

British Columbia fruit prospects are of the brightest description Plums, cherries and peaches, the latter especially, will from present appearances be in abundant supply.

The steamer "Harrow," which came across Lake Erie from Cleveland, Ohio, the other day, to Rondeau, Ont., took back about 1,000 bushels beans, which are largely produced in Kent county.

Brantford has for several years possessed a co-operative society, which manages a grocery store. Recently at the annual meeting a dividend of 4 per cent. was declared, while the directors stated that they had earned 8 per cent. on the capital invested.

There is not much enlargement in the marketing of hogs. Western packers have handled 255,000 for the week, compared with 240,000 the preceding week, and 215,000 last year. From March 1st, the total is 2,685,000, against 2,600,000 a year ago. Quality generally satisfactory. Prices were well sustained for some days, but became weaker.—*Cincinnati Price Current, May 16.*

Hon. Dr. Montague, replying to a question as to the Government's butter policy, said in the House recently that 915 packages were shipped from Montreal to Great Britain for sale on Government account during the present year. Particulars of two small shipments from Prince Edward Island had not yet been received. It was, he said, the intention of the Government to give encouragement to the butter trade with the mother land by supplying cold storage.

Mail advices from a leading tea house in Calcutta to 17th of last month state: "Manufacture has now become general and samples are coming down more freely. Quality is about up to the standard of early pluckings. There has been good rain in Assam and Cachar, accompanied by some hail, which has damaged a few gardens. In the Dooars, Terai, and Darjeeling, rain is still much wanted. The opening sale will probably take place about the same time as last year."—*N. Y. Journal and Bulletin of Commerce.*

—We learn that the distinguished body, L'Institut des Actuaires Francais, has conferred the title of corresponding member upon two Canadian actuaries, who may well take pride in the distinction. These gentlemen are Messrs. T. B. Macaulay, F.S.S., secretary and actuary of the Sun Life Assurance Co., and Mr. William McCabe, F.I.A. Other gentlemen similarly honored are not numerous, but among them are Mr. Augustus Hendriks, of London, a former president of the British Institute of Actuaries, and George King, of the same city; Mr. Rufus W. Weeks, actuary of the New York Life; Mr. I. C. Pierson, secretary of the Actuarial Society of New York, and Mr. D Parks Fackler, of that city; Mr. Howell W. St. John, of Hartford.

—The council of the Montreal Board of Trade has received a number of protests against the plan of making tariff changes apply to goods entered on the morning of the day in which the Budget is brought down. The council is unanimous in agreeing with the protests against the duties being retroactive, and strong representation to that effect will be made to the Minister of Finance.

—Our letter from Halifax, which arrived too late for its quotations of Maritime stocks to appear in to-day's Stock and Bond report, gives the following prices of shares as at 20th inst. Bank of Nova Scotia, 189 to 192. Merchants of Halifax, 157 to 161. Union of Halifax, 124. Halifax Banking Co., 138 to 141; Bank of Yarmouth, 120 to 122; Commercial of Windsor, 106 to 110.

—Having to go to press this week on Thursday, in order that our staff may enjoy the Queen's Birthday holiday, we are without our usual Clearing House Returns.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 30th April, 1895.

J. M. COURTNEY, *Deputy Minister of Finance.*

THE COTTON GOODS MARKET.

We have previously noted the strength of the cotton goods market, and during the week there has been no abatement in the ideas of manufacturers To have an advance of 7½ per cent in domestic sheetings followed by a rise of 5 per cent in the price of the coarser grades of grey cottons, can surely be deemed satisfactory. The effect of an advance in so staple an article as cotton goods, cannot be confined within the limits of a single department of the trade. It must extend and beneficially affect other dry goods lines.

While the recently issued annual report of the Canadian Colored Cotton Co is not wholly satisfactory, it is encouraging in that the latter half of the year was so much better than the first six months The report shows a loss of $55,000 on the business of the first six months, and a gain of $181,000 on the trading of the latter half of the year, or a net profit of $126,000 during the year. There should be, from present indications, a fair prospect of a renewal of the payment of quarterly dividends by this company soon

The raw cotton markets of the United States have been for several weeks under the control of the bulls, and prices have been carried up to 7⅞c. Planters have found conditions this spring very favorable, although there have been some reports of damage to crops. It is, however, not at all likely that we will have a repetition of last year's mammoth yield, of almost 10,000,000 bales. The world's visible supply of cotton on May 8th was 4,079,626 bales, of which 3,720,000 bales were American, as against 3,743,876 bales, of which 3,125,676 bales were American a year ago. In 1892 the world's supply of American, at the same period was 3,452,711 bales. It does not appear from these figures that the statistical situation would warrant a bullish movement. We must look for improvement in cotton goods, not to the raw markets, but rather to improved industrial conditions in general, and a resuming of normal consumption so long curtailed

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for five days commencing Friday last. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. Total for the five days was 3,627 shares.

Imperial Bank, 63 at 180, 180½; Bank of Hamilton, 10 at 157½; British America Assurance, 100 at 117⅜, 118; Western Assurance, 793 at 160½, 160⅝; Consumers' Gas, 528 at 200; Dominion Telegraph, 20 at 120; C.P.R. stock, 100 at 52, 54½; Incandescent Electric Light, 10 at 111; Commercial Cable, 1270 at 150, 155; Bell Telephone, 75 at 156; Montreal Passenger Railway, 79 at 196; Toronto Railway, 450 at 74½, 78½; Canada Landed and Nat. Investment Loan Co., 8 at 112½; Canada Permanent, 2 at 168; Freehold Loan, 10 at 135; Imperial Loan and Investment, 70 at 115; London and Canadian Loan and Agency Co., 61 at 119; Union Loan, 28 at 130

CIVIC AFFAIRS IN MONTREAL

When the financial affairs of the city of Montreal are in a condition requiring the calmest and wisest treatment by her representatives in the council, a chaos of quarrel and recrimination seems to exist at the meetings of that body. Even the French newspapers are now disgusted with the proceedings of some of the aldermen of that nationality. With reference to the disgraceful scenes in the City Hall on Tuesday evening during the council meeting, *La Patrie* says (we give the translation appearing in the *Witness*) "If there was still something that could disgrace the city council of Montreal, last evening's meeting would crown the disgust which it inspires among the whole sound population. Never did such a disgusting scene soil a public hall. Public business and the citizens' interests are no longer considered the aldermen's purse is at stake. The council is now divided into factions of equal number: thirteen against thirteen each faction has its leader and toll keeper, and the fight consists in ascertaining which of the two factions shall have the greatest lump All these people abuse and insult

one another, call each other liars and robbers to earn their money. The Davis-Laforest matter which yesterday turned the council into a low-class menagerie, is a sample of what takes place. Here is a question that interests nobody; it is simply a quarrel among officials that should be settled in the office, and the whole council is put into motion. The reason is very simple; the aldermen are for or against Davis, because they have reasons to be for or against him. Hence the intensity of the fight. But what is comical is to see the silly people, who are not paid, and who become excited over that immense speculation. These are the elements upon which we rely to reform the council!

"Is this not enough to cause despair? On what can we rely when we come to think that the men who will have to decide on the gas contract, in which millions are involved, are the same as those who fight so easily over the retention or dismissal of an official."

MINING INVESTMENTS.

The absolute indifference of Canadians generally, and eastern Canadians in particular, to the mining developments of their own great country, is enough to make a citizen of West Kootenay tired and weary. If the capital in Montreal, Toronto, Ottawa and other eastern cities that is used annually for gambling on Wall street, New York, or on the Wheat Exchange, Chicago, Illinois, or on the Mining Exchange, Denver, Colorado, were put into development work throughout the mineral zone in British Columbia, which is as great or greater than any mineral-bearing area in the United States, not only would we see more rapid development of the country, but we would see immense fortunes made by our own countrymen. We would also see some point in the East becoming one of the world's great trading centres for the refined product of Canadian mines. Canada would become a great exporter of the precious metals and Canadian commerce in every branch would feel the stimulus. But no, our precious metals now being mined in bulk, must filter through the markets of the United States into the commerce of the world; bring prosperity t is true, to the loyal Canadians of West Kootenay, but in their ultimate and most far-reaching effects doing no more for Canada than if the 49th parallel lay north instead of south of West Kootenay. Trail Creek is now producing $4,000 a day in solid gold. During 1895 it will export $2,000,000 worth of the precious metal, or 5 per cent. of the whole output of the United States. Who in Canada knows or cares anything about so comparatively uninteresting a fact, and what enterprising Canadian capitalist is reaching out a hand for a share in the golden shower? Trail Creek is now greater than Cariboo in its palmiest days and more permanent, but British Columbian ears are so stuffed with the traditions of Cariboo that the noise of a present day movement disturbs them no more than it would the lotus eaters of Alfred Tennyson.—*Rossland, B.C., Miner.*

—The British Admiralty having decided on utilizing the resources of Chatham Dockyard for the manufacture of the engines and boilers for vessels of war, it has been found necessary to enlarge the engine and boiler shop in the dockyard. This work is to be carried out at a cost of £2,000, while a similar amount is to be expended in enlarging the torpedo stores. The largest engines now under construction in Chatham Dockyard are those for the new second-class cruiser "Minerva," 11, 5,600 tons, 8,000 horse-power, which vessel is being rapidly completed for launching. The engines for the first-class battleships "Victorious" and "Illustrious," under construction in Chatham Dockyard, are being manufactured by private firms, the machinery for each, which is of 10,000 horse-power, being too large for being made in Chatham Dockyard.

Debentures for Sale

The School District of Regina, Protestant Public School District No. 4 of the North-West Territories, offer for sale $13,000 in debentures, payable in twenty equal consecutive annual instalments, bearing interest at the rate of 5% per annum. The assessed value of the District is over one million dollars. There is a prior issue of debentures of $12,000, $3,000 of which has been repaid.

Offers for purchase of said debentures will be received up till the 10th of June, 1895. Address

THE ÆTNA
EXTRA.

Under the above heading the Ætna Life Insurance Company, of Hartford, Conn., has issued a Four-Page, Handsomely-Printed Sheet, which contains the following, among other cases :

Ætna Life and New York Life.

Fifteen-Year Endowment—Age 27—Issued in 1881. Basis of $10,000. Both Policies on same Life.

14 Payments in New York Life	$8,266.41
14 Payments in ÆTNA LIFE	7,173.35
Saving in ÆTNA LIFE	**$1,093.06**

Ætna Life and Equitable Life.

Fifteen-Year Endowment Age 48—Issued in 1881. Basis of $10,000.

14 Payments in Equitable, No. 231,405	$9,100.08
14 Payments in ÆTNA LIFE, No. 130,519	8,042.00
Saving in ÆTNA LIFE	**$1,058.08**

Ætna Life and Mutual Life.

Ten-Payment Twenty-five Year Endowment—Age 32—Issued in 1872. Basis of $20,000.

10 Payments, less dividends, in Mutual Life	$9,287.60
10 Payments, less dividends, in ÆTNA LIFE	7,357.30
Saving in ÆTNA LIFE	**$1,930.30**

Ætna Life and Travelers.

Twenty-Year Endowment—Age 30—Issued in 1874. Basis of $20,000.

20 Payments in Travelers (present rates)	$16,480.00
20 Payments in ÆTNA LIFE (less dividends)	13,337.34
Saving in ÆTNA LIFE	**$3,142.66**

Ætna Life and Northwestern.

Ten-Payment Twenty-Year Endowment—Age 22- Issued in 1882 Basis of $20,000.

10 Payments in Northwestern (less dividends)	$11,660.96
10 Payments in ÆTNA LIFE (less dividends)	11,291.70
Saving in ÆTNA LIFE	**$369. 6**

Ætna Life and Connecticut Mutual.

Annual Life Plan Age 34—Issued in 1884. Basis of $20,000.

11 Payments in Connecticut Mutual, No. 172,537	$4,690.60
11 Payments in ÆTNA LIFE, No. 143,316	4,476.80
Saving in ÆTNA LIFE	**$213.80**

Ætna Life and Washington Life.

Fifteen-Year Endowment—Age 32—Issued in 1870. Basis of $10,000

15 Payments in Washington Life, No. 37,320	$8,645.68
15 Payments in ÆTNA LIFE, No. 125,749	7,433.08
Saving in ÆTNA LIFE	**$1,212.60**

Ætna Life and Connecticut Mutual.

Twenty-five Year Endowment - Age 28—Issued in 1870. Basis of $10,000.

25 Payments in Conn. Mutual, No. 103,030	$6,613.80
25 Payments in ÆTNA LIFE, No. 70,178	6,207.50
Saving in ÆTNA LIFE	**$406 30**

Ætna Life and Mutual Life.

Twenty-Year Endowment—Age 24. Basis of $20,000.

20 Payments, less dividends, in Mutual Life, No. 129,865	$13,922.93
20 Payments, less dividends, in ÆTNA LIFE, No. 87,463	13,054.80
Saving in ÆTNA LIFE	**$868.13**

Ætna Life and New York Life.

Twenty-Payment Life Plan—Age 40. Basis of $10,000.

13 Payments in New York Life, No. 156,912	$4,405.70
13 Payments in ÆTNA LIFE, No. ——	3,948.86
Saving in ÆTNA LIFE	**$456.84**

Ætna Life and Connecticut Mutual.

Ten-Payment Life Plan—Age 57. Basis of $10,000 on same Life

5 Payments in Conn Mutual, No. 191,026	$4,445.10
5 Payments in ÆTNA LIFE, No. 184,491	4,054.82
Saving in ÆTNA LIFE	**$390.28**

Ætna Life and Equitable Life.

Twenty-Year Endowment -Age 40. Basis of $10,000.

12 Payments in Equitable, No, 269,513	$5,461.90
12 Payments in ÆTNA LIFE, No. 149,334	4,885.10
Saving in ÆTNA LIFE	**$576.80**

Ætna Life and Germania Life.

Twenty-five Year Endowment Age 30. Basis of $10,000.

10 Payments in Germania, No. 75,786	$3,439.20
10 Payments in ÆTNA LIFE, No. 151,958	3,062.81
Saving in ÆTNA LIFE	**$376.39**

Ætna Life and Mutual Life.

Twenty-Year Endowment—Age 24. Basis of $20,000.

THE BITER BITTEN.

An amusing incident occurred at a fashionable wedding in London. One friend, who determined to save her money and credit at the same time, took a broken earring to a famous jeweller of Bond street and ordered the little stone to be set in a scarf-pin for the groom. As she sagely remarked: "It does me no good, and coming from such a famous establishment they are sure to prize it and think I paid a lot of money." When the package was returned from the shop the wedding guest failed to examine her proposed present, and merely despatched it with her card and compliments. Imagine her disgust when strolling through the rooms where the bridal gifts were displayed, to find a dozen people about her offering and each one smiling. For a moment she hesitated, then pressed forward, and lo! there was the precious white satin-covered box bearing the prize name, it is true, but, alas! below: "From the repairing department"; and even worse than all, resting on the blue cotton beside the pin was an old broken bit of earring returned by the conscientious firm.—*Life's Calendar.*

THE FAST AND THANKSGIVING DAYS OF NEW ENGLAND.

There still may be found in the remoter parts of New England a few persons who observe fast days and the Thanksgiving Days as they were observed in the Colonial times, and in the early decades of the Republic These few persons believe, as the Fathers believed, that if the crops are good, the country is prosperous, the public health satisfactory, all these things have been ordered specially to indicate that the Great Ruler of the universe is pleased with the people.

They also believe that sickness, drought, freshets, fires, storms, and everything else that is disagreeable and hard to bear, are manifestations of God's displeasure. If a man loses his wife, they say he has been sinful and the Lord has taken away his helpmate in order to remind him of his responsibility to a higher power than any on earth. If a herd of cows, in its ignorance of the laws of nature, assembles beneath a tree in the pasture in order to escape the downpour and falls dead in a heap when the lightning comes, these same good people tell us that the man who owned the cows had "wandered from the sight of the Lord." As Mr. Love puts it:

"They (the Pilgrim Fathers) found no place for the discipline of chastening love. Regarding all dire happenings as punishments, and all blessings as approvals, they seem to have thought that their moral status before God was thus written out in events. They connected every calamity or deliverance with their present sin or virtue. As the former had a particular voice of warning and the latter a testimony of forgiveness, every event approached them with its shadow before and its sunshine afterwards, to be recognized by fasting and thanksgiving."

Mr. Love makes no plea for the restoration of the spirit with which the Fathers kept their fasts; his purpose is to exhibit what that spirit was, and how it weakened with advancing years. He thinks that "pious purpose, persevering courage, and honest faith of these good men" are "as worthy of regard as their oaken chests, spinning-wheels, and warming-pans."—*N. Y. Times.*

THE FIRST DUTY.

Joseph Wharton, of Philadelphia, says that Europe hesitates to send money to the States, and the North and East hesitate to send money to the South and West, "largely because of the threat that half a dollar's worth of silver shall be made legal tender for a whole dollar of debt." In a letter to the New York *Herald* he urges, therefore, that the first duty of individuals is "to crush this absurdity by every means in their power," and that the first duty of Congress is "to stand by our honest money standard of gold, tolerating no weakness nor menace at home, yet consenting to participate in any conference to which Great Britain, Germany and France may invite us." He hopes that Congress will mercifully adjourn as early as possible, and forbear "from what Emerson calls fumbling with our umbilical cord."

—A canal is to be constructed from Marseilles to the Rhone, a distance of about 35 miles. The most important feature of the work will be a tunnel 4½ miles long. The depth of water is to be 6 feet 6 inches between the Rhone and Port de Bouc, and 10 feet thence to Marseilles. The width will be sufficient for two paddle-boats 46 feet wide over the boxes to pass, boats of this character being largely used on the Rhone. The cost is estimated at 80 million francs, one-half of which will be borne by the State, and the remainder by the Marseilles Chambre de Commerce, with the exception of a subvention of 13½ million francs from the department of the Bouches du Rhone and the town of Marseilles.

UNHEALTHY LITERATURE.

Speaking of the effect of the subtle moral poison which Oscar Wilde and his followers have injected into recent literature and art, the New York *Times* says the malady will now be recognized as disease, instead of "originality," 'higher culture," or "individuality," and goes on: "The symptoms of this disease—idleness, unrest, discontent, selfishness, craving for notoriety—will, we hope, be more carefully watched and their causes treated by those who have kept themselves clear of the pestilence." In his recent book on "Degeneration" Max Nordau declares that "there is a candor which is wholly inadmissible. The artist may be criminal by organic disposition. We do not permit homicidal maniacs, incendiaries, thieves and vagabonds to expand their individualities in crime, and just as little should we permit the degenerate artist to expand his individuality in immoral works of art and literature." We have been flooded of late years with books, chiefly novels, showing a hysterical craving for notoriety. The writer shave strained after striking subjects and harrowing details. Morbid conditions of mind and body especially have been so popular as to lead the American *Medico-Surgical Journal* to remark, sarcastically, that "as yet there exists no novel of the ear, no drama of the digestive organs, no romance of the kidneys, no pastels of the intestines. Blindness, idiocy, simple mania with delusions, visions and bright lights of hysteria and epilepsy, have each in turn served the modern writer of fiction." The conclusion drawn is, publishers should discourage authors who bring these wares to them for publication, and all healthy men and women should be as much ashamed to be in the company of such books as to be in the company of the shameless men and more shameless women they describe.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

WALL STREET PROSPECTS

Henry Clews says in his circular of last week "The stock market has some remarkable features, which do not seem to be generally understood. Few of those who have been buyers have had any very decided idea why prices should have risen as much as they have, and to most it has been a matter of surprise that quotations should so promptly take a higher bound after each turn of realizing . . .

"There are unseen forces behind the market, which few understand and the force of which still fewer appreciate. These influences began to show their effects three months ago, and were ushered in by the operations of the Loan Syndicate. They are not, however, to be attributed wholly, nor even principally, to that negotiation. . . . To find those causes, we must go back to the conditions that produced the great commercial depression which has existed since 1892 in this country and since 1890 in Europe.

"That depression was the result mainly of universal over-production. The over-production was the consequence of a large excess of producing plant, growing out of the progress of modern invention. The over-supply of machinery has been so universal and so great that the capacity for production still largely exceeds the possibilities of consumption. Industrial investments, except in the case of a few monopolies, are consequently earning almost nothing, and from that two important results follow: In the first place, an unprecedentedly low rate of interest on industrial capital; and, in the next place, the withholding of new capital from industrial employment. These results involve the further consequences of establishing a reduction in the market rate of interest which may quite possibly be long continued; and investment is being diverted to securities which are exempt from the evil of over-supply. Such exemption is found almost alone in railroad securities. There has been quite a furore in London on African gold mining stocks, but that excitement has exhausted itself, and nothing remains, either for speculative or investment purposes, except the long-neglected railroad issues of the United States. Within the last five years, the yearly construction of new railroad in this country has averaged barely 3,000 miles; while, for the ten previous years, the yearly increase averaged 7,400 miles. The current rate of railroad construction is thus far below the ratio of increase in commerce. It is true that the earnings of the roads have fallen very low, but it is also true that prices have fallen proportionately, and also that their receipts are now beginning to show a material increase, in sympathy with the recovery of general business.

"These facts seem to mark our railroad securities as a form of investment destined to receive a special preference until prices have reached a point that will bring their yield to about a parity with that of the investments which are now suffering in productiveness. This drift is clearly indicated in the fact that Europe has, within the last three months, taken some $90,000,000 of our railroad investments alone. . . . In view of these facts and indications, we conclude that the upward movement in prices has not yet reached its climax, and that 1895 is likely to prove an extraordinary year in railroad investments."

MONTREAL MARKETS.

MONTREAL, May 22nd, 1895

ASHES.—The market is fairly active, with values steady at $4.10 to $4.15 for first quality pots, seconds, $3.80 pearls are a shade easier at $5.50. There are not many coming forward, and the present stock is about eighty barrels of pots and fifteen of pearls.

CEMENTS AND FIREBRICKS.—Receipts of cements last week were liberal, aggregating 9,250 brls of English, 9,775 brls of Belgian The demand is fair, and quotations are for English $1.90 to $1.95 Belgian $1.80 to $1.90 Firebricks have also arrived freely, some 250,000 having come to hand last week, and prices are easier at $15 to $20 per thousand

DAIRY PRODUCTS.—The shipments of cheese last week footed up 19,111 boxes, as compared

with 12,897 for the corresponding week of last year. The total shipments this season to date are 36,668 boxes. The market shows no gain in strength; English advices are to the effect that there are large stocks of old cheese unsold there; an auction sale of 10,000 boxes of Canadian cheese is to be held in London this week, and buyers are advised to act cautiously. The cable quotation shows further decline. Butter also continues very dull, the only business being a moderate local demand for creamery at 15 to 16c. Eggs are fairly steady at 10 to 10½c.

DRY GOODS.—The week before the Queen's Birthday is generally expected to be a brisk one in the millinery trade, but the November-like weather which exists at present writing has affected sales adversely. Notwithstanding the unfavorable conditions, however, sorting business with most of the dry goods houses is very fair, and one leading house reports their orders for May so far are fifteen per cent. ahead of last year. Quite a few country buyers have been in town during the week making personal selections. Woolen and silk goods continue to show firmness.

MONTREAL GRAIN STOCKS IN STORE.

Flour	20,560	17,180
Buckwheat	23,533	5,050

GROCERIES.—The movement in this line of trade may be called a fair one on the whole; no large orders are reported, but the aggregate of business is moderately good. The feature of the week is the excitement in molasses. The quotation at the Island of Barbados has advanced to 15 cents per gal. first cost, but even at this figure no supplies are now available. Holders here are quoting 34 to 35c. per gal. in lots for Barbados, but are not anxious sellers. A meeting of the Guild will be held shortly to fix jobbing prices. Attention is being diverted to Porto Rico goods on account of recent deterioration in quality of Barbados molasses, and fancy Porto Rico are quoted 33 to 36c., with reported sales of 800 puncheons at the former figure. Summer quotations have undergone no recent revision, the factory price for granulated being 4¼c.; the lowest grade of yellows that local refineries can offer is 3½c., though the lower province companies are said to be offering dark samples at 3¼c. Teas are quiet at the moment. A Japan tea bill to hand on Monday reported settlements to date 63,000 piculs, as against 82,000 piculs at same date last year. The steamer that left on the 17th inst. has on board 7,400 packages, of which only 500 packages are for Canada. The Rice Milling Co. has issued a circular stating that rice prices will remain just the same as last year. The first cargo will arrive in June, and it is claimed the quality will be exceptionally good. Canned goods are quiet, but stocks are moderate. Gallon apples keep advancing; they are now quoted at $2 30, and may go higher. Salmon packers are not yet making any quotations for new pack, and suggest that an arrangement may be made to advance prices.

HIDES AND TALLOW.—There is still great scarcity of hides, and Ontario dealers are said to be trying to buy in this market. For No. 1 light and heavy hides dealers are paying 8 cents, and sales to tanners have been made at 9c., with some holding at 9½c. Calfskins are quoted at 8c.; lambskins, 15c.; sheepskins, 75 to 80c. Tallow remains very dull, and 5c. is about the best figure obtainable.

LEATHER.—Buying is not very active in black leathers, but sole in pretty good demand and there is no check to the upward tendency in values. No. 1 B.A. sole is now quoted at 24 to 26 cents and No. 2 at 23 cents. There have been reports of a large sale of 3,000 sides of No. 2 to a Quebec house at 24 cents, but this lacks definite confirmation; No. 1 ordinary is quoted at 23 to 24 cents, and slaughter sole at 26 to 30 cents. A sale of 400 sides was made the other day at 26 cents. Some commission houses have received letters from Ontario tanners to hold splits at 28 to 30 cents, and glove and pebble at 14 to 15 cents.

OILS, PAINTS AND GLASS.—A fair volume of business is reported. There is a good deal of excitement in Paris green; supplies have been very moderate this spring, and prices are away up in the United States; arsenic and sulphate of copper, which enter largely into the manufacture of this article, are much advanced Local prices are now 14 to 15c. in bulk, and 16 to 17c. in pkgs. Turpentine and linseed oil are without change. Fish oils dull and little enquired for. Glass is easier, and we shade quotations. We quote:—Turpentine 47c. per gal. for single brls.; two to four barrels, 46c.; 5 brls. and over 45c. Linseed oil, raw, 55c. per gallon. boiled, 58c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal., in small lots. Leads (chemically pure and first-class brands only), $4 50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4½c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, 14 to 15c. in bulk, 16 to 17c. in small packages; window glass, $1.10 to $1.15 per 50 feet for first break; $1.20 to $1.25 for second break; third break, $2.70.

METALS AND HARDWARE.—There are evidences of a strengthening in iron. Tin plates and some other lines American pig iron are said to be selling in the west at an advance of 75c. a ton, and it is said the only thing that prevents domestic iron being stiffer is the strong competition between the Ferrona and the Siemens' people. Scotch warrants are cabled stronger at 43s. 5d. A sale of 500 tons of Summerlee is reported at $19, and smaller lots have sold at $20. One holder declines to sell below the latter figure. A lot of No. 2 Langloan, some 80 tons, held in store here some time, was cleared out Tuesday on private terms. Siemens and Ferrona are quoted at $15.75 to 16.25; bars remain without change; the advance in ingot tin has gone no further, but price is steady at 17 to 17½c. Copper firmer at 10½c. Nails and wire have undergone no recent change. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $19.50 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $18.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $15.75 to 16.25; Ferrona, No. 1, $15.75 to 16 25; machinery scrap, $14.00 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00, 52 sheets to box, 60 sheets $2.10 to $2.15, 75 sheets $2.20 to $2.25; all polished Canadas, $2.50; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, ccording to finish; P. D. Crown, $3.75; do., I.X., $4.50; Coke I. C., $2.70 to 2.90; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4½ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5½ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron 1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 18 to 19c.; ingot copper, 10½ to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25; American do., $4 to 4.25. Antimony 10 to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3½ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

WOOL.—A rather better feeling is reported, and though no important transactions are reported, some moderate business has been done. Some mill men report some good orders already for next spring's goods. The London sales which close Saturday, show a much firmer feeling than at the opening; a cargo of Cape wool is being loaded for this market, and is needed, stocks being small. We quote greasy Cape 13 to 15c.; some stock is available below the inside figure, but is not a desirable quality. Natals, 15 to 16c.; Australian, a little available at 14 to 14½c.; Canadian fleece, 19 to 22c.

TORONTO MARKETS.

TORONTO, May 22nd, 1895.

DRUGS.—The distributive movement of drugs is quite satisfactory and larger than that of May, 1894. Values are firm, and many drugs have an upward tendency. Camphor is decidedly higher, having advanced fully 15 per cent. within the last fortnight. Glycerine is firmer. Paris green has made most remarkable advances in the United States this season, amounting to about 200 per cent. The advance here, although not equal to this amount, has been very decided. Stocks are not large, and as the season is only beginning, we may look for even further advances later. Corks are dearer. The recent advance in alcohol caused by the change in the tariff has effected the price of all preparations in which alcohol is used. Bromides are higher. Quinine shows signs of an upward movement; Howard's has advanced in price and German is very strong.

These prices are wholesale by the car-load.

Collections have improved somewhat and are easier to make.

DRY GOODS.—Until the advent of a rather prolonged period of cold weather, the movement in summer goods was good. Dress materials such as prints, delaines, crepons, ducks, etc., have been in active demand. The recent advances in cotton goods, to which we elsewhere refer, have extended, as was natural to expect, to other lines of dry goods. Knitted goods are firmer, and prices 10 to 15 per cent. in advance of quotations made several months ago. English advices indicate advancing textile markets.

GROCERIES.—The dried fruit market is quiet, and the consumptive demand not large. Since last week there has been no change in the sugar situation. Refiners still ask 4⅜c. for granulated, and 3⅜c. for yellow. Teas, on the whole, are very firm, with medium and low grade japans 1 to 1½c. higher. Brokers are showing samples of May pickings. There is at the present moment quite a turn over in canned corn, peas and tomatoes. In canned fruits there is also a good demand for raspberries, plums and pears. Corned beef is strong, and packers are accepting orders snbject to the privilege of cancellation. Present stocks of canned salmon are in small compass. There is no cutting in quotations, and prices are stiff.

HIDES AND SKINS.—Hides were quoted last week at 7c. and this week at 8c. The situation is a remarkable one, and beyond explanation. So far as local tanners are concerned, it is impossible, with the present range of leather values, to put hides into the vats with a prospect of making a profit by manufacture. This is shown by the falling off in demand during the last several weeks, or since the last two advances. Sheepskins are scarce; the season is now about over; dealers are paying $1 to 1.25 for choice skins. Calfskins are unchanged. Tallow is weak and dull. *Hides and Leather*, Chicago, May 18th, well summarizes the situation thus: "To put the case in a nutshell, heavy hides, roughly speaking, cost over 100 per cent. more to-day than at this time last year; light hides are over 260 per cent. and calfskins fully 85 per cent. higher than in May, 1894. Against this, heavy leather is about 50 per cent., and upper, such as grains and smooth finishes, about 100 per cent. higher than at this time last year. Shoes are now listed at an advance of from 10 to 25 per cent., the latter principally on low priced grades, and, it is predicted, will rise still further unless the unexpected should occur and leather decline."

HARDWARE AND METALS.—Business remains steady. There is not the rush there was three weeks ago, but this is to be expected, as the season is now well advanced. Harvest and garden tools are still in demand. Wire nails are moving well. Cut nails do not find equally good movement. Barb wire is in strong demand, but the movement is for the most part in small lots, although some carloads were sold this week. Orders are coming in for ice cream fertilizers and other summer supplies. There is a scarcity of screen windows at the moment. Several large lots of screen doors were received during the week. There is apparently an upward tendency in values. Ingot tin is firmly held at 17½c. in ton lots, and 18c. in smaller quantities. Ingot copper has also fallen in line, and in ton lots is quoted at 10⅜c., with small lots selling at 11c.; this means an advance of ⅜c. per lb. Pig lead is ruling higher at 3 to 3⅛c., according to size of lot. Shipments of window glass are being received now, a much earlier date than the shipments of last year. A number of deliveries are being made throughout the country. Import orders are being freely booked for galvanized iron, Canada plate and tin plate. Shipments of metals from stock are fairly good. Trade in builders' supplies is rather active on country account, but the city trade shows little improvement.

PROVISIONS.—There is only a fair activity in the provision trade. Really choice butter is in better demand at 12 to 13c. per lb. Cheese is weak, with a local jobbing trade at 8 to 8½c. and probabilities of lower quotations. The prices of hog products remain unaltered over those of last week, and there is only a moderate request for stock. Eggs at 10 to 10½c. are in good demand. April and May stock are always in favor with picklers, and a considerable quantity of eggs are being absorbed in this way. Dried and evaporated apples are quiet. Beans continue steady at $1.60 to 1.65.

WHEAT.—An advance of 8c. during the week and strength at the advance is certainly a pleasing thing to say of the wheat market. Winter wheat is now quoted 88 to 93c.; spring is quoted at 88 to 93c.; Manitoba advancing 5c., stands at 90 to 97c. The bulls are for the moment in almost complete possession; their principal arguments have been reported damage to the growing crop by frost in several of the wheat-growing States. So far as we can learn, little or no damage has been done to the Ontario crop by frost, although it is possible that the yield will be somewhat delayed. Barley remains nominal. Peas are firm and at 59 to 60c. in good demand. Oats are strong, quotations standing at 39 to 40c., or 2c. in advance of last quotations.

THE VISIBLE SUPPLY.

" " " 1894, $4,239,050 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company that has from its inception given its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low-priced "PAY AS YOU GO" plan to the shortest single premium endowment.

H. OELSCHLAGER, Inspector.

A HUGE STEEL TOY

For some months past there has been gradually rising to view in the exhibition grounds at Earl's Court, [England], a steel structure, which has now reached a final altitude of 300 ft. from ground level to summit, and which, in clear weather, is visible for many miles around. This is the gigantic wheel, which is an enlargement upon, and a modification of, its prototype, which attracted so much patronage at the Chicago Exhibition. The present structure consists of the largest wheel ever built, the axle being carried on eight supporting columns 150 feet high, at which level there will be two large promenade or recreation rooms, having balconies around them, and communicating with each other by a passageway through the axle, which is 7 feet in diameter Around the periphery of the wheel will be suspended, at regular intervals, on steel shafts, 40 cars, which are rather larger than ordinary tramcars, being 24 ft. long by 9 ft. wide, and 10 ft. high externally. Each car is capable of carrying 30 passengers, giving a total complement of 1,200 persons. Ten of these cars have been elegantly fitted and furnished at a cost of about £100 each, and will form first-class cars, five being for the smoking and five for the non-smoking portion of the public. As the cars leave the platforms the passengers will be raised above the ground gradually and will first be able to overlook the surrounding houses and then to look down upon them, and, in clear weather, to obtain a splendid view of London, with its numerous public buildings, whilst from the summit the surrounding country, stretching away even as far as Windsor Castle in one direction, will be within view.

Access to the promenade at the top of the columns forming the towers which carry the wheel will be gained by a double funicular railway or water-balanced lift. This consists of two cars connected by hauling gear, and each having a water tank in its base. These cars will balance each other and will slide up and down two of the columns, which are rectangular in section, and are placed at an angle. At the top of each column is a storage tank for water, which will be pumped up from a reservoir under the ground. When a car at ground level has received its complement of passengers, the base tank of the car at the top will be filled with water, and on the brakes being released the car will glide down the column at a moderate speed, and at the same time will haul up the freighted car on the other leg. Arrived at the ground level, the water in the car tank will be discharged into an underground tank, to be again pumped up to the top of the towers.

The wheel will be rotated by means of powerful chain gearing driven by steam power. Two endless chains will be used, each passing around either edge of the wheel through a series of guide brackets, over pulleys, and through a subway to the engines. The chains are of the short-link type, and each is over 1,000 feet in length, and weighs about eight tons. They are operated by two 50 horse-power Robey undertype engines placed in an engine-house at the foot of the wheel-towers. Either of the two chains is capable of driving the wheel by itself, so that there need be no fear of stoppage. At night the wheel will be lighted by electricity The weight of the wheel and the empty cars is about 1,500 tons; with the cars loaded, it will be about 100 tons more. The wheel will be completed and opened to the public on May 25th, that being the date of the opening of the exhibition.—*Iron and Steel Trades Journal.*

WHY ENGLISH PEOPLE CANNOT MAKE COFFEE.

A writer in a London evening contemporary says: "One of the things that the French understand better than us is coffee. In England the coffee berries are as good as those that are bought in France at double or three times the price; but the beverage that is made from them is almost invariably bad, in hotels no less than in private houses. French visitors have explained again and again the reason of this inferiority, but to no purpose: for John Bull, difficult as he is to please over his tea, is indifferent on the subject of coffee, and will go through life serenely unconscious of the fine aroma and flavor that may be extracted from the yellowish-green berry if proper attention be given to the matter. The main rules are these: the berries should be freshly roasted, and should never be put into the mill until the coffee is about to be made. To buy coffee already ground is indefensible. Supposing it to be pure when retailed by grocers in that state, it has generally lost much of its aroma, which is exceedingly volatile. Now the aroma is to coffee what the bouquet is to Bordeaux and Burgundy; that is to say, almost everything. However "generous" a wine may be, if it has no fine bouquet it is merely *vin ordinaire*—good enough for common use, but not to be offered to a friend at dessert. When it has lost its aroma coffee is almost worthless, chicory being then quite as good, if not preferable. But when its essential perfume rises powerfully with the steam of a freshly poured-out cup, it is one of the best and most delicate of nature's little attentions to mankind. In all French kitchens the coffee mill is regarded as one of the most indispensable of utensils; and although people living in large towns generally buy their coffee ready roasted, in country houses the roasting is done at home—a very simple and excellent contrivance being sold for the purpose. But it is of little use to talk of coffee to people who only drink it when mixed with milk. It is only so employed by the French at their early breakfast, when, in their opinion, the addition of chicory improves it; but those who have proper respect for the refinements of life think it rank heresy to use ever so little of the bitter root in making *cafe noir*. The English will never understand the art of making coffee until they learn to appreciate the true flavor and virtue of the berry when served in the form of *cafe noir* after lunch or dinner. The habit, however, is not worth cultivating when it is done parsimoniously. To obtain a good result there should be much coffee and little water. It is not the quantity but the quality of the liquid that is to be thought of. Inasmuch as there is nothing like black coffee—unless it be strong tea—to whip up the nerves, it should be used with caution, or not at all, by the ever-increasing number of people who are more or less afflicted with nervous disorders.

AN INEBRIATED BANKRUPT.

Rees Davies, lately carrying on business in Oxford street, Swansea, as a grocer, was examined at the Swansea Bankruptcy Court, on Thursday week. At the commencement the Official Receiver said: "This man is not in a fit state to be examined." "Oh, yes, I am," was the reply, given with some difficulty. "You were drunk at the last court, were you not?" "That is an opinion—I don't think so." (Laughter.) The Official Receiver: "I'm told that Mr. R. J. Lloyd, debtor's solicitor, has thrown up the case because debtor is not in a fit state to be examined. Is not this contempt of court?" Debtor said he could answer any question. The Official Receiver—"Perhaps in this state you may throw some light upon the missing books of account? (Laughter.) Where are they?" Debtor: "I don't know." The examination was eventually adjourned, the Registrar observing that if he came in that state again it would be serious for him. Debtor: "I hope to be in a better state than I am now. I have been in very bad health. (Laughter.) What about my expenses?" (Loud laughter.) The Official Receiver: "The expenses were sent you, and this is what you have done with them." Debtor then stumbled out of the box. The Official Receiver called the Registrar's attention to the debtor's conduct, stating that he failed to put in an appearance at the first meeting of the creditors, and was drunk at the last court. He was afraid that unless he was locked up by order of the court he would never appear. The Registrar decided to consider the matter.—*Grocer's Review.*

CONNECTICUT RAILROAD MATTERS

When it was announced a few days ago that the Connecticut legislature, which has been hearing arguments for several weeks on the question of granting charters to electric roads paralleling to some extent existing steam lines, had decided not to make any general regulation, but to decide each case upon its merits as it came up, it was assumed in some quarters to be a victory for the trolley people. Such is not the case. Every application coming before the legislature since the hearing, where the parallel idea was involved at all, has been decided adversely to the trolley interests and against the best interests of the people of the State.

There can be but one interpretation placed upon the action of these Connecticut lawmakers. The merits of the trolley system for interurban traffic are so thoroughly demonstrated, and have been so overwhelmingly recognized by the public at large, that these hayseed legislators cannot crawl behind the pretext that they thought they were working for the public good. They were working chiefly in the interests of the Consolidated Steam Road Company, which for years has controlled the body.

If there be one man among them who honestly holds that the state is under any obligations to the railroad company, he is sadly misguided. Paternalistic ideas have slight foothold in America, but the arguments offered by the railroad lawyers would outdo in this direction anything that we know of even in Germany, the stronghold of paternalism. These lawyers held that the state had really guaranteed that the investment in New York, New Haven and Hartford securities should forever be a profitable one. This is not exactly nonsense. It is socialism of too dangerous a tendency to be tolerated in New England.

The advance of the trolley has been checked; the people who need the new lines can now wait another season or two, but they will get it sooner or later.

It would not be a bad notion to make an issue of trolley extension in the next legislative election in Connecticut. The trolleyites would certainly win.—*Electricity.*

COAL SEAMS DISCOVERED NEAR SYDNEY, N.S.

A large coal basin of magnificent coal has been discovered at Black Brook. It extends over three miles, and lying along the eastern shore of Sydney harbor there are five and a half miles of area rich in coal and prolific with seams. One seam, a large one, contains coal of a kind not hitherto mined in Cape Breton.

Four seams have been bored by diamond drill; two of these are large seams, the third is a good seam with a small clay parting of about five inches. Besides the four seams bored by the diamond drill there are outcroppings of coal, and coal has been taken out of them all One of the seams has been proved, by a slope, to contain the best of coal, and shows at the roof of the slope a seam of five feet six inches from roof to pavement. It has been demonstrated that there are four large workable seams, and it is also true that other seams of the best coal are lying underneath the others in the coal measures.

An English syndicate has bonded this property at $20,000 a mile, and as they have decided to make their money talk, some very interesting developments may be expected during the coming summer. The property is contiguous to water shipping, and has the best railway facilities. Mira Bay coal mine (the Tracy seam) is one of the best seams of coal in Cape Breton, and a harbor could be constructed at the lake by cutting through False Bay beach. The lake is owned in fee simple with a charter from the Government, enabling its present owners to proceed at any time with harbor construction. In a very short time the whole matter will be clearly laid before the public, and special legislation will be sought for the new syndicate.—*Sydney Reporter.*

SENSIBLE ADVICE.

In an address at the commencement exercises of the New York trade school ex-Mayor Hewett said: If you ask whether it is the right of the workmen to associate together for the general welfare, and to increase the rate of labor, then I say yes. It is not only their right but their duty. But it is when the trades-union steps between the pale of the law, and assumes the right to compel or prevent labor, that it violates the fundamental principle of human liberty and Christianity. So also has the employer the right to combine with others, but when he oversteps the law then he has violated the principles upon which the constitution rests But I see the dawn of harmony between the employer and the employe. When that time comes questions will be discussed and considered by honest men. The workman will not be deprived of his individual liberty. These late disturbances are among the last, and the time is at hand when there will be absolute equality to every man who breathes beneath the flag of the union.

Don't Circulate your Catalogue Promiscuously

You may think it will fall into the hands of some likely customers. But you don't want to get customers in that way. Rember that

"Something for nothing isn't business, never was business and never will be business."

Anyway catatalogues, as they should be, cost too much to throw about indiscriminately. Not that they cost more than they should. Take, for example, the catalogues we print they don't cost too much, but they are so well printed and so attractive that you are careful how you circulate them. The results are all the better for this. Ask us for our price when next you print one.

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

DECISIONS IN COMMERCIAL LAW.

IN *re* G. NEWMAN & Co.—According to the Court of Appeal, where a director of a company has entered into a contract for a purchase, and agrees to resell the thing purchased to the company at a higher price, he cannot keep for his own benefit any part of the difference. Where, therefore, the higher price was fixed by directors with knowledge of the circumstances and because it was known that the purchasing director would necessarily incur in the course of the negotiation considerable expense in addition to the price he had to pay, he must nevertheless account to the company (or its liquidator) for any clear profit he may have made after meeting such expense. Where a person has formed his business into a limited company in which he holds the great bulk of the shares, and exercises an authority similar to that of an individual trader in his own business, sections of the Companies Act prevents the Court from holding him liable for the debts of the company; and he has no power to dispense with the sanction of the company in general meeting to acts which the directors are not authorized to do. Therefore, according to the English Court of Appeal, presents cannot validly be made by the directors for services alleged to have been rendered to the company, and if made can be recovered back by the company or its liquidator, although all the directors and shareholders may have individually assented. Though a majority of the shareholders of a company can in general meeting give remuneration or presents to the directors out of the assets properly divisible amongst the shareholders, yet they cannot make any such payments out of capital, or out of money borrowed by the company for the purposes of its business.

CANADIAN FIBRE CHAMOIS COMPANY VS. CARSLEY.

The Canadian Fibre Chamois Co. asked for an interim writ of injunction against S. Carsley & Sons, of Montreal, to restrain them from selling as "fibre chamois," or "fiberine," or "chamois," or "fiberine interlining," any article of merchandise not made and sold by the plaintiffs as "fibre chamois." The defendant Carsley contested the petition on the ground that, according to the law of the Province of Quebec, a temporary injunction could not be granted, and that, besides, the defendant had acted in good faith and had not endeavored to pass off any imitation goods, as fibre chamois, and that in any case the plaintiffs were not entitled to exclusive use or right in the name of fibre chamois.

Judgment was rendered in the Superior Court, Montreal, on Monday last, by Mr Justice Taschereau, who said Good or bad faith is not in question; it is not an element of the present application. The right invoked by the plaintiff is not derived from any patent or trade mark, but it is upon the principle that no one can use a trade name so as to pass off his goods as the goods of another. His honor held that the plaintiffs had made out a *prima facie* case, establishing that "fibre chamois" is known as their product, that they have a right to make and sell it, and that defendant has on several occasions offered for sale and sold goods other than the plaintiff's under like names. If the court has the power to issue a temporary injunction, the plaintiffs have now established the facts which would entitle them to that injunction. The question was raised by the defendant that, according to the law of the Province of Quebec, no injunction can issue for any case outside the cases specially provided for in the injunction act. . . . His honor, however, could not agree with the conclusion arrived at by Chief Justice Meredith, who took for granted that injunctions did not exist in France, or before the special statute passed by the Legislature of Quebec. Our statute, he said, introduced into this country the right of injunction as it existed in England, and prescribed certain procedure by which it was to be regulated. But this only referred to a certain number of cases. The court itself had inherent powers under which it could grant, by an interlocutory judgment, a restraining order, to prevent the position of the parties being altered during the pendency of the suit. This power was frequently exercised in France, although it was not called an injunction, and it exists in this province. His Honor cited a number of French authorities in support of this principle, and held that the plaintiffs, under Quebec law, were entitled to an order.

The judgment rendered enjoins the defendant, his agents, clerks and servants, and each of them during the pendency of the suit and until it is finally determined, from selling or offering for sale as Fibre Chamois, or under that name or title or under a designation similar to "Fibre Chamois," or containing said words, any goods, substances or materials which are not the goods, substances or materials, manufactured by the plaintiffs and known as "Fibre Chamois."

Mercantile Summary.

THE Rapid City *Spectator* makes the boast that the only female butter-maker employed in the province has been secured by the Douglas creamery.

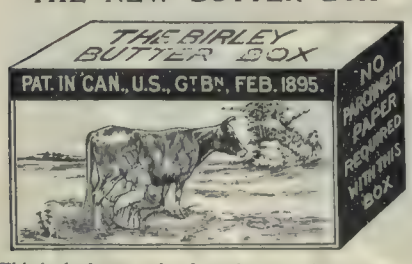
THE rural municipality of Portage La Prairie offers $20,000 of their six per cent. debentures for sale. The treasurer will receive tenders up to June 17th next.

THE Quebec branch of the wholesale firm of John Fisher, Son & Co. has been removed from St. James street to larger premises on St. Peter street in that city.

THE offices of the Western Loan and Trust Company have been removed from Francois Xavier street in Montreal to the Stock Exchange building in that city.

A GROCERY firm in New Westminster, B.C., named Rae & Lamb, who carry a stock of $30,000, are in trouble. For a considerable time they have been slow in making payments, and being pressed by creditors they have assigned. ——In July last Hazlett & Jackson, grocers at James' Bay, B.C., dissolved partnership, the former retiring, and Wm. Hazlett, of this firm, shortly afterward opened a store in Victoria, B.C. But his assets were soon mortgaged, and now it is foreclosed and the stock will be sold.

THE NEW BUTTER BOX



This is the latest style of putting up 1 lb. prints. The board is specially treated both inside and out, so as to make it both grease and water proof. By this means the waxed wrapping paper hitherto so generally used is entirely dispensed with, as also are those wooden butter dishes and other such like unsightly contrivances. This box is by far the best and most stylish package for butter that has ever been put on the market. It is also very ch ap. If you are interested write for samples and prices to the manufacturers.

Mercantile Summary.

MR. J. A. FORD, of Clinton, says the *Expositor*, has sold his butcher business to A. Couch and C. Wilson.

THERE are $65,000 worth of city of Winnipeg school debentures offered for sale. Tenders must be in before 29th June next.

HENSALL village is growing. Seventeen houses are in course of erection there. The public library of the Mechanics' Institute of this place now contains nearly 1,000 volumes.

AN assignment has been made by Mrs. M. R. Robins. Her husband was at one time a member of the firm of Robins Bros., stationers, Mitchell, who failed early in 1894. After this they moved to Ridgetown, were they opened a bakery and confectionery business in her name. Last month their offer of 50 per cent., cash, was accepted by creditors, but failing to obtain the money, the result is as above stated.——In 1881, James McDougall died in Hamilton. His wife then continued the business of dealing in lamps, oil, &c., until June, 1890, when she failed and compromised with creditors at 40 per cent. About a year afterward she again assigned with $3,000 liabilities. This too was settled at a like rate. Now she makes her third assignment. Although creditors feel kindly disposed, they are beginning to think her failures are becoming entirely too numerous.

Mercantile Summary.

IT looks as if the Guelph folks were in earnest over their rolling mills scheme. The provisional directors of the company met last Friday evening, Mr. Watt presiding. All the stock has been subscribed and it is to be incorporated. The directors have two options for sites, and it is expected the buildings will be commenced in a week or ten days. Arrangements have been made to buy an engine. A call of 20 per cent. on the subscribed stock has been made, payable on June 15th.

WORD came to us from Montreal, too late for notice in last issue, of the death of Mr. Geo W. Moss, a gentleman deservedly held in high esteem by the mercantile community of that city. Deceased came to Canada from England some thirty years ago. He was for years in the dry goods trade, and afterwards represented for several years the Clark Spool Cotton Company. On his retirement from business he became vice-president of the Bell Telephone Company. Although a retiring man, he was a thorough merchant, of good judgment and rare integrity. "I have known many fine men in business circles of Montreal these last thirty years," says one who knew Mr. Moss well, "but a more scrupulously honest man, or one of more delicate instincts and more kindly nature, I never knew." He was in his sixtieth year.

Mercantile Summary.

THE city council of Windsor, Ont., ask for tenders for the purchase of over $37,500 of local improvement debentures.

SAMUEL BERNARD, who began a dry goods business on St. Catherine street west, in Montreal, in 1888, on limited capital, has abandoned his estate, owing creditors some $5,000.

UPON the application of G. R. Prowse, a winding-up order has been granted against the Montreal City Club. Mr. A. W. Stevenson has been appointed liquidator, and a meeting of creditors and shareholders has been fixed for June 5th.

EVER since 1869 J. C. Monro has been in general store business at Grantley, Dundas county, Ont. But he has had to turn over his estate to the assignee. His has been a case of gradual rust out. The liabilities are $1,500, and assets about $1,000.

A MAIDEN lady named Miss E. Gregoire, who has conducted a small general store business at Fort Coulonge, on the upper Ottawa River, for the last six years, has made assignment to a Montreal firm of accountants.——A. Fauvel, general dealer at Rigaud, reported in difficulties a fortnight ago, has settled his indebtedness at 25 per cent. cash.

AT a meeting of the creditors of A. Charlebois & Co., Laprairie, Que., held last week, each of the partners made an offer of 25 cents in the dollar, cash, on the liabilities of $6,468, assets being $4,856. The creditors think the estate is worth 50 cents on the dollar, and adjourned to allow for the presentation of amended offers.

IT is many years since Chas. W. Bloor started a shoe store in Ingersoll, but that he met with poor success became evident, for he was sold out some years ago. Starting again in November, 1891, he gave a chattel mortgage to a Woodstock firm for $2,500. This has been renewed from year to year, and now it is foreclosed and Mr. Bloor's career seems to be closed.

AN offer of compromise is made by B. A. Booth, miller at Odessa, who had the reputation of being an honest, struggling man with but little capital.——The landlord is in possession of the premises of McCrum & Morrison, carriage makers at Ingersoll, for a rent claim of $500. Besides this they owe $1,600, and creditors need not expect to get any dividend worth speaking of.

STRATFORD will erect a poorhouse.

CALGARY'S population is 2,806, according to the police census.

IT is pointed out by the *Railway Age* that while in 1864 the charge for carrying wheat from Chicago to New York was 60 cents a bushel, it is now 13½ cents.

THE ratepayers of Chicoutimi have passed the by-law awarding Mr. E. L. de Lavallee, of Montreal, the contract for the construction of water works in that place.

THE Ontario Rolling Mill Company, in consequence of the recent imposition of a higher duty on scrap iron, has put in a puddling furnace with a capacity of four tons a day.

IT is estimated that between 17 and 18 million feet of lumber have been cut on the Restigouche River and its tributaries this season, while last year's cut in that locality aggregated 20,000,000 feet.

AT the annual meeting of the Nanaimo Gas Company the following officers were elected: G. L. Milne, president; John Mahrer, vice-president; W. K. Leighton, secretary-treasurer; F. G. Peto, auditor; A. Thomas, manager of works. It was decided to reduce the price of gas from $3 to $2 50 per 1,000 feet. No dividend was declared this year, owing to the large expenditure in necessary extensions.

IT is stated that Mr. George Sleeman has closed a contract with the Canadian General Electric Company for the entire electric equipment of the Guelph Electric Railway. The road will begin with five cars, and plying from the cemetery to the Agricultural College, and to Mr. Sleeman's brewery. The road will likely be running in three months.

THE managers of the leading Montreal hotels had a meeting this week in the St. Lawrence Hall, to form an association on the plan of the Hotelmen's Association of the United States. When the Montreal men are in line, it is proposed to secure also the hotel men in other cities. One of the main objects to be arranged for will be the dispensing with hotel runners on the steamboats and railway trains.

THE traffic returns of twenty-one of the principal lines of the United Kingdom for the week ending May 12th showed total receipts amounting to £1,411,463, or £121,945 less than for the corresponding week last year; whilst the mileage was greater. The aggregate receipts for the current half year amounted to £23,803,674, a decrease of £1,030,321 upon the corresponding period of last year.

A MONTREAL grocer, J. B. Desrochers, in business about a year, has been served with a demand in insolvency. He owes $3,008.——G. Brown & Co., tailors, reported in trouble last week, have assigned to the court, and file a list of liabilities to the amount of $3,214.

A STOVE and tin shop was opened at Galt in 1894 by W. J. Hutton, who had belonged to the milling firm of Hutton & Carr at Wingham. He took in with him A. Sutherland, a practical man, under the style W. J. Hutton & Co. It appears that the venture has not proved thus far a success, for they are asking an extension of time.

W. H. FOWLER, a young man of Amherst, N.S., who began business in the tinware line about two years ago, has assigned, making preferences of $1,379.——J. L. Strang, a trader of the same town, has also assigned with small local liabilities.——M. C. Young, in general trade at New Victoria Mines, N.S., for the last four years, has made assignment of his estate. He has been reported slow for a year past

JOSEPH W. RAY, hotel keeper, Oshawa, appears to have locked up too much capital some years ago in improving his hotel. Since then it has been a struggle to make ends meet. Not only has his building been mortgaged, but his stock and furniture as well. He owes nearly $19,000, and has nominal assets of $12,000 or thereabout. On next Monday his creditors will consider his position.

A VICTUALLER of Halifax, N.S., L. E. Parker, has made an assignment of his estate, with small local liabilities. He was formerly a milkman, and became a merchant (as above) eighteen months ago.——At Dartmouth, in the same province, J. N. McElmon, a contractor and lumber dealer, has also assigned. He was unfortunate last fall with a couple of schooners he owned, and also lost on a building contract in Halifax. His obligations amount to about $4,000 in all.

GANANOQUE freeholders voted on Tuesday last upon a by-law submitted by the council of that town. The proposal was the granting under specific condition of a cash bonus of $6,000 to the Thousand Island Carriage Company, limited, and exemption from taxes (except school tax) for twenty years. The vote stood in favor of the bonus being granted. The bonus is to be collected by a special tax and paid at a rate of $600 each year for a period of ten years, upon proof of a specified number of vehicles being manufactured.

QUEBEC Province gives a bonus of a cent a pound on butter which its dairymen make and export. The Commissioner of Agriculture for that Province, and some other gentlemen, interviewed Hon. Mr. Angers, at Ottawa. They asked that the appropriation of $20,000 to stimulate exportation of butter be applied first to the provision of suitable cold storage on cars, in stations and on steamship wharves.

THE Dominion Government has received a communication from the party sent out last year to prospect the coal oil field of Athabasca. Throughout a section of country about 300 miles by 100 miles there is every indication of rich deposits of oil. The party has made a boring at a point about 100 miles north of Edmonton. It is now 1,200 feet deep. There is a good flow of natural gas and oil, and it is expected oil and gas will soon be struck in quantities.

THE fires of last Sunday in Montreal were investigated by the fire commissioners. The cause of the burning of the building and stock of Boyd & Gillies, which it will be remembered was declared to be a total loss, with insurance of $33,000 on stock and $9,000 on building, was stated to be most probably the defective insulation of an electric wire in the cellar. At Wm. Thomas & Co.'s fur manufactory, St. Paul street, where the loss was between $8,000 and $10,000, the reason given for the fire was an overheated coal stove.

THE earnings of the Montreal Street Railway on Queen's Birthday this year showed a big increase over that day last year. In 1894 on the 24th the total earnings were $3,132.22, and on the 24th this year they were $3,937, an increase of $804.78. The company had 138 motors and 53 trailers on the different routes. But the Toronto road did still better. On Friday last it took in for fares $5,720.55, representing probably 130,000 or 140,000 passengers, where on the 24th May, 1894, the takings were $4,061.30, an increase of $1,659.25, or nearly 30 per cent.

ASSIGNMENT is made by W. L. Johnston & Co., saw-mill proprietors, New Westminster, B.C. Their assets have been mortgaged for a considerable time.— In the same town resides Charles McDonough, a storekeeper for more than twenty years, well reputed, and supposed to be worth nearly $20,000. We hear, however, that he is compelled to ask his creditors for an extension of time.——The creditors of McMillan & McLeod, grocers in Vancouver, have granted that firm an extension of time covering

a period of sixteen months. Less than a year ago they had a similar favor on an amount of $1,200. In January last they claimed a surplus of $2,839.

GRAIN shipments from Montreal since navigation opened have been quite large. The total shipment of wheat is 143,528 bushels, and of Indian corn, 145,900 bushels.

MESSRS. ANDERSON & Co., of Walkerton, who have purchased the furniture business of the James Hay Company, limited, at Woodstock, request of their patrons that in order to expedite shipments, orders for Walkerton goods may be forwarded to their Walkerton factory, and orders for Woodstock goods to the Woodstock factory.

THE Montreal city treasurer, Mr. Robb, has written to the chairman of the several committees, stating that this year they will have to keep their expenditure within their appropriations. He notifies them that any attempt to exceed them will be immediately stopped by himself, as he does not wish to assume the responsibility, as in past years, of paying more money than is voted to the committee.

THE season of ocean travel has opened well by the performance of the "Lucania" in breaking her daily average speed record, and crossing the ocean at an average rate of 22.01 knots an hour. Since it has been established that great speed means a stronger, and consequently a safer vessel, the travellers can rejoice without apprehension over every improvement that is chronicled.

THE people of Berlin and Waterloo, both which towns have active manufacturing interests, have projected what is called the Grand Valley Railway, to connect with the Canadian Pacific system. The Berlin *Record* says the line is contemplated to run from Brantford to Berlin, *via* Galt, thence to Waterloo, and then on through Wellesley to Listowel. The provisional directors have chosen the following officers: President, E. Carl Breithaupt; vice-president, Fred. Colquhoun; secretary, Herbert J. Bowman; Treasurer, J. E. Skidmore; Messrs. Burt, of Waterloo, and Bouteiller, of Berlin, together with the officers, were elected an executive committee.

LAST week the new marine insurance rates on grain went into effect. Boats trading to Lake Ontario, many of which are of A2 grade, will be most seriously affected. By the new tariff vessels are divided into two classes: Class 1 includes all line steamers, and A1 and A1½ steam, tow or sail vessels. Class 2 includes all A2 vessels. On class 1 the average is waived, while on class 2 ten per cent. extra is charged for waiving the average. The new rates are: To Lake Erie ports, class 1, 28 cents; class 2, 40 cents; to Port Huron, class 1, 20 cents; class 2, 40 cts.; Lake Ontario and Ogdensburg, class 1, 35 cents; class 2, 50 cents; to Montreal, class 1, 45 cents; class 2, 65 cents. After September 1, the rates for the low grade vessels will be materially increased

THE tobacco stock of Berryman & Nex, in Hamilton, has been seized by the bailiff. This is the second seizure that they have undergone this year.——In March, 1894, Wm. J. Wynn succeeded his brother in a cigar store and billiard room in Hamilton, but not having any experience in that line he did not prosper, and now he finds a bailiff in possession of his premises.——About three years ago a general store was started in Ruthven by J. E. Moore, with something less than $2,000 capital. Last fall he was hardly pressed by creditors, and to relieve himself sold his grocery stock to F. R. Smith. But this being insufficient to tide him over his difficulty, he has assigned.

THE Charles Stark Co. (Ltd.) suspended payment in July, 1892, with liabilities of $123,000. A compromise was then arranged on a basis of 72 per cent. Charles Stark then assumed the liabilities, and made his first and second payment. But he failed on the third. Then his brother and his banker came to his assistance and paid off the creditors at the rate of 50 per cent. cash. As security for advances, John Stark took a chattel mortgage for $11,000, and E. R. C. Clarkson, liquidator, for $56,000. These mortgages have been foreclosed, and the premises are closed, it is said, for the purpose of taking stock.——In 1877 Charles Cluthe, manufacturer of trusses, arrived in Hamilton from Germany. Four years later he settled in Toronto, and soon established a successful business, but after a time included the manufacture of surgical instruments. This proved to be a loss, and thus, with heavy expenses, he soon dropped behind in his payments. Now we hear of his assignment.

THE SITUATION.

Measures are being taken to ensure colonial representation on the Judicial Committee of the Privy Council. For that purpose, Lord Rosebery has a Bill before the House of Lords. It provides that any judge who has been a member of the Supreme Court of Canada, or of any one of the Australian colonies, may become a member of the Judicial Committee of the Privy Council, Whenever such judge is made a member of the Privy Council, he will by that fact become also a member of the Judicial Committee. This will bar outside appointments. The qualification for the new position to be opened to the legal talent of the colonies will be occupation of a judicial position in the highest court of the colony. In a supposable case, the qualifications of the appointee being incontestable, a short sojourn might be made to the Supreme Court of the colony as a means of technical qualification; but as this would have the appearance of artifice, it could only be resorted to on rare occasions. Something like this occurred in England, within the latter half of the present reign, and a great outcry was raised against it, the other judges who would properly have been eligible strongly protesting. Lord Rosebery's Bill is in a form which, for the present, would place the new honor beyond the reach of Hon. Edward Blake, whose name, in connection with it, naturally at once occurs. If Sir John Thompson had lived, he would doubtless have gone to the Supreme Court and thence to the Judicial Committee of the Privy Council. In any case, the choice would, perhaps, naturally fall on the Chief Justice of the colonial court. As the Bill does not provide a salary for the transferred colonial judge, it may fairly be presumed that the precedent of India will be followed. India is the only dependency of the Empire which now has judicial representation on the Judicial Committee, and she pays the salary of her judge.

While the British Government is considering whether it will join in affording aid to the Canadian and Australian cable, Mr. Larke, on behalf of Canada, has presented a plan to provide for the construction before the Sydney, N.S.W., Board of Commerce. The cost is put at about $8,000,000. This sum it is proposed to borrow on the credit of the countries interested. It is not deemed necessary that the guarantee should exceed 2½ per cent. on the loan. The estimates are somewhat rose-colored. At two shillings a word, the estimate is that not only would interest and working expenses be annually paid, but all the capital redeemed within twenty-five years. Seldom has there been a case in which so much depended on the accuracy of the estimates. Is two shillings a word a rate that can be maintained against actual or possible competition which may appear sometime within the quarter of a century? This query also involves the amount of the estimated business, for it is quite clear that an opposition rate of a shilling would cut off a very large proportion of the estimated business. In an enterprise of this kind some risk must be taken, and if all the interested governments concur, division will make the share of each comparatively small. Unfortunately not all the Australian colonies can be counted, one of them being wedded to a rival scheme. On the decision of the British Government, shortly to be announced, the fate of the scheme seems practically to hang. If favorable, the cable will speedily be laid; but if it be adverse, the discouragement will go beyond the loss of the proportion of the contribution looked for.

New Zealand is desirous of drawing closer her trade relations with Canada, and for this purpose she has despatched her colonial treasurer, Mr. J. G. Ward, on a mission to Ottawa. This incident marks the difficulty of commercial agreements with Australia and New Zealand; each colony has to be dealt with separately. If they were united federally, the feat would become comparatively easy. As a reason why some special arrangement should be made with New Zealand, it is said that she can supply us with a certain kind of wool suitable for our purposes. Wool, as a raw material of manufacture, might claim the right of admittance free, in which case the otherwise free trade farmer would be certain to object. But it is difficult to see that the wool of any one colony can be treated preferentially, even if the option were left to others or to all the world to come in on the same terms. But the same terms would scarcely be open to all; a commercial convention implies equivalents, and what is an equivalent for one is none for another. The most legitimate way of encouraging manufactures is the making of raw materials free. A proposal to make wool free could be understood; a proposal to admit wool on preferential terms from New Zealand would involve complications of which it would not be easy to see the end. Mr. Ward was to set out on his mission for Canada yesterday. When he comes he will be received, wherever he may choose to go, with welcome. Only good can come of these interchanges of views on the commercial relations of the colonies, even though no convention should follow. Some possibilities of trade before unknown are very likely to reveal themselves on these occasions. Another account, attributed to Mr. Ward, says that the proposed treaty looks to free trade in fruit, wine, and salt.

An arrangement is reported to have been made by which the Toronto, Hamilton and Buffalo Railway, when completed, will use the C.P.R. tracks from Cooksville to enter this city. The road will form a connection of the Vanderbilt system; what part the Canada Pacific will have in it is not yet plain. Between Hamilton and Brantford, a distance not on the direct line, trains have already began to run. Meanwhile the Grand Trunk has taken a step which will increase the travel between the United States and Toronto, by putting an end to the three-hours lay-over at Hamilton, The effect of this delay was to prevent thousands of Americans visiting Toronto. The Grand Trunk is to be congratulated on a tardy change which ought to have been made long ago.

Newfoundland may obtain a loan in England if the legal conditions insisted on can be complied with, a point on which some doubt is expressed. The amount which the London syndicate is willing to advance is £550,000. The statement comes from London that Mr. Bond's attempt to obtain a loan in Boston or New York failed; but if this be so, the negotiator covers his defeat by denying that he attempted to float a loan there. A silly story comes from Newfoundland to the effect that the British Government intervened to defeat the negotiations in the United States for a loan. The Republic as a nation is a borrower; but we are not aware that it has ever made a loan to a oreign country. The negotiations in England are with the house of Glynn, Mills & Currie.

IRRIGATION IN THE WEST.

The subject of supplying needed water to cultivable land in the interior of the Western States and territories is one of present and growing importance, and the supplying to the arid plains by artificial means water from streams at a distance, has passed beyond the experimental stage. The matter was deemed of sufficient moment to the United States to have a Congress called at Denver to consider it, for that country has an arid region of great extent, which is gradually being improved by this means. What has already been done in that region is that 3,630,000 acres of land has been placed under cultivation by irrigating. The first cost of doing this is placed at $29,611,000, or, say, eight dollars per acre, but the effect has been to increase the value of the irrigated areas from $77,490,000 to $296,850,000, a result which is sufficient to draw the attention of any cultivators whose land may suffer from lack of water.

In the territory between Medicine Hat in Assiniboia and Gleichen in Alberta is a district containing about a million acres which is badly in need of water. The Canadian Pacific Railway Company has it in view to benefit this tract in Southern Alberta and Western Assiniboia by distributing over it water taken from the Bow River. In pursuance of this idea, an examination of the district mentioned has been made, we understand, by experts. Sufficiently accurate data have not been obtained, however, to justify the company in beginning irrigation work on this land, on what would necessarily be a large scale. Possibly they may be waiting to see the result of experiments already in hand. In the neighborhood of Calgary, the Messrs. Alexander have done irrigation work on a limited scale, and the Messrs. Davis, too, have brought water some distance to their property in the same neighborhood. Other land proprietors thereabout, the Calgary Irrigation Company, Limited, who own several thousand acres, have begun their operations about twenty-four miles above Calgary, their source being the Elbow River, and have been successful enough to induce them to attempt an increased issue of stock, with a view to enlarging their operations, to benefit more distant lands which are settled upon. They can, their prospectus estimates, irrigate land thereabout for just about half the cost of a similar operation in the Colorado district of the United States. It is this company, by the way, which is antagonized by the Springbank settlers, who desire also to use the water of the Elbow River for irrigating purposes, and contend that there is not water enough for both. The dispute will likely have to be settled by the Government.

A good deal depends, in estimating the practicability of irrigating land, upon the nature of the soil to be watered. If it be porous to a great depth, so as to absorb water in great quantity, the fact would have an important bearing upon the cost of irrigation. Certain soils can be made productive by a small proportion of water, in which case an apparently insignificant ditch will provide an adequate supply for a great tract of country. Other soils again could hardly be kept properly moist if a good sized river full were sent through some thousands of acres. There are some tracts in which, to use the expression of an American, "Nature has to be assisted, sir." To such districts water must be supplied just as to other fields manure is necessary. Given a practicable soil and a mountain stream within reasonable distance, the melting snows of the mountains will supply water to the irrigating ditch at the very time it is needed—in midsummer, when the land is parched.

INSPECTION OF CATTLE.

Some cases of lumpy jaw have been found at Montreal by the veterinary inspector of cattle. In accordance with the usual practice, the animals were neither permitted to be shipped nor slaughtered. In the last two years 82 cattle were similarly condemned at Montreal. The recent incident has been magnified, in a cable to England, into the outbreak of a dangerous disease among Canadian cattle. For purposes of shipment, the precautions are sufficient to ensure safety. The slaughtering of lumpy jaw cattle for domestic use is forbidden, but there may be places where the rule is difficult to enforce. One advantage of large abattoirs is that the animals can be inspected, and, if unfit for food, condemned. At all the great abattoirs of the United States all animals are inspected before being slaughtered, and rejected if found unhealthy, though it is possible that the examination of swine is more or less imperfect. Canada is only just entering on the meat-canning business, and it behooves us to see that our inspection law keeps pace with new necessities as they arise. If there be any defects in the law, now is the time to remedy them; the present session should not be permitted to close without this being attended to.

WHAT IS A TRUST?

In the discussion of the question stated above, the attitude of those who justify arbitrary combinations of capital for commercial purposes, and those who, on the other hand, defend the public interest when menaced by them, is pretty clearly put in the columns of the New York *Journal of Commerce and Commercial Bulletin*. A gentleman in Richmond, Virginia, wrote as follows to that journal on 15th instant:

"In your courteous reply to my letter defending the American Tobacco Company, you say it is a trust; you are wrong—it is not and never was a trust. It is an incorporated company, subject to all the laws governing and controlling chartered companies. How is the company 'at the mercy of one or two persons, whose caprice or self-interest may any day precipitate its dissolution' any more than any New York bank of high standing is in like danger. Its trade marks and brands 'known and in demand all over the world,' have been created and established by great skill and much money, hence their earning power. But you say its methods of business are illegal. Its only method of practice complained of is that it gives special facilities and lower rates to those who will sell its goods exclusively. Has not this been the practice of trade since the beginning? Is it not universally practiced from the largest manufacturer to the smallest retailer? When did it become illegal? Wherein is it immoral? But this company has been formed by the consolidation and absorption of others to reduce expenses and increase receipts—yes, precisely as the *Bulletin* absorbed and consolidated with the *Journal of Commerce*, giving us a better paper than either.

"I hope you will excuse my continuing the subject; the people of Richmond are very largely interested in the subject; the people of Richmond want all the light they can get.

FRED. R. SCOTT."

To this the *Journal and Bulletin* replies: "A trust is the outcome of an understanding by which certain manufacturers agree to suspend competition among themselves and combine to regulate the output of their commodity and fix its price at their discretion. It is also calculated to give its members the control of the market for their raw material

and to enable them to buy at such rates as they may determine. Incidentally, by reducing the expenses of management and the cost of multiplied and competing agencies, it lends itself to economy of production. The purchasing public may or may not get the benefit of this saving; that depends altogether on the rate of profit the trust may choose to exact. If the monopoly be wisely administered the rate of profit which it imposes will be moderate, if not the monopoly will take all that it can get. The essential fact is that the sole inducement to the creation of a trust is to establish a monopoly, and that when it fails in this it resolves itself again into its constituent parts." And the example is cited of the Wall Paper Trust, which has had two or three predecessors that went to pieces for lack of internal cohesion, or from failure to shut off outside competition.

Now it is a well settled principle of the common law, continues the *Journal*, "that the people as purchasers of any commodity should have the full benefit of free competition among the sellers of the commodity in the open market. Any combination whose purpose it is to deny this is made in unlawful restraint of trade, whether it calls itself a trust or not. It does not matter whether the combination can be shown to have artificially raised prices, and it cannot be pled in its justification that it has lowered them. If it appears that the object of the agreement or combination was to control the output of the commodity, or to restrain the general trade or commerce therein, the purpose is an illegal one, and being obviously susceptible of abuse, its immediate results do not affect the case. When the combination appears under the form of a corporation owing its existence to the State, it becomes doubly obnoxious to the law. For, as the Court held in the case of the People of the State of New York against the North River Refinery: 'If corporations can combine and mass their fortunes in a solid trust or partnership, with little added risk to the capital already embarked without limit to the magnitude of the aggregation, a tempting and easy road is opened to enormous combinations, vastly exceeding in numbers and strength, and in all their power over industry, any possibilities of individual ownership; and the State, by the creation of the artificial persons constituting the elements of the combination, and by failing to limit and restrain their powers, becomes itself the responsible creator, the voluntary cause of an aggregation of capital which it simply endures in the individual as the product of his free agency. What it may bear is one thing; what it should cause and create is another.'"

After defining the character of the American Tobacco Co., whose capital is $25,000,000, and whose incorporation is placed in New Jersey, where it has neither factories nor depot, and which, it is said, has steadily pursued the policy of buying up competitors, however petty in character or worthless in equipment, the New York journal quoted declares that the company has changed the entire method and customs of the tobacco trade in the United States. No jobber can handle cigarettes made by the company without signing an agreement to receive them on consignment, and to sell them on such terms and prices as the company may fix in its list, receiving a stipulated commission for his services, and virtually agreeing to sell no brand of cigarettes but theirs. "If," concludes the *Journal and Bulletin*, "our correspondent fails to see that such a combination is illegal, we must refer him to Judge Folger's dictum, accepted in all the courts, that 'the rule is that agreements which, in their necessary operation, tend to restrain natural rivalry and competition, and thus result in disadvantage to the public, are against the principles of sound policy and void.' The distinction between such methods of doing business and the simple process of amalgamating two commercial interests into one without any exclusion of competition or monopoly of product, is too obvious to call for comment."

THE LOCAL IMPROVEMENT SYSTEM.

FOURTH ARTICLE.

The facts and figures about city properties that we have already given are startling, but take another case, that of Jameson (now North Lansdowne) avenue. The following assessments are running against that street:

Jameson Av.	Street opening, Dundas to Bloor	$19,506
"	Cedar roadways	10,660
"	Sewers.....	7,489
"	Sidewalks, not less than	3,000
		$40,655

There is about 6,000 feet of frontage, with almost $7 a foot assessed against it; with 28 houses on this part of the street, of which two are vacant. At the recent tax sale, lots on this street were put up for sale with arrears of taxes amounting to over $5 per foot charged up against them. For many of the lots there was no bid, and at the adjourned sale they went for considerably less than the taxes. All that has been said about the Pape avenue lots as to the permanence of these assessments applies to this and the other cases cited hereafter.

Another case in the same neighborhood is that of Margueretta street, from Dundas to Bloor. Here are the assessments against it:

Margueretta st.	street opening	$21,469
"	cedar roadway.....	7,204
"	sewer.....	8,262
"	sidewalks, not less than.....	3,000
		$39,935

There are in this case about 6,000 feet of frontage, with about $6.66 per foot charged against it, with 46 inhabited houses on the street and 5 vacant. Nearly thirty lots, comprising about a fifth of the whole frontage on the street, were offered at the recent tax sale with arrears amounting to from $4 to $5 per foot charged up against them. Very few lots attracted a bid. At the adjourned tax sale about a housand feet went for little more than a third of the taxes due.

Return to the east end of the city and take the case of Carlaw avenue. As late as the year 1892, when the "boom" had already passed over, and there were in the city thousands of vacant houses and unoccupied streets, the Council expropriated a mile and a-quarter of land for this street and constructed a sewer upon it. It does not appear that a cedar block roadway has been built. Why the Council has missed such a chance to spend money cannot be guessed. The assessments are:—

Carlaw avenue,	street opening	$46,770
"	sewer	21,450
		$68,220

The frontage on this part of the street is 18,200 feet. According to the new Directory, there is but one house on the whole 2½ miles of frontage. The tax is a little over $5 per foot, and before the street can hope to compete with others, sidewalks and paved roadway must be built at a further cost of not less than $80,000. To pay off these assessments in ten years, will take an annual tax of at least 90 cents a foot, which is equal to the interest at 6 per cent. on a mortgage of $15 a foot, or of $4,850 per acre if the lots are 150 feet deep; of $6,525 per acre if the lots are 100 feet deep.

Yet another instance from the west end. There is an assessment of $36,517 against Sunnyside avenue for street opening. By the time this street is graded, sewered, and

equipped with sidewalks and block paving, it will be in as bad case as any street before mentioned.

North Gladstone avenue is even a worse example. On this street the property-owners petitioned for works estimated to cost $14,000. The council, after letting the petition lie for a long time, took it up and actually spent $36,180 in merely buying land for the street. It will take many thousand dollars to grade this "avenue" and put it in condition to have many other thousands spent upon it in sewers, watermains, sidewalks, block paving and lighting. Many lots on this street were offered at the recent tax sale, but no one would take them for the taxes due.

Many other instances of abuse of the local improvement system, as bad as and worse than the foregoing, might be cited, but these are sufficient to prove the extremity of the folly of the real estate owners, and the almost criminal recklessness of the council in carrying out these virtually confiscating schemes. It is not as though the council had no warning of the trouble it was rushing into As long as six years ago, it became perfectly clear whither the local improvement system was tending, but there was no abatement of foolishness whatever until the exhaustion of the means of the "boomers" compelled them to cease petitioning. The city council kept on "initiating" works long after the stream of petitions had dried up; in fact, no longer ago than last summer a batch of improvements on the "initiative" plan had to be knocked on the head by indignant property-owners, in order that the remnant of their property might be saved.

MODERN OCEAN FLYERS.

To build and equip a steamer of the type of our modern trans-Atlantic passenger liners, to drive her through the water at twenty knots an hour, to officer her properly from engine-room to bridge—these are serious and costly undertakings. The growth in cost and maintenance has been in the main in proportion to the increase in speed. In 1880 or 1882, for instance, as we learn from an article in *Shipping*, £150,000 was regarded an outside price for a first-class mail steamer. In 1888 the Admiralty were willing to pay the White Star Company £130,000 each for two of their steamers, and for the "Aurania" and "Etruria" £230,000 and £310,000 respectively. But later boats cost more, the Southampton flyers, named after two great cities, exceeding the sum last named, the "Teutonic" and "Majestic" £400,000 each, while the latest two steamers of the Cunard line, the "Campania" and "Lucania," cost together over a million pounds to build.

What do they cost to run? is the next query of this writer, who answers, "a pound a minute," and explains thus where the money goes. In the first place, about 120 tons of steam has to be raised every hour. Every day, from 600,000 to 700,000 gallons of water are evaporated. To raise the required water to the needful pressure of 180 lbs. or 200 lbs. per square inch, the boiler furnaces must be fed with from 250 to 350 tons of coal per day, say, 3,600 tons the round trip. It costs a small fortune to get this put on board the steamer after it is bought. Then the wages list of the latest vessels amounts to, say, £2,000 per trip. "Every trip out and back must realize from £15,000 to £20,000, or result in a debit balance."

The raising of steam on board one of these floating palaces is a gigantic operation. Let one go down to the basement of the Toronto Street Railway engine room and into the boiler room, and see the maze of tubing and machinery that is supplementary to a set of modern engines. Then let him suppose this multiplied many times before he can form an idea of the propelling power of a new Atlantic liner. First, the contents of a dozen huge boilers has to be heated and evaporated, then it has to be condensed again through some twenty miles of condenser tubes, and three or four times has it to be evaporated and condensed before it has done its duty. "To drive a ship of 10,000 or 15,000 tons at the rate of 35 ft. or 40 ft. a second, this means a power to the screw of which its inventor never dreamt."

As to the earning capacity of such huge passenger vessels, we are told that with most of the largest shipowners, certainly with those who possess the finest and fastest vessels, the greatest profits arise from the Government subsidies for the transmission of mails. The aggregate sum paid in this way by Great Britain, France, Germany, Russia, and Italy, is more than three millions and a quarter annually, and of this Great Britain pays £657,000, or about twenty per cent. Thus the Peninsular and Oriental Company received £340,000; the Cunard Company, £50,000, and the Royal Mail Company over £90,000, the balance being distributed between many other lines.

It gives a rude shock, certainly, to the popular notion of the great earnings of the swell ocean flyers, with their crowds of tourists, to hear that, "even if well patronized by passengers, the fares are so comparatively low that they leave little margin for profit, whilst at present, as is only too well known, cargo is mostly carried at a loss." These mail subsidies constitute, then, it would seem, the chief revenue of the receiving companies. The balance sheets of ocean steamship companies show pretty clearly the profitless character of much modern ocean steam carriage. If it be said that England is overdoing the trade, it may easily be seen that other nations are no better off in this respect. The North German Lloyd is financially unsuccessful; in spite of an Imperial subsidy of £220,000 a year, it can show only a nominal profit one year, and a loss of £150,000 odd another year. The chief companies in France are also heavily subsidized—the Messageries Maritimes to the extent of £554,000, and the Trans-Atlantique, £446,000; but the returns to the shareholders in either case are exceedingly small, the earnings of the latter company being about one-fifth of the State subsidy.

COMMERCIAL HEALTH.

An American public man expressed the opinion, not long ago, when speaking on the subject of business success or failure, that every merchant should inscribe on his ledgers the old German proverb, "Long Sickness is Sure Death." In applying this proverb, he was not speaking of sickness of the body, though even in this application the proverb is probably not far wrong. But his meaning, we take it, was that when any business man or firm shows continued signs of financial illness, gets chronically behind in payments, looks upon the renewal of notes as part of the day's routine, and is not able to take a discount for cash, the death of that concern is certain, and indeed is not far off. Let every merchant beware of the first renewal note, and remember that it is dangerous to indulge himself with a second. The appetite for renewals will grow, like the habit of drink upon some men, until instead of honestly trying to make sales or collect outstandings to get rid of the deadweight and pain of that note, a storekeeper, moral coward that he is, will sign a renewal as an easy way out of the trouble, a sort of opiate, a commercial cocktail. It is as if a man who felt indigestion, or depression, or mental exhaustion, and who knew that the way to get cured was to go for a walk or a ride, to mow grass or to split wood, should attempt instead a lazy short-cut to health by taking a drink of whiskey. Both practices are dangerous, and should be avoided.

We have endeavored, on the occasion of his death, to indicate [illegible] week of May, 1893

Monetary Times, Toronto

R. H. BETHUNE,

LATE GENERAL MANAGER DOMINION BANK

Then let him suppose this multiplied many times before he | Both practices are dangerous, and should be avoided.

THE DOMINION BANK.

The report of the Dominion Bank shows smaller earnings than in the previous year, a result which was to be expected considering the character of the trade of the later twelve months. Still, to have earned about 12·64 per cent. on the capital, or 6·32 per cent. on capital and reserve combined, in such times as last year's, is to have done well. Four quarterly dividends of 3 per cent. each were declared out of the profits of the year, and the remaining $9,561 was carried forward. Deposits, we observe, continue to mount up; they reach now the large total of $10,146,000, but it is agreeable to find that the increase is mainly in those which do not bear interest. Circulation is at a higher point than at the corresponding date last year. The proportion of readily available securities is greater even than the last annual statement showed.

Naturally, the topic which was in every one's mouth at the meeting was the death of Mr. Bethune, the executive man whom the shareholders had been accustomed to see at every yearly meeting. The report of the board deplores his loss as the officer "mainly to whose energy and ability the bank owes its present position." The shareholders, too, adopted a resolution of regret expressive of the high esteem in which their late general manager was held by Canadian bankers and business men. The president and vice-president eulogized the deceased gentleman, with whom, necessarily, their relations had been so close. Last year, our readers will remember, we published for their benefit a likeness of the president of the Dominion Bank, who is still in the flesh. To-day we present them with an engraved portrait of the late general manager, from a photograph taken a year or two before his death.

THE LATE MR. BETHUNE.

The twenty-fourth annual meeting of the Dominion Bank is an opportune time at which to give a sketch of the career of the deceased gentleman who was for nearly five and twenty years its most prominent officer; the one to whom, as the resolution passed by its shareholders at their gathering on Wednesday last indicates, the bank mainly owes its success and its present high standing.

Robert Henry Bethune was born at Cobourg, Ontario, on the 5th of May, 1836. He was the second son of the Right Reverend Dr. A. N. Bethune, successor of Bishop Strachan in the Bishopric of Toronto; Dr. Bethune was a dignitary of the Church of England who commanded the respect and love both of clergy and laity. Robert was one of four brothers, two of whom had a bank training, and his early education was received at various private schools in the Province and at Upper Canada College, Toronto. At the age of seventeen or thereabout, his banking career began as a junior clerk in the Brockville branch of the Bank of Montreal. He passed through various grades in this and other banking institutions at various points in Canada, and was accountant in New York in the sixties. He served in succession at Cobourg, Guelph, Whitby and Hamilton, and later entered the service of the Quebec Bank, whose manager, at Toronto, he became in 1866.

Under Mr. E. H. King, general manager of the Bank of Montreal, Mr. Bethune received banking training which he in later years acknowledged to have been very valuable. And while in the service of the Quebec Bank he received instruction and suggestion at the hands of the late James Stevenson, which, added to his natural qualities of perspicacity, firmness and integrity, united to make him the sound banker that he was acknowledged to be.

In 1870 Mr. Bethune was offered the position of cashier of the Dominion Bank, which was being organized by a group of Ontario gentlemen, prominent among whom were Mr. James Austin and Mr Frank Smith. Although the venture may have seemed to some not without peril—for he stood well with the Quebec Bank, and the success of the new institution was uncertain—he never hesitated to make the plunge, having confidence in the character and influence of the gentlemen who were founders of the bank. Without delay he accepted the responsible post of cashier, and neither he nor his directors ever had cause to regret the step. The Dominion Bank grew and prospered in a manner unexcelled, we venture to say, in the history of Canadian banking. And its cashier lived to see its paid capital stand at a million and a half, its reserve at an equal amount, its assets at almost fourteen millions of dollars, while it earned and paid dividends of 12 per cent.

Having seen the fruition of his hopes and labors in the high standing of his bank, having established a reputation as a just, besides being a successful banker, in the enjoyment of the confidence and esteem of the community, Mr. Bethune was stricken down with mournful suddenness, and after but a few days' illness passed away, on the 27th March in the present year.

We have endeavored, on the occasion of his death, to indicate some of the qualities which made Mr Bethune an estimable citizen as well as a valued bank officer. And to those who knew him well there is no need to dwell upon the solid features of his character. Almost a quarter century ago this journal said of him [MONETARY TIMES, December 2nd, 1870], in noticing his choice by the Dominion Bank promoters: "Mr. Bethune brings to the responsible post of cashier an unblemished reputation as a man, good abilities as a financier, undoubted qualifications as an accountant, and an amount of experience, acquired as an agent of the Quebec Bank, that will prove serviceable in the onerous task of organizing and imparting system, vitality and vigor to the new institution." Our favorable forecast of that day has been fully borne out by his career. We may here quote from tributes that have been paid to his worth by business men best able to judge. A Montreal banker of experience and eminence wrote of the deceased gentleman, upon hearing of his death, "I have heard the news of Bethune's death with great regret. We all esteemed him highly. We have lost a valuable member of our fraternity, for he was a very strong man." And at a special meeting of the executive council of the Canadian Bankers' Association, held in Montreal on the 28th March, 1895, the day after his death, a resolution of condolence was passed by that body, from which the following is an extract:

"A man of few words, clear insight and correct judgment, he promoted by sound and consistent banking principles the best interests of the institution which he served so loyally and successfully, and he was at all times ready to forward reforms in banking practice and to co operate in any worthy movement connected with the banking interests of Canada."

DEPARTMENT STORES AGAIN

Notwithstanding the plaints and protests of orthodox merchants, the departmental store continues to exist, and more than that, apparently thrives and prospers. A great part of this world's commerce is carried on with the object of adorning woman kind. Paris, Manchester, Bradford, Nottingham, Belfast, Lyons, Crefeld, Milan, Zurich, Grenoble, nay, even Yokohama and Canton, and other distant cities bend their best energies to this end. In all our towns the most pretentious retail stores have always been devoted to what we call the dry goods trade And in no business has there been keener competition. Price reduction is not always an effective way of meeting competition in the dry goods trade, for women look upon price as the natural criterion of quality. And quality is the all important consideration. Other means had to be sought out, and among those adopted was the idea of the departmental store.

Although a woman will eye suspiciously dry goods marked down to half price, and feel awkward when clothed with dress goods that have adorned the bargain counter, she has not the same feelings toward teas, sugars and other staple articles of the grocery trade. And here the trap was laid. From the prices advertised, and we have no reason to believe the advertisements are mere puffery, departmental storekeepers do not find the grocery counter a paying one. And yet it is retained. Women who have come to take advantage of a bargain in sugars cannot resist the siege of temptation through which they must pass to reach the grocery counter. What is lost through one source is made up through another. To have one's trade subjected to unduly severe competition is a hardship, but to have one's trade used as a footstool for something else is beyond endurance. And yet this is the position of the grocers to-day.

THE WHEAT SITUATION.

It is impossible to account satisfactorily for the recent sharp advances in wheat. Bull and bear reports are so conflicting, and both so plausible, that one gives up in despair an attempt to measure the situation by following the crop reports and the expressed opinions of so-called authorities. The bulls have it that the States of Missouri, Illinois and Southern Indiana will only yield half a crop, so serious has been the damage by frost in these districts. If we were to admit the truth of this estimate, and it is probably exaggerated, it is difficult to see why this should cause any sharp advance in the market. The area included in this frost suffering district does not yield an average crop of 100,000,000 bushels, and the loss of half this amount before harvesting is not a large factor in considering the world's supply. The crop of Kansas also suffered, according to report, very severely by frost, but the damage had occurred previous to the recent sharp advances in price. From Indiana comes a strange story of the growing plant being destroyed by the Hessian fly, which story has not as yet been authenticated.

The visible supply of wheat on May 25th was 54,244,000 bushels, or a decrease of 2,240,000 bushels from the previous week and 7,086,000 bushels less than the visible supply at the same period a year ago it was indeed 18,438,000 bushels less than the visible supply in the last week of May, 1893

Ontario wheat at $1.02, the quoted price at the time of writing is still below the average of a May market. Taking the average of Toronto prices in the last week of May since Confederation, we find $1.10 is the normal price of No. 1 Ontario winter wheat. The average price for the first ten years of Confederation at the same period was $1.30 per bushel; the quotations of the last ten years of Confederation yield an average of only 89c. per bushel. Three times within 28 years has the May market witnessed Ontario wheat over the $1.50 mark. In the year 1868, wheat was quoted $1.80; in 1872 the price was $1.53; while in May, 1877, quotations ranged so high as $1.80 per bushel.

The improvement in wheat has come too late to materially benefit many farmers, and so far as producers are concerned, the crop of 1894 must pass into history as a failure. An average by months, of the prices paid on the Toronto market during the season, yields the following:—October, winter, 50c.; spring, 52c.; Manitoba, 62c.; November, winter, 53c.; spring, 55c; Manitoba, 66c.; December, winter, 59c.; spring, 60c.; Manitoba, 73c.; January, winter, 59c.; spring, 62c.; Manitoba, 78c.: February, winter, 60c.; spring, 63c.; Manitoba, 79c.; March, winter, 63c.: spring, 65c., Manitoba, 81c.; April, winter 69c.; spring, 71c.; Manitoba, 83c.; May, winter 87c.; spring 87c.; Manitoba 97c. per bushel. The months in which the wheat was marketed by the growers yielded very poor results, Farmers are not alone in their complaints; for so hopeless seemed the future, that dealers were only too anxious to part with their stock at an advance of several cents on the purchase price, and only a fortunate few will make any considerable profits by the upward turn of the market.

HIDES STILL FIRM.

With hides at 3½ cents the pound there was good reason for an advance. But it is just a question whether 8 cents is not too high a quotation for the Toronto market. Toronto hide merchants are, of course, not to be blamed for this over-valuation of hides; the blame rests with the American speculators, for it is no longer a matter of doubt that there is an intense speculative influence at work in the present hide situation. Speculators have, as is their custom, taken hold of a market rising by its own inherent strength and have pushed it up beyond a normal basis. That this fact is apparent to the tanning industry is seen by the conservative policy which tanners are uniformly pursuing. Those tanners who were fortunate enough to have considerable stocks on hand have been using them in a careful way, while the tanners caught without supplies have curtailed production rather than fill their vats with over-valued hides. A decrease in production means, in the natural order of events, an increase in price. In the leather trade, as in the boot and shoe trade, higher prices are certainties of the coming weeks, although hide quotations remain steady or even decline.

BOOK SELLING.

In almost every branch of merchandising there has been a tendency in recent years towards reduced profits. And concurrent with this has been a steady reduction in the price of commodities. So that the outcome of the turnover of a certain quantity of goods has been not only a smaller volume of money, but also a diminished percentage of profit upon that smaller volume of money. Perhaps no trade has felt these tendencies more than book selling. Where a merchant was accustomed to sell ten years ago 1,000 books for an average of one dollar each, he now gets 75 cents or possibly 50 cents each. And where his profit was 30 or 40 cents for every book, it is now more likely 20 cents or 10 cents. Thus instead of $300 or $400 profit on 1,000 books, he has to be content with $200 or even $100. The most of the books he sells now, indeed, are 25 cent or 40 cent books, and on these he makes only 5 to 10 cents each.

This result has been brought about in part through the competition of departmental stores, which used books as a leading article and were not particular to exact much profit upon them. Books, such as paper covered novels, are now-a-days sold at 7 or 10 cents each, that used to be considered marvels of cheapness at a quarter dollar. Quite recently there has been made a decided "cut" in the price of American books by a house that has heretofore maintained the regular retail prices with great firmness. This has created much discussion and some dismay in "the trade." The cause of the reduction is very frankly avowed by the house making it. It was to meet the competition of what are known as department stores.

A New York journal, commenting on this proceeding, questions if the department stores will account for the present condition. It is admitted that there has been a substantial change in the terms on which the book selling business is conducted, "a change which is likely to be lasting and to extend rather than contract. It is not, however, quite so novel or revolutionary a change as it appears for the time being." The reduction in the retail price of books is a process that has been going on with more or less regularity, but over long periods, with obvious certainty, pretty steadily ever since copies of manuscripts made by slaves and freedmen were sold in Greece and Rome. Since the invention of printing and relatively advancing peace and order in the world, the process has been more continuous.

The argument of the journal in question is that "Books, in fact, have become a staple product in every civilized land. They are subject, so far as concerns the cost and conditions of their productions and distribution, to forces of the same sort as those which prevail in corn and cotton, in rails and rubber goods—in everything that supplies a growing want of the increasing population of the world. And the chief of these forces is the intensified competition which always and everywhere follows a steadily extending demand, and which in its turn tends still further to increase the demand." And the conclusion reached is, that while there are very marked peculiarities in the book trade, "It would be very foolish to suppose that the book trade, in all its branches, will not gradually adjust itself to the changing conditions of the current time. It has done so with like conditions in the past, and the intelligence, enterprise, ingenuity, and energy of the trade are not diminishing. On the contrary these qualities are steadily increasing." With which complimentary deduction the sorely tried bookseller must, apparently, be content.

MONTREAL BOARD OF TRADE.

The matter which most particularly engaged the attention of the council of the Montreal Board of Trade at their meeting on Tuesday last, was the provisions of the bill for the incorporation of the South Shore Suburban Railway Company. This bill proposed that, in pursuance of the general scheme, a railway should be built on the guard pier of Montreal harbor, and also that a bridge should span the St. Lawrence at or near St. Helen's Island, in front of the city. The proposal met with vigorous resistance at the hands of the council, who appointed the president of the board, Mr. Cantlie, and the treasurer, Mr. Charles F. Smith, to proceed to Ottawa and oppose the bill in committee. It is significant that the Board of Harbor Commissioners was also rigorously opposed to the scheme. Their chairman, Mr. Bulmer, was sent to Ottawa to prevent the granting of the charter, on the grounds that it would interfere seriously with the harbor improvements, and that it would be an infringement upon property to the detriment of the harbor. Other gentlemen, representing shipping interests, also addressed the committee in opposition to the bill, which the railway committee threw out.

A suggestion made to the board by the London Board of Trade, that it should be compulsory for bankers to register their liens within, say, thirty days, was discussed, and referred to the insolvency committee, by whom the question had already been considered in relation to insolvent estates. The council ordered that the Postmaster-General be telegraphed to, expressing its anxiety that the "Labrador," of the Dominion line, being a fast boat, should carry the mail from England on Wednesday, 29th inst.

VIRDEN BOARD OF TRADE.

The report for the year 1894 of what used to be known as the Board of Trade of the County of Dennis, but which changed its name last December to the Virden Board of Trade, comes to us in pamphlet form. Noticing the abundant crop of oats, potatoes and feed as being some compensation for the low price of wheat, the report goes on to congratulate its members on some things for which they may be thankful. For instance, immunity from disastrous fires; absence of noteworthy failures among merchants or traders; the low rate of mortality—there had not been a death from natural causes in Virden, a place of 1,200 inhabitants, for a period of eight or nine months last year. Besides these is the fact that they have got what they long wanted in Virden, a branch of a chartered bank, the Union having opened there recently. The officers of the board for 1895 are:

President—B. Meek.

Vice-President—J. F. Frame, M.P.P.

Secretary-Treasurer—George H. Healey.

Council—R. Adamson, W. J. Kennedy, D. McIntosh, H. H. Goulter, B. F. Foster, W. J. Wilcox, R. E. Trumbell, J. A. Merrick, D. McDonald, E. Bunt, D. Fraser, W. H. Hall.

LANCASHIRE INSURANCE COMPANY.

The Lancashire is to be congratulated on a successful year in 1894. By the general accounts lately to hand from Manchester, England, the return for the twelve months ending 31st December, 1894, is very satisfactory. After paying the usual dividend, the management has carried £50,000 sterling ($250,000) to the fire reserves. The business of this company is a very large one, the total income for last year amounting to

$4,331,380, and the total resources of the Lancashire, including subscribed capital, exceed twenty millions of dollars. The Canadian business of the company, already large, is still growing. The head offices of the Canada branch, under the management of Mr. J. G. Thompson, situated at the corner of Yonge and Colborne streets, in Toronto, have recently been enlarged and refitted. The company now has one of the handsomest and most commodious suite of offices to be found in the city, giving much needed room and convenience to the staff.

SHIP-BUILDING IN SCOTLAND.

Scottish ship-building for the present year keeps up very well, according to figures just published of the output of Scotch shipyards thus far in 1895. The tonnage built on the Clyde this year was but a trifle below the average first third of the last ten years, in the matter of aggregate tonnage built, that average being 84,500 tons in the four months, while in 1895, thus far 81,434 tons has been built.

Scotch ship-builders launched in April, 26 vessels of 29,146 tons—22 steamers of 27,057 tons, and 4 sailing vessels of 2,089 tons—as compared with 27 of 20,176 tons last month, and 33 of 33,781 tons in April, 1894. To the total, the river Clyde contributed 20 steamers of 26,478 tons and 4 sailing vessels of 2,089 tons; the Forth a paddle steamer of about 480 tons; and the Dee a steamer of 99 tons. The April totals and aggregates follow :—

	April. tons.	Four Months. tons.
In 1895 were built.....	29,146	91,106
" 1894 " "	33,781	97,972
" 1893 " "	20,670	74,661
" 1892 " "	40,347	145,492
" 1891 " "	31,948	120,942
" 1890 " "	47,699	145,524

Of the total tonnage 2,585 were for the Thames, 320 for the Humber, 12,160 for the Mersey, 480 for Bristol, 400 for Wales, 3,382 for the Clyde, 3,419 for East of Scotland ports, 5,400 for Russia, 700 for the East, and 100 for West Indies. A vessel of 200 tons was returned as for a foreign Government. Of the steamers, one was over 5,000 tons, two between 4,000 and 5,000 tons, one between 3,000 and 4,000 tons, one between 2,000 and 3,000 tons, one between 1,000 and 2,000 tons, three between 500 and 1,000 tons, eleven between 100 and 500 tons, and two under 100 tons.

This year's totals of construction on the different Scottish rivers are given below, with number of vessels and the tonnage :

	Clyde.		Forth.		Tay.		Dee.	
	Ves.	Tons.	Ves.	Tons.	Ves	Tons.	Ves.	Tons.
Jan.	8	17,971	1	1,550	1	250	1	2,197
Feb.	14	17,930	2	885	1	350	2	651
Mar.	21	16,966	5	2,410	..	..	1	800
April	24	28,567	1	480	..	..	1	99
	67	81,434	9	5,325	2	600	5	3,747

INSURANCE NOTES.

The director of the Cleveland fire department, Mr. Palmer, has given it as his opinion that 35 per cent. of the fires in that Ohio city in past years have resulted from improper construction of buildings and lack of care of premises.

The Fidelity and Casualty Company has discontinued its advertisement insurance department. Mr. Seward informs the *Chronicle* that he found the policy which he proposed unsatisfactory to advertisers, and being unwilling to grant as broad a policy as was desired by them, he concluded to abandon the advertisement insurance scheme.

"The Massachusetts legislature has passed a bill which prohibits life insurance without medical examinations. Thus do the most enlightened States put blocks under the wheels of progress. Just as those most competent to judge are doubting the value of medical examinations in life insurance, a State legislature steps in and utters its 'Thou shalt not!' What is the use of discussing a scientific question when it is practically settled by men who know nothing about it?"—*Hartford Insurance Journal.*

"This is the fourth incendiary fire this spring," writes an Exeter correspondent of the Seaforth *Expositor*, describing an incipient fire discovered by a Hensall man who was driving last week through the former village, at three in the morning. The building thus found on fire was T. H. McCallum's tannery, but not much damage was done to it. The same miscreant appears to have set fire to the Grand Trunk engine house, which was consumed the same morning. Why do not the Exeter people devise means to capture and punish some of these incendiaries ?

A movement towards amalgamation of some of the British life offices has begun, and appears to be gathering strength. Early in May, a resolution agreeing to amalgamate was passed by general meetings of the members of the National Life Assurance Society and the Mutual Life Assurance Society. And now, the *Finance Chronicle*, of London, understands the old Pelican and the young Scottish Life offices are to be amalgamated, the former, as the larger and more venerable, to absorb the younger but more energetic. Mr. Tucker, the actuary and secretary of the Pelican, will retire, and Mr. James Sorley, actuary and secretary of the Scottish Life, will take the post of chief officer of the united company in London, and Mr. David Paulin, with the Scottish Life directors, will have the management of the company in Edinburgh.

FOR GROCERS AND PROVISION DEALERS.

Boring for salt rock at Upham, King's County, N.B.

A creamery is to be established near New Westminster, B.C

Stratford bakers advanced the price of bread to 12 cents per loaf.

St. Thomas grocers will close their stores early during the summer months.

St. Stephen, N.B., merchants are now unanimously in favor of early closing.

The 1895 yield of Grecian currants is expected to be in the neighborhood of 140,000 barrels.

The Hankow tea market has opened high, and latest reports quote low grades very strong and firm.

Vancouver fruit dealers intend to resist a Sunday closing by-law recently passed by the municipality.

By a recent decision of the Minister of Marine and Fisheries, legally taken oysters may be sold in the close season.

To a grocery firm, W. H. Gillard & Co., belongs the honor of the first shipment over the new railroad, the T., H. & B.

"Many a man who prays for rain," says the Manayunk Philosopher, "is too mean to buy a garden hose, and too lazy to use it if he had it."—*Philadelphia Record.*

A number of Halifax merchants, it is said, have forgotten to pay the duty upon West India cigars before selling them. The customs officials will direct their attention to the matter.

The Bridgetown Cheese and Butter Company, limited, have applied for incorporation in the Province of New Brunswick. The amount of the capital stock is to be $2,000.

The holders of prunes, in spite of bullish crop reports, will not apparently make any immense profits. The yields of France and California promise to be fully up to the average.

A New Westminster, B.C., Cold Storage Company, we are told, intend making a shipment of fresh spring salmon to Europe *via* Australia. It should be marked "Fall Salmon" in order to sell as fresh.

Montreal bakers realize that it is impossible to sell bread at present prices in view of the recent advances in the flour market. Some bakers have advanced prices 3 cents a large loaf, while others consider a rise of 2 cents sufficient.

Yarmouth fish dealers are doing a good trade with Boston. A week ago last Saturday 1,507 baraels of mackerel, 1,126 crates of lobsters, 15 boxes of salmon, and 100 cases of canned lobsters, valued at $19,000 were shipped by steamer.

Maritime Province fish exporters have been paying a duty on smelts and bass sent into the United States under protest. A decision has been given in favor of those who fish in salt water, and they will receive considerable money by way of refund.

The Listowel Cheese Board opened this season with a largely increased attendance of salesmen and buyers. Mr. Geo. Struthers, of Moncton, was elected president, and Mr. Wm. Climie was re-elected secretary. At the first session some 2,300 boxes were offered; prices ranged from 6 3-16 to 6½c.

The first shipment of lobsters from the preserving factory, says the Dartmouth correspondent of the Halifax *Chronicle*, was put aboard the "Halifax City," Saturday. It consists of 263 crates, or over 16,000 crustaceans. This is merely done as an experiment, and if the venture is a success there is no doubt but a very profitable business will be carried on in the future.

Byron Sturtevant, a grocer of Port Clyde, Me., is said to be the most obliging man in Maine. Recently one of his neighbors wanted his horse for the day. Mr. Sturtevant needed the horse in his delivery wagon, but he could not say no to his neighbor, so he let him have the horse, and wheeled his own groceries about town to customers on a wheelbarrow, going in some cases as much as a mile.

The pork-packing factory at Pottersburg, near London, does not receive that consideration at the hands of the neighboring residents one would think so important an industry deserves. There may be some offence to the aesthetic tastes of the residents in the nearness of a

vulgar pork factory, but we cannot believe the management guilty of carelessness in allowing nauseous smells dangerous to the public health.

Samples of new Japan teas were received in Toronto last week, while first shipments having been landed in Vancouver on the 22nd, may be expected on this market within a very few days. The quality is very similar to that of last year, although some merchants are inclined to think it somewhat inferior. Prices will range slightly above the values of last year's first shipments, although it is impossible to tell what turn the market may take later in the season.

Latest advices from Calcutta report the first auction sale of the season, amounting to 10,000 packages, against 6,000 packages same time last year. Broken and Pekoe Souchongs were 1d. per lb. higher than last season's opening rates, but common Pekoes and broken Pekoes neglected and fine teas in small supply. The season was reported as late, in view of colder weather having retarded growth of plant in districts ordinarily very forward.—*N. Y. Journal and Bulletin of Commerce.*

At last British Columbia fishermen have heard the answer to their many prayers at Ottawa. The concessions asked for in regard to the size of the meshes of nets have been granted and certain changes made in the time of fishing. The provision of former legislation in regard to the disposal of offal is to be suspended during the year. The British Columbia Oil and Guano Company, Limited, is erecting and equipping a factory on Lulu Island for the manufacture of oil and guano from the fish offal of the canneries, and when once this is in operation it is to be hoped this much vexed question will be finally determined.

The committee of coffee factors appointed for estimating the crop for the year 1895-96 report as follows, under date of Rio de Janeiro, March 19th: "Heavy rains during the last three months have contributed to hasten development of seasonable and late fruit, but have hindered the production of cafe das aguas, which is almost a total failure. The committee accordingly believes that the future crop will be of good quality unless injured by rains during the process of gathering and drying. The quantity available for exportation will, it seems, hardly exceed 1,750,000 bags, subject, however, to be increased by the remainder of the previous crop, whose shipment is delayed by various well-known causes.—*N. Y. List.*

Mr. Wilhelm Schroeder, of Amsterdam, furnishes us the following statistics of the Government in Holland:

April, 1895.	Tons Nutmegs,	Mace.	Cloves.	Pepper.
Landed	89	22	5	196
Delivered	79	43	14	149
Stocks May 1, 1895	1,168	438	713	8,154
" " 1894	1,108	415	708	5,405
" " 1893	711	342	343	4,585
" " 1892	806	335	464	1,627

The next quarterly sales of nutmegs have been postponed until middle of June.—*N. Y. Journal and Bulletin of Commerce.*

DRY GOODS JOTTINGS.

Foreign glove markets are very firm, as a result of a stiffening in the price of raw material.

When will you find a better time than now to bring out your stock of negligé shirts? Later on in the summer competition will cut prices down and with them profits.

The strike in the cotton factory of the Wm. Parks Company for an increase of 10 per cent. in wages, has ended in favor of the employers, and the men return to work at former wages.

Good authorities estimate the coming season's cotton crop of the Southern States at about 7,500,000 bales. This is a somewhat small yield, as compared with last year's excessive yield of almost 10,000,000 bales.

Cycling caps, coats, knickers, hose, ties, boots, sweaters, and the like, all illustrate the hold this popular form of exercise has upon the public. Are you catering to this class of trade or leaving it to some one else?

In many of the London churches last Sunday appeals were made to the congregations to do their shopping before 6 on Saturdays. This taking hold of practical questions by the church in the interest of humanity must do good

J. Matheson & Sons have fitted up their woolen mills at Waugh's River with extensive and improved machinery, and will go very extensively into the cloth and yarn business. There will be quite a hum in and around Balfron this summer.—*Truro News.*

The brightness of the prevailing colors seems, according to many, inclined to bring about a reaction for the fall. After several seasons of strong shades human nature craves a decided change. Parisians are already feeling this, hence their sudden freak for grey, which is probably only a passing fad.—*Dry Goods Economist.*

The Montreal *Gazette* is informed that Mr. James Jackson, general manager of the Dominion Cotton Mills at Hochelaga, and Mr. Jas. Dolphin, superintendent of the Magog branch, left on last Saturday for England on a nine weeks' business trip. Both gentlemen will visit the cotton manufacturing centres of Britain, in order to see the latest improvements, with a view of adopting them in Canada.

With returning prosperity we hear of strikes and rumors of strikes in the textile mills. Operatives accustomed to factories working on half time imagine that employers must be making enormous profits with looms running full time. Never was there a greater mistake. Competition in the Canadian textile trade at the present moment is intensely severe, and only a small wave of labor troubles is needed to send trade back into its former depression.

The 1894-5 wool season, from the Australasian point of view, has been a dismal failure. The average price realized per bale during the season just closed is 19.63 per cent. lower than the average price of last season. The inferior quality of the clip now almost completely marketed will account for say 2½ or 3 per cent. of this fall in price; the remaining decline of 17 per cent. can be attributed only to laxity in demand, the outcome of industrial depression.

With the craze for crepons come crepon prints. They are exceedingly pretty, and from a distance of several feet have every appearance of silk. The crimps are not woven into the print, but are put in by an entirely new chemical process. They are not expensive, costing only about 50 per cent. more than the ordinary wide cloth prints. John Macdonald & Co. recently received two shipments, and yet now have comparatively few pieces left. They are shown in a variety of patterns.

Duck suitings, as every one knows, were all the rage last summer. They are stiff and not so comfortable as prints, delaines or muslins, but withal for outing wear, for lounging on the sands or boating, they are perhaps unequalled by any other dress goods material. Originally an American idea, and the product of American factories, they have been taken up by English manufacturers, and Toronto houses this year are pushing the English goods with vigor. There is not likely to be the same demand for plain colors this season as last, spots and figures having apparently displaced these.

PRESCRIPTIONS FOR DRUGGISTS.

Quinine and whiskey are now put up in the same bottle. That's to insure the absent-minded man from forgetting the quinine.

The German Consul in Constantinople, in a report, which has just been published, observes that the importation of quinine into his district has diminished in the course of the last ten years from about 35,000 to about 25,000 ozs. per annum.

The following drugs are reported by the New York *Drug Reporter* as having advanced in price: Quinine, quicksilver, mercurials, spermaceti blocks, balsam tolu, camphor, shellac, cloves, naphthaline balls, pepper. On the other hand, cocaine, menthol, and asafœtida have declined.

The United States customs' officials in Montreal, announces an exchange, have unearthed a gang of smugglers whose headquarters are in Montreal. They are engaged in smuggling phenacetine and sulfonal across the border. The drugs are placed in hollow walking sticks and umbrellas, which are carried across by members of the gang, unsuspected by the customs officials.

The following are the dates fixed for the chinchona bark sales to take place in London and Amsterdam during the current year:—

London.		Amsterdam.	
May 28.	September 17.	.....	October 3.
June 25.	October 15.	June 13.	November 7.
July 23.	November 12.	July 18.	December 12.
August 20.	December 10.	August 29.	.....

Reviewing the shellac situation the *Reporter* says: "Every indication points to higher prices. Stocks are the lowest throughout the world that they have ever been; the primary market only offers goods that are sure to arrive hard blocked and practically unfit for jobbing purposes, and the London stock, May 1, was but 24,505 cases, 12,767 cases of which were orange. A scarcity of orange in that market is looked for before the end of the year."

It is said that there is at present some quantity of linseed oil on the market adulterated with liver and blubber oils. To detect this admixture, ten parts of the oil and three of commercial nitric acid are mixed thoroughly in a test tube, and the two layers allowed to separate. If the fish oil be present, the oily layer is dark brown to black in color, while the acid has a deep orange-red color. If, however, the oil be pure, the oily layer is only a dirty green, and the acid a golden yellow color.—*Seifensieder Zeit.*

The Chemists' Co-operative Society (Limited) of London has been organized, with a capital of £200,000 in 100,000 seven per cent. cumulative preference shares and 100,000 ordinary shares of £1 each. The company has entered into a contract for acquiring 40 establishments, the net profits of which for the last complete year are certified to have amounted to £11,905. The company has also agreed to purchase 36 other businesses, subject to the net profits being certified to be not less than £11,000 per annum, and it acquires certain leasehold premises. The purchase price is fixed at £122,500, payable as to £70,000 in cash and £52,500 in shares at the price of 21s. per share. Seventy-five thousand preference and 75,000 ordinary shares are now offered for subscription at a premium of 1s. per share

ANSWERS TO ENQUIRERS.

South West, Windsor.—Yours is a question that cannot be answered by Yes or No. We prefer free trade, but perceive that free trade cannot be got under the circumstances. We are not so sure as you seem to be that Sir John Macdonald was a "hide-bound protectionist," as you call him. It was he who, during the debates on the National Policy, said that the manufacturers who asked for protection wanted all of it they could get. They were, Sir John said, like the squaw, who said of whiskey that "a little too much was just enough."

A. T., Hamilton.—The table on page 1486 of our issue of 17th was compiled from pages xxxii to xl. of the Trade and Navigation Returns for 1894-5. The heading of the column, "Excise, etc.," is not accurate, and should have been rather "Other Revenues" than Customs duties. It does not mean Inland Revenue or Excise, for to show Hamilton's excise revenues for a whole year to be only $1,227 would be manifestly wrong.

BOOKS RECEIVED.

Steam.—The handsome cloth-bound volume of nearly two hundred pages under this title is issued (28th edition) by the Babcock & Wilcox Company. It has a series of papers on steam-generation, and is intended to show, by illustration and certificate, the advantages of the water tube boiler.

New York Insurance Report.—We have received Parts II., III., and IV. of Mr. Pierce's Report for the year 1894, devoted to Life, Casualty, and Assessment Assurance, Title, Credit, and Mortgage Guarantee, respectively. Some 160 pages at the close are devoted to Receivers' statements, Attorney-General's opinions and decisions upon insurance by the N.Y. Court of Appeals.

The first number of a new weekly, devoted to the manufacturing and financial interests of the United States, was to be issued from Court Square, Boston, last week, under the name of the *Financial and Industrial Record*.

The seventh yearly issue of that useful pocket companion (with the corners rounded), *The Indicator's* Chart of Regular Legal Reserve Life Insurance Companies, has been sent us. It shows the condition of the companies and the business done for each of the five last years ending with December.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, May 30th, compared with those of the previous week:

Clearings.	May 30.	May 23.
Montreal	$10,811,959	$11,294,036
Toronto	4,804,425	5,800,176
Halifax	937,598	1,048,336
Winnipeg	881,908	952,733
Hamilton	512,127	626,522
Total	$17,898,017	$19,721,803

Aggregate balances this week, $3,237,564; last week, $3,003,893.

This week represents but five business days' transactions, Queen's Birthday holiday coming last Friday.

—That shrewd observer, Chauncey M. Depew, has thus stated one of the paradoxes of the last quarter of the present century. It refers to industrial economics, and it is this: Every artisan and mechanic, and the laborer in every department to-day, with shorter hours of labor, receives 25 per cent., and in many cases 50 per cent., more than he did thirty years ago. While he receives thus one-third more than he did thirty years ago, his dollar will buy in clothes and food twice as much as it would have done thirty years ago. "One would think that the laborer ought to be supremely happy when he compares the past with the present, and that beyond his living he ought to be laying up in the savings bank the fund which would speedily make him a capitalist. And yet he feels a discontent which his father thirty years ago, with one-third the wages and his dollar buying only half as much, never knew."

—Mr. T. C. Patteson received a cable message from England, last week, announcing the death of Col. C. E. Bignold, secretary of the Norwich Union Fire Society. This gentleman, who at the time of his decease was Mayor of the ancient city of Norwich, succeeded his father, Sir Samuel Bignold, in the office of secretary of the society, and will most probably now be followed by his son, Mr. C. A. B. Bignold, the present assistant secretary. The family is well-known and highly respected in Norfolk. The late secretary was a man of popular manners, and, besides being an expert in insurance business, was identified with all the best interests of the city in which he had lived all his life.

—The number of bicyclists in Canada was made, the other day, the subject of a bet, one party to which based his estimate upon the presumed number of bicycle riders in Toronto being 10,000. This number may seem excessive, but it is to be remembered that there are a number of Canadian manufacturers of wheels, and that we import tens of thousands of dollars' worth of bicycles every month from Great Britain and from the States. As long ago as 1884 it was estimated that there were 30,000 bicyclists in Great Britain, and that the aggregate capital employed in the manufacture of their wheels was over £2,500,000 sterling. These figures have vastly increased since 1884; and as to the use of the "bike" in the United States, their number must reach hundreds of thousands.

—Mr. Alex. McIntosh, of the firm McIntosh & Griffiths, was elected president of the Woodstock Board of Trade at its annual meeting on the 23rd of April last. Mr. D. W. Karn, the retiring president, was chosen vice-president for the current year, and Mr. J. G. Wallace was re-elected secretary-treasurer. The following gentlemen compose the council of the board for this year: J. M. Grant, D. H. Charles, Dr Mearns, Dr. McLay, John White, James Scott, T. W. Gray, A. Pattullo, Robert Whitelaw, T. H. Parker, R. T. Crawford, and R. O Smith.

—We understand that a leading dry goods house of London, Eng., asks of persons who seek credit the following questions:

Do you keep a set of books?
Do you keep a cash book?
When was your stock last taken?
When were your books balanced?

Canadian wholesale merchants or manufacturers may well take note of this practice, and pursue a similar course with those who ask to buy goods on credit.

—The city grocers and their travellers are going to have "a da off," or more properly a half day off, on the afternoon of Wednesday, June 5th, at Hanlan's Point. The events of that holiday time will be a series of bicycle races—slow race, team race (travellers against grocers), race for grocers' clerks, race open to all in trade, etc., etc., a dozen races in all. Twenty-five prizes have been provided. A part of the grand stand will be provided for ladies and their escorts. Abundance of fun is certain.

—Alarming rumors are current at Shanghai that a renewal of hostilities between China and Japan is imminent. The trouble arises over the handing over the island of Formosa, which has very inopportunely declared itself a Republic. Suspicion believes that the birth of the Republic is a trick on the part of China and Russia, with the countenance of France, to prevent Japan getting the island.

—The Province of Quebec has borrowed £300,000 sterling in London, to repay temporary Canadian loans and to settle some railway subsidies which are due. No bonds have been issued for this sum, which it appears is to be repaid upon notice. The rate is not given, but is said to be under four per cent.

—We learn that Mr. N. D. Hurdon, lately manager at Ridgetown for the Molsons Bank, has been transferred to the Exeter branch of the same bank. Mr. E. E. Ward succeeds Mr. Hurdon at Ridgetown

—The new president of the Grand Trunk Railway, accompanied by some of the directors, will shortly visit Canada to inspect the road, and see what is necessary to be done in the reorganization of the staff

DOMINION BANK.

The annual general meeting of the Dominion Bank was held at the banking-house of the institution, Toronto, on Wednesday, May 29th, 1895.

Among those present were:—Mr. James Austin, Sir Frank Smith, Col. Mason, Messrs. William Ince, John Scott, William Ramsay, C. Cockshutt, W. G. Cassels, William Roy, James Scott, E. Leadley, M. Boulton, Aaron Rose, E. B. Osler, William Hendrie, Dr. Smith, John Stewart, David McGee, G. W. Lewis, Gardiner Boyd, G. Robinson, Walter S. Lee, J. J. Foy, Samuel Alcorn, Anson Jones, R. D. Gamble and others.

On motion of Mr. Edward Leadlay, seconded by Mr. A. Ross, the president, Mr. James Austin, took the chair, and on motion of Mr. Anson Jones, seconded by Col. Mason, Mr. R. D. Gamble was appointed to act as secretary.

Messrs. W. G. Cassels and Walter S. Lee were appointed scrutineers.

The secretary read the report of the directors to the shareholders, and submitted the annual statement of the affairs of the bank, which is as follows:

REPORT.

The directors beg to present the following statement of the result of the business of the bank for the year ending April 30th, 1895:

Balance of Profit and Loss account, 30th April, 1894.....		$ 6,328 78
Profit for the year ending 30th April, 1895, after deducting charges of management, etc., and making full provision for all bad and doubtful debts....		189,561 53
		$195,890 31
Dividend 3 per cent., paid Aug 1, 1894....	$45,000 00	
Dividend, 3 per cent., paid Nov. 1, 1894..	45,000 00	
Dividend, 3 per cent., paid Feb. 1, 1895 ..	45,000 00	
Dividend, 3 per cent., payable 1st May, 1895	45,000 00	
		$180,000 00
Balance of profit and loss carried forward.....		$ 15,890 31

It is with deep regret your directors have to record the loss the bank has sustained by the death of the late general manager, Mr. Robert H. Bethune, who has been the chief executive officer of the institution since its inception, twenty-four years ago, and mainly to whose energy and ability the bank owes its present position.

Mr. R. D. Gamble, who has been in the service of the bank since 1871, and who has until lately been the manager of the Toronto branch, has been appointed general manager.

JAMES AUSTIN,
Toronto, May 29, 1895. President.

R. D. GAMBLE,
General Manager.

Dominion Bank, Toronto,
30th April, 1895.

The adoption of the report was moved by Mr. James Austin, seconded by Sir Frank Smith, and carried.

The following resolution was then adopted on the motion of Mr. Aaron Ross, seconded by Mr. William Hendrie:—

"That we, the shareholders of the Dominion Bank, take this opportunity at our annual meeting to express our deep sorrow and regret at the loss we feel the bank has sustained by the death of the late general manager, Mr. Robert H. Bethune, who has been the chief executive officer of the bank since its inception 24 years ago, a man who was held in the highest esteem by the bankers of the Dominion, and by the business community generally, and to whose ability, energy and careful management the bank is largely indebted for its present position."

It was moved by Dr. Smith, seconded by Mr. John Stewart, and

"Resolved, That the thanks of this meeting be given to the president, vice-president and directors for their services during the past year."

It was moved by Mr. Charles Cockshutt, seconded by Mr. Bolton, and

"Resolved, that the thanks of this meeting be given to the general manager, managers and agents, inspectors and other officers of the bank, for the efficient performance of their respective duties."

It was moved by Mr. George W. Lewis, seconded by Mr. James Scott, and

"Resolved, that the poll be now opened for the election of seven directors, and that the same be closed at 2 o'clock in the afternoon, or as soon before that hour as five minutes shall elapse without any vote being polled, and that the scrutineers on the close of the poll do hand to the chairman a certificate of the result of the poll."

Mr. William Ramsay moved, seconded by Mr. G. Boyd, and it was resolved, that the thanks of this meeting be given to Mr. James Austin for his able conduct in the chair.

The scrutineers declared the following gentlemen duly elected directors for the ensuing year: Messrs. James Austin, William Ince, E. Leadlay, Wilmot D. Matthews, E. B. Osler, James Scott, and Sir Frank Smith.

At a subsequent meeting of the directors, Mr. James Austin was elected president, and Sir Frank Smith vice-president, for the ensuing term.

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for the week. There was not a meeting of the board on Saturday, so the week consists of five days. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. Total for the five days, 3,540 shares. Bank of Commerce, 450 at 135-135½; Standard, 166 at 161; Hamilton, 20 at 157½; British America Assurance, 41 at 118½-119; Western Assurance, 350 at 161-161⅛; Consumers' Gas, 29 at 200-200¾; C.P R. stock, 150 at 51-53¼; for Incandescent Electric Light, 20 at 110½; Commercial Cable, 1498 at 153½-158¾; Bell Telephone, 111 at 156½-158½; Toronto Railway, 535 at 77⅞-79½; Canadian Permanent Loan, 9 at 157 (20 p c.); London and Canadian Loan, 125 at 119½-120; Western Canada Loan, 36 at 148 (25 p.c.)

A DOUBLE REPROACH.

At Ottawa the other day, Judge Taschereau, in concurring with the Supreme Court judgment dismissing the appeal of the Toronto Street Railway Company against the injured motorman, Bond, said, "I may add, that in my opinion a humane master would not treat his servants or employees who suffer injuries in the discharge of their duties towards him as this company has treated the respondent. That a poor man who, under the circumstances disclosed by this record, can be dragged from the jury to the Divisional Court, from the Divisional Court to the Circuit of Appeal, and from the Circuit of Appeal to this Court, to get a paltry compensation of $500, which the three courts, together with the jury, held he is entitled to, is alike a reproach to the system which allows of it and those who take advantage of it.

RAILWAY FREIGHT.

While it is coming to be almost universally admitted that the principle of charging what the traffic will bear, is, when applied in its proper sense, the correct basis upon which rate schedules should be formulated, it is also coming to be believed that in connection with such a basis some method by which railroads can be protected from dishonest shippers on the one hand and equally dishonest associates on the other, must be provided. The theory that, aside from the question of risk, it costs no more for a railroad to haul a ton of gold than a ton of lead, or a bolt of silk than an equal weight of calico, therefore the transportation charges should be practically the same, now finds few advocates, but the railroad manager and the hardware merchant, who both admit that a case of high-priced shelf goods should pay a higher rate than an equal weight of iron bolts, find that when they come to put the theory into practice there are dishonest shippers who will offer, and dishonest railroad men who will accept, a shipment of shelf hardware under the description of iron bolts, and thereby defeat the very object of the discriminative theory.

This subject is just now agitating lumber mill men who wish to obtain a market for their low grade lumber, which, under the present basis of rates, is not only practically refuse stuff, but a nuisance, as well as a constant source of danger. They understand full well that because of the possibilities inherent in the dishonest combination referred to, that railroads cannot safely issue a reduced tariff on such product, but they also know that, properly handled, that traffic would prove a source of revenue to both themselves and the railroads, and at the same time put upon the market lumber that for some purposes could be employed where a more expensive grade was now being used. Here is a problem in transportation that may profitably engage the attention of those interested. That it ought to be possible to market this product which is now going to waste, is a self-evident proposition, but how under present competitive conditions it can be accomplished is decidedly problematical.—*Railway Review.*

—A fraction less than a mill per ton per mile is now the cost of carrying freight on the lakes. To be exact, a report prepared under the direction of Gen. Poe of the war department. shows that last year the cost per ton per mile of moving 13,195,860 tons of freight to and from Lake Superior was 99-100ths of a mill. In 1893 it was 1 1-10th mills. Every year the cost of lake transportation is lowered.—*Marine Review.*

—Western Man—"Y-e-s; that's a fine building, a mighty fine one, I must say; but just wait. It won't be long before the glorious West will have a finer one! yes-siree; we'll outshine anything you folks can do in the effete East, just mark my words."

Eastern Man—"How soon will you start it?"

Western Man—"Just as soon as we can borrow the money from you."

A BANKER ON THE NEWFOUNDLAND SITUATION.

An interview with Mr. Thomas Fyshe, the general manager of the Bank of Nova Scotia, published in the Montreal *Gazette* of Tuesday last. Being asked what the general opinion was in the Maritime Provinces as to bringing Newfoundland into the Canadian confederation, Mr. Fyshe replied: "As far as I can judge from the tone of the press and from conversations with the business community, the sentiment down by the sea coincides with that of the older provinces regarding the union of Canada with Newfoundland. Halifax and Nova Scotia, in fact, would, I fully believe, be well satisfied to see the confederation rounded off by the admission of the ancient colony, if fair and satisfactory terms could be arranged. They, however, would object to see Canada grant terms that would be burdensome and unfair to the larger state."

The Bank of Nova Scotia having established a branch at St. John's, Mr. Fyshe was asked about the condition of trade on the Island, and said that the condition of the colony from a commercial standpoint was far from being hopeless, and, in fact, he believed if one could only dismiss the political aspect from a discussion of the present situation in Newfoundland, a fairly sound condition of affairs might be predicted with a good degree of certainty for the near future. He added that the banking accommodation that had been recently secured from Halifax and Montreal had been a perfect godsend to the mercantile community of St. John's and the rest of the Island. For nine or ten years previous to the financial crisis, the two local banks had been over-loaning to their directors who were amongst the leading merchants of the Island, and as is known, disaster followed all round.

Continuing, he said: "At the present time a better feeling in the mercantile community prevails, the fisheries have been fairly productive, and the current business of the Island is by no means bad. In a word, all the information which I have at hand goes to show that with prudence the legitimate business of the Island can be placed on a good basis within a reasonably short space of time."

The political outlook Mr. Fyshe considered unsatisfactory.. Extravagance, he said, had been certainly indulged in in the administration of public affairs. Unnecessary schemes had been encouraged, and the railway had been rushed along in a manner that would lead the disinterested outsider to believe that there was simply no end to the financial resources of the colony. To his mind the best thing that could happen the Island would be for it to revert to a Crown colony, and when a good English governor, and an able and impartial council, selected from the best local men, had succeeded in getting things in good shape, then let Newfoundland come into the Dominion. This would be a good government, although not a government by jabber.

As to business matters in Nova Scotia, he thought that the depression was not so keenly felt in the Lower Provinces as in Old Canada. Coal mining has been active, the fisheries good, and although not rapid, the development of the dairy interest has been quite marked

THE PANIC IN NEWFOUNDLAND

In a letter from St. John's to the Charlottetown *Guardian*, Mr F. H Arnaud, manager of the Merchants' Bank of Halifax in the former city, gives some sketches of the exciting times: "The 'scare' began on the evening of 6th inst. From what source it emanated it is impossible to determine; but once started it spread like wildfire. No rumors were too ridiculous to be entertained by the panic-stricken people. First it was the Canadian Pacific Railway which had come to grief. Then it was the Bank of Montreal which was in difficulties. Before the banks opened for business on the 7th inst., crowds surrounded the doors, eagerly awaiting their opportunity to convert their notes into gold. Fishermen, laborers, women, children, squeezed their way to the counters. The bank officials remained calm. As fast as the notes were passed in, gold and silver were doled out. All current bank notes were treated alike, each bank redeeming in gold and silver its own notes and the notes of the other banks. As the morning wore on the rush became more and more pronounced. The cry was 'still they come,' and the outflow of precious metals continued unabated. Presently in came the press representatives:

"'What,' said they, 'can we do to stop this folly?' 'Do nothing,' answered the managers 'Let the people come along. We will pay gold, if necessary, for every dollar of Canadian paper money afloat in Newfoundland.'

"By one o'clock the worst of the rush was over, and at the hour of closing matters had almost resumed their normal condition. In the course of the day the Bank of Montreal, the Bank of Nova Scotia and the Merchants' Bank of Halifax had, between them, paid out about $70,000 in specie, and still each bank remained armed to the teeth for all eventualities. Not the slightest inconvenience was experienced except the additional labor entailed upon the officials. The panic was over. The banks' honor and the honor of Canada had been vindicated. I say this because politics had been freely mixed up in the rumors which were said to have given rise to the squall. The Confederates declare that the whole business was the work of the 'Artist' personally. I don't believe a word of it. The scare was simply one of those occurrences to which, owing to the recent local bank failures, an uninstructed public are pecu liarly liable. Probably it will not be repeated. Already the reaction has set in and gold is returning to the coffers of the banks.

"How foolish such a run as this was it will take some time for the people to realize. In Canada the position as regards bank notes is better understood. Even there, however, it is not universally known that the operation of the Bank Act of 1890 renders Canadian bank notes safe beyond peradventure It may not be amiss, therefore, to remind the public that under no reasonably conceivable circumstances can the holder of such a note lose his money. In addition to his first lien on the resources of the bank issuing the note, he has for security the 'Bank Circulation Redemption Fund This fund, to which all the banks have contributed at the rate of 5 per cent. on their average circulation, amounts to nearly $2,000,000, and is held by the Dominion Government

D. W. BOLE,
Chairman Finance Committee

Winnipeg, May 21st, 1895

funny incidents occurred. In the midst of the excitement one man, a Jew, tore up to the Bank of Montreal, five dollar note in hand. 'I vants gold for dis note,' shouted our frantic son of Israel to the unperturbed official before him. 'All right,' said the latter, 'what makes you look so warm? Have you run all the way from Jerusalem for your money?'

"Yours truly,

"F. H. ARNAUD.

"P. S.—The question of confederation remains *statu quo*.

"St. John's, Nfld., May 9, 1895."

Commercial.

MONTREAL MARKETS.

MONTREAL, May 30th, 1895.

ASHES.—Receipts continue light, and stocks are practically exhausted. There are 79 brls. of pots and 4 pearls in store, but of these 25 brls. are just about being shipped to London, and several small lots to other points. Values are firm at $4.10 to 4.15 for first quality pots; seconds, $3.80; pearls, $5.50 to 5.75. A transaction in third sorts of pots, the first lot for several years, is reported at about $3.50.

DAIRY PRODUCTS.—No improvement can be reported in the butter market, and aside from some moderate trading in creamery at 14 to 16c. per lb., little business is being done. Slightly better prices are being paid for cheese, probably owing to the improved quality of the article offered, and quotations range from 6½ to 6¾c., but the cable shows no improvement in England. The demand for eggs is fair, at 10 to 10½c. per doz.

DRY GOODS.—The coolish wet weather, and the two recent holidays, have somewhat interfered with city retail trade, but wholesale men seem generally satisfied with the volume of business doing. Travellers report country stocks in healthy shape, and those lately returned from the lower provinces speak of a pretty sound state of affairs there. Several houses consulted speak of an improvement in remittances over those of May, 1894. Cotton goods show great strength, and in addition to recent advances noted, we learn, since last writing, that canvas has been put up 10 per cent.

GROCERIES.—Owing to the two holidays, Ascension Day and Queen's Birthday, the week, since last writing, has been rather a broken one, and business has consequently not been very active. Some samples of new Japan teas are being shown, which are quoted at from 35 to 45c. per pound, but which find few buyers in this market. There is a demand for teas at about 11 cents, which cannot be supplied, because all stocks of low grade are exhausted. A Japan circular, under date May 10th, is just to hand, and reports settlements to date 20,409 piculs, as against 32,544 piculs at same date last year. The market is reported firm at from 2 to 3c. per lb. advance on last year. Quality of leaf is said to be inferior, and reports from the interior lead to the belief that the crop will be short. Quotations are for fancy, $55 and upwards; choicest, $42 to 44; choice, $37 to 39; finest, $33 to 35. Exchange 2s. 2¼d., being nearly threepence higher than last year. Sugars are without change, and refiners report no important transactions. Granulated at the factory is 4¼c. per lb., and the lowest in yellows 3¾c. A considerable advance is reported in cloves; the crop is reported short, and a Jewish syndicate in London is said to control a large proportion of the available supply. Spices generally are reported firmer. Gallon apples are further advanced, and packers are said to be asking $2.25.

HIDES.—Supplies continue light, and hides are actually being imported from England for Quebec and St. Hyacinthe tanners. Dealers are paying 8¼c. per lb. for No. 1 green hides, with sales to tanners of cured generally at 9½c., though some hold out for 10c., and it is said a sale has been made to a Western tanner at this

figure. Calfskins are quoted at 8c., but some dealers are said to be paying 9 to 10c.; lambskins are advanced to 20c. each.

LEATHER—.There is no abatement of the firmness in sole leather. For a fair lot of No. 1 B.A. 24c. per lb. has been refused, and some tanners write their agents to make no further sales at present prices. No. 1 slaughter is firm at 27c., and a Nova Scotia tanner asks 30c. Waxed upper is advanced to 35 to 40c., and an actual sale is reported at 39c. There is not really much doing, the only large transaction reported being a purchase of 900 sides of upper and a good-sized lot of grain by a shoe manufacturer who had contracted some time ago for stock at the lower prices then prevailing, but who could not get delivery, and had to buy at present prices to fill his orders. Sales of Western splits are reported at 25c. We quote:—Spanish sole B.A. No. 1, 24 to 26c.; do. No. 2 to B.A., 23c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 22 to 23c.; No. 1 slaughter, 27c.; No. 2 do., 25c.; common, 22c.; waxed upper, light and medium, 35 to 40c.; do. heavy, 33 to 36c.; grained, 38 to 40c.; Scotch grained, 38 to 40c.; western splits, 25 to 27c.; Quebec do., 20 to 21c.; juniors, 16 to 19c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 15 to 16c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 13 to 16c.; extra heavy buff, 17c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c

PAINTS, OILS AND GLASS.—The excitement noted last week in Paris green continues, and prices have advanced nearly 50 per cent.; 17c has been quoted in bulk, and in small packages the price is up to 19c. It would pay to ship the article now to New York, where the price is 25c. Linseed oil is also advanced 2 cents per gallon, owing to advices from England, where oil-cake is so low in price that seed crushers will not operate. Turpentine is unchanged. Dry white lead is firmer in England, and red lead is advanced ten shillings a ton, but no revision of local prices has yet been made. Glass continues to be sold at $1.10 to 1 15, though manufacturers in Belgium still withhold quotations, and it could not now be laid down to sell at any such price. We quote:—Turpentine 47c. per gal. for single brls.; two to four barrels, 46c.; 5 brls. and over 45c. Linseed oil, raw, 57c. per gallon.; boiled, 60c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4½c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, 17 to 18c. in bulk, 19c. in small packages; window glass, $1.10 to $1.15 per 50 feet for first break; $1.20 to $1.25 for second break; third break, $2.70.

METALS AND HARDWARE.—The improved movement is fairly maintained, and there is a notable tendency to firmness in a good many lines of goods. Makers of domestic pig iron are not inclined to concede, and machinery scrap has recently sold at $14.75. Langloan is now entirely out of the market, and Summerlee is about the only brand of Scotch iron being dealt in; this is offered, to arrive, at $19. Tinplates are rather firmer in Britain, and ingot tin steady at the advance. Makers of sheet zinc have cabled two advances lately, and we make quotation $4.50 to 4.75; it had recently sold at $4.25. We quote:—Coltness pig iron, none here, Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $19.00 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Carnbroe, 18.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $15.75 to 16.25; Ferrona, No. 1, $15.75 to 16.25; machinery scrap, $14.75 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00, 52 sheets to box, 60 sheets $2.10 to $2.15, 75 sheets $2.20 to $2.25; all polished Canadas, $2.50; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, ccording to finish; P. D. Crown, $3.75; do., I.X., $4.50; Coke I. C., $2.70 to 2.90; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3⅝c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron $1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 18 to 19c.; ingot copper, 10½ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do., $4 to 4.25. Antimony 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3⅝ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

WOOL.—No very noteworthy transactions have been put through since last writing, but there has been some moderate trading in Capes at a range of about 13 to 14c. The London sales closed last Saturday on a pretty firm

basis. We quote greasy Cape 13 to 15c.; Natals, 15 to 16c.; Australian, 14 to 14½c.; domestic fleece, 19 to 22c.; B.A. scoured, 25 to 30c.; pulled supers, 20 to 21½c.; extra, 23 to 26c. per pound.

TORONTO MARKETS.

TORONTO, May 29th, 1895.

GRAIN.—The wheat situation is strong and prices well maintained. We quote:—Winter, No. 1, $1 to 1.02; No. 2, 98c. to $1; No. 3, 96 to 98c.; spring, No. 1, $1 to 1.02; No. 2, 98 to $1; No. 3, 95 to 96c.; Manitoba, No. 1, $1.08 to 1.10; No. 2, $1.07 to 1.09; No. 3, $1.02 to 1.07. We elsewhere refer at length to the situation in wheat. Peas are firm and in good demand for local use, although demand from export markets is rather slow; quotations have improved, and stand now at 62 to 63c. Oats are firm and at 41 to 42c. per bushel; stocks are not heavy and supplies are wanted. The barley season is closed and the movement of last year's crop over. Rye is nominal. Corn attracts little attention.

GROCERIES.—The roads are good and the weather favorable to an active trade. Prices are very steady. Coffee excites no special interest. Latest foreign advices concerning currants are rather easy. Sugars find only a moderate movement, and trade is not expected to improve much before the opening of the season for domestic small fruits. Raws continue unsettled; while the market cannot be called strong there is no noticeable tendency to weaken. The stock in four ports of the United Kingdom is 89,000 tons, against 71,000 tons same time last year. Teas probably attract more attention at present than any other staple of the grocery trade. We have previously noted the character of the samples of May pickings of Japan teas. Advices from Japan state that the steamer sailing 17th inst. carried some 7,500 packages on American account. Prices will probably range higher this year than last, although much must depend upon the course of the silver market. Up to date of forwarding latest information, settlements so far this season were considerably behind those of the same period last year. New Moning Congous are opening strong. Advices from Calcutta report broken and Pekoe Souchongs 1d. per lb. higher than at the first auction last year. Common Pekoes and broken Pekoes were neglected. Cold weather has made the season a late one.

HARDWARE AND METALS.—There is a good movement in general hardware supplies. Fence wires, wire nails, cut nails and rope all meet with a good healthy demand. The trade in bars and steel and other manufacturers' supplies is good. Builders' supplies on country account are in good demand, while even the long-depressed city trade shows signs of animation. Values are firm. The Carnegie Co. have advised the trade here of advances in steel plates and bars. Window glass is now arriving, and advances having been made abroad, Toronto jobbers have raised their prices about 5 per cent. on former quotations.

HIDES AND SKINS.—In the face of small supplies and a good demand, prices are maintained at their former basis. As a result of the importance of the present situation, we elsewhere refer to hides Calfskins are in fair supply; the heaviest part of the season's movement is now pretty well finished. Very few sheepskins are coming in. Pelts are offering freely at 15c., and lambskins at 20c. Tallow is dull, and the market depressed; dealers are paying 5 to 5¼c., while we hear of transactions this week at 6c.

PAINTS AND OILS.—Business in this line of trade is good, and prospects much better than they were in May last year. Turpentine is unchanged in quotation, but the feeling is, if anything, easier. The recent smart advances in the prices of Paris green, which we have already noted, is the principal feature in the trade. White lead remains unchanged. Stocks of window glass have now arrived and are well sorted up; manufacturers having decreased discounts, jobbers have advanced prices.

PROVISIONS.—This last several days butter has been offering very freely, and in consequence the feeling is somewhat easier; tubs have been sold at 10 to 12c., while large rolls are quoted at the same figures. The local cheese market is not active; the feeling is easy and local jobbing prices range around 8c. In hog products there is a steady market with a seasonable demand and no change in quotations. Eggs are steady at 10½c.; receipts are not heavy; some picklers have secured their season's supply, but others are busily at work. Beans are scarce and prices higher; sales have been made at $1.65 and $1.70 this week; the last year's crop is now pretty well exhausted. There is nothing doing in dried and evaporated apples.

WOOL.—As the season advances, the quantity of fleece wool marketed materially increases. It is too early yet to make an estimate of the probable season's offering from present receipts. So far as condition is concerned, there is a distinct improvement, which is but reasonable to expect, because of the more favorable weather. Yet a quantity of dirty wool filled with burrs and chaff is being offered. The exercise of a little seasonable care by the grower would prevent this, but the wool having once become soiled should be carefully separated from choicer selections and sold for what it is worth. Prices vary. In certain country markets, we are told, 18c. is being paid, whereas Toronto merchants quote: Clothing, 21c.; combing, 20c.; and rejects, 16c It does not seem from the present outlook that these quotations would admit of a very profitable market; but the intense competition of Toronto merchants with one another and a desire to outbid Hamilton competition has led to these fancy prices.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company.

First—It is the only Canadian company that has from its inception given its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low-priced "PAY AS YOU GO" plan to the shortest single premium endowment.

A NOTABLE EXCURSION.

"Well, I shall never be afraid of a lake voyage again. This is the most comfortable trip I ever made on a steamboat."

"Oh, I say, wasn't that a royal breakfast on Saturday morning, and wasn't it served nicely? I have never seen or tasted a nicer meal, even on a Cunard or Inman steamer." The speaker was an Englishman, and it was much for him to say.

A quiet but observant New Yorker thus expressed himself: "What takes me is the space you have on board. Here we have had some 300 passengers for two days, and yet there was no crowding anywhere, no discomfort."

"Boys, she's a bird, and they know how to fly her. A Bird of Paradise you may call this ship; anyhow it's Paradise for her passengers. Strawberries for breakfast—Gee whiz!" This from a breezy Westerner.

"Catch on to the naval style of everything, will you," remarked the man from Chesapeake Bay. "Why, there wasn't a blamed deck hand who wasn't clean shaved and had his blue guernsey on, with a star in the bosom of it."

"Say, fellows, ain't you glad you came? I am, you bet. These folks have got every thing down fine, even to the weather. But then I reckon they fixed things with Old Probs, both in Washington and in Toronto."

"This excursion has been a poem, sah. As symmetrical as a sonnet, yes, sah. Such hospitality could not be surpassed even by a Southern gentleman's house. I feel honored and proud, sah, to have been a guest of this ship. I have never seen these Great Lakes before, and never dreamt of such vessels but on the ocean. I shall see both again, sah, I promise you."

And what especially pleased a Canadian of the party was "the order, the discipline, the civility apparent in every part of the ship's work. The absence of profanity, the lack of hurry, the smoothness of procedure, indicated a settled system, planned beforehand and adhered to."

Such are a few of the sentiments expressed by the guests on board the steamer "Northwest" of the Northern Steamship Line, plying in connection with the Great Northern Railway between the ports of Buffalo and Duluth. The transportation agents of the American and Canadian railways were tendered a complimentary trip on this swift and beautiful ship on Friday and Saturday of last week from Buffalo to Cleveland and return. Nearly three hundred gentlemen accepted, from every part of the United States and Canada. And they had an excellent opportunity of observing the character of the vessel and the nature of her *cuisine* and appointments. The result, as we have indicated above, was an universal chorus of approval, a united expression of pleasure

An ocean steamer, to all appearance, 383 feet over all and 44 feet beam, of four thousand eight hundred tons, with quadruple expansion engines, for each screw, of 7,500 horsepower in all; heated by steam, lighted by electricity, and ventilated by electric fans, carrying thirty officers, five engineers and 158 of a crew, requiring 600 tons of coal for a round trip, running at eighteen miles an hour in the rivers and twenty miles the hour in the open lake, this great white steel yacht with raking spars and triple funnels, is a sight for the eye as her appointments are a delight to the passenger.

It was a shrewd arrangement on the part of the Northern Steamship Company's management to secure for guests on a Lake Erie trip such a representative gathering of railway men from all over this broad continent, a critical company, to be sure, to test for themselves the capacity of these vessels—there are two, the "North West" and "North Land"—built at Cleveland, on Lake Erie. And the great scale of the excursion was only equalled by the excellence of the provision made and the perfect manner in which it was carried out. As a piece of advertising it was noteworthy; as a scheme of hospitality it was princely.

No wonder that the passengers united in a voluntary testimonial to the general manager of the steamers, Mr. John Gordon, and the general passenger agent, Mr. A. A. Heard, and their assistants, of compliment upon their magnificent vessels, and gratefulness for so memorable an outing as that of May 24th to 26th, 1895. Success to the line, for it is deserved.

—A lady commenting upon pretty feet to a friend in a street car, said: "I have a Trilby foot, and have had a bust taken of it."—*Detroit Free Press.*

AN INCIDENT OF THE NEW WHITE LAW.

Before the supervising inspectors decided that the smaller class of tug boats would be permitted to comply with the White bill regulations by using a 30-pound bell, a representative of a local ship chandlery firm was in a small Lake Erie port and came across a tug about 20 feet long. He proceeded to instruct the owner in the new law.

"So I have to put a bell on the steam launch, eh?"

"I have nothing to do with it. I am just telling you the requirements of the law."

"What kind of a bell?"

"Sixty pounds, good bell metal, and we warrant our bells to stand government inspection."

"Sixty pounds! Sixty pounds?"

"That's the law!"

"Maybe you sell cork-jackets, too?"

"Yes, sir! Warranted genuine granulated cork. Will float in water thirty days without becoming water-logged."

"Make them any size?"

"Regulation size—"

"You might send me one cork-jacket big enough to put around the launch, so as to keep her afloat when we put that sixty-pound bell on."—*Marine Review.*

HOW ACCIDENT CLAIMS ARISE.

The variety of circumstances to be considered in taking an accident risk and fixing an adequate rate is illustrated in what was said by Mr. M. R. Prior, chairman of the Sun Life, of London, in his annual address to the shareholders. We make an extract or two: "We have had a lot of accident claims already, although they have not affected our accounts injuriously. The most dangerous thing in the world seems to be to keep a pet. One gentleman suffered severely—and this was one of our heaviest claims—from the bite of a monkey; another man tumbled over a dog; while two people were bitten by dogs. These pets are really terribly dangerous. Polo, of course (as we do a little business in India), is also a serious peril, but as it conduces to the health and welfare of men over there, we can quite afford to take the risk. A very promising young officer died the other day actually whilst his policy was in the post to him at Calcutta, he being killed whilst playing polo. That, of course, is all in the way of business, and sorry as we are that a promising young officer should be cut off in that way, we certainly, probably all of us, would yet wish to encourage polo in the interests of good health and good spirits. We have not had any serious number of people tumbling about in the unusual frost this year; in fact what little frost there was in the previous year was, I think, more dangerous to us. But it is very uncomfortable to slip down in the ice caused by last winter's fierce frost, and I commend the expediency of accident insurance to you all in view of that."

THREE FARM PRODUCTS.

In 1881, the small country of Denmark exported what was valued at about $21,000,000 worth of agricultural products. In the same year Canada's total exports of farm products amounted to $30,000,000; and in 1893, the value of farm products exported from each country amounted to equal sums, $40,000,000. That Canada, a new and fertile country, made no more progress than the little, old European peninsula, shows that there is great need for the expansion of dairying and agricultural interests in the Dominion.

Canada is not taking advantage of her own great possibilities Her resources lie dormant. While Canadians have for some fifteen years wasted their time building and counting the tall chimneys of protected industries, other countries have grasped the opportunities to which Canada was blind. Yearly England imports cheese to the value of $25,000,000, butter to the value of $62,000,000, and bacon to the value of $55,000,000. The trade returns last issued show that Canada exported to Great Britain $16,218,131 worth of cheese, only $949,319 worth of butter, and only $2,748,072 worth of bacon. In other words, Canada supplies the British Isles with only about 14 per cent. of what England alone imports of the three products specified. Figures on the other Canadian farm products in demand on the British market are yet more disappointing, and constitute as it were an index of what Canada might do and yet leaves undone.

There are some reasons for the unsatisfactory returns. Exporters have not branched out extensively enough to send representatives of their firms throughout Canada in order to secure the best produce from the farmers, to send that produce in good condition to the British market, and even to have the consignments handled in the old country by members of the Canadian firm. To prove profitable, the transportation cannot be effected too quickly. Transportation will be much improved this year by the establishment after May 14th of an excellent refrigerator car service, which will extend not only over the main line, but also on branch lines of the Canadian Pacific. The refrigerator car service should prove a means of saving many thousands of dollars. Another need inadequately supplied is cold storage. With the branding of all cheese exported, with the instruction from specialists on cheese and butter making, and with the better understanding of the demands of the British market, no doubt Canadian exports of farm produce will make in the future a better record than in the past.—*Winnipeg Free Press.*

DR. LARDNER'S MISTAKE.

Referring to the well-known dictum of Dr. Dionysius Lardner, the scientist, to the effect that steam navigation of the Atlantic was impossible, because no boat could then (60 years ago) carry coal enough to propel her across, a writer in *Notes and Queries* says, under the heading of "Lardner's Mistake," as follows:

"I was present at a meeting of the British Association, at Bristol, in August, 1836, and listened with great interest to the speech in which Dr. Lardner certainly did endeavor to show that steam navigation between England and the United States was practically impossible. With greater interest I heard the younger Brunel, engineer of the then growing Great Western Railway, point out an arithmetical error in the early stage of the 'demonstration' which vitiated the whole of it. I remember also that the learned doctor sat down suddenly without a word.

"My father, who was also present, talked it over with me afterward, wondering that so eminent a man should have fallen into a palpable error in simple arithmetic; while I, recalling my own many blunders, rejoiced that a philosopher could stumble as well as a schoolboy."

FLOWERY PENCILLINGS.

Under the head of "Pencillings," and occasional correspondent of the Huron *Expositor* works off some philosophic sentiment in a way to make one wonder whether it is a parson or a female pedagogue who writes. Thus:—

"The warm weather of a few weeks ago has induced a vigorous growth, and nature is now fully clad in that beautiful green garb which is so refreshing and restful to the eye. It is a pity that the frost should nip the tender buds and blight the expectations of the husbandmen, but we should not worry. Surely the Bountiful Giver effects a compensation somewhere, when He thus blasts our fond hopes. The National Bank of Heaven never suspends payment. Up yonder in the ethereal blue the government makes no mistakes. The weather wise say that the last moon was a 'dry moon.' The state of the present moon is uncertain, as a new disturbing element must be taken into account. We refer to the fact that whisky has lately 'gone up.' The village savors of onions again this spring, notwithstanding the low price for onion sets; the acreage sown this season is greater than ever before. Nothing can discourage the onion kings."

—The annual meeting of shareholders of the Northwest Electric Company was held last week in Winnipeg. The following board of directors was elected for the ensuing year: G. H. Strevel, president; J. M. Graham, G. A. Simpson, J. A. McArthur, and H. Cameron, manager and seecretary.

—"Confound it!" exclaimed Jackson, "What a stupid fellow that jeweler is!" "How so?" enquired his friend. "Why, I told him the other day that I wanted engraved on the engagement ring the letters 'From A. to Z.'—'from Arthur to Zenobia,' you know—and the idiot went to work and put in the whole alphabet!"—*Boston Post.*

DECISIONS IN COMMERCIAL LAW.

HENDERSON v. WILLIAMS — A bailee (*e g*, a warehouseman) who, on the completion of a contract for the sale of goods in his custody, attorns to the title of the purchaser by informing him that the goods are now held at his disposal, is estopped (if the purchase be *bona fide*) from afterwards setting up any defect in the vendor's title. Where the bailee in such a case refuses to deliver the goods to the purchaser, the proper measure of damages is the market price of the goods at the date of such refusal, according to the English Court of Appeal.

CHARTERED BANK OF INDIA, AUSTRALIA AND CHINA v. MCFAYDEN & Co.—A letter of credit contained a promise by the defendants to accept bills drawn upon them by their correspondents "against produce bought and paid for." The plaintiffs had knowledge of this condition, and advanced money upon bills purporting to be drawn under the credit at a time when no produce had been bought, or bought and paid for. The defendants refused to accept these bills. In an action for not accepting, held by Matthew, J., that the defendants were entitled to refuse to accept, as they only agreed to do so on the terms of the letter; and that if the plaintiffs advanced money on the faith of their correspondents' representations that the conditions had been fulfilled, there was no guarantee on the part of the defendants of the truth of such statements. The defendants counterclaimed against the plaintiffs for the amount of other bills accepted and paid, which had been drawn under the same letter of credit; but the same judge held that the defendants were not entitled to recover, as the presentation of the bills for acceptance was not a warranty by the plaintiffs that bills had, in fact, been drawn against produce bought, or bought and paid for.

CASGRAIN v. ATLANTIC AND NORTH-WEST R'Y.—Where a railway company in constructing a line of rails block up a public street under an arrangement with the City Council, and professing to have a right to do so on the ground that they have bought up all the rights of the private owners interested, they are not exercising "any power, franchise or privilege" within the meaning of Article 997 of the Code of Civil Procedure for Lower Canada, so as to afford a foundation for a writ of information by the Attorney-General. The Attorney-General of the Province of Quebec is the sole *dominus* of a suit instituted by him in his official capacity, whether there be a relator or not. Accordingly, a mandamus will not lie at the instance of a relator to compel him to continue proceedings under Article 997 of the Code, nor need he obtain the leave of the Court before discontinuing such proceedings A succeeding Attorney-General cannot retract a discontinuance by his predecessor. It is doubtful whether, in a suit brought by the Attorney-General under Article 997 of the Code, any other party is entitled to appear and prosecute as an intervener; it is still more doubtful whether such party has a right to prosecute a claim for damages which was not within the conclusions of the original writ. Section 12 of the General Railway Act of Canada deals with two separate matters, the first being the carrying of a permanent line of rails along the public highway; the second, the temporary occupation and obstruction of a highway for the purpose of constructing the permanent works. Under the former provisions a municipality may have power to sanction the closing of a public street. This is a judgment of the Privy Council

ATLANTIC AND NORTH-WEST RAILWAY v. WOOD AND OTHERS. — The principle upon which a Superior Court ought to review the award of arbitrators in an appeal under Sub-Section 2 of Section 161 of the Canadian Railway Act, is not that the Court should entirely supersede the arbitrators and themselves make the award, but that they should examine into the award on its merits, on the facts as well as on the law, reviewing the judgment of the arbitrators as they would that of a subordinate Court in a case of original jurisdiction where review is provided for. This is a judgment o the Privy Council.

ALEXANDRE v. BRASSARD. — The provisions of the statute of the Province of Quebec, relating to the "canonical erection of parishes" is in the nature of a rule of procedure, and it is for the ecclesiastical authorities alone to decide as to the validity of any objection founded on alleged non-compliance therewith. According to the true construction of the section of the Act which relates to the civil erection of parishes, every decree for the canonical erection of a new parish is a sufficient foundation for proceedings with the view of obtaining civil recognition of the parish. Proceedings before the commissioners appointed for a Roman Catholic diocese, held in accordance with the statutory proceedings relating thereto, with a view to the civil recognition of a new parish, are not subject to the review or control of a court of justice. This is a judgment of the Privy Council.

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE mounted police census shows that between 1891 and 1894 the population of the North-West Territories increased from 52,230 to 73,506, or by over 40 per cent.

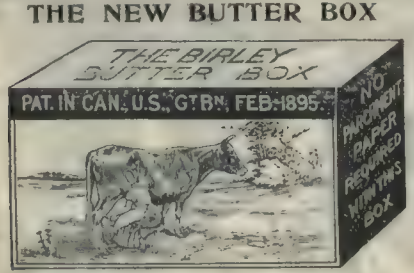
PANTHERS are destroying the sheep on Gabriole Island, British Columbia, at a wholesale rate, much to the annoyance of the ranchers.

THE town of Sarnia has sold to Mr. George A. Stimson, of this city, bonds amounting to $16,000, repayable in annual instalments bearing 5 per cent. interest.

NANAIMO miners will meet to consider steps to secure an advance in wages. It will be remembered that a year ago a reduction was made in the wages bill of the Nanaimo mines, to which the men on account of the trade depression at that time consented.

COUNTRY failures in the Province of Quebec are singularly few. Emery Poirier, who began the baking business six or seven years ago at Terrebonne, has assigned with small liabilities.——Moise Duguay, of Gentilly, already reported failed, is offering his creditors 25 cents, cash, or 40 per cent. at 3, 6, 9 and 12 months. ——B. Neron, general store at St. Jerome de Chicoutimi, recently failed, has arranged liabilities of $7,000 at 30 cents on the dollar.

THE NEW BUTTER BOX



This is the latest style of putting up 1 lb. prints. The board is specially treated both inside and out, so as to make it both grease and water proof. By this means the waxed wrapping paper hitherto so generally used is entirely dispensed with, as also are those wooden butter dishes and other such like unsightly contrivances. This box is by far the best and most stylish package for butter that has ever been put on the market. It is also very ch ap. If you are interested write for samples and prices to the manufacturers.

Mercantile Summary.

THE Grand Trunk Railway shops at Stratford will be closed from June 18th to July 2nd.

A CORRESPONDENT of the *Free Press*, writing from Manitou, Manitoba, says that Mr. Jas. Huston, who has been conducting a general store there for some twelve years, is now retiring therefrom, his duties as postmaster and municipal treasurer demanding all his attention.

A. A. MCDONALD, general dealer of Peake's Station, P.E.I., and formerly of Mill View, is seeking an arrangement with creditors on the basis of 25 cents on the dollar.——At Halifax, N.S., W. H. Corrigan, doing a small peddling sort of business in clothing and dry goods, has made an assignment.

RETURN of Grank Trunk Railway traffic for weeking ending June 1, 1895:

	1895.	1894.
Passenger train earnings..	$106,407	$108,446
Freight train earnings	217,024	202,770
Total	$323,431	$311,216

Increase, 1895, $12,215.

A DESPATCH from Rat Portage, of date May 27th, declares that "Dr. S. S. Scovil and J. R. Bunn are the owners of the richest gold discovery in this district, and have just secured their patent for the same." The alleged fortune consists of a gold property called the Mikado

Mercantile Summary.

mine, situated close to Ash Rapids on the Lake of the Woods, and is 24 miles from Rat Portage. "The vein is exposed by nature five feet wide and one hundred feet long, and the vein cuts at right angles through the granite rocks It has every appearance of being a true fissure vein." The mine was found by an Indian. and the surface samples "showed gold studded throughout and in the majority of cases as large as grains of wheat." The doctor and Mr. Bunn are surely justified in feeling "good."

A GENERAL store was opened at Burk's Falls eleven years ago by Robert Menzies, the stock and building costing $3,000. Half of this sum was paid in cash. Three years went by and he claimed to be worth $6,000. But the assets which produced this surplus contained a list of accounts of $4,000 due him. In view of this, it will not be surprising to hear that a year later he was obliged to consult his creditors, who kindly granted him one year's extension of time. This, however, was not sufficient to tide him over difficulty, as he assigned in 1890, with liabilities of $14,000 and nominal assets $3,000 less. His wife, with the assistance of friends, then bought the stock at 53 per cent. The business was continued under the style of J. Menzies & Co. Last month Mrs. M. was sued for $1,000, and now assigns.

Mercantile Summary.

CREED & SMALL, a young plumbing firm, Montreal, are reported in financial difficulties, and will have to get some indulgence from creditors if they are to continue in business. Liabilities are estimated at about $2,500

HALIFAX gentlemen, among whom are F. D. Corbett, Chas. Archibald, Geo. S. Campbell, Arthur Drysdale and Hector McInnes, ask incorporation as the Halifax Tow Boat Co., capital $20,000, to do towing and salvage on the coasts of Nova Scotia and in Halifax harbor.

MCGILL BROS., dealers in fruit trees, etc., London, for twenty years, at one time were doing very well, but lately they have found business dull and now somewhat suddenly assign.——Other assignments are those of Louis Feick, butcher, at Berlin, and Alex. Johnson, saw miller, at Parry Sound.——The business office of Carson & Slater, as agents at Watertown, appears to be closed after changing ownership from one to the other.

EARLY in the year 1893 Michael Waters succeeded E. Bannon in the hotel business at Lindsay, where he had been barkeeper and had saved $500. Finding this capital insufficient for the wants of the business, he gave a chattel mortgage in Dec. last. This was followed by another in March, and creditors have now the option of either accepting 15 per cent. of their accounts or closing the premises —— Last month we noticed that the Mooretown Salt Co. held a meeting of creditors, and as no arrangements were made the company assigns. ——Another assignment is that of Jacob Hanhofer, brickmaker, Walton.

IN eastern Ontario we note the following three failures: B. Silver, who has been in the clothing business at Kingston for the last five years, has made an assignment of his estate. He was previously in business in Merrickville, and compromised there at 50 cents in the dollar.——Fraser & Timm began business in the boot and shoe line at Eganville, just about two years ago. They have been sued several times, and lately asked an extension, but have now assigned. They owe $2,200 ——E. O'Callaghan, dry goods dealer, Cornwall, finds himself unable to meet maturing obligations, though he claims a surplus of some $9,000. Montreal creditors are investigating his position. He has been in business since 1875, and during this period has repeatedly had to get indulgence from creditors.

According to the Windsor *Record*, the Consumers' Wall Paper Co. have purchased the Wm. Laesser stock of wall paper in that city.

George Kelsey did a crockery business in Toronto for many years, and failed in 1887. Not obtaining a discharge, he has carried on business in his wife's name, and she too now assigns.

Mr. Sydney Robinson, of Sheffield, England, is visiting Canada. Mr. Robinson is the managing director of the William Jessop & Sons Steel Co. (Ltd.), one of the largest steel forging firms in the world.

It is proposed to build the Bancroft and Irondale R. R. from Brockville, through Perth, and then north-west by Fallbrooke or Lanark, to Bancroft, thence by Gravenhurst to the Georgian Bay. Mr. Pusey is the president.

The committee of the Windsor military parade, after paying all expenses of the most creditable display on Queen's Birthday, including the fares of 430 of the 48th Highlanders from Toronto to Windsor and back, have some $300 surplus.

It turns out that N. S. Tarr, fancy goods dealer, Ottawa, who was reported last month as arranging a compromise at 40 cents on the dollar, has had to assign. He owes about $9,000.——Alex. Henderson, who arrived from Scotland about five years ago and started as a jeweller at Arnprior, Ont., is reported financially embarrassed and likely to assign.

Here is versatility which made a poor ending. C. Frechette, who has lately been in the tea and grocery line at Quebec, has gone into insolvency. He is reported to have been a farmer, huckster and boarding-house keeper at various times in the past, but apparently lacked the experience and capacity necessary to success in mercantile life.

From Montreal we learn that Messrs. P. S. Ross and J. W. Ross (P. S. Ross), and Jas. G. Ross and Alex. F. C. Ross (P. S. Ross & Sons), have dissolved partnership as accountants, and that a new firm has been registered, consisting of P. S. Ross, Jas. G. Ross, Alex. F. C. Ross, A. C. Ross and J. W. Ross (P. S. Ross & Sons).

As an indication of the awakened interest in butter-making in eastern Canada, by means of modern appliances, it is satisfactory to learn that the Robb Engineering Co., of Amherst, N.S., has received orders this spring for creamery outfits from the following places: Yarmouth, Aylesford, Noel Shore, Granville Ferry, Great Village, Windsor, Berwick, Bridgewater, Harcourt, Grand Digno in Nova Scotia, and Hillsdale, Kings Co., New Brunswick.

Montreal Customs returns show an increase from $472,302 in May, 1894, to $503,542 last month. The inland revenue collected at that port was $203,386, where in the previous May it was $167,623.

Shipments from Prince Edward Island per steamer "Northumberland," for the week ended 27th May, included cattle, horses, sheep, hogs, hides, beef, hams, game, pork, oats, potatoes, 306 barrels oysters, and 338 cases eggs.

The number of letters, newspapers and post cards delivered in Winnipeg by the letter-carriers last year was 2,263,117. Winnipeg is the sixth city in the Dominion as regards volume of postal business, standing next to Quebec.

The annual meeting of the Quebec & Levis Ferry Company was held on Monday afternoon last. The old board of directors was re-elected as follows: Messrs E. Jones, president, D. C. Thomson, G. R. Renfrew, S. J. Shaw, F. Samson, W. Simons and Philippe Huot.

During the three months ended with May dividends amounting to $375,375 were paid on a total capital mill stock of $22,008,000 at the Fall River mills in Massachusetts. The average percentage is slightly over 1 75, and the amount paid is an increase of the amount paid during the three months ending in February, though the increase is not a large one.

The London *Iron and Steel Trades Journal* says that No. 10 wire, manufactured in Chicago, was recently offered in Liverpool, by a representative of the American manufacturers, at $31.20 per ton, delivered, the cost of freight from Chicago being about $10 20. This, it says, is a marvelous change in a few years, since England used to supply the United States with a good deal of wire.

The following are some country failures in Quebec Province: Pednaud & Tremblay, keeping a general store at Chicoutimi since 1893, are reported embarrassed. They began on small capital, and as one partner lacked experience, and the other entire steadiness, their success has never been likely.——Isaie Domphousse, bottler, Maskinonge, is trying to compromise his liabilities at 25 per cent.——O. Marchand, hotel-keeper at Beauharnois, has made assignment of his estate, owing $2,175.

Mr. Leonard Morris, of Summerside, P. E.I., has sold out his book and stationery business to Mr. D. K. Currie, late with Mr. R. C. Macleod, of that town.

We observe the announcement of a dissolution of the wholesale woolens firm of Hutchison, Dignum & Nisbet, of 55 Front street, this city. We understand that Mr. Edward J. Dignum has secured control of the present premises, and also that he retains existing agencies.

The Quebec *Chronicle* notes with regret the closing on Saturday of Mr. Botterell's shoe factory in St. Roch's, the proprietor having retired from business. Mr. Botterell has generously allowed a month's salary to the old hands, and most of them have obtained employment in other factories.

Mr. Milne, the collector of customs at Victoria, was informed on the 23rd ult. officially of the seizure of the Victoria sealer "Shelby," supposed to be for illegal hunting. She is believed to have been captured by the "Corwin" and handed over to H. M. S. "Pheasant," which ordered her to Victoria, where, if the charge be substantiated, she will probably be forfeited. She is nearly a new vessel, the *Columbian* says, worth about $3,000, and is owned by Louis Willie, formerly of New Westminster.

The Baltimore *Manufacturers' Record*, in its issue of May 24, published statistics showing that since January 1st, 1895, over 103 locomotives, including two electric locomotives, and about 3,000 passenger, freight and coal cars, have been purchased or have been ordered by railroad companies for southern business. The total valuation of this rolling stock is over $2,500,000. This is a significant indication of the way southern railroads are forced to meet demands of increased traffic.

The Guysboro *Gazette* says it is some time since any new buildings were put up in Goldenville, N.S., with the exception of the engine house and shaft house, but during the last week several shanties have been commenced on the Stellarton Gold Co. land. "Four years ago a good house could be bought for $20 in Goldenville; and it was no uncommon sight to see a building that cost two or three hundred dollars to put up torn down and used for fuel. But the New Glasgow company have got their steam pump to work and the water is going very fast in the Chicago, Meredian and Cleverton areas. Their outfit will include ten stamps, an air compressor, two Rand air drills, three steam pumps, and an 80 h.p. engine and boiler."

THE efforts made to boom the stock of the Toronto Street Railway appear to be meeting with good success. It has got up from the seventies well into the eighties, considerable blocks selling yesterday at from 83¼ to 84⅞.

THE Montreal Street Railway Company's earnings for the month of May amounted to $100,579.63, against $85,182.58 for the previous year, an increase of $15,397.05. The total gross earnings from the 30th September, 1894, to May 31st, 1895, were $647,274.90, against $525,265.26 for the corresponding period of last year, an increase of $122,009.64.

THE Catholic Order of Foresters, a fraternal life insurance organization, has a flat rate for all ages, which the younger men have begun to perceive is an injustice to them, and they have endeavored to secure a change so as to make assessments based upon the age of members. The older element proved the stronger in a recent meeting, however, and voted to keep on in the "good old way." If the order lasts long enough, the older members will find themselves shouldering all the burden, and will wish they had listened to the plea of "the boys."—*Investigator.*

—THE directors of the Montreal Freehold Co. and the Consolidated Investment Co. of Toronto held a joint meeting in Montreal the other day to consider assimilation. Robert Jaffray, president of the Toronto company, and D. Morrice, of Montreal, vice-president, both resigned their respective positions. Then the directors practically agreed to unite the board, electing the following officers: D. Morrice, sr., president; Robert Jaffray, vice-president; directors, Robert Archer, F. J. Stewart, R. L. Gault, E. Kewin, S. H. Blake, John Burns, and Mr. McCuaig, general manager. It is hoped that the ultimate amalgamation of the companies will be realized at the next session of the legislature.

AFTER being in the dry goods and clothing trade in Peterboro more than twenty years, T. Dolan & Co. (T. Dolan being the sole owner) now finds himself involved. About ten years ago he was worth over $20,000. But it is possible that his success, unusual in that line, may have caused his ruin. He gradually became somewhat irregular in his habits, and in 1892 he was obliged to mortgage his stock for $7,000. This is foreclosed, and it is feared that outside creditors will receive but a small dividend. ——Last November, Arthur J. Limin succeeded Rymal & Limin in grocery business in Hamilton, and as he knew nothing about the business the bailiff has taken possession for rent. Now he assigns.——So does A. C. Overholtzer, manufacturer, Bloomingdale.——This week there are no failures to record in any of the provinces west of Ontario.

INSURANCE losses this season on the lakes have been unprecedentedly heavy. The aggregate, to May 15th, 1895, was $520,000, as compared with losses last season up to the same date of $136,000. The spring of 1893, which opened with a long list of disasters, cost the insurance companies only $320,000. As insurance rates are lower this spring than they have ever been the outlook is decidedly blue.—*Chronicle.*

DEATH OF MR. H. D. CAMERON.

Some weeks ago Mr. H. D. Cameron, manager of the Hamilton Provident and Loan Society, left Hamilton for Winnipeg, and while in the latter city was stricken with paralysis. During his illness he had every attention that human aid could supply, but without avail. On Saturday evening his corpse reached his home in Hamilton, and on Monday last his funeral service was conducted by Rev. Dr. Samuel Lyle. The pall-bearers were the members of his board of directors: Messrs. George H. Gillespie, president A. T. Wood, vice-president, T. H. Macpherson, Wm. Gibson, M.P., George Rutherford, Walter R. Macdonald, Alexander Turner and W. H. Glassco.

The Land Mortgage Companies' Association, of which the deceased gentleman was vice-president, was represented at his burial by Messrs J. Herbert Mason, president; R. H. Tomlinson, sec.-treas.; Walter S. Lee, and Andrew Rutherford, Toronto; William F. Bullen and George A. Somerville, London, and R. S. Schell, Brantford. In addition to these a large number of prominent business men were present, and general expressions of regret were heard at the loss of such a worthy citizen. At an early date we hope to be able to give a more lengthy notice of the deceased.

TORONTO, FRIDAY, JUNE 7, 1895.

THE SITUATION.

The Canadian Minister of Marine and Fisheries is credited with the intention to recommend reciprocity in fishing on the great lakes. The plan would be to remove all restrictions to American fishing in Canadian waters, on condition that the United States authorities would grant what he deems an equivalent privilege to Canadians. About the proposed equivalent, as considered by the minister, there may be some difficulty. If it were confined to fishing in the lakes alone, a bargain could easily be made. But in such an arrangement, Canada would get the worst of it, since the American fishermen are far more numerous than the Canadian. To adjust the difference and make the equivalent more real, the Minister asks that, in addition to reciprocity in lake fishing, the American authorities should remove all restraints upon Canadian boatmen, farmers and others, in the American waters of the St. Lawrence, and that the latter should have liberty to dispose of their produce there. Does this mean free trade in fish and agricultural produce? And if so, is the arrangement to be reciprocal? Some explanation is necessary before the scheme, if such it can be called, can be understood. Divergencies in the fishing laws of the two countries create anomalies, which it is the interest of both countries to remove. Complaint has long been made that Americans were under a shorter close season in Lake St. Clair than Canadians; and after condemning the American practice for years, our Government has followed their example. This emphasizes the necessity for some common agreement being come to.

Four by-laws for raising money to improve the waterworks and to establish a municipal electric plant have been rejected by the property owners of Toronto. Some of the improvements contemplated in the waterworks will have to be made, and if there be no other means of doing it, the amount must be added to the taxes of the year. The defeat of the civic electric lighting scheme, at the present moment, is not a matter of much concern; the only difficulty being that an attempt will be made to coerce the city into entering into a five years' contract for the supply of electric light. Any contract beyond two years should be refused, even if we have to fall back upon gas, which is, of course, not desirable. No company will serve the city except at a profit, and this profit the city is itself in a position to make and ought to make. Distrust of municipal management counted for something in the late vote; the real opposition was directed by private self-interest against the electric plant by-law and distrust felt by property holders of the municipal management, a distrust for which ground has assuredly been given, and voters, without distinguishing, rejected the other by-laws in connection with this. In all votes of this kind, where there is room for the play of interests opposed to those of the city, influences are used which would not be permitted at a parliamentary election. Why, for instance, should a private company be permitted to employ cabs to bring up voters to vote in their interest? This is a question to which before long an answer will have to be given.

Unless there was some mistake in the announcement which connected the negotiations for the Newfoundland loan with the house of Glyn, Mills & Curry, there must have been a sudden change to the dealings with Coats & Son, for both reports were comprised within the space of two successive days. It was mentioned that the former house required to be satisfied on some points; and we are left to conjecture the cause of the sudden change of negotiations, on the capitalist side. The second announcement told of a four per cent. loan of £555,000 being secured, with the additional statement that this would be sufficient to pay all the floating debt of the colony and to leave a surplus. There was, besides, a statement that $200,000 more than was required had been offered. The next we hear is that some adjustments are still necessary to the completion of the loan. Naturally, the lenders require assurance that means for the prompt payment of the interest will be forthcoming, perhaps in the shape of the custom's revenue of the Island. The revenues of the island are far from being elastic; an increase of resources being out of the question there is nothing to be done but to cut down expenses, so as to make both ends meet. On the past scale of outgo there would be a deficiency. The task cannot be without its difficulties, but its accomplishment is indispensable. If the question of confederation with Canada had not been shelved, the success of the loan would, without special conditions, have made against the chance of the union being consummated. As it is, the loan will have no political effect. Canada, we may safely say, desires to see Newfoundland well out of her difficulties.

Incident to a return to specie payment, Chili has treated silver in a way that bi-metalists elsewhere would do well to take note of. While silver advocates in the United States are insisting on the double standard, at the ratio of 16 to 1, the Chilian Government has fixed the ratio between the two metals at 41 to 1. In so far as this move is intended to indicate a desire to make the value of gold and silver coin concurrent with its market value, it is at least evidence of an honest intent. But the ambition to do something brilliant overleaps itself. Silver is here undervalued to the extent of ten points, the relative market value of the two metals being about 81 to 1. On these terms silver cannot be kept in circulation as currency, and in fact at once began to flow out. If the choice were confined to the two metals, on the new basis, gold must get the preference as a means of payment, furnishing, as it does, a currency of inferior value. There was, besides, a current silver dollar, of previous coinage, which was inferior to either the new dollars or the gold coin; and, strange to say, the old depreciated paper had a charm for ignorance which soon caused it to be accepted in exchange for coin. Under these circumstances, both gold bullion and silver, at the new ratio, began to leave the country. This was probably the effect

of manipulation operating on prejudice. This occurred some time ago, when an experimental issue of gold and silver, on the new basis, was made; and now specie payment has been formally entered upon. The mints, after being stopped, to prevent gold and silver leaving the country, were opened again last Saturday. Chili has been cursed with paper money, not convertible into coin, for seventeen years.

New Zealand is evidently in earnest in changing her fiscal system to free trade, as it is understood and worked out in England. A bill cutting down the customs duties to five articles—wine, beer, spirits, tobacco and opium—has passed the house. The revenue from these articles will be supplemented by an income tax and a land tax. Canada is interested in this onslaught on customs duties. This change of policy puts out of the question reciprocity with Canada, for there is nothing to reciprocate. The new plan reduces taxation, in appearance, to nearly the last possible degree of simplicity; though it may be less simple in the working out than appearances indicate. The income tax may create complications or give trouble in the collection. At present there are no signs that any other of the Australasian provinces will follow the example of New Zealand on tariff diminution. Some of them have been pronouncedly protectionist. New Zealand will, of course, largely increase her external trade. The success or failure of the experiment will be watched with interest; the effect of it will not be unfelt in other colonies, especially those existing under conditions similar to those under which New Zealand is found.

BANK MEETINGS.

The season for annual meetings of Canadian banks and financial companies has again come round, and for some weeks we shall witness gatherings of shareholders more or less anxious to know what the heads of these institutions think or say about prospects for business. The year 1894 was, as we know, an unfavorable one for large earnings by financial concerns. Business was inactive, farmers were in the dumps because the price of wheat ruled low, while merchants were dispirited by the steady decline of staple commodities. Competition in trade was as keen as ever, but profits had nearly reached the vanishing point. Then, as to money-lending, there was abundance of capital going almost a-begging for lack of remunerative employment and rates of interest were persistently low. Nor were we in Canada exceptions to the general rule in these respects. Indeed, as compared with the United States, or even with the Mother Country, there is great reason for thankfulness that our business houses and banks have come so well through the year.

The Bank of Montreal, as was learned last month, showed earnings sufficient to pay its usual dividend of ten per cent., though its net profits were $100,000 less than in the preceding twelve months. Such a reduction in earnings is not, however, to be wondered at. Rather may we wonder that it has been found possible to do so well in circumstances so little favorable. The general manager of the bank has shown concisely why it did not earn more. About $15,000,000 of the money of the bank is employed in the United States and in Great Britain. "With the rate for money in London a half per cent. to one per cent. per annum, in New York the same, and in Chicago 4 per cent. instead of 6 or 7 per cent. as in previous years, a much larger shrinkage in profits could be explained." And, in Canada, the rates for money have been a little less than normal. Then it had to be taken into account, that while the bank's losses through bad debts have been about normal, it was necessary to be more than ordinarily prudent in estimating doubtful accounts. Circulation showed a decrease of $870,000.

After reviewing the untoward industrial and commercial conditions in the United States, the pernicious obstruction of the Senate, at Washington, in legislating against a revival, the disturbing folly of financial theorists and silver standard advocates, Mr. Clouston expresses his thankfulness that in that country the corner has been turned. Canada, he says, has come well through the ordeal, with so few failures and disasters. "In this, we compare favorably with any other country. Indeed, it has been a great surprise to me how well we have stood it." In a cautious paragraph, dealing with improved conditions in the States, and the favorable impulse which we on this side shall likely receive from them, he warns us that until the coming crop is assured, we must not rely too confidently on active and prosperous business.

The president of the bank is cheerful in his comments upon the year's business and the past and present conditions. He dwells upon the improved standing of Canadian securities in the British market, upon the improvement in railway and clearing house returns, and thinks we have fairly good reason to infer that the turn in the tide of business has come. A despatch from the North-West, which he read at the meeting, is reassuring as to the grain crops, which "never looked better at this time of year." The damage to the wheat by the late frost is put down at one-half of one per cent., and to early sown oats and barley five per cent.; and the heavy rain of May 30th was general over Manitoba and west to Moosejaw. Sir Donald Smith has strong faith in the future of Canada, and urges with some warmth what will, we think, commend itself to the general sense as an essential part of the future policy of this country. "It appears to me," he says, "that what is wanted is a well conceived system of emigration from the United Kingdom and other countries of Europe, and we have every reason for believing that money judiciously spent in this way would be refunded to us tenfold." The development of our mineral resources is another matter referred to by Sir Donald as of great moment to our growth in activity and wealth, and the example he gives of the effect of such development upon the railway interest in other countries is significant.

The Quebec Bank report shows decreased net profits compared with the previous year. This arises in part from the lessened recent margin of profit obtainable over rates paid to depositors, a matter which affects all banks, and in part from an unusual appropriation found necessary for bad debts. The bank had for years done a large and satisfactory business with Newfoundland, but owing to the bank failures on that Island some months ago and the collapse of trade, the Quebec Bank made losses, not only by the Island merchants, but by the Island banks, whose sterling it held in payment of collections. It has been found necessary, therefore, to take a round sum from the Profit and Loss balance, and it is also deemed prudent to transfer from Rest to Profit and Loss account a sum of $50.000 and to reduce the June dividend from 3½ per cent. to 2½.

The gentlemen who constituted the former board of directors were re-elected, with the exception of Mr. J. R. Young, who retired voluntarily after long service. To succeed him, Mr. W. A. Marsh, well known in connection with the Quebec shoe trade, was chosen. It was to be expected that Mr. McDougall, the general manager, should refer as he did to the gifts and good qualities of his predecessor, the

late Mr. Stevenson. And we are pleased to observe, further, that the shareholders carried, and ordered to be sent to the family of that most estimable gentleman, a resolution expressive of regret at his loss.

DIVIDENDS OF LOAN COMPANIES.

The reduced earnings of Canadian mortgage loan companies of late lead irresistibly to the reduction of dividends by these institutions. We observe, for instance, that the Western Canada Loan and Savings Company, which for thirty years has paid its shareholders ten per cent. per annum, now declares its half-yearly dividend at four per cent. instead of five. Other loan companies, the Union Co., the Canada Landed and National, and the Building and Loan Association, have followed the fashion, and it may be that still others will make reductions during these fat years for borrowers and lean times for the investor.

The decline in dividends is caused, we have no doubt, chiefly by the low rates of interest prevailing and partly by the large proportion of the companies' funds which must perforce remain idle in bank because of the present scarcity of investments of the best kind. It speaks well for the country that neither Manitoba nor Ontario farmers are borrowing to any extent this spring, though of course this very abstention from borrowing is the reverse of encouraging to the companies, whose function it is to lend.

It is to be borne in mind that renewals of maturing mortgages of the first-class can only be secured to-day at five per cent. or five and one-half per cent. at most, practically on the borrower's own terms. To the above must be added the well-known fact that much property in the city of Toronto has fallen into mortgagees' hands, the rental returns from which are seriously cut into for the present by necessary repairs and heavy municipal taxes. In a rich and progressive city like Toronto this state of things ought soon to cure itself, but loan company directors are to be commended in the meantime for curtailing the distribution of earnings until the expected improvement has taken place.

THE WOOL SITUATION.

Toronto wool merchants are walking over one another in mad anxiety to buy wool, or rather to prevent competitors from securing wool. The market quotations are: Fine selections, including Southdown, 21c. per lb.; fleece, combing, 20c.; rejects, 14 to 16c.; unwashed, 11½ to 12c. These prices, if not excessive, are at least high enough, when the risks and uncertainty of the future are considered. But competition has caused transactions to be made at even higher figures. We learn of a sale of fleece combing in Toronto at 21 cents per pound, and have been informed that merchants offer, in addition to regular quotations, to pay freight charges, which means from 35 to 50c. per 100 lbs. If the merchants making these extravagant offers were not of unquestionable financial strength, we should be inclined to doubt the permanence of this state of affairs. Merchants throughout the country are apparently not unwilling to take advantage of a favorable market in Toronto, and offerings are very free.

Notwithstanding the statements of certain inspired newspapers, we can perceive nothing in the domestic woolen goods trade to warrant high prices for wool. While the consumptive demand is strengthening and the feeling is firm, prices have not advanced because of the intense competition among manufacturers. Woolen goods command no better prices in Toronto now than they did a year ago, although during the interval an advance of three cents per pound has been made in the wool market. We are told that Canadian mill owners are unwilling to concede the recent sharp advance in wool, and with one notable exception are not buying for future use, evidently expecting to make purchases later in the season to better advantage.

The wool markets of the United States are by no means strong. A Philadelphia house writes: "From the data available with reference to supply and demand, some purchases seem to indicate courage rather than good judgment. Higher prices are apparently not feared by manufacturers, if their views may be judged by their present indifference towards domestic wool." The Boston *Journal of Commerce*, a textile authority, says of wool: "There certainly is no change looking in the slightest degree toward better prices. The tendency is in the opposite direction." The imports into the United States of wool, shoddy, noils, wasters, etc., for the eight months ending April 30th, 1895, amounted to 162,372,871 lbs. as compared with 81,261,994 lbs. during the same period in 1894 and 122,791,991 lbs. in 1893. The United States offers a wide market for our wool producers, but we must not overlook the fact that there are a great many wool producing countries seeking a market in the United States.

It is to England, however, rather than to the United States we must look in order to take our bearings. The last series of London auctions closed on the Queen's Birthday, 24th May, or one week earlier than the announced time. Merchants naturally presume that since nearly one-fifth of the wool was withdrawn, the sales were stopped in order to sustain prices. In woolen goods, the small advances made are to be attributed to a rage for certain particular patterns, rather than to any strength imparted by the conditions of supply and demand.

Many buyers are proceeding upon the hypothesis that high wheat means high wool. And there is truth in the fact, that the recent improvement in wheat, hides, cotton and other staples of commerce must affect the woolen trade. Fashion, too, may favor Canadian wool interests. There is every appearance in the United States of an increased demand for worsted goods, and if this tendency be developed, it must result to the advantage of the Canadian wool producer, whose output is in well known favor with the manufacturers of worsteds. But if this be the only basis of the present high prices paid for Canadian fleece, then the market stands upon a very insecure foundation.

LOCAL IMPROVEMENT SYSTEM.

EXCESSIVE POWERS.

The abuses of the local improvement system have now been made manifest, so that he who runs may read. It is quite evident that municipal councils have greater powers of expropriation and confiscation than it is safe to trust to bodies that may consist largely of men destitute of any sense of responsibility. There is no knowing what crazy scheme may be rushed through the council under cover of being an improvement, and there is no safety for those who have anything left except in a reversal of policy, which can be depended upon to stay reversed, or in some modification of the law.

Let it be remembered that the local improvement system has conferred upon us benefits at least as great as the evils that have accompanied the benefits, and that the evils are due to our own foolishness. Under the influence of the system the face of the city has been transformed. Fifteen years ago it was one of the dirtiest, sandiest, dustiest, mud-

diest cities on the face of the earth. It had no roadways that were passable after a day's rain. The depth and filthiness of the mud are almost unimaginable to us to-day. There were almost no sidewalks, except of wood. Three-quarters of the streets were not sewered, and half of the houses were without modern improvements. Nearly all the improvements that have been made must be credited to the much-abused local improvement system. Until that system was brought into esteem by the exemption from general rates for like purposes being extended to properties specially assessed, there was no progress. The people on the central streets, who were anxious for improvements and able to pay for them, could get nothing done. If we were to abolish the local improvement system to-day, we should begin to drop back into the old bad state. The ward grab game would revive as soon as there was a chance for four wards to combine and plunder two. In short, any proposition to go backward would be voted down as soon as it was understood.

What we have to do is to take hold of the local improvement system, shear off all the excrescences and defects and adopt it to our needs. We don't want stagnation. We want to continue to grow healthy, and to have ready to our hands the means of forcing the adoption of such improvements as are absolutely necessary for the welfare of the community.

It ought not to be difficult for the city council to frame out of its experience a set of regulations for future guidance. The powers of the council under the local improvement system are so extraordinary that they ought to be exercised only with the greatest care. As it is, hundreds of land-owners and mortgagees have been deprived of their property without compensation or remedy. Works have been constructed exceeding in cost the value of the land against which the assessment has been made. These works are in many cases so far in advance of the needs of the population that they will have rotted away long before they can be put to use.

There should be no more using of the public credit for land speculation; no more opening of streets through the wilderness; nor construction of sewers where there are no people to use them; and above all there should be no more conspiracies among aldermen, contractors and real estate owners, to force premature improvements upon persons of more honesty and better judgment than themselves.

The law needs amending in some particulars. It never can have been the intention of the legislature to entrust municipal councils with the power to rob property owners as they have been robbed in Toronto. Probably it never entered the heads of the members of the legislature that in such a flourishing city as Toronto, so-called improvements could be devised which not only would not increase the value of the land, but would actually decrease its value by rendering it too costly to carry. It is quite clear that some of the powers of the city council ought to be diminished. The ordinary alderman has proved himself not fit to be trusted with them. Probably it would be a useful amendment if the proportion in number and value of the petitioners were increased. The number necessary to petition against "initiative" plan might be decreased. The initiative process should be very sparingly used. The time of payment for all works might be shortened. A very useful amendment would be one enabling property owners themselves to contract for, execute and pay for some of the works, thus saving all the expense of the council proceedings, issuing of debentures, book-keeping and collecting.

A very necessary change in the law is one giving mortgagees a status on all local improvement petitions. At present the mortgagee, no matter how large his investment, has no say in the matter. He has been robbed right and left during this local improvement boom. There are many cases, such as the following: A bookkeeper ten years ago purchased a 200 foot lot in St. Matthew's ward, paid for it by degrees, and in 1889 sold it again, taking $500 in cash and a mortgage for $2,000. The new owner went in with the others for a lot of reckless improvements. When the tax bills came in he found himself charged, general taxes, $40, local improvements, $180; total, $220. He could not begin to pay them. He strove for three years to sell, trade, or give the lot away, but could not. Then the mortgagee had to take back his land, with more taxes upon it than he could pay. Consequence, he has lost his life's savings; and he is one of many. The law should be changed, so that councils, before passing local improvement by-laws, should be obliged to send registered letter notices to every mortgagee whose name and address appears upon the Registry of Title. If one-half in value of the mortgagees object to the work, it should not be proceeded with. Certain it is that such a provision would stop many reckless jobs. It might in some cases aid covetous mortgagees in preventing improvement of land which they wanted to grab. Even this would be a small evil compared with the evils now existing.

A MODERN COAL SCHEME.

A second coal mining company, which makes a large figure on paper rather prospectively than actually, has recently made its appearance in Nova Scotia. Some coal field leases, held by Mr. A. C. Jones, who hails from New Brunswick, have been made the basis of a deal, from which emerges the Inverness Coal Mining Company. The operators are stated to have got possession of the charters of several of the companies already doing business in the province. Under the reorganization that is to take place new and improved machinery will be used. The company, so the promise runs, will make a specialty of establishing its own lines of communication to various coal-consuming points which we have not seen named. But Halifax, St. John, Quebec, Montreal and Toronto are mentioned as points where the company will own coal yards, and distribute coal to consumers. It will require a special effort to succeed in bringing coal from Nova Scotia to Toronto, so as to compete with coal brought from nearer points. The capital of the Inverness company is put at $1,000,000, but it is expected to be extended to $20,000,000. From this it will be seen that the project is sufficiently ambitious. Where $20,000,000 will be obtained, if it is to be real, we cannot pretend to conjecture; what are the estimates which can give hope of a return on so large a sum, is a secret of which the projectors are alone in possession. Meanwhile, it is safe to say that there are plenty of people, in various directions, ever ready to welcome a supply of cheap coal. Mr. Jones is the largest stockholder; the president is Mr. Lawson, of Boston, and Mr. Moss, of the same city, treasurer.

"SIC VENIT GLORIA," ETC.

Among the local events of the week has been the laying of the foundation stone of a building for the Independent Order of Foresters, on the corner of Bay and Richmond streets in this city. Fond as ever of the spectacular, and with a shrewd notion of effective advertising, the Supreme Chief Ranger, Oronhyatekha, M.D., managed to secure the presence of Lord Aberdeen at his show, just as he had managed to get and to exploit the names of Sir Oliver Mowat and Hon. G. W. Ross as members of his Order. A colored sketch of the new building appears in a window

on King street, and a handsome one it will be. Contrary to expectation, the stories will number only nine, though if it had been in an American city there would likely have been a story for every letter in Oronhyatekha's name. We do not see a brazen image of the Doctor anywhere in the design, but the architect has shown a keen appreciation of a foible of that functionary in placing at the main entrance of the pictured building a burly figure, which looks like that of the Chief Ranger, accompanied by a lady in a red gown, typical perhaps of the daughter or relict of a deceased member who has just received, say $3,000, and to whom besides, the stout party aforesaid acts as guide, philosopher and friend. In a year or two, no doubt, the worthy Chief will be able to point to the red and brown structure and to say to the members of the I.O.F.: "Behold, gentlemen, this monument to your Order and to ME. This represents $60,000 [or is it $80,000?] of the vast sum which has come out of your pockets, not mine, to exhibit the glories of assessment life insurance and the cleverness of—YOURS TRULY."

BRITISH COLUMBIA SEALERS.

Of the thirty-four schooners engaged in sealing on the western coast of the Pacific, all but three had arrived in Victoria by the last week of May. The total spring catch amounts to 6,124 skins, the largest single catch having been made by the schooner "Director" in the South Atlantic, while on her way from Halifax to British Columbia Other good catches were: "Triumph," 353 skins; "Dora Selward," 503 skins; "Saucy Lass," 257 skins; "Amoko," 325 skins, and "Florence M. Smith," 285 skins. Some of the schooners have, it unfortunately appears, transgressed the international seal fisheries regulations, and suffered the consequence in confiscation by the United States cruisers. The first shipment of skins for the season, numbering 1,200, was made east to London by a Victoria firm on the 28th inst. There are 22 British Columbia sealers on the Japanese coast, from whom no information has as yet been received.

ST. THOMAS BOARD OF TRADE.

The annual meeting of the St. Thomas Board of Trade was held on Friday evening last, 31st May, the president, Mr. W. H. King, in the chair. The annual report considered the year 1894-5 commercially an improvement on its predecessor. "The factories are nearly all working a full force on full time, and with the railways things are better than for some time past. Failures among the traders of the city have again been few."

The arrangement between the Lake Erie & Detroit River and the London & Port Stanley railway companies, whereby the former operate the latter, has been consummated, and the former is likely to extend its track from Ridgetown into St. Thomas. The Board desires that the city should have the benefit of an electric service "within the municipality and to our summer resort, Port Stanley," and considers that in the matter of electric transportation St. Thomas is far behind many of its sister cities, London, Brantford, Windsor and Oshawa

Losses by fire have been greater than usual, and the report regrets that nothing has been done towards providing a fire alarm telegraph. It also recommends, very sensibly, the purchase of two or more chemical extinguishers, in order that in the case of incipient fires great damage by water may be avoided. The needless loss often occasioned to proprietors and insurance companies by the senseless deluging of premises with water is enough to make a spectator tear his hair. The additions of handsome dwellings to the residential quarter of the city are referred to with justifiable pride. The gentlemen whose names follow were elected officers of the Board for the ensuing year:

W. H. King, president.

John Campbell, vice-president.

J. W. Stewart, secretary-treasurer.

J. H. Still, R. Potts, J. M. Green, Joseph Mickleborough, W. H. Murch, McDonald Fraser, and the president and vice-president compose the council.

We are informed of the following changes among the staff of the Canadian Bank of Commerce: Mr. G. de Courcy O'Grady, for some years deputy inspector of the bank, has been appointed manager at Woodstock. The former manager at Woodstock, Mr. D. H. Charles, has been transferred to Galt.

TORONTO GENERAL TRUSTS COMPANY.

The results of another year's working are shown by this important company, the range of whose operations appears to grow steadily wider. Out of the profits of the last twelve months, after paying ten per cent. dividend to shareholders, the sum of $10,000 has been added to reserve, making that fund a quarter of a million, and $15,000 to contingent account, which is now some $43,000. Adhering to the policy of calling up from time to time a proportion of the subscribed capital equal to the increased amount of the reserve fund, the directors recommended that a further call of 2½ per cent. should be made on the million subscribed, bringing the paid capital up to $250,000. And at a special meeting of shareholders held on 4th June this recommendation was adopted. The security of a financial kind which the company will offer to its customers when this sum is paid in will be $548,000 in paid capital and accumulated profits, and $750,000 subscribed and uncalled capital, a very handsome total.

Dr. Hoskin, one of the vice-presidents, stated at the meeting last week that the estates and work which had passed through this company's hands during the thirteen years since its formation exceeded in value fifteen millions of dollars. This fact serves to point out how large must be the volume of transactions all over the province, such as executorships and trusteeships, which used in former years to be entirely confided to the care of private individuals, but are now being placed in the hands of this and other trust companies. And the special advantages which companies have over individuals for such responsible work were well summarized by the same gentleman when he named them as continuity of service, security, effective management, constant supervision, and reasonable charges. There remains to be noted the important matter of which Mr. Beatty spoke at the meeting, the thorough methods of inspection and audit adopted by this company to secure accuracy and safety in its transactions. And this is by no means least among the precautions taken to merit, what is so essential to such companies as these, the confidence of the public.

ONTARIO MUTUAL LIFE ASSURANCE CO.

The report of this well known Canadian life company for its twenty-fifth year exhibits a progress coincident with that of the Province of Ontario itself. There is indeed hardly a better test of the enlightened economy of a community than the manner in which it takes advantage of the benefits of life assurance. In this respect the premier province of the Dominion makes an extremely creditable showing, whether we regard the number of associations which have originated within her borders or the extent to which her residents have patronized British and American life companies. But with reference to the Ontario we must not forget that it does business beyond the province after which it is named. Its policies are now issued from the Atlantic to the Pacific.

Comparing the business of the company for 1894 with that of the previous year, betterments are shown in nearly every direction. Premium income in 1894 was $527,131, a gain of $13,000; interest income, $132,858, a gain of $19,000; aggregate insurance, $18,767,698, an increase of a million; dividends paid to policyholders, $70,734, as compared with $63,900. There is a gain in total assets of nearly ten per cent.; a gain in surplus of more than $51,000, and, what is not least creditable, a decrease in expense account. The only feature respecting which the management needed to be in any way apologetic is the new business of 1894, which is not so great as that of 1893. But for this, as the president explained, there were several reasons, mainly the financial and industrial conditions of the year; and in any case, "the success of a company does not consist so much in the volume of business done as in its careful selection and in its return to policyholders." Out of an income of $659,989 there was returned to policyholders $136,540 in death claims under 91 policies, $22,111 in endowments, $72,294 in cash surrender values, and $70,734 in cash surplus—in all, $301,681

An important announcement was made at the meeting, namely, the change in valuation of the company's policies from the Hm. 4½ per cent. table to the actuaries' 4 per cent., owing to the reduction in the rate of interest obtainable on investments. To do this the sum of $117,231 will be transferred from surplus to reserve. The transfer, however, the president considers, can be made without lowering the liberal scale of distribution to policyholders in reduction of their premiums heretofore maintained. The company has now $18,767,000 of assurance in force, under 14,147 policies, showing an average amount of $1,185 per policy. The reserve to be held against this is $2,706,143 The Ontario Mutual has shown steady growth for a quarter of a century, and its management is to be congratulated on the care and economy with which its affairs have been conducted.

FREEHOLD LOAN & SAVINGS COMPANY.

The thirty-sixth annual report of the Freehold Loan & Savings Company exhibits a satisfactory volume of business during the year. While the rate of interest obtainable on mortgages has declined, there has been at the same time a reduction in the rates for debenture money borrowed. The company continues the policy of reducing its deposits, some of which have been replaced by currency debentures, so that while deposits are now down to $473,009, Canadian debentures stand at $475,000, and sterling debentures at $2,969,000.

The earnings of the year were $344,092, which is equal to rather more than six per cent. on the $5,616,000 of mortgages held, and the company has about $180,000 less money in bank. The reserve remains at $659,550, and the contingent fund is $5,000 less than a year ago. Eight per cent. dividend has been declared. The assets of the company in mortgages, municipal bonds, office building and unpaid subscribed stock are $7,951,518, against liabilities to the public of $3,970,371.

The president, in his remarks at the annual meeting, pays a compliment to Canadian business men and farmers for their efforts to withstand and overcome the financial difficulties of the year. He expresses the resolution of the directors to write off ascertained losses without hesitation, as they have done for several years, and appropriately reminds his hearers that the contingent fund was created on purpose to meet such losses. He has an instructive paragraph on Manitoba, which is making steady progress, and whose farmers are advancing in the direction of mixed farming. Furthermore, he tells us, commercial affairs in that province are improving in respect of shorter credit and less of it, a very desirable tendency. After quoting statistics of Ontario agriculture showing its satisfactory development, he concludes that its farmers are aiming "to adopt the lines of work that are most profitable and promising, . . . adapting themselves to the changed conditions of agriculture." The former board of directors was re-elected.

MUNICIPAL MEMORANDA.

The assessment of Rat Portage for 1895 is thus given: Value of property in Rat Portage proper, $1,006,690; in Norman, $58,635. Total, $1,065,325. The population of the town is 2,959.

A contract with the town of Sudbury has been secured by Messrs. W. H. Plummer, of Sault Ste. Marie, and M. McCarthy of Sherbrooke, Que., for putting into Sudbury a system of waterworks, sewerage and electric light. The contractors take in payment $30,000 of debentures, payable in thirty years, and $10,000 debentures payable in twenty years, at par.

The town of St. Henri, on the Lachine canal, near Montreal, has a debt of $118,000, and a meeting was arranged for this week of the proprietors and ratepayers to decide whether to order a loan of $200,000. With this sum it is proposed to pay off the present debt, and if they can get it at 3 per cent., thus saving about $3,500 a year, with the balance of $82,000 they intend finishing the work of macadamising, etc., begun on St. James, St. Emile, St. John and Maria streets. The meeting failing to agree, the council will order a vote to be taken.

The town of Woodstock, we are told, has granted a sum of $200 to its town band, to play in the town park one evening of each summer week. A very sensible thing to do, and an example which other towns might follow. The residents of places in the adjoining county of Waterloo, largely German as they are, know well the good effect, the recreative influence of music. And they derive a degree of elevating pleasure from frequent social gatherings of a musical kind. Let us have more town bands, playing on fine evenings for the benefit of the whole populace. "Music is a discipline," said Luther, and a mistress of order and good manners. . . . It removes sorrow from the heart, and the fascination of evil thoughts from the mind." A good band has a more tranquilizing effect upon a village, we venture to think, than a town constable, and municipalities may well consider the formation of such as a measure of social economics.

The advantage of employing to audit the accounts of a municipality, men who know their business as auditors, and are not afraid to speak out when they discover anything irregular, is illustrated in the case of Brantford. In their report as auditors for 1894, Messrs. J. W. Turnbull and W. T. Mair note several points in which the recommendations of auditors have been adopted by the council with advantage to the municipality. For example, the securities constituting the sinking fund are now deposited with the manager of a bank, subject to surrender only on the joint order of the mayor, chairman of finance and city treasurer for the time being. Further, they call attention to certain items of the city's expenditure which they consider illegal, consisting of payments to members of the aldermanic and other municipal boards of 1894 controlling the expenditure of the city's funds. "These payments, as they occur throughout our statements, we have prefixed with the word 'illegal,' so that attention may be readily drawn to them."

BUILDERS' NOTES.

The Lake of the Woods Milling Company have decided to build a large elevator at Moosomin, Man.

British Columbia shingle mills are pressed with orders, but competition still keeps prices at low water mark.

Additions and extensive repairs are being made to the Stetson, Cutler & Co.'s large mill at Indiantown, N.B.

The Ogilvie elevator, at Stonewall, Man., is receiving an addition of some 90 feet in length, with a capacity of 20,000 bushels.

The logs are coming into the booms near Fredericton in great quantities, and the way they are being handled must be satisfactory to all concerned.

It is estimated by the *Gleaner* that 105,000,000 feet of lumber has been cut this season on the upper St. John and its tributaries, all of which has been safely got out.

The drives on the Restigouche river are getting along very well. It is estimated that between seventeen and eighteen millions have been cut on the Restigouche and its tributaries this season, while last year's cut in that locality aggregated 20,000,000 feet.—*Fredericton Gleaner.*

The Lake of the Woods Milling Company have decided to increase the capacity of the elevators to be erected by them, in Manitoba, this year, from that formerly decided on. All their new elevators will have a capacity of at least 40,000 bushels instead of 30,000. This is due to the excellent crop prospects in this province.

The water is favorable for lumber driving, and Mr. Moore expects to clean the river pretty thoroughly. He thinks by fall 100,000,000 feet of lumber will have passed through his hands in the boom, and that of last winter's entire cut not more than 400,000 feet will be hung up, so that almost all of the cut will be available at the boom at au early season.—*Woodstock Dispatch*

Builders are now busy at work erecting the Ogilvie Milling Company's elevators at Carman and Virden, and it is expected that these will be completed within the next week or ten days. Then the men working at Carman will proceed to Holland, and those at Virden to Midway, on the M. & N. W. Railway, to build the elevators arranged for at those points. The next in order will be Cypress River and Methven.—*Manitoba Free Press.*

A large quantity of lumber is being exported from this city this season. The mills that are going are doing a rushing business, and are about able to keep ahead of the market, while those that are undergoing repairs are being rushed through as rapidly as possible in order also to aid in the cut. There are at present eleven sailing vessels and one steamer loading lumber in the harbor. The total tonnage of these vessels amounts to about sixteen or seventeen thousand tons, and when loaded they will carry between seventeen and eighteen million feet of lumber.—*St. John Sun, May 27th.*

DRY GOODS JOTTINGS.

Overheard at the Horse Show.—"That's a perfect dream of a bonnet." "Yes, but I'll bet it cost a regular nightmare of a price."—*Philadelphia Record.*

In a few weeks vacation time will be here; see that the intervening days are spent in a close application to business and the holidays will seem all the more enjoyable.

The stationery and fancy goods stores of Stratford, on and after Monday, June 3rd, will close every evening at seven o'clock during the months of June, July and August.

The ventilation of some dry goods stores is disgraceful, a nuisance to the public and a serious menace to the health of the employees. Do you know of a store which needs renovating?

Large shipments of cotton, says the *Courier*, are being made just now by the St. Croix cotton mill. One day's shipment this week consisted of about 250,000 yards consigned to Kingston, Hamilton and Toronto, Ontario.

Knit goods are selling in Toronto from 25 to 30c. per dozen cheaper than when wool could be had 3c. a pound less than at present. The National Policy cannot protect manufacturers from injuries caused by themselves.

The feeling in England appears to be growing in favor of curled cloths, both for dresses and capes for autumn wear. These, with friezes and cloths of the plain covert coating order, are likely to be the leading lines for autumn.

"'Tis an ill-wind that blows no one good," and the scorching hot winds of the last several days have lived up to the old adage. Underwear, hose, ties, wraps, hats, parasols, and many other commodities suited to a high temperature have been selling themselves.

Mitchell was asked to bonus a carpet factory and refused. Mitchell may never be filled with empty smoke stacks and vacant factories, but one thing is certain, if she continues in her wisdom the inhabitants of the town will always be able to pay their taxes.

At the beginning of the month another advance was recorded in the cotton goods market. A B shirting was advanced six per cent. by D. Morrice & Co., the manufacturer's agents. Following the advances previously noted, this must be taken as a sign of great strength.

A number of wool buyers are advising farmers, in view of the American market being open to Canadians, to market their wool unwashed. The question is a debatable one, and the interests of the merchant and the farmer may possibly not lie in the same direction.

The official estimate of the prospective Egyptian cotton crop places the present area at 1,075,000 acres, with a possible crop, under favoring conditions, of 1,050,000 bales American standard. Shipments of Egyptian long stapled cotton to the United States continue to increase, and for the commercial year 1894-95 will amount to 47,500, or equivalent to 71,000 bales of American standard. The shipments ten years ago were less than 4,000.

There appears, says a writer in the *Drapers' Record*, to be a perfect rage for crepons and kindred dress materials. Some are of silk, and others of pure mohair, with cross silk stripes, which give a bright silken appearance to the fabric. Many of the finest examples I have seen hail from Paris. These command a high price, and are necessarily scarce. Repeats are urgently required, but are very slow in coming to hand. Those who anticipated the demand, and who bought early, are now in an enviable position.

The *Drapers' Record*, May 25th, says: "The following buyers and travellers have sailed westwards: Mr. W. D. Michael (Messrs. Gordon, Mackay & Co., Toronto), Mr. Ernest Hamel (Messrs. Hamel Frères, Quebec), and Mr. J. Black (Messrs. R. Linton & Co., Montreal). Mr. Black sailed by the Dominion liner "Vancouver," which also conveyed Mr. J. C. McLimont and his bride to Canada. Mr. W. T. Minnes (Messrs. Macnee & Minnes) returned to Canada on Saturday by the "Campania." Mr. John Boyd (Messrs. Boyd, Bower & Brummel, Toronto), Mr. R. C. Struthers (Messrs. R. C. Struthers & Co., London, Ontario), Mr. A. B. Macpherson (Messrs. Lonsdale, Reid & Co., Halifax) and Mr. T. Brophy (Messrs. Brophy, Cains & Co., Montreal), have also sailed.

FOR GROCERS AND PROVISION DEALERS.

Hull is to have new market premises.

The Fearman pork factory at Hamilton suffered from a $15,000 fire on Sunday.

The Owen Sound evaporating factory will be conducted during the coming season by Mr. Geo. Wilcox.

Woodstock ratepayers will vote on June 24th on a by-law for the erection of market sheds to cost $9,000.

The inevitable consequence of a rising wheat market, an advance in the price of bread, is making itself felt.

It is estimated that there are about 15,000 bushels of wheat in the farmers' hands within hauling distance of Forest.

The Eastern markets are being supplied with fish caught along the Atlantic coast, and until this supply is exhausted shipments of fresh salmon from British Columbia will cease.

The employes of Messrs. Rankin, biscuit manufacturers, St. John, recently struck for a Saturday half holiday, but soon decided that idleness does not pay, and are now back at work.

A Patron storekeeper near Kingston recently sent an order to a wholesale firm for 12 bbls. of nutmegs, or at least so the illegible writing of the farmer-merchant was interpreted. The order was probably intended for 12 lbs.

The shipments of fish on Saturday, says the Yarmouth *Times*, amounted in value to $14,000, consisting of 1,002 barrels of mackerel, 827 crates of lobsters, 434 cases and 200 half cases of canned lobsters, 6 boxes of salmon, and 36 cases of halibut.

The cheese factories in Kings and the two adjoining counties, says the St. John *Sun*, are opening for the season under most favorable conditions. New factories will be opened this season in nearly every county in the Province of New Brunswick where dairying is carried on to any extent.

The Barnsdale Trading Co. of Stratford, Limited, has been incorporated to carry on, with a capital of $20,000, the grocery business now conducted in Stratford by E. K. Barnsdale & Co.; the persons consti, tuting the company are E. K. Barnsdale, F. W. Byatt, J. E. Barnsdale and Mrs. Barnsdale and Mrs. Byatt.

Vermont stands at the head of all States in the amount of maple sugar produced yearly -9,000,000 pounds—and with the sugar 100,000 gallons of molasses. Following Vermont come New York with 6,000,000 pounds, Ohio with 2,500,000, New Hampshire with 2,000,000, Pennsylvania with 1,800,000, Indiana with 1,500,000, and Massachusetts, Virginia, Kentucky, and West Virginia high on the list. *-New England Grocer.*

The following is a statement of shipments of black Singapore and Penang pepper from the Straits, January 1st to June 1st:

	1895	1894
America, tons	3,571	1,120
Continent, "	4,135	3,615
England, "	3,465	3,355
Total	11,175	8,090

PATENT RECORD.

The following list of United States patents, granted to Canadian inventors, April 30th, May 7th, 14th and 21st, 1895, is reported by James Sangster, patent attorney, Buffalo, N.Y.:

William Chandler, North Bend, lamp-wick trimmer.

James Houlehan, assignor of part to R. Laird, Chicago, Ill., C. J B. MacIvor and W. H. Laird, Toronto, and J. R. Barclay, Montreal, magnetic ore separator.

John L. Jones, Toronto, cinder-sifter.

John A. Sinclair, Kingston, book-holder.

Henry Ievers, Quebec, toothache remedy and surgical dressing (Trademark.)

David T. Baxter, Hamilton, combined carbon-roll holder, and temporary binder for manifolding tablets

Charles W. Lutes, assignor to R. Muir, Winnipeg, tea chest.

Joseph H. Hantion, Hull, match-splint coiling machine

Henry E. Moffatt, Galt, oil-extractor for exhaust steam.

Edna W. Troop, Windsor, bouquet holder.

Selden S. Casey, London, metal fabric.

Jules Colas, Montreal, draining well.

Silas Fader, Vancouver, car for transporting coal, etc.

George McKinney, Hamilton, instrument for laying out stair-stringers.

James Morrison, Toronto, valve.

Joseph E. Porter, Ottawa, Ill., scraping machine for streets, etc.

Daniel D. Wilson, assignor to W. B. Close, Toronto, hand-fire extinguisher.

William H. Rodger, Ottawa, medicinal tonic for nervous weakness. (Trademark.)

INSURANCE NOTES.

An eastern exchange tells us that the home office of the Ætna Life, of Hartford, has recently been undergoing a renovation to make room for its rapidly growing accident department.

The directors of the Guardian Fire and Life Assurance Company, Limited, recommend a dividend of 5s. per £10 share, making with the interim dividend, 7s. 6d. per £10 share, or 7½ per cent., for the year.

In the Montreal city council the other day, at the urgent request of the chief of the fire brigade, who said he had an insufficient supply of hose for a large fire, it was decided to invite tenders for 10,000 feet of new hose.

The death is announced of Mr. F. J. Roan, who for many years acted as cashier at the London office of the Liverpool and London and Globe Insurance Company. Mr. Roan was in the 72nd year of his age, and had been in the service of the company nearly fifty years.

Consequent on the retirement of Mr. A. H. Bailey, the directors of the London Assurance Corporation have extended the duties of their fire manager, Mr. James Clunes, to those of principal officer in the life department. In this he will have the co-operation of Mr. Robert Cross, F.I.A., who for the past four years has been assistant actuary.

The directors of the Northern Assurance Company recommended to the general meeting of shareholders to be held on the 14th proximo:—"That the sum of £50,000 be added to the fire Reserve Fund; that a further dividend of £1 5s. per share, and a bonus of 5s. per share, be paid on account of the year 1894, making the total distribution for the year £2 10s. per share."

We understand that D. M. Telford, for many years connected with the Canadian Pacific Railway, has been appointed manager at Winnipeg of the Provident Savings Life Association Company, of New York, which position was filled by Mr. J. G. Moore, who resigned in December last. Mr. Telford being well and favorably known in Winnipeg, the appointment is looked upon as very satisfactory

The *Insurance Record* of London says —" We regret to record the death, at the age of 67, of Mr James Robb, who for many years occupied the position of fire manager of the Northern Assurance Com-

pany. The deceased earned the respect of all with whom he came in contact, on account no less of his sterling excellence of character, than of his sound business judgment and practical abilities."

The report of the chief of the Quebec fire department for the last eighteen years shows that there has been in the last five years a marked increase of chimney fires and false fire alarms in that city. The average number of these since 1890 has been 384 per annum, where in the previous dozen years the average was only 194. Then the "actual fires and incipient fires," which averaged 45 per annum in the first five years after 1877, increased to 57 and 81 in successive five-year periods, and to 120 in the three years ended with May, 1895.

The following circular has been issued by the President, Mr. John A. McCall, to the representatives of the New York Life Insurance Company: "At the end of this month we are obliged by the laws of some of the States, to file a semi-annual report. As announced at the beginning of the year, we have been pursuing a most conservative course in all our transactions, and, it is gratifying to add, with excellent results. We have determined that hereafter, in all our Reports to Insurance Departments and the public, we shall, in reporting new business, include in the amounts issued and in force only such policies as have been paid for in cash to the company itself. All other policies will be omitted from our returns. You will see the necessity, therefore, for prompt collections and remittances."

ELECTRICAL MEASUREMENTS AND STANDARDS.

In reply to a correspondent in the Province of Quebec, who sends us a number of questions, we would say that some of the questions he asks about electricity are beyond our power to answer. Upon other matters enquired about, electrical engineers themselves are not agreed, and it would not become us to offer an opinion. His enquiry about the meaning of "volts," as well as of "watts" and "amperes," has already been answered in these columns. Still, a report of the International Electrical Congress, which was lately held in Chicago, may afford some information of value to him and to others.

There were some twenty or thirty delegates, leading electricians in Great Britain, France, Germany, and the United States, present at that congress—such men as Ayrton (the honorary president), and Preece from England, Mascart and Hospitalier from France, Siemens and Carhart from Germany, Sylvanus Thompson and Mendenhall from the States. Papers were read on a variety of subjects. Among them, ocean telephony, signalling through space by means of electric vibration, subterranean electrical construction, substances for standards of resistance. For two days the congress discussed the transmission of motive force.

The following conclusion was reached by the delegates as to units of electrical measurement:—That the unit of resistance should be the international ohm; the unit of current the international ampere; the unit of electro-motive force the international volt; the unit of quantity the international coulomb; the unit of capacity the international farad; of force the international watt; that the unit of work performed should be the joule; and the unit of induction should be the henry.

TABLE OF ELECTRICAL TERMS.

The unit of	Resistance	—the ohm.
" " "	Current	—the ampere.
" " "	Electro motive force	—the volt.
" " "	Quantity	—the coulomb.
" " "	Capacity	—the farad.
" " "	Force	—the watt.
" " "	Induction	—the henry.
" " "	Work performed	—the joule.

A committee was named to look into the question of a standard of light, but did not reach a solution. The opinion is expressed by a writer in the *Electrician* of London, England, that the importance of the gathering consists in the fact that it assists towards an understanding, if not agreement, between Europe and America in the matter of electrical units and standards. M. Hospitalier stated, however, to an American interviewer that he regards the proceedings of the congress as having been hasty, as well as lacking in order. And he seems to think that more valuable work might have been done with a greater length of time and greater deliberation.

AMERICAN IRON ORE PRODUCTION.

It is not easy for an unaccustomed reader to grasp the significance of millions of tons of any product. But if we wish to measure the industrial development of the United States, we must pay attention to the output of iron. And when we come to examine into the production of iron ore in the United States of late years, the millions surprise us. Mr. John Birkinbine, of Philadelphia, who is an acknowledged authority in such matters, tells us that in the year 1894 the production of iron ore in the United States was 11,879,679 gross tons, and that 65 per cent. of it, viz., 7,755,494 tons, was produced in the Lake Superior region. Although the production throughout the country in 1894 was greater than that of the previous year, it was below the average yearly production from 1889 to 1892 inclusive, which was 15,360,484 gross tons. The figures for three years past are: 11,879,679 gross tons in 1894; 11,587,629 gross tons in 1893; 16,296,666 gross tons in 1892. The production of 1892 represents the maximum for all time past. Michigan continues to be the largest producer among the States, holding this record for six years past. The average value of ore at the mine in 1894 was but $1.14 a ton, against $1.66 a ton in 1893, according to the same authority.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, June 6th, compared with those of the previous week:

Clearings.	June 6.	May 30.
Montreal	$13,199,823	$10,811,959
Toronto	6,519,675	4,804,425
Halifax	1,210,375	937,598
Winnipeg	1,035,513	831,908
Hamilton	668,834	512,127
Total	$22,634,220	$17,898,017

Aggregate balances this week, $3,046,257; last week, $3,237,564.

ANSWERS TO ENQUIRERS.

Georgian, Halifax.—Possibly you are right in saying that the explanatory information given in an article on exports was in part "such as every merchant, or indeed, every fairly informed person ought to know." Yet there is reason to believe that there are many who are not aware of these economic facts, and this is the reason we try to make the matter clear to their minds. We do not write altogether for scientists and university men; there are many plain people among our readers. There are people, we venture to say, even in Halifax, who would be puzzled by the anomaly of our importing millions of bushels of American grain, if it were not explained to them that the grain from the Western States comes to Canadian ports in bond, and takes the St. Lawrence route through Montreal to the sea, appearing among Canadian exports.

—Mr. Robert G. Leckie, who for five or six years past has been the manager of the Londonderry Iron Works in Nova Scotia, has resigned his position to give his entire time to the coal and iron properties he possesses in New Brunswick. His successor at Londonderry is Mr. C. A. Meissner, of Birmingham, one of the great iron districts of Alabama, who is a thoroughly practical man in all departments of the manufacture of iron and steel. Mr. Leckie's attainments as a metallurgist are well known. The Truro *News* says of him: "Mr. Leckie has had the management of the iron works at Londonderry during a period unprecedented in the depression of the iron markets of the world, and only by prudent guidance and control has he kept the company as safe as it is to-day. He has carried it through years of depression with a tact that has won the approval of his directorate. . . . Mr. Leckie has been well liked by the men in his employ, and he and his family—especially his late wife, who was ever trying to do some good to some one or to assist some good cause—will be long held in pleasant memories by the residents of picturesque Acadia Mines."

—A curious bug-bear has been imagined by certain people in the ancient city of Quebec, and brought forward as an argument against the building of an electric railway in that city. It appears to have been imagined that the road would mean ruin to certain trades. Accordingly a delegation of blacksmiths and carriage builders waited on Mayor Parent last week protesting against the construction of the proposed electric railway. The mayor replied that the railway would increase traffic and employ more people than before. He reminded them that there were only 356 carters in town, paying about $4,000 to the city, instead of, as erroneously reported, about 800 carters, paying $40,000 into the municipal revenue. This was untrue, he said. The people of Quebec will presently find, to their surprise, as other people before them have found, that modern conveniences and improvements, however much they may threaten old privileges for a time, enure to the general benefit of the citizens in the long run.

—The Canada Permanent Loan and Savings Company declares its dividend for the half year ending with the present month at five per cent.

Meetings.

BANK OF MONTREAL.

The 77th annual general meeting of the shareholders of the Bank of Montreal took place in the board room of the bank at one o'clock on Monday, 3rd June, 1895. Among those present were:—Sir Donald Smith, Hon. George A. Drummond, R. B. Angus, W. C. McDonald, Hugh McLennan, A. T. Paterson, W. W. Ogilvie, F. S. Lyman, Q.C., A. W. Hooper, Donald Macmaster, Q.C., Justice Cross, M. Burke, Captain Benyon, Alexander Mitchell, W. R. Miller, John Dunlop, Hector Mackenzie, James O'Brien, J. B. Learmont, John Crawford, J. H. R. Molson, A. T Taylor, H. Montagu Allan, W. Murray, M. Foley, Jas. Moore, B. A. Boas, Wm. McKenzie, R. S. White, M.P., James Wilson, jr., J. C. Badgley, J. M. McCarthy, Charles Meredith, F. T. Judah, James Tasker and John Morrison.

On motion of Mr. John Crawford, Sir Donald A. Smith, president of the bank, was voted to the chair.

Moved by Mr. J. H. R. Molson, seconded by Mr. B. A. Boas, that the following gentlemen be appointed to act as scrutineers:—Messrs. F. S. Lyman, Q.C., and A. W. Hooper, and that Mr. James Aird be the secretary of this meeting.

The president then called upon Mr. E. S. Clouston, general manager, to read the annual report of the directors as follows:—

REPORT.

The directors have pleasure in presenting the 77th annual report, showing the result of the bank's business of the year ended 30th April, 1895.

Balance of profit and loss account 30th April, 1894		$ 804,715 33
Profits for the year ended 30th April, 1895, after deducting charges of management, and making full provision for all bad and doubtful debts		1,210,436 77
		$2,015,152 10
Dividend 5 per cent. paid 1st December, 1894	$600,000	
Dividend 5 per cent. payable 1st June, 1895	600,000	
		$1,200,000 00
Balance of profit and loss account carried forward		$815,152 10

A branch of the bank has been opened at St. John's, Newfoundland.

A branch office has been opened in the premises built and owned by the bank on the corner of Notre Dame and Seigneur streets in this city.

With deep regret the directors have to record the death of their esteemed colleague, Mr. W. H. Meredith, who had been at the time of his death a member of the board for upwards of three years.

The vacancy on the board has been filled by the election of Mr. W. W. Ogilvie.

All the offices of the bank, including the head office, have been inspected during the past year.

DONALD A. SMITH,
President.

GENERAL STATEMENT, 30TH APRIL, 1895.

Liabilities.

Capital stock		$12,000,000 00
Rest	$6,000,000 00	
Balance of profits carried forward	815,152 10	
	$6,815,152 10	
Unclaimed dividends	3,172 69	
Half-yearly dividend, payable 1st June, 1895	600,000 00	
		7,418,324 79
		$19,418,324 79
Notes of the bank in circulation	$4,260,962 00	
Deposits not bearing interest	9,504,473 34	
Deposits bearing interest	24,585,726 73	
Balance due to other banks in Canada	5,196 77	
		38,356,358 84
		$57,774,683 63

Assets.

Gold and silver coin current	$2,814,089 56	
Gov'rnm'nt demand notes	2,170,133 25	
Deposit with Dominion Government required by Act of Parliament for security of general bank note circulation	265,000 00	
Due by agencies of this bank and other banks in foreign countries	11,882,651 88	
Due by agencies of this bank and other banks in Great Britain	3,454,321 90	
United States railway bonds	2,053,791 43	
Notes and cheques of other banks	1,139,492 33	
		$23,229,480 35
Bank premises at Montreal and branches		600,000 00
Current loans and discounts (rebate interest reserved) and other securities and assets	33,733,762 01	
Debts secured by mortgage or otherwise	124,913 34	
Overdue debts not specially secured (loss provided for)	86,527 93	
		33,945,203 28
		$57,774,683 63

E. S. CLOUSTON,
General Manager.

Bank of Montreal,
Montreal, 30th April, 1895.

THE PRESIDENT'S ADDRESS.

The president, Sir Donald Smith, then rose and said: Before taking up the immediate business of this meeting, I would desire to say how deeply we all deplore the loss of our late colleague, Mr. W. H. Meredith. He was in the prime of life, a gentleman of very great promise, who had endeared himself to all who had the privilege of knowing him, and I am sure that each and all of you here, in common with all who knew him, will join with us in this expression of deep regret at the loss we have sustained. You will observe from the report just read, that the net profits of the bank during the past year show a decline of $103,000 in round numbers, or of less than 1 per cent. upon the paid-up capital as compared with the statement of the preceding year. While we could have desired a better result, under all the circumstances with which the bank has had to contend, we consider it very gratifying, and trust it may be so regarded by you. The causes which have produced this result will be given more in detail by the general manager. I would, however, anticipate his remarks with the observation that the year has been marked by quiet trade at home and by dull trade abroad, by declining prices, by keen competition among traders of all classes, by difficulty in finding remunerative employment for capital and by the continued prevalence of singularly low rates of interest The period through which we have passed has not been remarkable in new events. A wide-spread prostration of trade has occurred for now many years past, and looking back on the traces upon the path of industry, commerce and finance made by that adverse wave, we are glad to believe that they will be found less deep in Canada than in most countries. In this connection let me draw your attention to the high rank which Canadian securities have maintained throughout the long depression. A leading English authority, writing recently on the appreciation of high class securities, remarked that "Taken all round it will be seen that as compared with fifteen years ago the yield upon first-class securities generally has declined upon an average of about 25 per cent., or in other words that capital values have risen to a corresponding extent, for one fact merely implies the other." In the table supplied by this authority it appears that Canadian 4 per cent. securities have risen 21½ per cent. since 1880, a higher rate than that of the bonds of any other British colony. The suggestion arises that, while a property like the Bank of Montreal is owned practically and exclusively in Canada, a comparison upon the lines indicated would not be without interest, and it will be satisfactory to the shareholders to learn that while since 1880 the value of the shares of the Bank of England has risen 25½ per cent., of the London and County Bank 24½ per cent., of the London and Westminster Bank 22 per cent., and of other principal British banks somewhat less, the value of the stock of the Bank of Montreal has advanced since 1880 by 59 per cent. Now, I would venture to direct your attention for a few moments to

THE INDICATIONS OF REVIVING TRADE

which appear the world over, and which are not wanting in Canada. I observe that according to the London *Economist*, of May 11th last, "In several directions there are indications that the clouds of depression and distrust which have overshadowed practically the whole business world since the Baring collapse in the autumn of 1890, are gradually passing away, and that a period of greater activity in the race for wealth is setting in." And the *Economist* adds that "From nearly all the important industrial centres throughout the United Kingdom the reports read more cheerfully, and the long continued complaints of unremunerative prices are becoming somewhat less persistent." In the United States a similar state of affairs has come to prevail, judging by the signs we accept as a reliable index of the commercial barometer. Railway earnings in that country are increasing; the number of mercantile failures is declining; bank suspensions have happily become as rare this year as two years ago they were common; manufacturing industries are reviving, and the Clearing House returns show that the movement of general merchandise is gradually growing. It is, however, more particularly to the reasons which seem to warrant a hopeful view being taken of the commercial outlook in our own country that I would draw your attention, because after all our prosperity as a corporation must mainly rest upon the trade conditions in Canada. These reasons are neither few nor unimportant. If, for instance, we look at the Clearing House returns of this city of Montreal during the past month of May, it will be found that the aggregate amount of the clearings has been $57,146,200, as compared with $49,294,200 in the corresponding month last year, and $54,525,000 in May, of 1893, the figures showing an undoubted improvement in business, even as compared with two years ago. Then as to railway earnings, you are doubtless aware that our two principal arteries of traffic have suffered a serious diminution in earnings since the continental depression set in, although, as compared with United States railways, those in Canada cannot be said to have done badly. The point upon which we have to congratulate ourselves, however, is that since the beginning of the present year the profits of the Canadian Pacific Railway show an improvement up to the close of April over those of the like period last year, the gain for the month of April alone being $86,840, and that in the case of the Grand Trunk Railway the receipts have risen from $1,626,500 to $1,651,830 in the five weeks ending with May 25th. From results of this kind we have, I think, fairly good reason to infer that the turn in the tide of business has come, in which view some confirmation may be found in the rising scale of prices both here and abroad.

The advance in the price of wheat, whether permanent or not, has already given hope and inspired a more confident feeling among the agriculturists of Ontario and the Northwest, and if the promise of better prices for this important serial should be realized during the ensuing year with even less than an average crop, and I am glad to see the indications from latest returns are that we shall have an abundant one, the effect cannot fail to be favorable to business generally in Canada.

I have received to-day information respecting the crop outlook in the Northwest which I am sure you will be pleased to hear. It is as follows:—"Telegraphic reports of Saturday covering all the Canadian Pacific main line and branches in the Northwest as well as the lines of the Manitoba & Northwestern, and Great Northwest Central Railways, state that the wheat and other crops never looked better at this time of year; that the damage to wheat crop by late frost will probably not exceed ½ of 1 per cent., and to early sown oats and barley 5 per cent. Heavy rain Thursday night was general over entire Province of Manitoba and west to Moosejaw. No more rain needed until

July, except where soil is light. With warm weather the wheat should be headed out about the end of June, which will be two weeks earlier than usual."

I cannot omit observing; however, that a leading staple of export, one which, indeed, figures next to lumber in point of importance, has this spring declined largely in value. I refer to cheese, from the sale of which abroad Canada has in recent years derived large returns, and the current price of which has undergone so marked a depreciation as to affect the profits of those engaged in the industry. Perhaps, as in the case of the other staple of wheat, the cheese industry must have its ups and downs, and in any event we may hope the depression is merely temporary.

THE ABUNDANCE OF CANADIAN RESOURCES.

finds exemplification in trade export returns, which show a value of $83,895,600 of domestic products sent abroad from July 1st, 1894, to May 1st, 1895, as compared with an export of $82,293,000 of Canadian products in the corresponding period of the preceding year, thus showing an increase in the value of the goods which we have been able to sell abroad despite a somewhat low range of prices. When we remember that this growth of our export commerce has been coincident with a reduction in the value of imports, I think we may rest assured, not only of the accumulative power of the country, but of the prudence, ability and sound judgment which, in alliance with a well based and sagaciously directed banking system, lies at the foundation of its commercial affairs. It behooves us, however, to put forth every possible effort in aid of the revival of prosperity. This, it appears to me, can well be done by encouraging the settlement of our vast, practically unoccupied territory in the North-West, for surely two or three hundred thousand is indeed a sparse population for a district capable of maintaining millions in comfort and independence. This is not to be accomplished by constructing lines of railways where they are not and cannot, for many years to come, be required, but by offering every proper inducement to immigrants to take up farms near to the railways which at present exist and which offer every requisite facility for transport, and for all the trade that under the most favorable circumstances we can hope for in these many years to come. It appears to me that what is wanted is a well conceived system of emigration from the United Kingdom and other countries of Europe, and we have every reason for believing that money judiciously spent in this way would be refunded to us ten-fold. It is true that the Northwest has been greatly benefited by migration from the older provinces, and especially from Ontario; but what is a gain to that part of the Dominion has undoubtedly, to some extent, been a disadvantage to the other provinces, in that the population of the eastern portion of the Dominion is not sufficient to permit of its being, to any extent, depleted to strengthen the West. There is another way in which the prosperity of the Dominion can also be greatly furthered, and that is by the development of the vast mineral resources of British Columbia, for we have it on the authority of those having the best knowledge and experience of these industries in the adjoining State of Montana that we have within our own borders far richer deposits of silver, gold and other valuable minerals than are to be found in that State, and yet we know that one of the largest and most important railways in the American Northwest, while it has suffered in its ordinary traffic of cereals equally with other roads, has had this loss more than compensated for by the increase arising from its mineral resources. Besides the indications of hopefulness to which I have pointed, there are others which might be alluded to, but not having the gift of prophecy, and we all of us have had sad experience of how very unsafe and misleading, and at times disastrous, it has been to indulge in prophecy, I had better refrain.

NEWFOUNDLAND.

Some eight or nine years back your bank extended its business by establishing an agency on the Pacific Coast, and more recently at the head of Lake Superior, an important grain exporting point, and your directors have no reason to regret the steps so taken. They have within the last three months opened a branch in St. John's, Newfoundland, under circumstances which I need not particularly refer to, as they are within the knowledge of all of you. We have every cause for believing that, while entering into direct business there, the bank will confer a benefit on Newfoundland, it will also reap reasonable profit from the venture. Before moving the adoption of the report, I may be permitted to mention the regret which I personally feel, and in which I believe many of those present will share, that the recent negotiations looking to the inclusion of Newfoundland within the Dominion have not yet eventuated in a happy result. Let us hope, however, that ere long the oldest of Britain's colonies on the Atlantic will be part of our Confederation, and that as one country and one people we will together work out a common material and patriotic future. I now move the adoption of the report, seconded by Hon. G. A. Drummond.

I will now call upon the general manager to address you.

THE GENERAL MANAGER'S ADDRESS.

Mr. E. S. Clouston, general manager of the bank, said:

To men in active business it would appear quite unnecessary to explain why our profits are smaller than in former years, but as a number of our shareholders are not so closely in touch with the commercial world, and as they receive a report of our proceedings to-day, it may be as well to point out as briefly as possible the reasons why the result of our year's business is somewhat less favorable than usual. The chief cause of the reduction in our profits is the extremely low rates for money ruling in England and the United States now and for a long time past. This affects the Bank of Montreal more than any other bank in Canada. You will see by reference to the statement submitted to you that we employ in those countries about $15,000,000—and the average for the year will be somewhere in that neighborhood or a little under. With the rate for money in London ½ per cent. to 1 per cent. per annum—in New York the same, and in Chicago 4 per cent. instead of 6 per cent. or 7 per cent., as in previous years, a much larger shrinkage in profits could be explained. In Canada the rates have been a little less than normal. It seems hardly necessary to explain the necessity for employing so much money outside of Canada, but it may be as well to repeat previous explanations. These funds practically mean a large additional gold reserve, available on very short notice, and are not only a great strength to this bank, but I look upon them as an important safeguard to the financial interests of the whole Dominion. There has been no time during the past year when we could not have obtained from sources outside this country 25 per cent. of our total liabilities in gold, quicker than we could possibly use it, and the benefit of such a position has been shown on more than one occasion when we have been able to relieve a financial stringency here and probably prevented a serious panic, the extent of which no man could foresee, without in any way disturbing the financial requirements of the commercial community. Had we been obliged to draw from our local resources, we would only have succeeded in aggravating the situation.

Our actual losses through bad debts have been about normal, but in making our appropriations for doubtful paper we could not close our eyes to the fact that the past year has not been a prosperous one for the majority of our customers, and we were obliged to take a more than usually conservative view of our accounts in estimating anything that might be doubtful. On the whole, looking back over the last twelve months since I last met you, I am well satisfied that I am able to present you with the statement now before you. With reference to the other figures in the statement, the circulation shows a decrease of $370,000, which was to be expected owing to the stagnation in trade; the deposits, not bearing interest, an increase of $3,000,000, almost altogether Government deposits and of a temporary character; the deposits, bearing interest, an increase of $1,300,000—chiefly in our savings bank department. In the assets we hold less gold—$270,000—and Dominion notes $610,000, but have $3,000,000 more in foreign countries. The item of Government bonds, etc., has disappeared from the statement, as they have been sold at a good profit. I may say it is our intention to replace them when the opportunity offers. Our discounts are $2,300,000 more, chiefly loans to municipal corporations—our commercial discounts being about stationary. The overdue debts have been decreased $115,000, by collections and appropriations.

THE DEPRESSION IN TRADE.

As you all know the year 1894 added another to the depressing business years we have had since the Baring failure in 1890

In the United States not only was trade depressed and stagnant, and railroad losses enormous; not only were there low prices in wheat, cotton, steel, sugar, etc; not only were there railroad strikes, and extensive floods, one of which, on our own Pacific coast, closed communication with British Columbia for some weeks; not only were wages reduced, numbers thrown out of employment, and the forced economy brought about a heavy falling off in production in nearly every line of trade and industry, but to add to the trouble the legislators of the United States threw every impediment in the way of a revival by refusing to give any relief, with reference to the silver and currency question, and aggravated it by absurd financial propositions. Had it not been for the firm stand taken by Mr. Cleveland, aided by a syndicate of bankers and financiers who are carrying through with apparent success one of the most difficult and delicate financial operations of the century, the United States would to-day have been in the throes of a panic to which that of 1893 would have been child's play. In times of business depression, as in epidemics, there always comes to the surface a crop of cranks and quacks armed with special nostrums or theories to cure everything, and the ignorant, driven to desperation, are very apt to seize on the most plausible, only to find out later how deeply they have been deceived. Of such is

THE SILVER HERESY OR FREE COINAGE

at present rampant in the United States, promoted by interested silver mine owners, fostered by theorists and demagogues, and accepted by a large number of unthinking farmers, laborers, etc., who are feeling the pinch of low prices. I am glad to see that active and organized efforts are being made at last to stem the rising tide, and I have no doubt they will be entirely successful. These efforts are forcibly assisted by the continued increase in gold production, and the steady rise in staples without a corresponding rise in silver, refuting some of the chief theories and statements of the silver men. I saw it stated the other day that a French writer, referring to the tendency of the Americans towards the adoption of irrational and exploded financial theories, said that God is good to his little children, drunken men and the people of the United States, or they would have gone to eternal smash long ere this. The silver question is one that we, as large lenders in the United States, watch very closely, and though we could probably do business there as profitably on a silver basis as a gold one, we would like to see the present uncertainty removed.

Though the past year has not been a prosperous one, it should be a source of great satisfaction to Canadians that the business community in Canada has come so well through the ordeal, and with so few failures and disasters. In that we compare favorably with any other country. Indeed, it has been a great surprise to me how well we have stood it. It is too soon to say we are out of the woods, but in the United States there seems to be no doubt that the corner has been turned, and as Canada must always be affected in no small measure by the condition of affairs in that country, it is reasonable to suppose that here also the depression has spent its force. There is, undoubtedly, a more hopeful feeling, and though the improvement may be to a certain extent sentimental, many must have benefited by the rise in staples, which—with the exception of butter and cheese—has been general. Still, much depends on the coming crop, and until it is assured the danger is not over. The prosperity of the community will eventually enure to the banks, but in the meantime the same features with regard to money still exist in England and the United States, and I am afraid the coming half year will be an extremely lean one for this bank at least.

The failure of the only two banks in the Island of Newfoundland, the knowledge of the valuable trade carried on in that island, and its large natural resources capable of great development in the future, seemed to afford an opening for an agency of the bank, and we accordingly commenced business there on the 9th January last. We believe we have been of assistance in furnishing machinery for the transaction of business, which was practically

at a standstill, and we have been of service to the Newfoundland government by temporary loans, which have given them time to make more permanent financial arrangements. The result so far has justified our expectations, and we are encouraged to believe that the future has a satisfactory and successful career in store for our St. John's branch.

THE GENERAL DISCUSSION.

After some remarks by Mr. John Morrison in favor of the observance of economy, Mr. John Crawford alluded to the reference made by the president to the death of Mr. Meredith, and said that the remarks so feelingly made by Sir Donald had met with the hearty reception of those present. As to the appointment of Mr. W. W. Ogilvie to the directorate, Mr. Crawford thought the shareholders should have had the privilege of unearthing such an able gentleman, and not the directors.

The president explained that the directors had no choice; under the by-laws it was obligatory upon them to make the appointment.

Mr. Crawford said that while from one point of view the financial statement could not be called a supremely satisfactory one, on the other hand he was quite prepared to admit that under all the circumstances it was very gratifying. He regretted to see that the circulation did not grow apace; it seemed very apathetic. Competition was sharp at work, and general managers could not expect to improve the condition of banks by waiting passively for business. It must be met half-way. He observed in the statement of assets that included in an item of $33,000,000 were "current loans and other securities." He would like to know about what percentage of the whole amount these "other securities" represented.

The General Manager—It is a very small proportion, about $100,000, principally in real estate, the property of the bank other than bank premises.

Mr. Crawford considered this reply quite satisfactory, and went on to advocate the shareholders being made acquainted with the bank's gross receipts and gross losses, and he also touched upon quarterly dividends

The motion for the adoption of the directors' report, which had been moved by the president and seconded by the vice-president, Hon. Geo. A. Drummond, was then agreed to unanimously.

Capt. Benyon moved thanks to the president, vice-president, and directors, seconded by Mr. Hector Mackenzie, and carried. The president briefly acknowledged the vote of thanks on behalf of himself and colleagues.

Mr. W. W. Ogilvie moved a vote of thanks to the general manager, the inspector, the managers and other officers of the bank for their services during the past year. In making the motion, Mr. Ogilvie said: I am often brought into contact with the officers of the bank, from Vancouver to Halifax, and I have always been pleased with the caution, zeal and loyalty they display in regard to the bank.

The motion, which was seconded by Mr. R. B. Angus, was unanimously carried, after which the general manager briefly returned thanks.

A ballot having been opened for the election of directors, it resulted in the re-election of the old board of directors, as follows: Mr. R. B. Angus, Hon. George A. Drummond, Mr. A. F. Gault, Mr. Edward B. Greenshields, Mr. Hugh McLennan, Mr. W. C. McDonald, Mr. W. W. Ogilvie, Mr. A. T. Paterson, and Sir Donald A. Smith.

At a meeting of the board, held on the following day, Sir Donald A. Smith was re-elected president, and Hon. George A. Drummond, vice-president of the bank.

QUEBEC BANK.

Proceedings of the seventy-seventh annual general meeting of the shareholders of the Quebec Bank, held at the banking house, in Quebec, on Monday, 3rd June, 1895

Present: Hon. F. E. Gilman, Messrs. G. R. Renfrew, S. J. Shaw, T. H. Dunn, John T. Ross, Gaspard Lemoine, William Tofield, John Brown, A. G. Belleau, M.D., Alex. Robertson, B. Verret, John Shaw, James Patton, David Smith, Robert Cream, Edwin Jones, Ernest F. Wurtele, Robert Brodie, E. H. Taylor, J. H. Simmons, Peter Johnston, Thomas Norris, D. D. O'Meara, Major Morgan and others.

In the absence of the president, Mr. G. R. Renfrew took the chair.

The chairman read a letter dated this day from Mr. Robert H. Smith, president of the bank, regretting that owing to the state of his health he would be unable to attend the annual meeting of shareholders on this occasion.

The chairman read the report of the directors, and Mr. McDougall, general manager, read the statement of the affairs of the bank as on the 15th May, 1895.

REPORT.

The directors beg to present to the shareholders the seventy-seventh annual report of the business of the bank, showing the result of its business for the fiscal year ended the 15th May, 1895.

PROFIT AND LOSS ACCOUNT.

Balance of Profit and Loss account 15th May, 1894		$ 83,739 48
Transferred from Rest		50,000 00
Profits for the year ended 15th May, 1895, after deducting charges of management		230,424 87
		$364,164 35
Dividend 3½ per cent., paid 1st December, 1894	$ 87,500 00	
Dividend 2½ per cent., payable 1st June, 1895	62,500 00	
Appropriation for bad and doubtful debts	143,197 74	
		$293,197 74
Balance of Profit and Loss carried forward		$70,966 61

The net gains for the year just closed show a decrease as compared with those of the previous year. The reduction in earnings is mostly due to the narrow margin of profit which existed between lending rates to customers and those paid to depositors.

Owing to the general inactivity of trade during the past year, full employment could not be obtained for the means of the bank without making concessions in the rate of interest upon loans, but meanwhile the rate on deposits remained relatively high. With the co-operation of other banks, a reduction has been effected in the deposit rate, the advantage of which will be felt in the current year.

The directors have found it necessary to reduce the dividend for the latter half of the year to 2½ per cent., mainly because of a serious loss which the bank suffered in Newfoundland.

For many years past the bank has done a large business with that Island, its previous experience of which had been satisfactory both as to the quality of the transactions and the profits thereof; but owing to the failure of both banks in the Island in December last, and the total collapse of trade which occurred in consequence thereof, it was suddenly involved in loss, not only with the merchants but with the local banks, whose sterling it held in payment for collections.

To provide for this exceptional loss, and to allow for other losses which have occurred in the course of business, it has been found necessary to take a considerable sum from the balance of Profit and Loss carried over from the previous year. As a matter of precaution and to guard against depreciation in real estate and other items of investment held, the directors have considered it prudent to build up that account by transferring to it, from the Rest account, the sum of $50,000. The Rest now remains at $500,000.

Since the last annual meeting of shareholders, the directors have had to deplore the death of the late general manager of the bank, Mr. James Stevenson, who served the bank with untiring devotion for the long period of thirty-one years The vacancy caused by his death has been filled by the appointment of Mr. Thomas McDougall as general manager.

All of which is respectfully submitted.

By order of the board.

R. H. SMITH,
President.

GENERAL STATEMENT, 15TH MAY, 1895.

Liabilities

Capital stock	$2,500,000 00
Rest	500,000 00
Reserved for interest due to depositors, &c.	89,932 32
Balance of profits carried forward	70,966 61
Unclaimed dividends	1,095 65
Half-yearly dividend No. 146, payable 1st June, 1895	62,500 00
Notes in circulation	696,036 00

Notes and bills discounted, current		7,098,479 80
Overdue debts not specially secured		92,740 49
Overdue debts secured		45,184 24
Real estate (not bank premises) and mortgages on real estate		145,104 38
Bank premises and furniture		177,483 77
		$10,750,678 44

THOS. MCDOUGALL,
General Manager

QUEBEC BANK,
Quebec, 15th May, 1895.

The adoption of the report was moved by Mr. G. R. Renfrew, seconded by Hon. F. E. Gilman, and carried.

Thanks were offered to the board and to the general manager and other officers. In responding for himself and staff, Mr. McDougall referred to the high qualities of the late Mr Stevenson. Then, on motion of Mr. P. Johnston, seconded by Mr. T. H. Dunn, the following resolution was carried:

"That the shareholders assembled at this meeting desire to express their feeling of great regret for the loss which the bank has suffered through the death of its late general manager, Mr. James Stevenson, and they wish that a copy of this resolution be forwarded to the family of the deceased."

A poll having been opened, the gentlemen whose names follow were elected directors for the ensuing year:—R. H. Smith, William Withall, G. R. Renfrew, S. J. Shaw, John T. Ross, Gaspard Lemoine, and William A. Marsh.

At a subsequent meeting of the directors, Mr. R. H. Smith was re-elected president, and Mr. Wm. Withall, vice-president

FREEHOLD LOAN AND SAVINGS COMPANY.

At the annual meeting held yesterday at the company's office, Adelaide street, Toronto, the following were present: C. H. Gooderham, T. S. Stayner, Hon. J. C. Aikins, H. S. Howland, Capt. W. F. McMaster, Hon. S. C. Wood, Robert Gilmour, Miss Ellen V. Wilson, D. H. Milne, Andrew Young, R. H. Temple, Alex. McGee, Henry Pellatt, James O'Hara, Philip Browne, Wm. Spry, C.E., Alex. Smith, Wm Cook, Beverley Jones, Price Jackes, Michael O'Donnell, Donald G. Ridout, J. C. Fitch

Mr. C. H. Gooderham presided, and the Hon. S C. Wood, acting as secretary, read the report with the financial statement and the report of the auditors, as follows

REPORT

The directors herewith submit their thirty-sixth annual report, and have much pleasure in being able to state that the business of the year has been satisfactory.

The earnings of the company amount to $344,092.64, and, after deducting charges, commissions, etc., and paying two half-yearly dividends of 4 per cent. each, there remains a surplus of $24,348.09, which has been carried to the contingent account

The repayments on account of mortgage loans have been satisfactory, and, while the rate of interest on investments has declined, there has also been a reduction in the rates charged for moneys loaned on the debentures of the company.

Being able to obtain money at fixed periods and low rates on debentures, we reduced our deposits, and that account now stands in the neighborhood of $500,000.

The deposits and debentures of the company, including interest, amount to $3,970,371.80. These constitute the total liability to the public, for which we hold the following securities:—

Mortgages on real estate, municipal bonds, office premises, etc.	$6,047,118 10	
Unpaid subscribed stock	1,904,400 00	
Making a total of		$7,951,518 10

being about four millions in excess of and double the amount of the liabilities.

We have again to acknowledge the valuable services of our agents in England and Scotland.

The books, vouchers and securities of the company have been carefully examined by the auditors, whose reports are hereto appended.

C. H. Gooderham,
President.

S. C. Wood,
Managing Director.

Toronto, June 4, 1895.

LIABILITIES AND ASSETS, APRIL 30TH, 1895.

Dr.

To the public:		
Deposits	$473,376 71	
Debentures, currency	457,378 27	
Debentures, sterling	2,969,094 82	
Interest on above..	70,522 00	
		$3,970,371 80
To the shareholders:		
Capital	$1,319,100 00	
Reserve	659,550 00	
Contingent	45,332 30	
Dividend due 1st of June	52,764 00	
		2,076,746 30
		$6,047,118 10

Cr.

By investments:		
Mortgages, etc.		$5,616,593 96
Property owned:		
Office building, furniture, etc....		359,624 71
Balances:		
In banks and on hand.....		70,899 43
		$6,047,118 10

PROFIT AND LOSS.

Dr.

To interest paid and allowed—		
On deposits	$ 25,389 80	
On debentures, currency	19,681 33	
On debentures, sterling.....	124,256 45	
		$169,327 58
To expenses, including cost of management		43,371 97
To profits, apportioned as follows:—		
Dividends, two half-yearly, at four per cent. and tax thereon	$107,045 00	
Surplus to contingent fund.....	24,348 09	
		131,393 09
		$344,092 64

Cr.

By interest on investments, bank balances, etc.		$344,092 64
		$344,092 64

C. H. Gooderham,
President.

S. C. Wood,
Managing Director.

Toronto, May 18, 1895.

To the president, directors and shareholders of the Freehold Loan and Savings Company, Toronto:

Gentlemen,—We, the undersigned, having examined the securities and vouchers, and audited the books of the company (excepting the business of the Manitoba branch, which has been duly audited and certified to by local auditors), certify that we have found them correct, and that the annexed balance sheet is a correct statement of the company's affairs to the 30th of April, 1895.

W. E. Watson, F.C.A.,
Jos. Blakeley,
Auditors.

Toronto, May 18, 1895.

Gentlemen,—We, the undersigned, have examined the securities and vouchers, and audited the books of the Freehold Loan and Savings Company kept in their office in the City of Winnipeg, and have found them correct.

J. Paterson,
W. Hutchinson,
Auditors.

Winnipeg, May 10, 1895.

The president, in moving the adoption of the annual report, made the following remarks:

Gentlemen,—In moving the adoption of the report, I trust you will kindly permit me to refer to some matters of interest to this company.

Owing to our business connections both in Ontario and Manitoba, we have been able to invest our money at fair rates of interest, in no case loaning at less than 6 per cent. The rates at which money can be loaned in the future, especially in Manitoba, will depend largely on the action of the loan companies. It is true that private funds are being offered and placed on very easy terms, which is disturbing the money market, but only to a limited extent. On the other hand, loan companies, with their business connections, their wider field of operations, and their ability to employ salaried inspectors, have advantages not to be lost sight of in determining the question of reduction in rates. Lowering the rate of interest on the part of loan companies would, in all probability, be followed by a still further reduction in the rate of private funds. While admitting the depression that has existed in the Province of Ontario for some time past, we cannot forego the opportunity of pointing out the success that has attended the efforts of our business men and farmers to withstand and overcome the financial difficulties they have encountered.

A wave of depression comes periodically, and in its course rolls over this province. The effects of the last have been severe, but we are satisfied the worst is past, that brighter days are ahead, and that Ontario will come out of the ordeal with credit fully sustained and capital unimpaired.

Our policy has been, and will continue to be, not to hesitate as we make or ascertain losses through shrinkages in value, or from any other cause to write them off and charge to contingent account. We have done this very thoroughly in the past two or three years, and may have to continue doing so for a few years longer. Our contingent fund was created for that purpose. In good times we are able to enlarge this fund, but in times of depression and consequent shrinkage in values we frequently draw upon it.

MANITOBA.

The Province of Manitoba has been to some extent affected by the general depression; at the same time it has been steadily advancing. The production of the past year has been considerably in excess of any previous year, and, notwithstanding the low prices that prevailed, the value of the crop has exceeded that of any other year in the history of the province. The yield of wheat is estimated at between seventeen and eighteen million bushels; the flax crop realized about $500,000, and there was a full average of coarse grain.

The export of cattle this year has been about 30,000 head; of hogs, 10,000, and of sheep 4,000. The value of dairy exports was about $500,000. Notwithstanding this substantial development of the live stock industry, it is anticipated that the number of creameries and cheese factories will probably be doubled during the present year.

The farmers are practising the strictest economy and contracting very few debts, and this particularly in respect of implements and machinery, and, generally speaking, they are in a better position this year than last. The commercial condition of the province has also improved, having almost passed through the transition state from extreme and long credits to a reasonable cash and short-credit basis.

Winnipeg has continued to advance, substantial buildings have been erected, property has maintained its value, building has not been overdone, and the prospects are that this healthy prosperity will continue.

THE AGRICULTURE OF ONTARIO.

Two things are most noticeable in examining the returns made by the farmers of Ontario for the past few years to the Ontario Department of Agriculture; first, the steady increase year by year in the value of farm improvements and equipment, and, second, the gradual change that has been taking place at the same time from the production of grain for sale to the production of meat, eggs, fruit, butter and cheese.

The returns show that throughout the province as a whole there has been a marked improvement in the dwellings, barns and various buildings on the farms; that a very large increase has been made in the amount of underdrainage; that improved fences are rapidly replacing the old-style rail and stump fences, and that all kinds of machinery are being extensively used as far as possible in place of manual labor. The change in the products of the farm may be readily seen from the following table, which gives the acerage of seven crops for 1884, 1889 and 1894:—

	1884. Acres.	1889. Acres.	1894. Acres.
Wheat	1,586,387	1,220,725	1,009,008
Barley	700,472	875,286	4 86,861
Oats	1,481,828	1,923,444	2,330,766
Peas	570,928	708,068	785,007
Corn (maize) ..	174,560	187,116	378,709
Roots	133,525	143,575	186,513
Hay	2,193,369	2,386,223	2,576,943

Wheat and barley have been grown for sale off the farm, whereas oats, peas, corn, roots and hay have been grown mainly for consumption upon the farm. In five years the area of the two former crops has dropped by 600,742 acres and the area of the other five crops has increased by 906,512 acres.

The increase in the acreage of corn (maize), in the number of cheese factories and in the number of swine all point in one direction. These three are inseparably connected with profitable dairying in Ontario. The increase n the number of sheep since 1892 is 165,000, in the number of swine 150,000, and in poultry lover 500,000.

The most important feature in the change of our agricultural industries is the development of the cheese factory system. In 1883 there were in Ontario 635 factories, with a product of 53,513,000 pounds, while in 1894 the number had increased to 897, with a product of 100,000,000 pounds. The importance of cheesemaking may be emphasized by giving the returns of three or four counties for the year 1892, which will be about the same as 1894.

In the counties of Leeds, Grenville, Oxford, Dundas and Hastings there are 260 factories. The value of the cheese made was $3,207,166, or about $30 per head of the rural population of these counties. The number of creameries is steadily increasing, having doubled in the last three years

The adaptability of our province to fruit-growing is becoming more widely known, and year by year the acreage of fruits, large and small, is being increased. The municipal assessment returns show an increase from 1890 to 1894 of 16,173 acres of orchard and garden.

In this connection attention may be called to the increased interest taken in fruit-growing in Ontario by the Provincial Department of Agriculture through the establishment of several fruit experiment and testing stations in different parts of the province, sending out experts to teach the farmers and fruit-growers how properly to spray their trees.

All things considered, it may be concluded that the farmers of Ontario are rapidly adapting themselves to the changed conditions of agriculture brought about by the cheapening of production and enlarged competition, and are trying to adopt those lines of work that are most profitable and promising, and that tend to improve the fertility and productiveness of their farms.

I desire to express my sincere thanks to my colleagues for their generous support and valuable assistance, and my appreciation of the ability, devotion and competency of the managing director, as well as the other officers of the company.

T. S. Stayner, Esq., in seconding the adoption of the report, spoke as follows:—

The information contained in the president's report respecting the change in agriculture from almost exclusive grain-growing to mixed farming, which has been so rapid, is most satisfactory, as it appears from the report, not only in this Province, but also in Manitoba. This tate of things, I must say, is very promising

and hopeful for the future of the country Not only does it make farming more productive, but it is the means of improving the soil. Of course, we know nothing can be more hurtful to the land than continual cropping of wheat, hay, etc., and then sending the products off the farm. The best soil suffers under such treatment, and to such methods may be attributed a great deal of the loss to the farming community. As the assets of the loan companies consist largely of mortgages on farm properties, it is a matter of interest to know that an improvement has taken place which will redound not merely to the advantage of the companies, but to the agricultural interests also. I have much pleasure in seconding the adoption of the report.

The report was then unanimously adopted.

After a resolution thanking the president and directors for their attention to the interests of the company, and also a resolution thanking the manager and staff for their services during the year, it was adopted unanimously that Messrs. W. E. Watson and Joseph Blakely be general auditors for the current year, and J. Paterson and W. Hutchinson, auditors for the Winnipeg agency.

The election of directors was then held, and the scrutineers reported the following parties elected. C. H. Gooderham, T. S. Stayner, Hon. J. C. Aikins, H. S. Howland, Hugh Ryan, W. F. McMaster, and the Hon. S. C. Wood.

At a subsequent meeting of the directors, C. H. Gooderham, Esq., was elected president, and T. S. Stayner, Esq., vice-president for the coming year.

ONTARIO MUTUAL LIFE ASSURANCE COMPANY.

The 25th annual meeting of this company was held in the town hall, Waterloo, on Thursday, May 23rd. The attendance was representative, and included a number of the policyholders, in addition to the directors and the principal agents of the company in the Dominion. The meeting was marked by such a degree of harmony and smoothness as spoke well for the manner in which its business is conducted. The reports were exceedingly satisfactory, and everything went to show that the prospects of this well-known and well-established company are in every way bright.

The chair was occupied by the president, I. E. Bowman, M.P., who was assisted by Mr. Wm. Hendry, the company's manager.

It was moved by Alfred Hosken, Q.C., of Toronto, and seconded by Rev. Theo. Spetz, D.D., of Berlin, President of St. Jerome's College, that W. H. Riddell, the secretary of the company, be the secretary of this meeting, which was carried. Mr. Bowman read the report of the directors, and the financial statement, which were as follows;

REPORT.

Your directors desire to submit the following statements as their 25th annual report of the affairs of the company as at the 31st December, 1894.

During the past year 2,012 new policies were issued for assurance, amounting to $2,945,250.

The manager also received 94 applications for $110,000 from persons whose physical condition, family history or occupation did not justify their acceptance, which were therefore declined.

The net premium income for 1894 is $527,131.18, and we received for interest on our investments the sum of $132,858.34, which makes our total income $659,989.52.

The total assets of the company as at the close of the year are $2,866,559.89, and the reserve required to be held under the regulations of the Dominion insurance department as security to our policy-holders is $2,566,560, leaving a surplus of assets over liabilities amounting to $277,647.74

For some time your directors have had in view the propriety of changing the valuation of our policies from the Hm. 4½ per cent. table to the Actuaries' 4 per cent. (this being the table on which our rates are based), and we have decided, owing to the reduction of the rate of interest on investments, to make the change this year. In order to accomplish this the sum of $117,231 will have to be transferred from the surplus to the reserve, leaving a balance of $160,416.74 at the credit of our surplus account, which will enable us to continue our liberal distribution to policy-holders without any diminution.

The total number of policies in force at the close of the year is 14,147, covering assurance amounting to $18,767,698.

The amount paid for death claims which occurred during the year is $138,757, under 91 policies, and the matured endowments amount to $22,111 under 20 policies.

The Executive Committee has carefully examined the securities and cash held by the company, and found it correct as reported by your auditors.

The tendency of the money market has during the past year again been towards a lower rate of interest, both on mortgages and debentures, but we hope that as the general business of the country revives the demand for money will improve, so as to enable us to obtain a better rate of interest on our investments.

You will be called on to elect four directors in the place of B. M. Britton, Q.C., John Marshall, F. C. Bruce and J. Kerr Fisken, all of whom are eligible for re-election.

The detailed statements prepared and certified to by your auditors are herewith submitted for consideration.

On behalf of the board.

I. E. Bowman, President.

STATEMENT FOR THE YEAR ENDING DECEMBER 31, 1894.

Income.

From premiums	$527,131 18	
From interest	132,858 34	
		$ 659,989 52

Disbursements.

For policy-holders' death claims..	$ 136,540 67	
For policy-holders' endowments..	22,111 00	
For policy-holders' cash surrender values	72,294 60	
For policy-holders' cash surplus .	70,734 94	
For all other expenditures	117,459 25	
	$ 419,140 46	
Excess of income over disbursements	240,849 06	

Assets.

Municipal debentures	$ 643,795 11	
Mortgages	1,474,275 19	
Loans on policies	370,005 45	
Liens on policies	49,864 67	
Company's office and real estate..	12,603 64	
Ledger balance	77 88	
Bank deposit receipts	65,000 00	
Accrued interest, deferred premiums, etc	249,891 82	
Cash on hand and in banks.....	1,046 14	
	$2,866,559 89	
Reserve Hm. 4½ per cent. and other liabilities	2,588,912 15	
Surplus	$ 277,647 74	

Increase in surplus, during 1894..	$ 51,627 53	
Increase in Reserve during 1894..	235,578 00	
Increase in assurance during 1894	1,016,591 00	
Total assurance in force	18,767,698 00	

Mr. Bowman, in commenting on the report, explained some of its features. During the year there had been issued 2,012 new policies, making the new business for the year amount to a little less than three millions. This was not quite so much new business as there had been issued in 1893, but for this there were several reasons. There had been a considerable degree of financial depression; money had not been so plentiful. Some of the agents of the company had also been changed, and it took some time for the new men to get well under way.

However, the amount of new business was, he said, satisfactory. The success of a company did not consist so much in the volume of business done as in its careful selection, and in the returns to policy-holders.

The premium income for the year was $527,131.18 (practically for 11 months, agency collections for December, 1894, not being included), which, however, was considerably in excess of the previous year's revenue from this source.

The total assets amounted to a little less than $3,000,000, leaving a surplus of assets over liabilities of $277,647.

Mr. Bowman explained the clause in the report referring to the proposed change in the valuation of the policies from an Hm. (healthy male) four and one-half per cent. table, to the actuaries' four per cent. At first sight this might seem to require a smaller reserve, but as a matter of fact it was just the reverse, requiring a larger one. The reason for this change was that the directors expected that in the near future the Government would insist on all companies holding a four per cent. reserve. The directors had decided to anticipate the action of the Government and provide for a four per cent. reserve at once. It was, he said, to the credit of the company, and an evidence of good, sound management, that they were able to make this change, transferring from the total surplus no less a sum than $117,231, in order to make good the higher reserve without lowering the liberal scale of distribution to policy-holders in reduction of their premiums, as heretofore.

The business of the company now amounted to nearly $19,000,000 of assurance in force, held chiefly by members in the healthy Province of Ontario. During the last three years they had been doing a small business in Quebec, and while it was a little more expensive to do business there, owing to the high taxes imposed on insurance companies, they had decided to continue business in that Province, as there were prospects of doing a good business there in the future. In conclusion, the President said the report, the adoption of which he had much pleasure in moving, was in all respects as satisfactory as any that had ever before been submitted to the policy-holders of the company.

Mr. Robert Melvin, second vice-president of the company, seconded the report. The report was, he said, on the whole, a very satisfactory one, or, to use a good old Scotch phrase, "It micht hae been waur." He instituted a number of comparisons with last year, which showed that it might have been a good deal "waur;" in fact that it compared very favorably with its predecessors, notwithstanding the "hard times."

For 1893 the total assets were	$2,593,424	
For 1894 " "	2,866,559	
Gain	$ 273,135	
For 1893 the surplus was	$ 226,120	
For 1894 " "	277,647	
Gain	$ 51,527	
For 1893 receipts from premiums were	$ 513,681	
For 1894 " " "	527,131	
Gain	$ 13,449	
For 1893 the income from interest was	$ 113,690	
For 1894 " " "	132,858	
Increase.....	$ 19,167	
For 1893 the expense account was ..	$ 116,109	
For 1894 " " "	$ 115,597	
Decrease	$ 512	
For 1893 the dividends paid to policy-holders were.....	$ 63,900	
For 1894 the dividends paid to policy-holders were.....	$ 70,734	
Increase.....	$ 6,834	
For 1893 the amount of insurance was	$17,751,147	
For 1894 the amount of insurance was	18,767,698	
Increase	$ 1,016,591	

In commenting on these figures, Mr. Melvin pointed out that they showed a very encouraging state of affairs. The ratio of increase in assets was equal to that of any other company doing business. The decrease in the running expenses was most satisfactory, especially when it was considered that there had been an increase in the insurance of over $1,000,000. As to the amount to be distributed to policy-holders, Mr. Melvin explained that they would have been in a position to distribute even a larger amount, but he was of the opinion that in the past all companies had been giving too much. They had this year been enabled to add over $117,000 to the reserve, which was just as much profit as if they had given it to the policy-holders, and they had, notwithstanding this, increased the dividend by nearly $7,000.

Mr. Melvin then read a statement of the cash surplus paid to policy-holders in reduction of their premiums during the last ten years, which showed that in this respect there had been a steady improvement. The figures were as follows —

In 1885	$25,465
" 1886	34,009
" 1887	34,849
" 1888	37,511
" 1889	42,361
" 1890	48,719
" 1891	56,469
" 1892	65,001
" 1893	63,900
" 1894	70,734

As to the quality of the securities of the company, he said that the directors had gone over them carefully, and had found them to be of the very best possible kind. They were not speculative in any sense of the word. The company could have, perhaps, secured a higher rate of interest had they taken less reliable securities, but they had steadily adhered to the policy of taking only mortgage securities, municipal debentures, and loans to policyholders

In comparing the profits of the Ontario Life with other companies, Mr. Melvin asked his hearers to remember that many of these companies did a large "tontine" business, in which the profits were held until the end of the period. These profits were put in the reports as surplus, though they were really liabilities. There was no way of distinguishing these profits, the Government made no distinction, and so it was not possible to arrive at a correct estimate of the real surplus of such companies. He pointed out that, both in England and the United States, the mutual companies were the strongest and largest. He said that there was no occasion for stock in an insurance company. That mutual companies were stable, the history of the Ontario proved The amount of stock in a proprietary company was a mere hazard. Take, for example, the Canada Life, with the paid-up capital of $125,000. What strength did this give, with the company's insurance in force of $66,807,397? It was the same with other so-called proprietary companies in Canada and in the United States. He also instanced the Equitable of New York, whose paid-up capital is only $100,000, and assurance in force $913,556,733.

"There is no more need for stock in an insurance company than for three wheels in a cart," said Mr. Melvin, in conclusion, and, amid hearty applause, the report was carried unanimously.

Mr. B. M. Britton, Q.C., of Kingston, in supporting the motion, after referring to the successful career of the company, said that he regarded the rather slim attendance of policyholders as a good sign, as it showed that they were satisfied with the management of the board. Had there been dissatisfaction with the manner in which the company was being managed, there would have been a large attendance; the policy-holders would have thronged the hall to insist on the dismissal of the board. To show the magnitude of the operations of the company, he pointed out that it gathered in during the year from all sources, an average of $1,800 a day in cash, and that each day it paid out $632 to its living members for endowments, surplus, etc., and $400 in death claims. He urged the continuance of the present policy of the company, the avoidance of anything like speculative insurance, and of all attempts to secure too great apparent prosperity. He believed that *in medias res* was best, that we should stick to the middle course, and aim at steady growth, rather than at the ephemeral dashes that characterized different companies. On the other side of the line they said "boom and bust." This company did not want to boom and they did not want to bust. (Laughter and applause.)

People sometimes are anxious for more liberal policies. The policies of the Ontario were now nearly as liberal as the first policy ever issued, in 1610. That policy was an absolutely unconditional one. It was a case of payment of premium and death on the one side and payment of policy on the other. At the same time, it would be unwise to shut our eyes to the possibility of fraud in connection with life insurance. There was the recent Hendershott trial, at St. Thomas, and other cases, which he mentioned, on this and the other side of the line. It was the duty of insurance companies to the public and to themselves to do all in their power to prevent the possibility of such frauds being perpetrated. He also strongly opposed child-insurance, unless it could be very strictly regulated, as throwing too strong a temptation in the way of poor parents to commit crimes.

It was then moved by Mr. Sipprell, local manager for the Maritime Provinces, "that this meeting has great pleasure in tendering a hearty vote of thanks to the president, vice-presidents and directors for the care they have shown in promoting and safe-guarding the company's interests during the past year."

Mr. Sipprell, in supporting his motion, said that down by the sea, whence he came, there was among the policy-holders loyalty to and confidence in the management of the company, to which he himself paid a high tribute. The company had many advantages over its competitors. It was not by accident that the rate of interest obtained by the Ontario Life over a five-year period was larger than that of any other leading company in Canada. It had been almost six per cent. To be exact, it was 5.94 per cent., and the highest obtained by any other company was 5.87 per cent. The earnings from interest during the past five years exceeded the death claims by nearly $40,000, which was very gratifying indeed.

He instituted some instructive comparisons between the business of the Ontario and some of its leading competitors, extending over a period of five years from 1890 to 1894 inclusive, as follows:—

Company	Business in Force.	Profits paid policy-holders.	Increase in Surplus.	Total Profits for 5 Years.
Ontario	$18,767,698	$305,403	$138,465	$443,868
Sun	31,528,570	224,861	169,198	394,059
Confederation	25,455,343	355,117	2,777	357,894
N. American	14,466,685	35,401	211,067	246,468
Manufacturers	9,555,300	198	53,212	53,410
Temp. & Gen.	5,877,959	(none)	38,346	38,346

The business in force of two of the above companies largely exceeds that of the Ontario, but the amount of profits earned by them is considerably less than the amount earned by it. In other important respects he showed that the Ontario would be found to compare favorably with other companies. The high character and integrity of the management, the sound financial standing of the company, as well as the principle of mutuality as between the individual policy-holder and the membership as a whole, should nerve his fellow-workers in the field with redoubled efforts to extend the benefit of life insurance in their respective agencies.

He was sure he voiced the feelings of every agent when he stated they had received the greatest possible benefit from the two days' conference with the management, under the able presidency of the company's superintendent, Mr. Hodgins, and on behalf of the agency staff he desired to thank the manager and officers for the uniform kindness and courtesy shown to them on that occasion

Mr. Thos. Dixon, County Crown Attorney, Walkerton, in seconding this resolution, congratulated the agents of the company on the quality of the risks taken. The true way to arrive at the position of a company was to consider the relation between the amount of death claims and the amount of insurance carried, and in this light the affairs of the Ontario were exceedingly satisfactory.

On motion of Mr. J. L. Wideman, Messrs. Geo. Wegenast and John Killer were appointed scrutineers for the election of four directors in place of those retiring. The balloting which followed resulted in the unanimous re-election of B. M. Britton, Q.C., Kingston; Francis C. Bruce, Hamilton; John Marshall, London, and J. Kerr Fisken, Toronto.

On motion of Mr. B. M. Britton, Messrs. Henry F. J. Jackson, of Brockville, and J. M. Scully, of Waterloo, were re-appointed auditors of the company for the current year.

Mr. E. P. Clement, barrister, Berlin, moved "that the hearty thanks of the directors and of the policy-holders present at this meeting are hereby tendered to the manager, secretary, officers and agents of this company for the faithful and efficient services they have rendered the company, in their respective capacities, during the past year." He paid an eloquent tribute to the ability and attractive business courtesy of the manager, secretary and other members of the head office staff, and spoke in the highest terms of the energy, honesty and straightforwardness of the company's agents, on whose labors in the field so much of the success and future prosperity of the Ontario depended. Mr. Robert Baird, P.M., Kincardine, also made a few very laudatory remarks in support of the motion, which was carried amid rounds of applause.

Mr. Wm. Hendry, the manager of the company, replied to the last resolution, thanking the meeting on behalf of those referred to in it, and explaining some details in reference to the necessity for and purpose of reserves in life assurance. The directors met subsequently and re-elected Mr. I. E. Bowman, M.P., president; Mr. C. M. Taylor, first vice-president, and Mr. Robert Melvin, second vice-president of the company for the ensuing year.

For further Meetings see page 1598.

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for the week. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. Total for the week was 11,563 shares; last week, 3,540 (5 days). Bank of Commerce, 369 at 134-135½; Imperial Bank, 7 at 180; Standard Bank, 77 at 161; British America Assurance, 250 at 119⅜-120; Western Assurance, 6,390 at 161⅛-165; Consumers' Gas, 147 at 234; Dominion Telegraph, 8 at 120; Toronto Electric Light, 43 at 155-160; Toronto Incandescent Electric Light, 475 at 113-116½; Commercial Cable, 1,096 at 157½-160½; Bell Telephone, 125 at 157⅜-157⅞; Toronto Railway, 2,410 at 79⅞-84⅜; Canada Landed and National, 3 at 117; Canada Permanent Loan, 20 at 169; Farmers' Loan and Savings, 40 at 104; Imperial Loan and Investment, 3 at 114½; London and Canadian Loan and Agency, 100 at 119.

EUGENE DEBS MUST GO TO PRISON.

The United States Supreme Court, on May 27th, denied the application of Eugene V. Debs, the strike leader, for a writ of *habeas corpus*. This is a victory for the Government. The decision of the court was read by Justice Brewer, and was unanimous. The conclusions of the court are that the Government of the United States has jurisdiction over every foot of soil and over every individual within the boundaries of the United States, and it has power to invoke civil courts to remove obstructions to inter-State commerce, and the civil courts have the right to enjoin those who make obstructions to such commerce. The Circuit Court having final jurisdiction, its act is not reviewable by the Supreme Court on a petition for a writ of *habeas corpus*, and therefore the writ is denied.

—When Charles Sprague, the Boston poet, was at the height of his glory, he was importuned for his autograph. Sprague did not want to give it, but, quickly seeing a witty way out of the dilemma, he declared that he would furnish as many as desired for one dollar a piece. There was a great demand, and the next day he sent to all who made the request one of the dollar bills issued by the bank of which he was the cashier.

—"Living pictures" cannot be called an invention of "these modern days," says a writer in the *Ladies' Home Journal* for June, since it is claimed that they were first employed by Madame de Genlis for the purpose of educating the Duc d'Orleans' children, whose governess she was. With the help of several famous artists, she arranged pictures of historic scenes which ladies of the French Court posed for.

THE DOCTOR TO THE AGENT, GREETING.

At a meeting of the Life Insurance Association of New York, held last week at the Insurance Club, Dr. Edward Curtis, of the Equitable Life, presented a scholarly poem, from which we copy the following stanzas. He suggests, half humorously, that there should be a friendly understanding between the medical examiner and the agent as to the necessary functions of the former:

So realize what is the fact,
That 'tis only by business tact
The good risks to choose,
The bad to refuse,
That insurance is properly backed.

And realize further, I pray,
What is taught on this table to-day—
That to gather in gross
And then throw out the dross
Is industry's regular way.

For bethink you that nearly one-half
Of the grain that is reaped is but chaff,
From which the good seed
Must be carefully freed
Ere 'tis ground for life's sustenance-staff.

That the beautiful fruit of the vine
Must be crushed, and the worker refine
The luscious sweet mash
From the stalks and the trash
Ere the juice be fermented to wine;

That he who would seek to despoil
From the olive its generous oil,
Must squeeze and must skim,
Nor grudge him the *vim*
He expends in his troublesome toil.

So from *corn, wine and oil* take your cue,
And, broadening ever your view,
From Nature's own school
Learn that industry's rule
Must apply to your business too!

PUMPING BY ELECTRICITY.

A pumping plant for domestic and fire service has been installed at De Kalb, Ill., which is of special interest. The water is pumped by a deep-well pump from a 10-inch drilled well driven by a 25-horse-power motor. The water from this pump discharges into a reservoir near the pumping station, and it is pumped from this into the mains by two pumps, operated by motors. The mains are so laid that the water not consumed during the time of pumping is carried to a standpipe from which it flows to the mains again when the pumps are idle. The pumps are of the triplex pattern, having three pistons 10 inches in diameter, with 12 inch stroke, and are directly connected to a 50-horse-power multipolar slow-speed motor with rawhide pinions. The capacity of each pump is 500 gallons at 43 strokes per minute. For the domestic service the pumps work against a pressure of 60 lb., but being designed for fire service, are capable of working against a pressure of 125 lb. An automatic device for closing the standpipe connections from the mains is used in case of fire. The current to operate the motors is furnished by the De Kalb Electric Company, being carried from the power station to the pumping station, a distance of 700 yards. In the contract between the town and the De Kalb Electric Company, the latter assume all care and attention of the machinery in consideration of a price of 4 cents per 1,000 gallons pumped.—*R.R. Review.*

CLEAN MACHINE SHOPS.

The desirability of cleanness in an engineering workshop, of picking up every chip, and of sweeping in every nook and corner, has been so much talked about within the past few years, that scarcely any one possessing an ordinary shop is without a twinge of conscience every time he sees a little dirt heap. Practically, however, the writer adds, the exact degree of cleanness which is the most economical is a subject which might be profitably discussed. In a dark shop it is best, of course, to have the windows as clean as soap and water will make them, but where rough work is going there would seem to be little use in trying to imitate some of the shops where only the finest work is done. If it is a question of making fine tools, gauges, and nice work generally, cleanness is certainly desirable, bnt when it is repair work on big engines and the like, it is not likely that the shop owner can effect any increase in his income by attempting to have everything "spick and span." In one of the best known shops, where litter is never allowed to accumulate, it is quite interesting to study the conditions of the different departments. On one of the upper floors, where the work to be done is delicate, and where the light is, of necessity, very good, everything is as neat and clean as one could wish, but in those departments where the heavier and coarser work is carried on, there is no attempt to approach any such neatness. Every department has its own standard, and that standard is adjusted to the requirements of the work. The degree of cleanness and neatness, then, is to be determined by the money basis. That degree which will pay is the degree which a shop ought to support.—*Cassier's Magazine.*

—Mr. J. Ponsonby Sexton, advocate, only son of the late Recorder Sexton, has received the appointment as consul for Greece in Montreal.

—In a certain little Scotch town, some time ago, they held a temperance meeting. During the proceedings an old man, who was not exactly celebrated for sobriety, got up to address the audience. He said, after a few remarks upon the beauty and advantages of moderation: "My friends, there's just two occasions when I tak' whiskey—" Undismayed by the "hums" and "has" which ensued, he continued: "Ay, I just tak' whiskey when I hae haggis for dinner, and I tak' whiskey when I hae nae haggis." The rest of the speech was lost in the storm of applause that broke forth.—*Boston Globe.*

The Union Loan and Savings Co.

61st Half-Yearly Dividend.

Notice is hereby given that a dividend at the rate of six per cent. per annum has been declared by the directors of this company for the half-year ending 30th instant, and that the same will be paid at the company's offices, 28 and 30 Toronto street, on and after

Monday, the 8th Day of July Prox.

The Transfer Books will be closed from the 21st to the 30th inst., both days inclusive.

By order.

THE BRITISH CANADIAN LOAN AND INVESTMENT CO., Ltd.

DIVIDEND NO. 35.

Notice is hereby given that a dividend at the rate of seven per cent. per annum on the paid-up capital of the company for the half-year ending 30th June 1895, has this day been declared and that the same will be payable on the

Second Day of July Next.

The Transfer Books will be closed from 22nd to the 30th proximo, both days inclusive.

R. H. TOMLINSON, Manager.

Toronto, May 22nd, 1895.

Public Notice

IS HEREBY GIVEN THAT

(1) The Steele, Briggs, Marcon Seed Co., Limited, a company incorporated under the Ontario Joint Stock Companies' Letters Patent Act, will, after four weeks from the first publication hereof in *The Ontario Gazette* and in THE MONETARY TIMES, a newspaper published in the locality in which the operations of the said company are carried on, apply under the "Act respecting the changing of the names of incorporated companies," to His Honor the Lieutenant-Governor of Ontario in Council, for an order changing its corporate name to that of The Steele, Briggs Seed Co., Limited.

(2) That the said company is in a solvent condition.

(3) That the change desired is not for any improper purpose.

(4) That the name desired is not the name of any other company, incorporated or unincorporated, or liable to be unfairly confounded therewith, or otherwise on public grounds objectionable.

EDGAR & MALONE,
Solicitors for the Company

Dated this 29th day of May, A.D. 1895.

—The custom receipts at Halifax for the month of May last were $76,219, as compared with $71,667 in the previous May.

Partnership Notice

Notice is hereby given that the partnership heretofore existing between the undersigned in the business carried on by us at Toronto as importers of and wholesale dealers in

Woollens and Tailors' Trimmings, etc.

under the firm name of **HUTCHISON, DIGNUM & NISBET**, has been dissolved by mutual consent. All debts owing to the firm are to be paid to Mr Dignum, who continues the business under the firm name of **E. J. DIGNUM & CO.**, and who assumes the liabilities of the firm.

E. J. DIGNUM,
R. B. HUTCHISON,
R. A. NISBET.

Witness,
A. T. CHADWICK.

Toronto, 1st June, 1895.

WANTED

TENDERS for DEBENTURES

The City of Windsor, Ont., invites tenders for debentures to the amount of $37,597.06, being the cost of sundry local improvements.

Sealed tenders will be received by the undersigned up till noon on June 16th, 1895.

For further particulars address

CHARLES J. McARTHUR,
Acting City Clerk.

Debentures for Sale

The School District of Regina, Protestant Public School District No. 4 of the North-West Territories, offer for sale $13,000 in debentures, payable in twenty equal consecutive annual instalments, bearing interest at the rate of 5% per annum. The assessed value of the District is over one million dollars. There is a prior issue of debentures of $12,000, $3,000 of which has been repaid.

Offers for purchase of said debentures will be received up till the 10th of June, 1895. Address

JAS. BALFOUR,
Sec'y-Treas. School Board.
Regina, N.W.T.

$65,000

CITY OF WINNIPEG SCHOOL DEBENTURES

28th of June Next,

for the purchase of last issue of debentures of the school district of Winnipeg No. 1, $65,000.00 payable at the expiration of fifty years, with interest from the 1st day of July, 1895, at the rate of four per cent. per annum, payable semi-annually. Principal and interest payable at the office of the School Board in Winnipeg.

Money to be paid and delivery made at Winnipeg.

Any information can be obtained from STEWART MULVEY, Secretary-Treasurer, Winnipeg.

D. W. BOLE,
Chairman Finance Committee

Winnipeg, May 21st, 1895.

COLORS FOR THE WINTER.

Many of the knowing ones have predicted that the coming fall would witness a reaction from the bright colors now so conspicuous in women's apparel. But the winter card of the Chambre Syndicale des Fabricants de Plumes de Paris, for information of which we are indebted to the *Dry Goods Economist*, does not bear out this prediction. However, first impressions are not always lasting, and the season opening in brightness may become more sombre in tone as it advances.

Blues are brought forward prominently and commence the list with Horizon, Goëlette and Gabier, which are new grayish tones. These are followed by Mistral, Matelot and Marine, of the bright and dark navy shades. In the bleuets two shades are repeated—Jacinthe and Bleuet. The usual Ciel or baby blue is repeated.

The next novelty is a series of bluish greens, from light to mediums—Sévres, Chine and Japon. The three Latania shades of a yellowish cast appear again, as does the strong, handsome tint called Moskowa. For reed greens, Roseau and Phénix are old friends from the card for summer, 1895.

One bluish lavender and a deeper violet—Liseron and Campanule—are handsome, and the first shade is new, but the rosy violet shades, Clématite, Volubilis, Iris and Petunia, are more fashionable, especially the second and third.

A rich purplish red—Victoria—comes again, though formerly known as Antigone, and a lighter red of this color—Duchesse. The cardinal shades are standard and the two bright yellow reds are now Rubens and Vandyke.

A hint of cerise is seen in the tints Margottin and Fuschia, which are now in high favor. The Reine pinks are out again five shades, though several are re-named—Rose, Graziella, Magda, Manon and Reine.

One beaver or beige shade is of a grayish cast, and the same three grays are seen, Argent, Nickel and Platine. Six yellows, from Ivoire to Paradis, a deep, glowing yellow, are the same as on the summer card.

Brown is second in rank, and though the shades are the same the first three are renamed, beginning with Corée in place of Dune, and following down, Formose, Kola, Tabac, Marron and Loutre.

"A condensed card of 'leaders' for our private use," says the *Economist*, "informs us that of all these colors the prominent yellows will be Genêt and Ebénier, and two deeper orange tints unnamed. A turquoise blue is thought well of and a medium shade of Bleuet; also the bright navy, Matelot, and Mistral, which is still brighter.

"Two medium rosy-violet shades are selected —Iris and a redder one that is not on the French card. The greens called Sévres, Moskowa, and one shade darker, are among the 'leaders.'

"A golden brown, Tabac, is pronounced the best, and the rich purple of a red cast called Petunia. The deep purplish-red, Victoria, and one shade lighter, not on the card, are rich in appearance and well thought of, as are all purplish reds, and *vice versa*.

"Gray-blue and golden-brown will hold their own amid dress fabrics, with a dash of the bright green, violet and red. Millinery seems doomed to run to the strong pinks, reds and violet tones. For evening shades Turquoise, Horizon, yellow and American Beauty pink."

—One of the largest steel castings ever produced was lately made by the Bethlehem Iron Co., of South Bethlehem, Pennsylvania. This is the conning tower for the battleship "Massachusetts," and is in the form of a hollow cylinder 7 ft. 3 in. diameter and over 7 ft. high, cast in one piece, and resembles an elongated locomotive tire. When in position on board the ship it will be surmounted by the wooden pilot house from which the steering will be done when not in action. The weight of the tower proper is about 28 tons.

PARIS TOOL MANUFACTURING CO., Ltd. Paris, Ont.

Police Magistrate Denoyers, at Montreal, dismissed the action of the Dominion Government, which aimed to recover from contractor Emanuel St. Louis $170,930 wrongfully obtained at the expense of the country. However, Mons S is not to get off so easily, for a charge has been filed against him under section 595 of the Criminal Code, dated 1894. The Chief of Dominion Police, Mr. Sherwood, acting for the Government, will prosecute Mr. St. Louis in the Court of Queen's Bench (criminal side) on the charge of robbing Her Majesty the Queen of the stated sum.

Commercial.

MONTREAL MARKETS.

MONTREAL, June 5th, 1895.

ASHES.—Receipts for May were exactly the same as in May, 1894, namely, 222 brls. Total receipts this year to May 31st were 658 brls. pots and 125 of pearls; there was in store May 31st 107 brls. pots and 15 of pearls. The market is practically unchanged, quotations being for first quality pots $4.10 to 4.15, seconds $3.80, pearls $5.50 per cental.

CEMENTS, FIREBRICKS, &c.—A fair business is reported as being done. No large sales are being made, but the aggregate of orders is moderately good. Prices are rather firmer abroad, English makers asking a penny halfpenny advance. We quote English $1.90 to 1.95, Belgian $1.80 to 1.85. A good demand continues for firebricks, which range in price from $15 to 20 per M.

GROCERIES.—A very fair distribution is reported by the trade at large, but collections are not wholly satisfactory. As regards prices, there is little new since a week ago. Granulated sugar, at the refinery, is quoted at 4¼c. firm per lb., but outside lots can be still bought at 4⅛c. Factory prices for yellows range from 3¾ to 3⅞c., and in these no outside lines are held. Barbadoes molasses is scarce, but jobbing prices are yet unchanged at 35c. per gal., in puncheons, and 38½c. in brls. The first lots of new Japan teas are just about due here, but will only comprise some 500 or 600 packages. Standard B. rice is quoted at $3.45; Patna Royal, 4¼c.; Imperial Seeta, 4⅜c.; the mill has withdrawn the J. grade. The present is a dull time for dried fruits, in which there have been no recent changes, and there are fair stocks in most lines except 4 crown California muscatels. Canned goods are in moderate request, and tomatoes are quoted at 85 to 90c.; corn, 87½ to 92½c.; peas, 85 to 90c.; gallon apples, very firm, at $2.30. No quotations have yet been received for new pack of lobsters or salmon.

DAIRY PRODUCTS.—Shipments of cheese last week were 34,346 boxes, as against 50,752 boxes for same period last year. Total shipments for season of 1895 are 99,724 boxes, as against 111,669 in 1894. Notwithstanding continued low cable quotations, prices have improved locally, and from 7¼ to 7⅝c. per lb. is being paid at the moment. Butter remains dull and depressed, and from 15 to 16c. per lb. is a full price for creamery, and 13 to 14c. of choice Townships dairy. Eggs are in good request at 10 to 10½c. the dozen.

DRY GOODS.—The wholesale houses report a steady sorting business with country buyers, and fair orders for fall underwear, and some other lines of heavy goods are also being booked. Retail trade in the city has been somewhat interfered with by late rains, but on the whole moderate satisfaction is expressed with the business being done. Remittances are fair. English letters reported continued firmness in worsteds.

HIDES AND TALLOW.—A meeting of the trade was held on Monday afternoon, when the dealers' price for No. 1 hides was fixed at 8½c. to tanners the quotation is now 9½c. steady. Lambskins are advanced to 25c. each; calfskins firmer at 8 to 9c. per lb. The scarcity of hides still continues. Tallow is dull and low in price.

LEATHER.—Shoe men are not buying very much just now, but prices have lost none of their firmness, and in some lines, notably sole and splits, may be called dearer. For No. 1 slaughter 29c. is being asked, and for No. 1 B.A. 26 to 27c. Several western tanners report sales of splits at 28 to 30c., and instruct local agents to hold at 28c., though we have not heard of any sales locally beyond 25 or 26c. The last London sales of dongola raw stock on May 30th are said to have shown quite an advance in prices. We quote:—Spanish sole B A No 1, 25 to 27c.; do No 2 to B A, 24 to 25c.; No 1 ordinary Spanish 23 to 24c.; No 2, 22 to 23c.; No 1 slaughter, 28 to 29c.; No 2 do, 26 to 27c.; common, 22c.; waxed upper, light and medium, 35 to 40c.; do heavy, 33 to 36c.; grained, 38 to 40c.; Scotch grained, 38 to 40c.; western splits, 26 to 28c.; Quebec do, 20 to 22c.; juniors, 16 to 19c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 15 to 16c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 13 to 16c.; extra heavy buff, 17c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The recently improved movement is fairly maintained, and there is further evidence of advancing values in several lines. Rolling-mill men have withdrawn quotations for bar iron, and there is no longer $1.55 as a price. Pipe quotations have also been withdrawn, and American prices are advanced. In pig iron no important transactions are noted, and prices remain about the same. The advance of a quarter cent noted in zinc last week is maintained. Nail manufacturers have had a meeting this week, and have advanced cut tacks 15 to 20 per cent. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $19.00 to 20.00; Eglinton, $18.00; Gartsherrie, none here; Carnbroe, $18.00; Shotts, none here; Middlesboro, No. 3, $17; Niagara, No. 2, $18.00; Siemens, pig, No. 1, $15.75 to 16.25; Ferrona, No. 1, $15.75 to 16.25; machinery scrap, $14.75 to 15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00, 52 sheets to box, 60 sheets $2.10 to $2.15, 75 sheets $2.20 to $2.25; all polished Canadas, $2.50; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, according to finish; P. D. Crown, $3.75; do., I.X., $4.50; Coke I. C., $2.70 to 2.80; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.;

Greatest variety of patterns and largest stock in Canada

No. 24, 3¾c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, 1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 18 to 19c.; ingot copper, 10½ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do., $4 to 4.25. Antimony 10 to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅝ inch, 4½c.; 7-16 in., 4¼c.; ½ in., 3⅞ to 4c.; ⅝ in., ½c; ¾ in., 3¼c., ⅞ in., and upwards.

Oils, Paints and Glass.—A very fair amount of business is still doing in these lines. Paris green continues very strong, but it is said the demand will hardly be so large as expected, because the recent cold spells have apparently killed off a certain proportion of the potato bugs. In bulk the quotation is 16 to 17c. as to lot, in packages 18 to 19c. per lb Linseed oil is firm at the advance, and very scarce at the moment in the city. Shipments from Britain have been light so far, and western crushers are not operating, owing to the high price of seed. Glass stocks are also light, but selling continues at the close figures last quoted. Some houses have not received yet a third of their usual supplies. We quote :—Turpentine 47c. per gal. for single brls.; two to four barrels, 46c.; 5 brls. and over 45c. Linseed oil, raw, 57c. per gallon.; boiled, 60c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4¼ to 4½c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, in bulk, 16 to 17c.; in small packages, 18 to 19c; window glass, $1.10 to $1.15 per 50 feet for first break; $1.20 to $1.25 for second break; third break, $2.70.

Wool.—Very little can be reported in the way of news in this line Millmen are showing samples of next spring's goods, but have not yet booked sufficient orders to judge fully of their wants, and we only hear of a few sales of Cape at about 14c. Some movement of Canadian fleece to the United States was reported last week. We quote greasy Cape 13½ to 15c.; Natals, 15 to 16c.; Australian, 14 to 14½c.; domestic fleece, 18 to 21c.; pulled supers, 20 to 21½c.; extra 23 to 26c. per lb. A cargo of some 1,400 bales is now loading at the Cape for this market, and will shortly sail.

TORONTO MARKETS.

Toronto, June 5th, 1895.

Dry Goods.—Merchants could not have wished for more favorable weather than that of the last several days. The intense heat brought out a good demand for light underwear, hose, dress goods, parasols, etc., and enabled merchants to make considerable reductions in their stocks at the beginning of the season. This is always an advantage, for later in the summer reduced prices are the order of the day. The wholesale houses received a large number of sorting up orders, which establishes the fact that retailers are working upon small stocks. Values remain unchanged. Recent advances in cotton goods are being maintained. No increase has been made in the price of woolens, although the wool market has opened materially higher than last year.

Grain.—The markets of the United States have been unsettled during the week. Trading in Toronto has been somewhat quieter. The Manitoba wheat market has eased off a little, the feeling is weaker, and quotations lower by 2c. per bus. This has been caused mainly by offerings from Buffalo. A holder in that city offered 50,000 bushels here at 82c. By the time a duty of 15c. and freight charges were paid, it looks as if there would still be a margin for Canadian buyers. The prospects in Manitoba are all favorable to next season's crops. The Winnipeg *Commercial*, June 3rd, says: "Abundance of rain has fallen this week about all over the country, ensuring an excellent crop condition for some time to come, and the outlook is now very hopeful. The crop should now be in a condition to stand a long period of dry weather, should such conditions prevail, though there is no reason to look for such. Wheat is now sufficiently advanced to shade the ground well, and before the moisture now in the ground can dry up, the crop will be well advanced. Wheat is now mostly from six to ten inches high. The spring frost period is now over. There was a slight frost here the first day of the week, but it was not perceptible on crops." Reports from Ontario points also point to good crops. The only district that appears to have suffered by frost is the north-west part of the Province, and here the damage was not severe. The visible supply of Canada and the United States, on the 1st of the month, was 52,229,000 bus., or 2,015,000 bus. less than last week On June 2nd, 1894, the supply was 69,394,000 bus., and on June 3rd, 1893, 70,367,000 bus. Local stocks of barley, as is usual at this time of the year, are in small compass. Some sales were made during the week for feed purposes; quotations range from 48 to 55c. per bus. The visible supply of oats in Canada and the United States on June 1st was 8,626,000 bus., as compared with 2,606,000 bus. on June 2nd, 1894. The local oat market is, however, very strong, and an advance of 2c.

These prices are wholesale by the car-load.

per bus. has been made during the week. Oats are now quoted at 43 to 44c., and on June 1st, 1894, were quoted at 37 to 37½c. per bus. Peas are in good demand, but small offerings prevent active trading. Rye is steady and unchanged. Corn remains nominal.

THE VISIBLE SUPPLY.

	June 1, '95. Bush.	June 2, '94. Bush.
Wheat	52,229,000	69,394,000
Corn	10,763,000	7,495,000
Oats	8,626,000	2,606,000
Barley	100,000	100,000
Rye	1,236,000	250,000

During the past week wheat decreased 2,015,000 bushels; corn increased 1,785,000 bushels; oats increased 1,236,000 bushels.

GROCERIES.—Trade has been a shade quieter this week, and the market is devoid of any striking features. Values are about steady, with upward tendencies in several lines. Tapioca has advanced ¼c. per lb. White and black peppers have been moving upwards, and are from ½ to ¼c. per lb. higher. There is only a moderate movement in sugars at present. The large retailers are carrying for the most part good supplies, and will not enter the market this month. Others who were caught unprepared by the advance are buying in a moderate way. Several houses have received shipments of May pickings of Japan teas, and the local market opens at 36 to 37c., or somewhat higher than last year. Contracts are being made in canned salmon. Packers are talking high prices, and with prospects of higher freights, the outlook savors of strength. There has been a good demand for canned fruits from the Northwest. Wholesale stocks of strawberries and cherries are exhausted, and the street was canvassed in vain for enough to fill a small order this week.

HARDWARE AND METALS.—The outlook is encouraging, while present business is quite satisfactory. Values have upward tendencies. Prices of tacks, clout nails and shoe finders' supplies are advancing. Quotations on bar iron have been withdrawn by manufacturers, and meanwhile jobbers have advanced prices 10c. per 100 lbs.; revised discounts will soon be distributed. In iron pipe the situation is similar and quotations are withdrawn. Ingot copper, sheet zinc, zinc spelter are firm. Wire and cut nails meet with good demand. Harvest and garden tools are still being sold.

HIDES AND LEATHER.—Nothing has occurred to change the situation in hides. Prices are still maintained at former quotations and tanners continue to complain of excessive values. *Hides and Leather*, Chicago, June 1st, says: "Trading was very light the past week, but mainly from the fact that there are very few hides to be had. Packers say that never before in the history of the trade have hides been so closely sold up as at present. It is estimated that there are probably not to exceed six cars of May salting remaining unsold. Quite a number of buying orders for the various selections are here, with the possible exception of Texas steers, but tanners hesitate to take the early June kill, which are about the only hides offering." Few sheepskins are offering. Pelts are still quoted at 15c. Lambskins are worth 25c. The tallow market remains rather dull and trading slow. Dealers are paying 5 to 5½c. and offering at 6c.

LEATHER.—There is a better feeling in the tanning industry this week. The season is advancing and manufacturers will soon be compelled to enter the market. It will, however, be probably two or three weeks before cutters begin general operations on the fall trade. Buyers have pursued a waiting policy, but with only moderate success. Colored leathers, uppers and sole have probably reached a high water mark, but several lines must still advance in order that prices may accord with the hide market.

PROVISIONS.—The advance in wheat, the rise in hides and the improvement in wool do not appear to have influenced the provision market for the better. Dairy products are slow and hog products easy; the whole trade lacks vim and vigor. In butter the receipts of rolls are pretty well over; tubs are selling at 11 to 12½c. Cheese remains at 8c.; the feeling in the jobbing trade is, if anything, a little firmer. For hog products there is fair demand, quotations remain steady. The *N.Y. Journal and Bulletin of Commerce*, June 5th, says: "The detailed Chicago stock statement showed double the mess pork held a year ago, nearly three times as much 'other kinds,' over four times as much contract lard as a year ago, and over two and one-half times as much 'other kinds'; over 41 million lbs. s.p. hams, against the same a month ago and 22 million a year ago, or nearly double; 33¾ million ribs, against 29½ a month ago and 6¾ million a year ago; over 13⅛ million 'other' cuts of meats, against 10¾ a month ago and 7¾ a year ago; 5 000 more lard than a month ago, and the contract pork in spite of no production thereof." Receipts of eggs are fairly large, but the demand is slow, with quotations at 10½ to 10½c. Beans are scarce at $1.70. Dried and evaporated apples remain dull.

WOOL.—The week's offerings were very liberal, and thus far the 1895 clip is coming into the market much more freely than the clip of 1894. This is occasioned by the higher prices. Toronto quotations for Canadian fleece are: fine selections, including Southdown, 21c.; fleece combing, 20c.; rejects, 14 to 16c.; unwashed, 11½ to 12½c. Competition has caused merchants to exceed these prices, and as we elsewhere note, fanciful figures have been paid by buyers. No shipments of this year's fleece have as yet been made to the United States, and although receiving frequent enquiries for stock, Toronto merchants prefer to hold until the wool has been pretty well collected.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company that has from its inception given its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth Every desirable plan of insurance is issued from the low-priced "PAY AS YOU GO" plan to the shortest single premium endowment.

TORONTO GENERAL TRUSTS CO.

The thirteenth annual meeting of the shareholders of the Toronto General Trusts Company was held at its offices on the corner of Yonge and Colborne streets, Toronto, on Monday, the 27th day of May, 1895, at twelve o'clock noon. In the absence of the Hon. Edward Blake, the president, Mr. John Hoskin, Q.C., LL.D., vice-president, took the chair, and among those present were Mr. E. A. Meredith, LL.D., vice-president; Hon. Sir Frank Smith, George Gooderham, George A. Cox, W. H. Beatty, B. Homer Dixon, T. Sutherland Stayner, Robert Jaffray, James Scott, J. J. Foy, Q.C., Emilius Irving, Q.C., J. G. Scott, Q.C., J. W. Langmuir, Geo. W. Lewis and Edward Galley.

Mr. J. W. Langmuir, the managing director of the company, read the report of the directors for the year ended 31st March, 1895, as follows:—

REPORT.

The directors of the Toronto General Trusts Company have pleasure in submitting to the shareholders their 13th annual report, with the usual statements showing the operations of the company for the year ended 31st March, 1895, and its financial standing and condition at that date.

The number of estates, trusts, and other official positions assumed during the past twelve months was greater than in any previous year in the history of the company, and the volume of work has of course been very largely increased. Owing, however, to the rearrangement of the office work at the beginning of the year, the business has been efficiently and promptly managed with only a trifling addition to the office staff.

The income derived from the various branches of the company's business is fully set out in the profit and loss statement herewith submitted. It will be seen from that statement that the net earnings of the company for the year, including $4,308.75 brought forward from the preceding year, amount to $52,875.21, after providing for all ascertained and estimated losses. Out of these earnings your directors have declared one half-yearly and two quarterly dividends, amounting in all to $22,500, being at the rate of 10 per cent. per annum on the paid-up capital stock of the company.

The reserve fund has been increased by the sum of $10,000, and now stands at a quarter of a million dollars. There has also been carried to contingent account the sum of $15,000, which has increased that fund to $43,576.50. In addition to these appropriations the sum of $5,375.21 has been carried forward to the credit of profit and loss account.

Your directors have in the past adopted the policy of only calling up capital equivalent to the amount of Reserve Fund. In pursuance of this policy twenty-two and one-half per cent. of the subscribed capital of one million dollars has already been paid up, amounting to $225,000. Seeing that $10,000 has now been added to the Reserve, thus increasing that fund to $250,000, the directors, to carry out the above policy, recommend to the shareholders to make a further call of two and one-half per cent. on the subscribed capital. When this proposed call has been paid in, the capital stock, the Reserve Funds, and undivided profits of the company, taken together, will amount to $1,298,951.71, most ample security to the public for the faithful performance of the company's duties. The following figures show how this amount is made up:

Subscribed capital	$1,000,000 00	
On which 25 per cent. will be paid up		$ 250,000 00
Reserve Funds invested		250,000 00
Contingent fund and unappropriated cash balance		48,951 71
		$548,951 71
Uncalled capital subscribed		750,000 00
		$1,298,951 71

All of which is respectfully submitted.

JOHN HOSKIN,
Vice-President.

J. W. LANGMUIR,
Managing Director.

In moving the adoption of the report, Vice-President Hoskin said:—I think we have reasonable cause for gratification at the result of last year's operations of the company. As the report sets out, the number of executorships, trusts and other official positions assumed by the company during the past twelve months have been greater than in any previous year in the history of the company.

You will see from the elaborate statements which the managing director has placed before you that since the company was organized, thirteen years ago, the estates and work that have passed through its hands aggregate in value over fifteen million dollars; and after the winding-up of estates and the distribution of large sums, a residuum of over ten millions still remain under the care of the company. I have merely to state this in order to make clear two points:—(1) The great necessity that existed for the organization of a company like this to assume in a corporate capacity the positions that formerly had to be performed by individuals; (2) that the public have appreciated the establishment of the institution is shown in a very marked way by the liberal use that has been made of it in its various official capacities.

I take this opportunity of asking the shareholders to co-operate with the directors in our endeavors to bring before the public the many advantages that the company possesses for the management of estates and general investment and agency work. The question, "Whom shall I appoint as my executor and trustee?" is one of the utmost importance to every person who has property to leave at death, and as all of us who have observed the workings of the company for the past thirteen years know, there can be no doubt that a trust company and not an individual is best qualified for the purpose. Among the many special advantages which the company possesses, and which no individual can offer to the same extent, are: (1) Continuity of service; (2) security; (3) effective management; (4) constant supervision; (5) reasonable compensation for performance of duties.

Respecting continuity of service, individuals, fortunately or unfortunately, must die, but a company always lives. In its hands, therefore, a trust, no matter how long its duration, is not liable to be interrupted by death, or to have the personnel of the trust changed from other causes.

As to security, the large uncalled capital stock of the company, its accumulated reserve funds, and invested capital, amounting together, as the report just read shows, to $1,300,000, furnish the fullest guarantee to the public of the safety of all interest that may be entrusted to the company. Without unduly lauding the standing and position of your board of directors, I may be permitted to say that the varied experience and knowledge of its various members eminently qualify the company to supervise the duties devolving upon it, and it goes without saying that with a board of this kind and a staff of trained officers carrying on business on carefully considered principles, and with a special knowledge acquired by large experience of the best means of winding up estates and investing money, the company is in a much better position to effectually discharge the duties of executor and trustee, as well as all other positions of a kindred character, than any individual possibly can be.

Respecting compensation for management, I repeat what I have stated on previous occasions, that notwithstanding the advantages the company possesses, the compensation is in no case greater than is allowed to private individuals.

In conclusion, I cannot too strongly emphasize the fact that in the transaction of the company's business every species of speculation is avoided, and that the efforts of the company are devoted exclusively to the legitimate business of the management of estates and the investment of money.

The profit and loss statement which has been submitted to you speaks for itself. You will observe that the Reserve Fund has now reached a quarter of a million, and that it is the policy of your directors to buttress and fortify that Reserve by a large contingent fund, now equal to close upon $50,000.

I have pleasure, gentlemen, in moving the adoption of the report.

Vice-President Meredith, in seconding the adoption of the report, said:—Notwithstanding the wave of depression which has passed over the country, and, indeed, all parts of the world, the shareholders of the Toronto General Trusts Company, at any rate, have good reason to be satisfied with the result of the year's work, and the continued success that has attended its operations. The chairman, Mr. Hoskin, has gone so fully into the aims and objects of the company that little is left for me to say. The statements placed on the table are so voluminous that it would require hours to refer with any degree of minuteness to their contents. You will be glad to observe that, with the exception of the revenue from interest, which shows a slight decline, owing to the fall in the rate, the income from all other branches of the company's work continues steadily to increase. It should also be stated that a very considerable margin of profit that will ultimately come to the company is held in reserve until estates are wound up and passed by the courts.

The rents from the company's building make a very fair showing, but some considerable outlay had to be made in renewing the elevator services, which, however, will result in a considerable saving in the future.

I would like to refer to the arduous services of the managing director and his staff, but I am aware that Mr. Langmuir objects to laudations of that kind. I cannot refrain, however, from extending a word of commendation to his staff, every one of whom discharges his duty faithfully and well.

I beg to second the adoption of the report.

The report was adopted.

Mr. W. H. Beatty, the chairman of the inspection committee, in moving the adoption of the quarterly reports of the committee, gave full particulars as to the methods of inspection and audit, which constitute such an important feature in the supervision of the company's business. He fully endorsed the remarks of the chairman in asking the co-operation of the shareholders in making known the great advantages the company possesses in the management of estates and trusts.

Remarks were also made in the same line by Sir Frank Smith, Mr. B. Homer Dixon, Mr. George Gooderham and other directors. The election of directors was then held, and resulted in the re-election of the following gentlemen:—Hon. Edward Blake, LL.D., Q.C., M.P., E. A. Meredith, LL.D., John Hoskin, LL.D. Q.C., W. H. Beatty, W. R. Brock, George A. Cox, B. Homer Dixon, J. J. Foy, Q.C., George Gooderham, H. S. Howland, Emilius Irving, Q.C., Robert Jaffray, A. B. Lee, J. W. Langmuir, Sir Frank Smith, J. G. Scott, Q.C., James Scott, and T. Sutherland Stayner.

At a subsequent meeting of the board the Hon. Edward Blake was re-elected president, and Messrs. E. A. Meredith and John Hoskin, vice-presidents.

A CONSIDERABLE RAILWAY DEAL.

The reported reorganization of the Northern Pacific Railway means, the Winnipeg *Free Press* is informed, that the N. P. road will bear the same relation to the Great Northern as the Soo line does to the C.P.R., that is to say, the Great Northern would direct and control the movements of the Northern Pacific. There could be little doubt, the same informant thought, that the conjecture of the railway official published in the *Free Press* previously would prove to be well founded, and that the C.P.R. would absorb the Manitoba connections of the Northern Pacific Railway.

Mr. James P. Hill, president of the Great Northern Railway, says that freight rates will be put up slightly all along the line, and many expenses cut off. Moreover, it means that the Canadian Pacific will have a lively race in the building up and development of the North-West.

President Hill expects much from the town of Great Falls, as the Pittsburg of the west; and should Tesla succeed at Niagara Falls in making steel from iron ore from electricity, as he says he will do soon, the Montana metropolis will become one of the great industrial cities of the North West, with its contiguous coal, iron and silver mines.

Speaking of the proposed new line of steamships between Japan and the Pacific coast, Mr. Hill said: "Now that the war between China and Japan is virtually over, I expect that there will be a big industry development in those two nations, and the United States will have as a consequence a good deal of business with them. If such a line of steamships is established, it will have to have new ships for fast service, like the Atlantic liners, and, of course, that would take some time, but it will come."

—The pipe foundry of the West Superior Iron and Steel Co., West Superior, Wis., has started up, after an idleness of about two years. The company makes a specialty of railroad culvert pipe.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents or to

WILLIAM McCABE,

DECISIONS IN COMMERCIAL LAW.

IN *re* COOPER, COOPER V. STEPHENS.—According to a decision of Romer, J., the owner of a copyright book of designs produced for advertising purposes, may sell the blocks from which one or more of the designs are printed and allow the purchaser for a particular purpose to print from it without losing his copyright in the designs. Such a sale does not authorize anyone else to print from the blocks, and does not enable the purchaser of the blocks to authorize any one as against the vendor to print from them. One of such designs is a substantial part of the copyrighted work.

BURY V. THOMPSON.—A tenant wrote to his landlord from whom he had taken a house on a lease terminable at the end of seven or fourteen years: "I have just been looking at my lease, and I see that my first seven years will be determined on 25th December, 1894. I have been making enquiries for some time past, and I find that I am paying too high a rent; and considerably higher than any of the adjoining houses are able to let for now. I understand that the rent is £50 too high, and I shall not be able to stop unless some reduction is made. I give you an early intimation of this, so that you may have ample time to consider what course you would like to adopt." The Court of Appeal in England held that the letter constituted a good and sufficient notice to determine the lease.

GWILLIAM V. TWIST.—Where in the course of the employment a sudden emergency arises which renders a servant unable to continue his duties, an authority may be implied by the law giving him power to entrust those duties to another, if the act authorized is not plainly unreasonable or illegal, provided the servant violates no express limitation of this authority and no order of his master. This is a judgment of Laurence and Wright, J.J.

HINE V. STEAMSHIP INSURANCE SYNDICATE, "THE NETHER HOLME."—An agent who is authorized to receive payments on behalf of his principal must receive cash or a cheque drawn upon a banker and immediately paid, which will then be counted for cash. Payment by a bill of exchange drawn by the agent, and accepted by the debtor of the principal, payable at three months' date, is outside the agent's authority, and is not a payment to the principal even though the bill is immediately discounted and is honored at maturity, according to the English Court of Appeal.

HENDERSON V. WILLIAMS.—According to the Court of Appeal in England, where the owner of goods has invested an agent with authority to sell the goods and has delivered to him the indicia of title, a purchaser who deals in good faith with such agent and pays the purchase money before the authority is revoked, acquires a good title to the goods, and it makes no difference whether any property therein passed to the agent, or whether, as between him and his principal, his authority was obtained by fraud.

MIDLAND RAILWAY V. SILVESTER.—According to a decision of Romer, J., when a guarantee is terminable by notice by the guarantor "or his representatives," but is otherwise silent as to its continuance after the death of the guarantor, his legal personal representatives are meant, and notice of the death of the guarantor given to the obligees otherwise than by such legal personal representatives is not sufficient to determine the guarantee.

A LAKE ACCIDENT.

During a heavy fog on the night of May 30th the Canadian steamer "Jack," bound down with lumber, collided with the steel steamer "Norman," of the Menominee line, opposite Middle Island, Lake Huron. The "Norman" sank immediately, drowning the woman cook, wheelsman and fireman. The barge "Sicken" was near and picked up the balance of the crew.

The "Norman" sank in 300 feet of water, was worth $200,000 and insured for $175,000. The "Jack" is afloat, but badly damaged. The "Norman" is a steel propeller of 2,304 tons gross, was built in Cleveland in 1890, and is owned by Capt. George P. McKay, of Cleveland. The Canadian steamer "Jack" is a new boat, and the same vessel which damaged the locks in the Welland canal so badly about three weeks ago that navigation on the canal was suspended for three days.

A FISHERMAN'S WANT.

Writing from Woods Harbor, N.S., a correspondent of the Halifax *Chronicle* sets out the importance of the lobster fishermen of western Nova Scotia, to have ready and frequent access to his best market, the United States, the main transportation route being, for him, from Yarmouth to Boston, by the Yarmouth S.S. Line. He finds fault with the condition of things on this line, under which "during that term of the lobster season when the catch is largest and prices highest, there is but one boat running from Yarmouth to Boston, making two trips per week." The empty crates, he says, are often, on account of over pressure of freight, left behind, which causes inconvenience to the fisherman. On the whole, he urges that there is room for better accommodation in the carriage of lobsters, and suggests a boat for the express purpose of carrying lobsters and fresh fish, running from Yarmouth to Boston during the months of April, May and June.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE Chatham Waterworks Company will not accept the offer of $125,000 recently made by the city council for its plant. The company wants $150,000.

WE note that according to a registration just made, Mr. Brackley Shaw, who for some years past has resided in Boston, has resumed his interest in the leading sole leather house of Shaw, Cassils & Co., Montreal.

MR. GEO. A. STIMSON, the Toronto debenture broker, has just purchased the $12,800 town of Tilsonburg bonds. They bear 5 per cent. interest, and mature in 1915. It is said that the premium paid was the largest the town ever got for its bonds.

A YOUNG firm of jobbers in men's furnishing goods, MacFarlane & Patterson, of Montreal, have assigned. They began on a very modest capital, and have been rather inclined to overtrade. Liabilities are $27,676 direct, and $17,890 indirect.

THE president of the Bank of Commerce of St. Louis has issued a peremptory order forbidding any employe of that bank attending horse-races. President Thompson believes that the tendency and opportunity to bet on the races, lose money, and eventually become defaulters, is so great that it is best to bar the clerks in the bank from the temptation altogether.

THE NEW BUTTER BOX

This is the latest style of putting up 1 lb. prints. The board is specially treated both inside and out, so as to make it both grease and water proof. By this means the waxed wrapping paper hitherto so generally used is entirely dispensed with, as also are those wooden butter dishes and other such like unsightly contrivances. This box is by far the best and most stylish package for butter that has ever been put on the market. It is also very ch ap. If you are interested write for samples and prices to the manufacturers.

Mercantile Summary.

A DISSOLUTION is announced of the boot and shoe manufacturing firm of Whitney & Brown, Montreal. Mr. Brown withdraws, and the business is continued under the old style by A. S. Whitney alone.

AT Carleton, N.S., Edward Crosby, a manufacturer of sashes and blinds, has made an assignment, owing $4,200, and making preferences of $1,400. He has been four years in this business, and had previously been a general storekeeper.——Dr. J. F. McGregor, of Hopewell, in the same Province, has also assigned.

THE output of bicycles in the United States this year is estimated at 400,000, and it may reach 450,000, which would be double the production of any previous year. Half-a-dozen American manufacturers now have agents in Europe. American wheels are said to be supplanting the English in the Mexican cities where wheels are used, and in Havana there are three or four agencies of American wheels.

WHEN the Bank of London suspended payment about seven years ago, J. W. Sharpe, the manager at Dresden, at that time, opened an office and did a private banking business, having a capital of $8,000, half of which was said to consist of real estate. Since then he has been supposed to be getting on prosperously. But now he suddenly suspends. We have not

learned the cause of his suspension.——About two years ago, Stuart & Co. opened a small tea and crockery store in Hamilton, but never made sufficient headway, and a bailiff has closed his premises.——In the same city, the tobacco stock of Berryman & Nex, which had been seized some weeks previously, has been sold by the same officer.

MONTREAL failures for the week are as follows: W. F. Smardon, a leading up-town shoe retailer, has had to assign He had a large account with J. & T. Stephens, wholesale makers of shoes, lately failed. Liabilities are $13,476 direct and $8,673 indirect.——Benard & Boyer, painters, have assigned, owing about $1,500.——S. W. Cuthbert, grocer, involved through the recent suspension of a jobbing house, is offering 40 cents cash, on liabilities of $3,500——Alex. Leblanc, another grocer, but in a limited way, is in the hands of the assignee; he owes only about $900.——Creed & Small, a plumbing firm, lately reported in trouble, have made assignment; they owe $2,100, part of which is in Toronto.——A. S. Workman, clothier, is reported to have arranged a compromise at 25 cents on the dollar.——Joseph Pont, saloon keeper, has been asked to assign.——F. G. Lajoie, jeweller, in a small way of business, has made over his estate for the general benefit; liabilities about $3,000.

Mercantile Summary.

THE Rubber Company of Granby have on hand, it is said, orders from Australia for 30,000 pairs of shoes and many thousand feet of rubber hose and belting.

AT a meeting of the directors of the Bell Telephone Company of Canada held this week, Mr. Robert Mackay was elected vice-president and Mr. Charles Cassils a director, to fill the vacancy on the board caused by the death of Mr. George W Moss.

THE other day, in Montreal, an employe of Prefontaine Brothers wanted to find out if a benzine cask was empty. He lighted a match and looked inside the cask! If he found it empty of liquid, it was dangerously full of vapor, that "invisible spirit" that men may call "devil." Result—an explosion, and a fire which cost $550 The man oh where was he? The fire commissioners, having held an *enquete*, determined as above stated.

"No signs of blue ruin here," says the Summerside, P.E.I., *Journal*, and adds: "Mr. R. T. Holman is finishing what is probably the largest brick store in the province, and several other buildings have been erected or are being, while many others are being renovated or improved. Plate glass fronts are all the rage on Water street, and every carpenter and painter in the town is kept as busy as he can be."

IT is agreeable to learn that the shops at Peterboro of the Canadian Electric Company have a full force at work on orders in hand. There are nearly ready for shipment two 35 ft. open street cars for the Kingston street railway, equipped with double trucks and about 10 feet longer than the average closed car. Another order, about finished, covers cars for the Galt and Hespeler electric road. These are closed cars and are very handsome. An order was received for 25 cars for the Kingston street railway, some of which will be open and others closed.

IN yesterday's issue of the *Canadian Churchman*, Rev. Prof. Clark, of Trinity College, writing of the Pan-American Congress of Religion and Education, to be held in this city next month, and giving a list of speakers and topics, expresses the opinion that "the practical outcome of the movement must be considerable." It is worthy of notice, by the way, that, probably in view of the meeting of the Anglican Synod this week, the present issue of the *Churchman* is enlarged to 20 pages and has five illustrations, among them a good portrait of Bishop Bond, of Montreal, and a likeness of the new provost of Trinity.

IMPORTS at Amherstburg, in May, were $8,974, and exports $27,200.

THERE was a big rush at the Nova Scotia mines office, last Friday and Saturday, for areas in the northern part of Montague district, and over 200 were taken up.

EXPORTS from St. John during May were of the value of $350,151, which is $60,000 more than in the previous May. The imports amounted to $294,000, which is $25,000 less.

CUSTOM house collections at the port of Victoria, B.C., in May, were $61,142.12. The imports for the month were: Dutiable goods, $159,766; free goods, $41,415; total imports, $201,181. Exports, $134,696.

THE plans of the T., H. & B. station at Hamilton have been approved of and tenders are advertised for. The building must be completed by Aug. 23. It will be situated on the north side of Hunter street, between James and Hughson streets.

THE Druggists' Association of the Province of Quebec held its annual meeting this week in Montreal. There were elected to the provincial council: Messrs. R. W. Williams, Three Rivers; E. Roy, Quebec; Alex. Marson, C. J. Covernton, A. D. Mann and C. E. Scarff, Montreal.

THE Winnipeg Electric Street Railway Company will spend between $50,000 and $60,000 in putting in a large plant into their new works, with greater capacity than is at present needed. We understand that not only has the contract for boilers, engines and dynamos already been let, but some machinery has already arrived at Winnipeg. The power house is to be enlarged by an addition, which will have brick walls and iron roof. A chimney 150 feet high will also be erected.

THE fascination which storekeeping has for some men is not extinguished by a lifetime of struggle and a series of difficulties For an example of this, here is Mr. Charles May, of Dunnville. He was in the general store business many years without success, and assigned in 1880. After that date he continued for a while in his wife's name, but obtaining a discharge in 1883, resumed in his own name. Owing to heavy losses in cheese in 1886, he got into trouble again, but his father came to his rescue and tided him over the difficulty. Five years ago his store was operated in the interest of the Patrons of Industry, and resulted in a loss. This he has not been able to recover, and now he makes an assignment.

THE Territorial Exhibition which opens at Regina, on 29th July, will have a prize list of $19,000.

E. O'CALLAGHAN. dry goods, Cornwall, reported embarrassed a week ago, is asking an extension of twelve months, secured by a brother. The liabilities are $9,000, and he shows nominal assets of about $15,000.

A CONVENTION of railway-telegraph superintendents assembled in the Windsor Hotel, Montreal, on Wednesday last. It was presided over by Mr. M. B. Leonard, vice-president of the association, in the absence of the president, Mr. O C. Green, of St. Paul, Minn.

THE following is a statement of the work of the inspectors of the Hartford Steam Boiler Inspection and Insurance Company from the date of its organization to the first of the current year: Visits of inspection made, 891,707; whole number of boilers inspected, 1,771,992; complete internal inspections, 687,600; boilers tested by hydrostatic pressure, 109,881; total number of defects discovered, 1,341,330; total number of dangerous defects, 168,502; total number of boilers condemned, 9,001

THE new fire insurance company which for some months has been organizing in Winnipeg, is said to be now ready for business. Its name is The Canadian Fire Insurance Company, and the officers are: J. H. Ashdown, president; F. W. Stobart, vice-president; R. T. Riley, managing director; and F. K. Foster, secretary. The following are the directors: G. R. Crowe, R. J. Campbell, E. F. Hutchings and J. A. Richard. There are advisory boards at Brandon and Portage la Prairie, where not a little of the stock (of $300,000) has been taken. The present charter of the company, we understand, confines its business to Manitoba.

HERE following we note the weekly quota of failures in the Province of Quebec, none of which are important.——Anthime Lemieux, general store, L'Islet, is arranging a compromise at 40 cents on the dollar. He owes for merchandise $2,150, and also has some mortgage indebtedness. —— Angus McNaighton, general dealer, of Hutingdon, previously reported in trouble, has completed a compromise at 50 cents, cash.——J. L. Gaumond, of St. Anne de la Perade, is trying to settle with creditors at 50 cents on the dollar. He began business in 1889, and failed before in 1893.—— A. N. Ouimet, general dealer, Farnham, whose insolvency we noted several weeks ago, has arranged a compromise at 25 cents in the dollar, cash.

MAY shipments of coal from the port of Nanaimo amounted to but 49,495 tons. This is said to be the smallest monthly shipment for several years, and is due to the bad state of the California market .

OWING to locking up funds in timber limits and other lands, D. C. Wallace, dealer in lumber, coal and wood, Brantford, has been hard pressed to meet his payments, and at last has assigned. He has been there about six years, but lately has been inclined to extend his business beyond his means.

IN September, 1893, Buettner & Johnston succeeded J. Mullen in the grocery business at Winnipeg, paying $640 cash for stock, etc., which represented their entire capital. In May they claimed to have a surplus of $1,000, but more than this was represented by book accounts. Under these circumstances no one need wonder that they have assigned.

FOR weeks it has been known in grocery circles that the selling agreement of the Canadian Packers' Association was being violated Things finally reached the stage when the committee declared themselves powerless to control the situation, and the agreement was terminated. This, of course, does not put an end to the association, but merely to its arrangement in regard to selling goods. That the brief existence of the agreement has been beneficial we do not doubt. By organized effort the association has succeeded in introducing the brands of many packers into distant parts of the country which could not have been reached by the efforts of individual firms. The future is uncertain, and there seems just now little likelihood that the agreement will be revived.

AN offer to compromise at 50 per cent. has been made by Hugh Lovelace, cigar dealer in London He carries a stock of $3,000, and his brother Thomas is said to be interested in the business, although it is doubtful if he can be held liable for the debts. — An assignment is made by Edmund Bennett, undertaker at Glencoe, with small liabilities.——Fifty per cent. is offered to the creditors of Little & Morrow, harness-makers, Shelburne, whose assignment we noted about three weeks ago.——For many years (nineteen, it is said,) Pat. Slavin was a clothier in Napanee, and in 1875 he failed. Sometime afterwards he kept a hotel in Vancouver under his wife's name. The sheriff closed that business in June, 1892. In October following he opened a dry goods store in Deseronto with a stock of $5,000, for which he gave a chattel mortgage. Now he makes an assignment.

THE contractor is soon to begin work on the buildings of the Guelph Rolling Mills Co.

THE employes of E. Leonard & Sons, London, have had their wages increased five per cent. as a result of improved business.

IT is an indication of the spread of bicycling to learn that stabling for 75 of these clock-work steeds has been provided at the Granite Club smoking concert to-night.

ONE of the old and well-known merchants of Montreal died yesterday, in the person of Evan F. Ames, of the firm Ames, Holden & Co., boot and shoe manufacturers.

THE Provincial Exhibition for the neighboring Province is to be held in Montreal, from the 12th to the 21st September next. A bench show of dogs and a horticultural display are promised features of the exhibition.

THERE are reports from Quebec that the mica mines of the Saguenay are to be exploited, while the English purchaser of mica mines in the vicinity of Murray Bay and Lac a Costor has arrived in Canada intending to begin mining at once.

A BILL is pending in the British House of Commons designed to make it an object for the industrial companies to insure benefits to children during sickness, fixing the maximum death benefit at $25 where other benefits are also provided for. Otherwise the limit is $15. This provision applies to children under ten years of age.

ABOUT nine months ago, the British Columbia Grocery Company began business in New Westminster with an apparent capital of $2,500. Five persons were interested in the result of the business, and the management was in the hands of a person who had not made a record of success on his own account. They found before very long that an assignment was inevitable, and they have made one.——Early in 1888 J. C. Douglas opened a liquor store in Vancouver, and although in some respects a rather prominent man, he did not succeed in making money. In 1893 he was obliged to give two mortgages on his stock for $3,300. In the following year the sheriff took possession. However, at that time he managed to get rid of that officer and resume business. Now the stock is advertised for sale by sheriff.

THE Quebec *Chronicle* learns that the Canadian Pacific Railway Company has leased the block between the post office and the Archbishop's palace in that city, with the exception of Mr. Jacques' shop, and intends to fit up elegant offices in the part of the property now occupied by Mr. Laroche, druggist.

THE population of the North-West Territories of Canada, which in 1891 was 66,799, had increased by the end of 1894 to 88,851, an increase of 30 per cent. The following table gives the whites and half-breeds, according to a census taken by the Mounted Police: Alberta —1891, 18,322; 1894, 28,783; increase, 10,461, or 57 per cent. East Assiniboia—1891, 17,511; 1894, 23,696; increase, 6,185, or 35 per cent. West Assiniboia—1891, 8,937; 1894, 11,096; increase, 2,159, or 24 per cent. Saskatchewan —1891, 7,460; 1894, 9,931; increase, 2,471. or 33 per cent. Totals—1891, 52,230; 1894, 73,506; increase, 21,276, or 40 per cent.

THERE are five failures to report in this city this week, but all are unimportant. L. B. Mackay, who failed here some years ago, afterwards moved to Hamilton, where he carried on business in his wife's name. A few years later he returned to Toronto and opened a cigar store in her name. A second store was opened in his own name about eighteen months ago. During last summer he gave a chattel mortgage to his principal creditor. This has been foreclosed and the stock sold.——Another tobacconist, named F. E. Karn, mortgaged his chattels last month and now assigns.——So does H. J. Cooper, also a tobacconist.——The bailiff has sold the tannery business of W. A. Smith.——David Blakie, butcher, makes an assignment.

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for the week. During the warm weather there will be no Saturday boards held until further notice. Therefore the week consists of five days. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. TORONTO, FRIDAY, JUNE 14, 1895.

THE SITUATION.

Mr. Ward, a member of the New Zealand Government, who was in Ottawa on Monday, has interjected a new element into the Pacific cable question. His opinion is that the cable should be constructed and owned by the countries interested in it. Granting heavy subsidies to companies and leaving them all the chances of profit, while the governments which furnish a large part of the means get nothing, is an arrangement which may in future have to be subjected to some modification.

A sealing bill applying to Behring Sea, read a first time in the British House of Commons, on Monday, is intended to take the place of an Act which will expire in July. It applies to both the American and the Russian portions of this sea, and besides providing for prohibition of sealing at certain seasons, contains a code of regulations, from which the former provision for the sealing up of arms, at certain times, is presumably absent, that being one of the few deviations from the original measure. The agreement with Russia is less stringent than that which was the outcome of the Paris arbitration. The bill authorizes foreign as well as British cruisers to make captures for infraction of the sealing regulations. Countries which did not give their adhesion to the decision of the Paris tribunal are not bound by it. But security from serious interference from this cause rests upon the fact that among the non-complying nations there are no countries greatly interested in the seal fishery and likely to send fleets to Behring Sea.

The British Society of Authors has issued a manifesto in opposition to the Canadian copyright bill. This measure is denounced as reactionary. The expression is justified only so far as it releases Canada from the Berne convention, to which she never consented. But the chief expression of the bill is that it is an act of emancipation, in accordance with the principle of self-government. Canada, as a self-governing country, claims the right, under the constitution, to prescribe the conditions on which a British copyright shall run in this country. The wise use of the right is quite another matter. If the bill be, as the British authors contend, injurious to Canadian authors, that is a matter which these authors must settle with their own government. Whether the bill be necessary for Canadians is a question which they must themselves decide. The principle of autonomy once admitted, arguments drawn from the assumption of incidental results which are to follow lose their force. Let it be admitted that Canadian printers and publishers have been too prominent in promoting the bill; the fact is of little value when urged in bar of a political right of a self-governing people. Canada's release from the Berne convention is not likely to put an end to that compact as between other countries. American publishers now favor international copyright for the same reason that they formerly opposed it: it pays them better to buy copyrights for the sake of the control, than to appropriate without payment copyrights which they cannot control. It is quite true that in passing the bill the Canadian author was never thought of, and his interest would not be served so well as under the Berne convention. All this is true; but if mistakes have been made they can be rectified, once the right of legislation is freed from the doubts that have been cast upon it. Canada is unfairly charged with "entire failure to collect the duties under the foreign Reprints Act." By that Act the author is required to put in a claim to the duty which may be levied for his benefit; and we do not know of a single instance in which remissness on the part of agency of collection was proved after the claim was made.

Now that Toronto is about to complete the loan for which negotiations were begun last year, it is essential that the proceeding should be so conducted that all will have an equal chance of tendering. The treasurer has been sent to England to obtain a loan of $1,224,500. Last year two rival firms who tendered both complained that their offers were not accepted. With one a conditional agreement had been made which the agents of the city had no right to enter into. All the difficulties arose from the invitations for tenders not being open to all alike and on conditions distinctly prescribed. Let notice be given, both here and in England, that, within a reasonable time, tenders for the loan will be received; that they must conform to the prescribed conditions, from which there will be no departure. The notices should be issued at the same time in both countries, and sufficient time should be given to permit persons or firms who desire to tender to make their arrangements. If this be done, the highest bidder will be preferred and there will be no room for after disputes. But if one or two firms are privately bargained with, there is practically no competition, and while those who are excluded have a right to complain, the city is not likely to get the best terms obtainable. The treasurer has gone and the question is whether it is not already too late to get out of the old rut.

A crisis in the Senate Divorce Committee has passed the acute stage and reached practical dissolution by the resignation of a majority of its members, seven out of nine. The difficulty is a religious one. The Roman Catholic members of the Senate are opposed to divorce, on principle, and they vote to decide cases without reference to their merits or knowing or caring what the merits are. At Confederation four of the provinces, Nova Scotia, New Brunswick, Prince Edward Island, and British Columbia, had Divorce Courts, which they still retain. When the Imperial Government invited Canada, then consisting of Upper and Lower Canada, to form a Divorce Court, the Roman Catholic bishops opposed an effective negative, and the result is that to-day the Senate serves as a Divorce Court for Ontario, Quebec, Manitoba and the North-West Territories. The only change made since Confederation is a change of procedure; instead of the evidence being taken

before the whole Senate, it is received by a committee of nine, by whom it is reported. All the Senators, even if they have not served on the committee, have a right to vote, and many of them do vote without any reference to the merits of the cases brought before them. This state of things the Divorce Committee protest against by resignation. Looked at from one side, such proceedings as those of the opposing Senators are simply scandalous; from another point of view they appear in the light of religious scruples. But surely Senators ought not to undertake to decide judicially cases of which they have no knowledge.

Mr. McDougall, Auditor General, has appealed to Parliament, by petition, to have two of his clerks promoted and his contingencies increased by $500. If the 21 clerks now at his disposal be insufficient for the actual needs of his office, extra assistance ought not to be withheld. But to appeal to Parliament against a Government with a vast majority at its back is always a desperate resource, very much, in fact, in the nature of a vote of want of confidence. The Auditor General is an independent officer, as he ought to be; and the safest thing, both for the country and the official, is to follow the English practice, in spirit as well as in the letter. The petition being an appeal against the Government to the House, naturally became the precursor of a partisan debate, during which the hint was thrown out by the Government that owing to his relations to the Opposition, there was some danger that the usefulness of this functionary would be largely impaired. By Mr. Dickey he was distinctly charged with being under the influence of the Opposition. If there be any truth in this accusation, the Auditor General should at once fall into that neutral attitude which his position demands. There seems to be some difference of opinion as to what constitutes the duties of this functionary. According to Mr. Foster, his duty is "to take the expenditure and the grants, and see the former was made in accordance with the latter;" not to publish petty details outside of this. In his petition, Mr. McDougall said he would warn the taxpayer if things were not going well. He is right in doing this, on condition that he confines himself strictly to the limits of his duty. If the Auditor General has, in any way, misconceived his duties, who is to instruct him in them?

CHEAP BUILDING AND LOAN ASSOCIATIONS.

A friend has sent us extracts from recent Detroit papers containing criticisms of building and loan associations operating in the States, and referring to the Bill introduced by Senator Johnson, providing for the State supervision of these societies in Michigan.

We have had several enquiries from Canadians during the past few weeks asking how the Canadian Mutual, the Birkbeck, the Globe, and the York County Loan Companies could do for their patrons what they professed to do in the way of furnishing cheap money or earning big profits, and have been obliged to answer as Mark Twain did to his cousin William. So far as these, or any other concerns encourage saving and stimulate thrift, we find no fault with them. But when they offer higher interest than other lenders, or promise returns which are unreasonable and excessive, their methods should be shown, and the conditions on which people are "made rich" by borrowing from them should be made known.

We are told that a number of these societies are sending agents to all the cities and towns in Ontario, and are getting a great many subscriptions from servant girls and others in receipt of small incomes, upon expectations which will in all probability fail to be realized. This is a repetition of what took place between 40 and 50 years ago; but it seems that each generation must pay for its own experience in matters of this kind. The rate of interest paid by a borrower on this supposed cheap plan, rightly calculated, amounts to between ten and eleven per cent. per annum.

Analysis of the report of a Michigan association shows that the $1,654 profits made during the year cost 55 per cent. for management. That is to say, the salary, rent, taxes, law expenses, insurance and other general expenses of the concern amounted to $910 out of the gross profit of $1,654, or more than 55 cents for each dollar earned. This heavy percentage for expenses is one of the reasons that these concerns cannot mature their shares in the time they advertise. The concern mentioned above stated in print that its shares would mature in eight years. Now, in October, 1894, when its shares had been in force for seven years, and $42 per share paid on them, they were worth only $58.94, so that it would take ten and a half years to mature to $100, on the suppo sition that the same rate of earning could be maintained.

Here is a case cited by the Detroit *Evening News* which will serve as an example of how some people are "paying through the nose" for money and do not know it: In one case a member borrowed on 18 shares the sum of $1,800, for which he paid a premium of 25 per cent., thus receiving only $1,350 [instead of $1,800] as a net loan. For this he agreed to pay $21 at the time of receiving the loan and $21 in each month until his 18 shares were worth $1,800, with which to pay off his mortgage. If he makes 96 monthly payments of $21 each, his loan will have cost him at the rate of almost 11 per cent. [10.98] per annum on every dollar of which he had the actual use. And if he has to pay for 27 months longer, as we have shown above is likely, his interest rate will be 14.64 per cent. per year, computed on monthly balances.

In another case the large cost to members of each dollar of profits credited to them is shown, thus: In the case of a member of one of these concerns, holding $1,000 of stock in the first series, he was credited with $197 of profits during 62 months, for which he paid $72 into the so-called expense fund So that each $100 of profits cost nearly $36.55 to earn it. We are told that the York County Savings and Loan Company, whose representatives are issuing pink handbills throughout Western Ontario inviting the populace to meetings to "learn the object and benefits of this popular company (ladies cordially invited)," is offering higher rates for money than other older and stronger concerns and making flattering promises of big returns to those who will lend it. Clever talk is one thing —earning dividends is another. The York County Loan has no method of money-making by lending on real estate that can earn profit for both borrower and lender. Its rose-colored promises will not pan out.

MUST WE DRINK SEWAGE?

The report of the city engineer to the mayor of Toronto, read at the meeting of the city council on Monday last, is of deep interest to the citizens. The precarious condition of our water supply is therein shown with startling clearness. Replying to enquiries by the mayor, it is stated by the engineer that so close is the five-foot supply pipe to the surface of the bay that it is covered at one point by only fourteen inches of water; while the four-foot pipe is at its shallowest point but five feet three inches above the present [low] water level. Happily the three-foot pipe "is at an ample depth for all practical purposes." It is explained by the engineer, however, that the four-foot pipe is not running much more than half full.

Being questioned by the mayor as to the effect upon our water supply of what has been stated above, Mr. Keating reiterates that accidents to the conduit are particularly liable to occur, which may at any moment cut off the whole supply of water from the lake and compel us to drink bay water only; and that the city is running very serious risk in allowing the present state of affairs to continue. If through the apathy or the misunderstanding of voters, we are left to drink sewage, it is the duty of the council to see that we are provided with pure water at the earliest possible moment. The sand which, from the crazy state of the wooden pipe in the bay, has found its way into the water mains and water meters of the city, has not only caused great damage and loss to the water department, but diminishes the fire pressure in various parts of the city.

The continuance of this state of affairs is characterized rightly by the engineer as folly, for the damage grows worse as time goes on. He says the old wooden pipe should be abandoned and a steel conduit substituted, at a probable cost of $75,000. The citizens having defeated by their votes the by-law under which this sum was to have been obtained by debentures for the purpose indicated, the eng neer urges the absolute necessity of providing by some means, without delay, the new steel intake pipe. And he hopes to see provided also the $40,000 requisite for the new 24-inch main on Front street, "which is of urgent necessity."

The phrase last quoted is strong enough, surely, to arouse some attention. But if there are any who carelessly think we may with safety allow the present state of things to continue, the further statement of the engineer is of the nature of an appeal to their pockets. "The consequences of this delay"—it is twenty months since he recommended improvement of the defects named—the same official tells us, "are likely to prove serious; delay in carrying out necessary work of this description must inevitably lead to heavy expenditure in addition to that requisite for laying the new conduit." That is to say, the longer we wait, doing nothing, the bigger sum the citizens will have to pay in taxes eventually. Nor dare we reckon without the risk of serious fires by reason of inadequate water pressure, as the test of a few days ago illustrated. So, let the city council pay careful and immediate heed to the urgent advice of their engineer.

TOO MUCH WATER AT FIRES.

A correspondent in to-day's issue, in writing about the well meant stupidity of firemen who "drown out" premises sometimes with volumes of water upon a very trifling fire, asks the pertinent question, "When loss is caused to people uselessly and unpardonably in such a way, should not some one be made to pay for it?" According to the view of the Westchester Insurance Company, the municipality which employs or licenses the firemen should in such case pay for it, and the council of a New York town has admitted its partial liability. In the little town of Bristol, Long Island, there are three volunteer fire companies. A small wooden millinery shop took fire in that town the other day, which might have been put out with a pail of water or a hand extinguisher. But company No. 1, getting first to the scene, poured water into the building copiously from its engine at the front door; No. 2 placed its engine at the back door and played away vigorously till, as the account states, the water poured in cascades down the front and back steps. The firemen yelled and the crowd applauded, while flowers, feathers, lace, ducks of bonnets and visions in tulle and crepon formed the ingredients of a great millinery pudding, which was left in the middle of the store and afterward sold to the Westchester Insurance Company for $900. But this company made a claim upon the city fathers, who admit the town should pay something, and so forty-five days were given to agree how much it should pay. The Westchester says it will be satisfied with $500. We shall see if the matter will go to the courts.

THE ANCIENT WORKMEN, THE FORESTERS AND THE TEMPLARS.

In January and February last we published some figures, taken from the mortuary lists as given in the *Workman* and the *Forester*, respectively, showing the ages at which individual "Workmen" and "Foresters" become death claims upon their respective societies. Those figures seemed most conclusively to prove that the members of the one society are much older, on the average, than of the other. Also, that in consequence of this difference in the average age, the death losses in the near future would be found much heavier in the one than in the other. The more recent figures tend to confirm the prediction then made. In order that a more complete view may be had, we now give some further information on the same line, embracing also the recent death claims in the Canadian branch of the Royal Templars. Of the Workmen and Foresters we give the figures for three months of 1893, 1894 and 1895, and of the Templars, the figures in bulk from the latest nine months we happen to have access to at the moment of writing:—

AGES AT DEATH OF THE A.O.U.W.

Date.	Under 35.	35 to 45.	Over 45.	Total
March, 1893	0	5	7	12
April, "	5	7	10	22
May, "	3	8	7	18
March, 1894	3	5	8	16
May, "	4	8	9	21
June, "	0	4	15	19
March, 1895	2	5	12	19
April, "	2	2	15	19
May, "	1	10	15	16
Totals	20	54	98	172

AGES AT DEATH OF THE I.O. FORESTERS.

Date.	Under 35.	35 to 45.	Over 45.	Total.
March, 1893	6	6	4	16
April, "	8	8	7	23
May, "	9	6	2	17
March, 1894	17	11	10	38
April, 1894	7	14	8	29
May, "	9	4	7	20
March, 1895	18	11	9	38

Totals	93	81	65	249

AGES AT DEATH OF THE ROYAL TEMPLARS.

Date.	Under 35	35 to 45.	Over 45.	Total.
June, 1894	1	0	4	5
July, "	0	1	2	3
October, "	0	0	7	7
December, "	3	0	5	8
January, 1895	1	0	0	1
February, "	0	0	2	2
March, "	1	2	1	4
April, "	3	0	4	7
May, "	2	0	3	5
Totals	11	3	28	42

A glance at these figures brings to light the fact that the Workmen and the Templars both have a much larger number of old men on their books, in proportion to the whole membership, than the Foresters. Over one-half the deaths are among old men in the Workmen; and in the Royal Templars, the showing is still worse in this respect; while among the Foresters, not much over one-quarter of the deaths are among persons above forty-five. Undoubtedly, the chief reason for this is that the I. O. F. has recently been rapidly extending its operations throughout the United States and Great Britain, doubling and trebling its membership within five years past. Both the other societies are practically limited to this Province or Dominion.

Neither of them is growing much in membership, but their members are annually growing thousands of years older, and the result of this cannot but be a heavy death-rate at an earlier period, and upon the older members, than in the case of a still rapidly growing society. The heavy mortality, and the consequent extra assessments—of which the older members of the Covenant Mutual, of Galesburg, Ill., are just now complaining so loudly—will both come along together among the Foresters in due time, only a little later. When they do come, they will find all the more victims to prey upon, because of the present rapid growth. It is better that those who hold certificates in such societies should get their eyes opened early to the uncertainty of the provision they are leaning upon, so that they may drop an anchor to windward in good season, or get off the ship before it is too late to find refuge elsewhere.

In confirmation of our statement that two of the above societies have been growing but slowly, and the other quite rapidly of late, we will give the membership of each on the 1st of January for a few years past, and at latest date :—

Society.	1893.	1894.	1895.	Latest.
I. O. Foresters	43,024	54,484	70,055	73,836
United Workmen	25,738	26,678	26,485	26,443
Royal Templars	4,068	4,826	5,457	5,570

It will be seen that the A.O.U.W. is already on the down grade in Ontario, as it has for some time been in New York, Pennsylvania, Ohio, Illinois and Wisconsin. New members are hard to get once the assessments begin to increase, and especially so when relief calls come along with unexpected regularity and large dimensions. And in the case of the Royal Templars, it is almost a toss-up as to whether they are going to get much further up the hill of difficulty, in the direction of increased membership. During 1893 the increase was 758. In the following year only 631 were added, despite strenuous efforts in the shape of prizes and Bro. W. Bell's "missionary meandering;" and for the first four months of this year the score is only a meagre 113, or at the rate of 339 per annum. And now the inevitable is appearing, in the shape of heavier death claims and shrinkage in the surplus funds. The following shows the condition of the life insurance branch of the Order at recent dates :—

Date.	Members.	Monthly Inc.	Surplus Fund.
August, 1894	5,257	$5,472	$72,533
October, 1894	5,231	4,965	68,498
January, 1895	5,227	5,761	66,691
May, 1895	5,570	5,556	59,775

From August to May—nine months—an increase in members of 313, an increased income of $84, and a depleted surplus fund, from heavy mortality, of no less than $12,578. It would only need a continuance on that line for four or five more periods of nine months to exhaust the poor little fund. It would require an assessment of $3 per member, considering the lapses it would produce, to bring the fund back to where it was nine months ago. It was then $14 per head, whereas it is now but little above $10, and still diminishing. And we understand the American branch of the Order, whose headquarters are at Buffalo, is not succeeding any better. In fact the assessment societies are now so numerous, that it is becoming more and more difficult for any one of them to find a town or village which has not already several lodges, or councils, or divisions, or courts in operation, and if a new one crowds in the other societies suffer loss thereby, especially such as are obliged to levy extra assessments. And in many instances the people are finding out the falsity of the basis of all such counterfeits, as compared with insurance that insures, and cannot longer be induced to waste more good money in entrance fees, relief calls, and monthly rates. Those who do so will meet with inevitable disappointment, if their names should not soon be found upon the monthly mortality list.

TORONTO TRADE FIGURES.

Both imports and exports were larger at the port of Toronto in May last than in the previous May, goods to the value of $1,443,457 having been brought in, and $835,820 worth shipped out. In May, 1894, the corresponding figures were $1,402,423 and $264,928. The increased imports are principally under the head of dry goods; metals show a decline. Leather, drugs and paints are the only other main items showing an increase; books, paper, envelopes, glassware, jewellery, earthen and chinaware exhibit a decreased import. We subjoin a list:

IMPORTS.

	May, 1895.	May, 1894.
Brass and manufactures of	$ 5,861	$ 4,916
Copper "	778	707
Iron and steel "	107,082	123,365
Lead "	2,681	7,136
Metals and comp.	7,969	5,784
Total metal goods	$124,371	$141,908
Cotton, and manufactures of	$114,942	$71,024
Fancy goods and laces	33,510	42,969
Hats, caps and bonnets	25,264	22,834
Silk, and manufactures of	72,083	51,085
Woolen manufactures	104,094	89,934
Total dry goods	$349,893	$277,846
Books, pamphlets, &c	20,776	23,303
Drugs and medicines, N.E.S.	18,860	17,005
Earthen, stone and chinaware	16,542	21,526
Fruits, dried and green, and nuts	18,181	20,275
Glassware and window glass	20,634	30,480
Jewellery and watches	15,557	18,511
Leather and m'frs of	18,920	16,431
Musical instruments	10,295	10,363
Paints and colors	12,813	10,124
Paper and manufactures of	29,470	33,949
Spirits and wines	7,966	6,510
Wood and manufactures of	10,468	19,153

Turning to exports of Canadian produce, which are small for the month, we find an increase in horses, wool, dead meats, lumber, field products and manufactures shipped :

EXPORTS OF CANADIAN PRODUCE.

Produce of	May, 1895.	May, 1894.
The Mine	$ 55	$ 90
" Fisheries	....	....
" Forest	16,408	14,427
" Field	50,205	36,355
Animals, and their produce	106,956	92,221
Manufactures	122,844	81,767
Miscellaneous	.....	107
Total	$296,468	$224,967

Among free goods, such as raw materials for manufactures and the like, there is a very marked increase last month in hides and skins, and raw cotton, and an increase, less pronounced, in dyes and chemicals, wool and tea. On the other hand, we find a decline in imports of coal, coffee, and free metal goods. Only $71,938 worth of anthracite coal came in, against $120,218 worth in May, 1894. The total of free goods is $428,000 as compared with $400,000 in the previous May. But only $15,476 worth of coin and bullion was brought in last month, against $62,109 in May, 1894.

THE WOOL CLIP OF 1895.

The competition of Toronto merchants to secure the first parcels of the new wool clip, and the excessive prices offered, is no longer a feature of the local market merely. The fever has extended and the merchants and wool growers of Western Ontario all show extravagant ideas as to the future of the market. One would-be seller writes to a Toronto dealer: "Have some 30,000 lbs. of fleece wool to offer you; will expect: merchantable, 22c.; rejects, 18c.; unwashed, 13c. Confirm quick." Another offers "25,000 lbs. of combing and clothing at 25c. Will expect 16c. for rejects." It is needless to say that these bargains failed to tempt a buyer, although a close inspection of the week's transactions reveals values paid almost as high. The nominal market quotations are: merchantable fleece, 20c.; rejects, 16c.; unwashed, 12c.; in many cases, however, spirited bidding has led to higher prices.

Nothing has occurred to alter our views that dealers are paying

more for the wool than is warranted by the present industrial situation. An American buyer, the first of the season, appeared in Toronto this week. He expected to buy merchantable fleece for 19½c., and was surprised at the prices being paid growers. Toronto merchants are unwilling to quote American buyers, and it is in the interest of all parties that our export trade to the United States should not begin until the clip is pretty well in the hands of dealers. It is impossible to estimate the amount of fleece wool now in Toronto warehouses, but it is safe to say that they contain more than ever they did at a similar date in former years. The higher range of Toronto quotations existing until now has made this city the object point for country buyers

Domestic wool in the United States is moving slowly. The Boston *Journal of Commerce* says: "The tendency of the greater portion of the new clip is to be held at higher figures, and buyers can see no warrant in so holding. Foreign wools, therefore, are looked to as substitutes, and all kinds of stock is being experimented with. There appears to be no dearth of these wools, and the heavy purchases at London, in the recent sales, both on dealers' and manufacturers' account, seem to show that the wools will be held against any rise in domestic. The market certainly shows no increase of strength anywhere."

The wool clip of the North-West Territories will be on the market in a few weeks. Reports from ranchmen all point to a large clip; their ideas as to values, however, are not in conformity with the actual situation. It is undisputed that merchants made little or no money out of Territorial wools last year, and the best proof of this is the considerable quantity of 1894 clip remaining on hands of merchants. This year a different policy is to be pursued, and unless short heavy shrinking wools can be bought at or less than last year's quotations, the market must be neglected. Tender staple wool or brashy cannot be expected to bring prices anything in advance of last year. The season of 1894 was the first in which our north-western ranchmen have had to compete with the growers of American "Territorial," and in the conflict they were worsted. Canadian ranchmen have not yet realized the importance of clipping and handling wool carefully. Some ranchmen were worthy exceptions to this rule last year, but unless there be an improvement all along the line, there is not a very bright outlook for Canadian Territorial wool growers this season.

LA BANQUE NATIONALE.

At the annual meeting of La Banque Nationale, in Quebec, on the 23rd May, there was a very large attendance of shareholders. Dissatisfaction with the management of the bank was shown by several speakers. Mr. Garneau, in a series of questions, tried to elicit explanation of certain transactions. Some of these questions were replied to by the president, Mr. Gaboury, but others he declined to answer, in the interest of the bank. The discussion on this head lasted till eight in the evening, and the criticism of the management was very severe. One gentleman gave it as his opinion that what the bank required was a good manager; although Mr. Lafrance was a most honorable and painstaking man, he did not appear to come up to the standard. Similarly, the opinion was expressed by another shareholder that while the president was honest and painstaking, every man with those qualities was not fit to manage a bank. It was remarked that the net profits of the year were only $17,914, which, after the boasts of "success and undoubted prosperity" made in the president's address in 1893, was a poor commentary on the way the bank had been conducted. Doubtless it was expected, too, that after getting rid in 1893 of the $322,000 in timber limits and real estate, which were more or less useless assets after the reduction of the bank's capital in 1888, the rate of earning would be greater, not smaller. Messrs. A. Gaboury, F. Kirouac, and T. Ledroit resigned from the board. The result of the voting was the re-election of Messrs. L. Audet, R. Turner, A. B. Dupuis, and H. M. Price of the old board, and of Judge Chauveau, V. Chateauvert, and J. Bilodeau as the other members of the new board.

EASTERN TOWNSHIPS BANK.

The many adverse circumstances affecting the last year's business, which find mention in the report of the Eastern Townships Bank, must have been offset by some favorable conditions, or the bank could hardly have made the good showing it does. And indeed we find some of these brighter indications mentioned further on in the report. While the general trade of the country fell off in 1894 because of low prices for our products, and because of reflected dulness abroad, while our rail way and steamboat lines, not less than our mills, felt the stagnation, and our merchants looked helplessly on at the depreciation in value of their stocks, business in the Eastern Townships of Quebec was active enough to enable this bank to earn about 10¼ per cent. on its capital, which is a good deal more than it did in the previous year. Without looking too closely for the dividing line between what is past and what is present in the description of the state of the Townships given by the report, it is satisfactory to find it stated that agricultural operations are broadening, that textile mills are running full time, that in lumber there is an improvement over the previous year, and that while in mining there is no falling off, enterprise and more scientific skill are increasingly apparent. Nor is mention omitted of what is truly stated to be the real basis of prosperity—the spirit of prudence and economy which pervades business men and business establishments, and is "noticeable even in the Dominion and the local Governments, as well as in municipal affairs."

The bank's net earnings for the year were $153,401, which sufficed to pay seven per cent. dividend and to place $40,000 to Reserve, which is within two per cent. of half the amount of the paid capital. And this is after making a grant to the Pension fund of the bank and providing liberally for bad and doubtful debts. Where the amount carried forward, according to the previous year's report, was $7,931.58, the amount brought forward appears in this year's report at $5,101.58 The difference is explained by the fact that $2,830 of the sum at credit fo Profit and Loss was applied as a bonus to the servants of the bank after the statement for 1893-4 had been published. Circulation is at a somewhat higher point, while deposits are larger. An increase of half a million in current loans and advances indicates a more active employment of the bank's funds; real estate, mortgages and secured loans overdue, each show some reduction.

LONDON BOARD OF TRADE

We acknowledge receipt of the thirty-eighth annual report of the Board of Trade of the City of London, Ontario, a pamphlet of twenty-four pages. We have already noted some of the matters dealt with by the council of the board, and shall here copy some of the statistics presented. The exports from the port show a steady increase for four years, culminating in $1,036,662 in value during 1894. Imports last year were smaller than for several years, aggregating $2,398,526, upon which the Customs duty collected was $443,282. Inland revenue collected on spirits during the calendar year amounted to $79,259; on malt, to $68,089; on cigars (22½ millions manufactured), $133,781; on petroleum (12½ million gallons refined), $12,155; the aggregate of Inland Revenue collected was $365,292. A million and a-half gallons of beer was made, and four and a-half million pounds of malt. The statement of the year's freight shows that 17,475 cars carrying 203,937 tons merchandise was received at the city during the twelve months, while 6,871 cars laden with 80,692 tons of goods were received. Forty passenger trains daily arrived in London during the year, and thirty-five went out on the four railways; the whole number of passenger and freight trains for the year was 38,872. The post-office statistics show a steady increase in each of four years in the letters and papers delivered, 1894 showing a total of 1,802,868 letters, or 5,760 per day. The money order department also showed increased transactions. To conclude, there are given the figures of the loan companies of London, which is an important centre, and the statement is made that they show an increase in deposits and loans on mortgage, in debentures issued, and in cash on hand, compared with 1893:

The amount of	capital stock	paid up is	.....	$5,555,000
"	"	deposits held	"	4,445 000
"	"	sterling debentures	"	4,452,000
"	"	currency	"	2,056,000
"	"	Reserve funds	"	1,515,000

WINNIPEG BOARD OF TRADE.

The extreme importance to producers and live stock dealers in Manitoba and North-West Territories of having a regular recognized central market for stock, where competition would ensure the best values for various grades of animals, has presented itself to the council of the Winnipeg Board of Trade, which appointed a committee to secure information and ascertain the views of producers and dealers on the subject. This committee has arranged an open meeting in the Board of Trade rooms, Winnipeg, on Tuesday, the 18th June, at 4 o'clock p.m., to discuss the question, and meanwhile asks an expression of views upon it. The Winnipeg board also calls attention, through a committee appointed for the purpose, to an opening presented in the city of Winnipeg for a tannery, and urges the following considerations: The city has a population of 38,000 people, and supplies, largely, the goods consumed between the Red River and the Rocky Mountains; and in this vast area there is not any tannery which attempts to meet beyond a very small fraction of the demand for leather. The hide inspector at Winnipeg estimates that about 50,000 cattle hides were exported last year, and sold in the United States, Eastern Canada and Great Britain. Practically all the leather, boots and shoes, harness and saddlery and other leather goods distributed from Winnipeg, are first

imported from Eastern Canadian and foreign markets, indicating the extent of a market for the products of an extensive tanning establishment if located in Winnipeg.

THE CITY OF BRANTFORD.

Brantford, as we have long known, is a live community. It used to be said that its "liveness" arose in no small degree from its being on the line of the Buffalo and Lake Huron Railway, which gave its residents easy opportunity to go across the line and learn smartness from the citizens of Buffalo and other American citizens. But however that may have once been, the Brantford people of to-day require no pointers from Buffalo to make them up-to-date. We have received from the treasurer of the city the financial statement of the corporation for 1894, a pamphlet of 95 pages of sensible-sized print. It contains full particulars of the income and spending of the council, the public library, the Stratford Hospital, the schools and collegiate institute, the boards of health and police, the water works. There are 22½ miles of mains in the city, and 1,674 water-takers; a fire pressure of 90 to 120 pounds. The estimated receipts for 1895 are $143,700, of which $108,100 is from taxes ($6,051,000 at 17 mills, $318,000 at 12 mills, $544,000 at 4 mills). Sinking fund and interest on debt will absorb $41,000. The growth of the place in eighteen years is seen by comparisons. Thus: total value real property was $2,796,000 in 1877, and is $5,558,000 now; personal property and taxable income, $562,000 in 1877, and $855,000 now (it was $960,000 in 1890). The population was 10,631 in 1877; it is 15,677 to-day. Brantford is a representative Canadian city.

LIVERPOOL AND LONDON AND GLOBE INSURANCE COMPANY.

This great corporation held its annual meeting in Liverpool on 28th May, and it is of interest to observe the results of the year to a concern that does business on so large a scale. The report shows that the fire premium income for the year, after deducting reinsurance, amounts to £1,618,128. The losses, inclusive of full provision for all claims that had arisen up to the close of the year, amount to £902,241, or less than 56 per cent. The fire account, after providing for expenses, shows, without the addition of interest, a surplus of £211,456, which has been carried to profit and loss account. The life and annuity funds were, besides, increased by £151,904 during the year, and now amount to £4,608,477, or something more than twenty-three millions of dollars. With so satisfactory a result as these figures indicates, it was decided to pay shareholders a dividend of 32 shillings per share.

It is agreeable to find the leading insurance offices in the British Islands adding year by year to the strength which makes them trusted the world over, and the Old Country press is very complimentary of the company under review. Says that journal: "The Liverpool and London and Globe has consistently maintained throughout the recent cycle of lean years its reputation for a magnificent business and a semi-inspired administration, but it has not of course maintained its percentage of profit at quite the figure at which it used to stand, and which it has now regained. For the three years 1891-3 the loss ratios have run 67, 65 and 66 per cent., respectively. . . . It may be observed that the policy of the Liverpool and London and Globe, as of other great offices, has of late been distinctly conservative in tendency. The fire premiums—which up to 1893 were steadily expanding—were even run off to the extent of about £10,000 in 1894. The other feature of the account is its successful restriction of commission and management charges to the moderate ratio of 31 per cent."

There are one or two items of the fire account expenditure which serve to give an idea of the extent and wide-spread character of this company's operations. One is that the foreign state taxes which it pays exceed $110,000, and the other that its contributions to fire brigades at home and abroad amounted to $74,000.

"KEEP ON TRYING."

In commenting on a paper on the subject of Danish butter in England, published in an English review, the New York *Journal of Commerce* gives some hints to the farmers of the United States that merchants and farmers in Canada may do well to heed. For instance, our contemporary says, the American farmer in the past has been too prosperous: "It was too easy to make a living to make it worth while to take much pains about anything." He ought, the *Journal* thinks, to make as good butter as any Dane, but he doesn't; he ought to pack fleeces as well as any Australian, but he doesn't; he ought to cure bacon to suit the English taste, just as people in Europe do, but he thinks he knows better than the Englishman. "As a whole," the conclusion of the writer is, "we are not half trying to find a market for our productions." There is a good deal in this argument. It pays to take pains in producing a good thing. We reproduce the article elsewhere, and commend it to our readers. Canadians are making progress towards a higher standard of butter-making, but we must keep on trying.

MUNICIPAL MEMORANDA.

The taxable property and incomes of the city of Moncton, New Brunswick, amount to $2,316,375, divided as follows: real estate of residents, $272,800; real estate of non-residents, $272,900. Income, $40,900.

New waterworks are being introduced into the municipality of Hedleyville, near Quebec city, the municipality corporation having borrowed $55,000 for the purpose. Some fifty men are now at work upon them.

It is stated by the Winnipeg *Free Press* that in order to keep the rate of taxation of that city within two per cent., the finance committee of the city council will have to cut down the estimates as submitted by the various committees fully $30,000.

For street improvement the council of New Westminster, B.C., recently issued $20,000 of five per cent. bonds. They were offered on the London market, and the Vancouver *World* correspondent says an offer of 11.02 per cent. premium was obtained, making the issue yield $22,022. The correspondent, in his glee at so good a price, neglects to state whether the offer was accepted, but we infer that it will be.

We have already given particulars of the negotiations between the city of Moncton, N.B., and the Moncton Gas Light & Water Co., in connection with the taking over of that company's property by the city. On Saturday last the city clerk drew a check on the Bank of Montreal for the sum of $283,708, and another for $15,000. The first mentioned sum represents the amount of the award less the $60,000 bonds, and the latter covers the company's costs in the arbitration proceedings.

Municipal reform is growing to be a live subject in the United States. Its advocates have long planned, and at last arranged a convention from widely distant parts to hold a discussion in Cleveland, O., some days ago. Among the delegates present were Rev. Washington Gladden, D.D., Columbus, O.; Dr. John S. Billings, surgeon-general of the United States army; Mrs. C. A. Runkle, New York; Rev. Donald P. McLaurin, president of the Detroit civic federation; Mayor Wm. M. Kennedy, of Allegheny, Pa.; Prof. Small, of the University of Chicago; Hon. Melville Dewey, of the University of the State of New York; Charles B. Wilky, of Cincinnati; Mayor George W. Ochs, of Chattanooga, Tenn.; Lucius Swift, Indianapolis; Hon. Charles D. Bonaparte, Baltimore, and Hon. Charles Shurtz, of New York. A preliminary meeting of the board of delegates for the transaction of routine business was held on Wednesday afternoon, and the first public session in the room of the Chamber of Commerce in the evening, addressed by several noted municipal reformers.

FOR GROCERS AND PROVISION DEALERS.

Hamilton grocers will picnic in Niagara Falls July 17th.

St. Catharines' new fruit cannery will be located opposite the Welland station.

The Leamington *Post* reports that the frost has not hurt the Essex peach crop.

Shipments of Canadian cheese to Manchester *via* the new canal were a success.

Frozen sturgeon is being sent in car lots from New Westminster, B.C., to Chicago.

It is said that there are twenty-five new cheese factories at work in Western Ontario this season.

Minnie: "I want to introduce you to a young lady—a very nice girl—and she's worth her weight in gold." Bob: "Stout girl, I hope.'

Seven British Columbia canneries are packing spring salmon, including the Phoenix, Canoe Pass, Wadham's at Ladner's Landing, R. V. Winch's, and Alex. Ewen's.

A cheese board will be formed in Guelph, and a meeting has been called for the 21st inst., to accomplish this end. The erection of a cold storage building is under discussion.

From June 30th, 1894, to March 31st, 1895, we imported from Australia bananas and pineapples valued at $1,346; oranges and lemons, $2,874; butter, $5,925; canned meats, $7,413.

The Eastport, N.S., correspondent of the Digby *Courier* says: "The lobster fishery will soon be extinct around these parts unless the Government makes more stringent laws as to the size of the lobster. The lobster fishery is fast going to destruction year after year, caused by the saving of small lobsters for canning."

The Toronto Retail Grocers' Association met in St. George's Hall last Monday evening, Mr. F. S. Roberts presiding. A committee was

appointed to co-operate with the fruit dealers of the city to secure the appointment of an inspector of fruit, as provided for by the Act passed last session by the Local Legislature. It was decided that the annual excursion should take place on July 24th, and Hamilton will be visited.

Mr. John Craig, Dominion horticulturist, recently appeared before the House Committee on Agriculture and stated that his experiments led him to the belief that with local cold storage refrigerator cars and cold storage on board ships, such as that now provided for export of butter, it was quite practical to place all kinds of fruits raised in this country upon the London market in prime condition. It is probable that the Dominion Government will assist exporters in this direction.

The Hon. Mr. Wallace gave recently in the House the following figures of the hay export from Canada: in 1891, to Great Britain, 11,852 tons, value $150,291; to the United States, 50,070 tons, value $375,813 The quantity exported in 1892 was: To Great Britain, 14,969 tons, value $167,604; to the United States, 67,057 tons, value $598,567. In 1893 we exported to Great Britain 50,892 tons, value $515,461; to the United States, 94,282 tons, value $854,958. The export in 1894 was 175,559 tons, value $1,700,000, to Great Britain; to the United States, 7,847 tons, valued at $753,575.

Canton tea market (Deacon & Co.) to May 7th as follows: Macao Congous—A moderate business has been passing, settlements being reported at 3,500 boxes at tls. 14 to 17½ per picul; prices have again ruled easier, and may be quoted tl. 1 per picul lower than those current a month ago. There is no great quantity offering, and there is every indication of the crop being a small one. For Australia shipments are going forward steadily, the last two departures taking over 5,000 packages. A few small parcels of Moyune have been offered, but prices asked are very high and no business is reported. Scented Teas—Leaf for about 15,000 boxes has arrived from the country, but musters have not yet been shown.—*N.Y. Journal & Bulletin of Commerce.*

From figures supplied by growers, the Indian Tea Association have issued an estimate of the crop of 1895. Of the total quantity estimated, it is expected that 126½ million lbs. will be available for export to the United Kingdom, or an increase of 10½ million lbs. over the quantity actually exported last season:

	1894. Lbs.	Estimate for 1895. Lbs.
Assam	53,469,838	57,531,490
Cachar	18,157,465	19,405,880
Sylhet	19,625,680	22,272,900
Darjeeling	7,074,848	8,069,210
Terai	2,995,341	3,176,000
Docars	16,725,218	19,854,240
Chittagong and Chota Nagpur	1,078,825	1,080,800
Dehra Doon, Kumaon and Kaugra	4,000,000	5,000,000
Private and native gardens	4,000,000	4,000,000
	127,127,215	140,390,520

HARDWARE AND METAL TRADES.

Notice of application to be incorporated as the Chanteloup Manufacturing Company is given by Messrs. David Yuile, James Cochrane King, Wm. Robinson, D. W. Ross, jr., and John Watson, of Montreal. They will make brass and iron goods, carrying on the business formerly done by the late E. Chanteloup.

A new duplex compound condensing pump of the Northey pattern is being put in by the Golden Lode Mining Company at South Uniacke, N.S. This pump, a correspondent says, will deliver the water from a vertical depth of 400 feet. Mr. Hayward, the manager, is also having a 50 horse power boiler at the mine.

Letters patent are asked for to incorporate the Dominion Electric and Manufacturing Company, Montreal. Capital, $50,000. Applicants, Chas. Fleetford Sise, president of the Bell Telephone Company of Canada, Ltd.; Robert McKay, merchant; Hugh Paton, J. R. Thibaudeau, Robert Archer, Charles P. Sclater, Lewis B. McFarlane, manager.

Mr. J. B. Neily is president, Mr. W. A. Temple vice-president, Mr. James Reeves sec.-treas. of the Consolidated Gold Lake Mining Co., limited, whose capital is $400,000. They have 305 areas at Gold Lake and 400 acres of land. Three shafts, 40 feet, 45 feet, and 32 feet deep, have been sunk on three different leads in the property. It is said that quartz taken from one of the leads yielded 22 dwts. per ton, from another 15 dwts., and from the third 10 dwts.

A steamer left the Thames in May having on board four stern-wheel shallow draft gunboats, three of them built in floatable sections, by Yarrow & Co., for the Portuguese Government, in East Africa. The fourth one was in small pieces, arranged for transport overland to the interior on the backs of natives. Two are for service at Lourenco, Marques, and two for Inhambane. These vessels are 89 feet in length by 18 feet beam. The first two will have a draft of 18 inches with steam up, and the others will have a draft under the same conditions of 14 inches.

DRY GOODS JOTTINGS.

F. R. Smith, clothier in Hamilton, has decided to close up his St. Thomas branch store.

Kingsville woolen mills are working fourteen hours daily in order to keep up with orders.

It is said that J. & J. Livingston, Baden, will build a linen and cordage factory in Buffalo.

In the city neckwear trade bows are most popular. Some of the colors and patterns are simply gorgeous.

Our imports of Australian wool from June 30th, 1894, to March 31st, 1895, amounted to 249,183 pounds, valued at $32,460.

A Kingston merchant writes to a clerks' association in that place that he finds it impossible to fall in with a Friday half-holiday movement, but proposes to allow half of his clerks a holiday on Wednesday afternoon and the remainder on Friday. A compromise of this kind might possibly be found practicable elsewhere when it is decided to close the store for half a day each week.

The immense sleeves such as are now being worn by ladies are by no means a new thing, as will be seen by the following ordinance in regard to them adopted by the town of Dedham, Massachusetts, in 1639:—"And be it further enacted, that hereafter no person whatsoever shall make a garment for women or any other sex with sleeves more than half an ell wide in the widest part, and so proportionate for bigger or smaller persons. And for the present reformation of immoderate great sleeves and some other superfluities which may easily be redressed without much prejudice or spoil of garments, it is ordered," &c.

The following Canadian buyers are reported by the *Drapers' Record* as having arrived in England: Mr. John D. Ivey (Messrs. J. D. Ivey & Co., Toronto), Mr. S. F Mackinnon (millinery, etc., Messrs. S. F. Mackinnon & Co., Toronto), Mr. Wm. Waugh (Messrs. Silverman and Boulter, Montreal, hats and furs), Mr. Alex. Geddes (Strathroy, Ontario). These buyers have taken passage from Liverpool; Mr. O. A. Barette and Mr. E. St. Pierre (Messrs. Thibaudeau Brothers & Co., Montreal and Quebec), Mr. E. Gruguère (Messrs. Shebyn & Co., Quebec), Mr. James Baird (St. John's, N.F.), Mr. J. W. Scott (Messrs Alexander & Anderson, Toronto), Mr. George Ridout (Toronto), Mr. R H. M. Bremner (Messrs. Hodgson, Sumner & Co., Montreal), Mr. D Keenleyside (Messrs. Robinson, Little & Co., London, Ontario), and Mr. J. C. Campbell (Messrs. J. Whitla & Co., Winnipeg).

PUBLICATIONS RECEIVED.

Current History.—It is a pleasure to confirm, after perusing another issue of this quarterly, what we have already said of it as a record of current events, and in fact a permanent work of reference. It furnishes a concise and intelligent summary of all current affairs of importance, the world over, and is agreeably free from improper bias. Garretson, Cox & Co., Buffalo, N.Y., are the publishers. It costs 40 cents a number or $1.50 a year. Every newspaper man, every writer on general topics, every public man would be the better of having it in his library.

Business Men and Business Places.—This is an illustrated monthly, published by A. Y. Lee, of Pittsburg, Penn. Its April numbes contains, among other illustrations pertaining to that busy city, a portrait of Mr. Arthur B. Wigley, formerly of Brampton and of Montreal, now manager for R. G. Dun & Co.'s agency in Pittsburg.

Tricks of Trade.—"The narrative which follows will well repay perusal," says Messrs Walker & Sons, limited, of Windsor, respecting a story they print in a little red pamphlet entitled "Tricks of Trade." It describes an impudent imitation of their product, put up by a Chicago grocery house, which calls the spurious article "Smith's Canadian Rye," though there is no distiller named Smith in Canada. The correspondence with this house shows what elastic consciences pirates have.

Gold Mining Plant.—The firm of I. Matheson & Co., of New Glasgow, N.S., have published under this title a neat illustrated catalogue of the mining and crushing appliances which they are prepared to supply.

The Insurance of Children.—(a) Address of the vice president of the Metropolitan Life Insurance Company before the joint committee on insurance of the Massachusetts Legislature, March, 1895, on the bill to prohibit insurance of children under ten years of age. (b) The argument of John D. Long, contra, before the same body.

Chicago Law Journal.—This monthly has reached No 5 of its sixth volume. It is edited by John Gibbons, LL.D., and his associate editor is J. W. C. Jones.

INSURANCE ITEMS.

Mr. T. H. Hudson, of Montreal, has been appointed manager and secretary of the Canada Accident Assurance Company, as successor to Mr. Lynn T. Leet, who has resigned.

We learn that Mr. H. G. Corthorn, who has been for a long time with the Canada Life, has accepted the position of general agent for Montreal of the Confederation Life Association. Mr. Corthorn has made a good record in his particular field, and is an active man of business.

According to the ruling of a St. Louis court, a young lady who is engaged to be married has an insurable interest in the life of her intended husband. It appears that Miss Minnie Davis was engaged to a Doctor Emil Moore, of Helena, Ark. He had taken out an accident policy in her favor and was shortly afterwards killed. The company refused to recognize her right, but the court decided as above.

In the report for 1894 the Scottish Union & National Insurance Company of Edinburgh show a profit of $400,000 on their fire business in the United States during that year. This company commenced business in the United States in 1880, and the able management of Mr. Martin Bennett is commended thus: "Their special thanks are due to their manager and trustee in America, whose conduct of their business there has contributed largely to the surplus of the year."

ANSWERS TO ENQUIRERS.

SUBSCRIBER, Brantford.—The report in question appeared in March and was noticed in THE MONETARY TIMES, but not printed in full in Canada, so far as we have seen. It was a very "lean" report, the year 1894 being a poor one for earnings.

J. J., Goderich, wants to know the amount of the dividends declared by Canadian banks, at 1st June. We reply that seven banks in Quebec and eight in Ontario have declared dividends at that date, two of them at 5; five at 4; three at 3½; four at 3, and one at 2½ per cent. The aggregate thus due to shareholders in these fifteen banks is $1,600,340. This does not include the Molsons Bank or the Dominion Bank, whose dividend dates are different.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, June 13th, compared with those of the previous week:

CLEARINGS.	June 13.	June 6.
Montreal	$12,294,656	$13,199,823
Toronto	7,404,456	6,519,675
Halifax	1,367,170	1,210,375
Winnipeg	680,503	1,035,513
Hamilton	736,203	668,834
Total	$22,482,988	$22,634,220

Aggregate balances this week, $3,297,930; last week, $3,046,257.

—Apparently it is not found feasible to hold a World's Fair in Montreal next year. The Canadian Government was not sufficiently in funds to give a quarter million towards it, and Montreal, wealthy and public spirited as her merchants and manufacturers are, wisely deem the time too short to do justice to such an important undertaking. There is to be, however, a National Mexican Exposition in the city of Mexico in 1896, the opening to be on April 2nd, as we are advised by the Chicago Bureau of Promotion, 250 East Madison st. "The Federal Government of Mexico will admit free of duty all materials and machinery to be used in the buildings on the Exposition grounds, while all goods and articles imported from abroad for the Exposition will be treated as imported 'in bond' and import duties will have to be paid only in case of sale. The exhibitors and concessionaires—those who sell foreign articles, or have hotels, restaurants, bar-rooms, theatres, circuses, and other shows in the foreign section, are to be exempt from all federal taxes. Twelve States of the American Union, from New Hampshire to Iowa and California, have already formed State committees to assist in worthily representing the United States at the Exhibition. The Mexican Exposition Co. is licensed by the Federal Congress of the Republic of Mexico. Stock capital $500,000. Its director-general is Ignacio Bejarano, and its president, Sebastian Camacho, mayor of the city of Mexico and president of the Senate of the Mexican Republic. The Vicernte R. de Cornely is chief of the foreign department of the A. M. Exposition, 1896."

—We understand that Mr. H. D. Wells, of Montreal, has been appointed manager of the Perth branch of the Merchants Bank of Canada, taking the place of Mr. Morgan, who is transferred to head office.

—The various Canadian mining associations are to hold a united meeting in the Chateau Frontenac, Quebec, on Thursday and Friday, June 27th and 28th, under the auspices of the General Mining Association of the Province of Quebec. The Mining Society of Nova Scotia, the Asbestos Club, the Ontario Mining Institute, and the General Mining Association of Quebec, will send representatives. Reduced rates of fares are arranged for both by rail and boat. In addition to various local excursions on other days, there will be a trip on Saturday to Lake St. John and the Saguenay. Among the features of the open session at 8.30 on Thursday evening, will be papers upon "Phosphoric Acid in Agriculture," by Frank T. Shutt, chief chemist, Dominion Experimental Farm, Ottawa; "Canada—A Natural Manufacturing Centre for Fertilizers," by Mr. Henry Wigglesworth, New York; "Phosphate's Future," by Capt. Robert C. Adams, Montreal; "Recent Improvements in, and the Application of Electrical Machinery to Mining (illustrated)," by Mr. W. F. Dean, Montreal.

—The Farmers' Loan and Savings Company shows gross earnings during the year ended with April, some $5,000 less than in the previous year, on investments practically the same in amount. This difference is probably accounted for in part by the reduced rates for mortgage loans, and in part by interest not being credited on some properties in abeyance On the other hand the company is able to show a decline in the total of interest paid as well as in management and other expenses. The usual dividend was paid, and the balance, $3,655, added to the Reserve. We observe that while there is a decrease in deposits, there is an increase in both sterling and currency debentures, which, we are told, are now being obtained at reduced rates.

—At a recent meeting of the directors of the Bank of Ottawa, the resignation of the Hon. George Bryson, senior, of Coulonge, Que., as a member of the board, was submitted, and reluctantly accepted, Mr. Bryson having, on account of advancing years and consequent infirmities, felt impelled to press his resignation on the other directors. He has been a director of the Bank of Ottawa ever since it commenced business in 1874, and a name so long and favorably known as his among the people of the Upper Ottawa, must have been of material value and strength to the bank in the past. A special meeting of the board was convened to fill the vacancy, when the Honorable George Bryson, junior, M.L.C., son of the retiring director, was elected.

—We note the appointment of Mr. Malcolm Gibbs as general agent in Toronto for the Keystone Fire Insurance Company of St. John, New Brunswick, with headquarters in the Canada Life building. Mr. Gibbs is a man of experience in fire underwriting and of prudence withal. The Keystone has been in business between five and six years, but has only now ventured into Ontario, and made a deposit ($25,000) with the Insurance Department. It has some of the most respectable and prominent men in St. John on its board. The company will, we are told, write only in cities and towns duly provided with fire appliances, being resolved to do a conservative business.

—A dividend has been declared by the Trust and Loan Company of Canada, for the half year ended 31st March last, at the rate of 6 per cent. per annum. The net profits for this period amount to £10,667 5s. 6d., and after carrying to the Reserve Fund one-half the profits over 6 per cent. dividend, as the charter requires, the balance at credit of revenue, including £7,392 1s. 6d. brought forward from September last, is £17,600 14s. 3d. After payment of the dividend there remains at the credit of profit and loss £7,850 14s. 3d. The Reserve Fund was at the close of March, £183,715 12s. 10d., a slight increase.

—A morning journal mentions by way of complaint that in Montreal banks loan on Toronto Railway stock 90 per cent., and in Toronto only 60 per cent. The truth is that the majority of the banks here do not make advances on this stock at any figure. The same is true regarding several of the Montreal banks; it is, in their judgment, too purely a speculative stock to justify their having any dealings in it. The centre of the speculative movement in this stock is a narrow radius. The abnormal activity of the stock has no effect on the banks which fight shy of it, except to make them shyer still.

—By a curious error in the article on the wool situation last week, where we wrote "an advance of three cents per pound has been made in the wool market," the types said "an advance of 25 cents per pound," and so it was printed in a part of our issue of the 7th inst. Happily the error was discovered and rectified in the major part of the edition.

—The British Mortgage Loan Company has declared its usua half-yearly dividend at the rate of seven per cent. per annum, and the Ontario Loan and Savings Company at Oshawa one at six per cent. per annum.

Meetings.

EASTERN TOWNSHIPS BANK.

The annual general meeting of shareholders in the Eastern Townships Bank was held at their banking house in the city of Sherbrooke, pursuant to notice, on Wednesday, 5th June inst., a good number of shareholders being present.

R. W. Heneker, Esq., the president, took the chair.

Wm. Farwell, the general manager of the bank, was elected secretary; J. P. Wells and Wm. Morris were elected scrutineers of votes

Minutes of last annual meeting were read and confirmed, after which the president, on behalf of the board, submitted their report as under:

REPORT.

In meeting the shareholders at the close of the 35th year of the bank's operations, the directors have the pleasure to report a fairly profitable year's business, with a somewhat brighter prospect in the near future.

The balance sheet and profit and loss statement for the year ending the 15th of May last now submitted herewith, show the following results, viz.:—

The net profit, after making provision for all expenses of management, interest to depositors, grant to the pension fund, and all bad and doubtful debts, amounts to $153,426 35
Add thereto the amount carried forward from the previous year 5,101 53

An available profit will be seen of.. $158,527 88
This has been applied as follows, viz.:—

Dividend 3½ per cent. paid 2nd January, 1895	$52,496 67
Dividend 3½ per cent. payable 2nd July next	52,496 67
Carried to reserve fund	40,000 00
Balance carried forward	13,534 54
	$158,527 88

The Reserve Fund thus increased, now amounts to $720,000—within 2 per cent., or $30,000, of one-half the capital stock of the bank.

The directors feel, therefore, justified in claiming for the bank a fairly profitable business for the year, despite many adverse circumstances. There is an increased net return over the previous year of $18,000, partly applied in increased profits carried forward, and partly in the increased amount credited the Reserve Fund.

Referring to the adverse circumstances above alluded to, the shareholders must have noticed the great falling off in the general trade of the Dominion during the past year, due in part to the want of purchasing power arising from a low price of produce of all kinds; to the stagnation in trade amongst Canada's best customers—Great Britain and the United States—to a stoppage of a large proportion of the great public works, which give employment to the people; as well as to other causes.

In 1893 the returns of the two great railways—Grand Trunk and Canadian Pacific - began to show a falling off in traffic, which became more and more apparent in 1894. This loss of traffic was even more noticeable in the great lines of the United States, giving evidence of stagnation in trade. Happily there are now signs of improvement. Trade has taken an upward turn, a more hopeful feeling is manifest in almost all branches of business, and it may be fairly assumed that the tide has turned, with a fair prospect of renewed prosperity, if only the coming harvest should correspond with the wishes of the people. The spirit of economy has prevailed throughout the Dominion, noticeable even in the Dominion and local governments, as well as in municipal affairs, and every business corporation, firm, and private dealer has been acting with caution and care. This is the true basis of prosperity. The directors feel justified, from all these considerations, while expressing satisfaction at the fair state of prosperity enjoyed by the bank during times of difficulty, in looking forward to even a brighter outlook in the future.

Most of the Eastern Townships industries show increased activity. In agriculture there has been an extension of the dairy industry. In manufactures the mills are running full time, although complaint is still made of low prices. The lumber business presents a favorable contrast to last year. In mining, there is at all events no falling off, and new workings, new applications of scientific skill and more enterprise are apparent, and should produce good results. There is abundance of employment for an increased population, and trade should therefore prove more active and remunerative.

The directors, at the request of the business men in the village of Magog, have opened a branch at that important seat of textile manufactures, under the management of Mr. E. P. Olivier, from the head office.

In conclusion, the directors have to report that the several branches have been inspected as usual, and that the whole staff, by their zeal and assiduity in the discharge of their duties, deserve the thanks of the shareholders.

Respectfully submitted.

R W Heneker,
President.

PROFIT AND LOSS STATEMENT FOR THE YEAR ENDING MAY 15TH, 1895.

Balance at credit of Profit and Loss carried forward from May 15th, 1894		$ 5,101 53

Wm. Farwell,
General Manager.

The president then addressed the meeting, touching upon the various items of the statement, the business of the bank and the country generally, and closed by moving the adoption of the report.

The thanks of the shareholders were, on motion of Lieut.-Col. King, seconded by Wm. White, Q.C., voted the president and directors for their watchfulness and successful attention to the interests of the bank during the past year.

On motion by A. T. Foster, seconded by Wm. Morris, the thanks of the shareholders were voted to the general manager, managers, and other officers of the bank for their application, and the faithful and zealous manner in which they had performed their respective duties to the institution.

The election of directors was then proceeded with, which resulted in the election of the old board, viz.:—Messrs. R. W. Heneker, president; Hon. M. H. Cochrane, vice-president; Israel Wood, J N. Galer, Thomas Hart, N W. Thomas, Gardner Stevens, John G. Foster, T. J. Tuck.

The meeting then adjourned.

FARMERS LOAN AND SAVINGS COMPANY.

The twenty-third annual meeting of this company took place at the company's office, 17 Toronto Street, Toronto, on Wednesday, 5th June, at 12 o'clock, noon. The following shareholders were present:—Messrs. John Aikins, John Aitken, A. A. S. Ardagh, Robert Gilmour, J. D. Laidlaw, D. A. Milne, Wm. Mulock, W. E. Murray, A. Ross, James Scott, D. Smellie, John Stewart, Alex. Smith, F. W. Toogood, etc.

REPORT.

The President, Wm. Mulock, Esq., having taken the chair, the following report and statement of affairs was submitted:

The directors beg to present to the shareholders the following statements of the result of the business for the past year

The net profits, after making allowance for any investments of a doubtful nature, and deducting expenses of management, and all charges, commissions, etc., amount to $46,455 50, out of which two half-yearly dividends of 3½ per cent. each, amounting to $42,800.10, have been paid, leaving a balance of $3,655.40 to be added to reserve, making the sum of $162,479.90 now to the credit of that fund.

The amount borrowed on sterling debentures has been increased by $28,908 (£5,940), and on currency debentures by $26,931.67; the amount on deposit has been reduced by $68,382 69

The accompanying financial statements, verified by the auditors, are submitted for the consideration of the shareholders.

Wm Mulock,
President.

GEO. S. C. BETHUNE,
Manager.

We hereby certify to having examined the books and securities of the Farmers' Loan and Savings Company for the year ending 30th April, 1895, and that we find them correct and in accordance with the above statements.

W. E. MURRAY,
BENJ. PARSONS,
Auditors.

Toronto, 25th May, 1895.

The usual votes of thanks to the retiring directors having been proposed and adopted, a ballot for the election of directors for the ensuing year took place, resulting in the re-election of the following gentlemen, viz.: John Aikins, Geo. S. C. Bethune, D. B. Dick, J. D. Laidlaw, Wm. Mulock, A. Ross and Jas. Scott. The meeting then adjourned. At a subsequent meeting of the board, Wm. Mulock, M.P., was re-elected president, and James Scott vice-president for the ensuing year.

LA BANQUE NATIONALE.

The annual meeting of the shareholders of La Bank Nationale was held in Quebec on Wednesday, May 22nd. As it had been rumored around town that an effort would be made to oust some of the directors, a large crowd of shareholders were in attendance; in fact the directors' room was crowded, a number having to remain in the passages.

Mr. Gaboury, the president, occupied the chair, and the directors, Messrs. Kirouac, Ledroit, Audet, Dupuis, R. Turner and H. M. Price, were present. The president read the statement of the year's transactions.

It shows a balance to profit and loss of $17,-914.13. The notes in circulation amount to $711,749, the interest bearing deposits to $1,-989,648.53, and those not bearing interest to $492,519.15. There is due to agencies and other banks $115,000.70. The immediate available resources from specie, Dominion notes, notes and cheques of other banks, etc., are stated at $1,028,624.64; and those not immediately available at $3,302,627.37, which includes discounted loans to the amount of $3,193,-533.04. The building and furniture of the bank are valued at $136,560.16. The total assets are given at $4,467,812.17.

Mr. N. Garneau proceeded to put a series of nine questions to the directors, respecting certain transactions during recent years. Several of them were answered, but the President refused to give information publicly in answer to others. Moreover, they were only following the example practised in several English banks. That statement started the discussion which lasted until 8 o'clock in the evening. Mr. R. Turner, who with Mr. H. M. Price, was chosen a director in December last, said that a number of banks in this country had passed through ordeals which had caused losses. He considered the late cashier, Mr. Lafrance, a most honorable and painstaking man, but speaking as a business man, he thought that the bank required a good manager. He felt satisfied that a dividend would be declared next year. Judge Chauveau considered this year's statement less favorable than last year, and a reduction could be seen in all items from which a revenue was expected.

In answer to the charge of that gentleman, that circulation was lessened, Mr. Gaboury made the obvious answer that the aggregate circulation of the banks had declined $1,287,000 on the year. Then the Judge pitched into the Montreal management, hinting that the same man could not properly serve La Caisse d'Economie and La Banque Nationale, concluding, amid applause, with the words: "I consider that a bank lending at 3 and borrowing at 4 per cent. is badly managed." Then the judge reminded his hearers that at last year's meeting it was unanimously decided by the shareholders that the directors were not to be remunerated for their services. This year, nevertheless, they had drawn their fees as usual. He had no objection whatever to Messrs. Audet, Dupuis, Turner and Price, who were the last directors appointed.

Mr. Matte stated that when in 1888 he was inspector of the bank, he notified the directors that the management of the Montreal branch was anything but what it should be, and for thanks he was dismissed from office. He predicted just what happened to-day.

In answer to Mr. G. Larue, the president stated that he received a salary of $2,000. This information was received with jeers and laughter, which caused Mr. Price to remark if that was the way they were going to treat the president, he would put his resignation in the hands of the shareholders.

Hon. L. P. Pelletier thought Mr. Price should not take it up in that way. The shareholders had full confidence in the four last directors, but he thought it time some of the old directors should get out. He thought the president was a very honest and painstaking man, but every honest man was not fit to manage a bank. In answer to the latter speaker, one of the directors admitted that the *clientele* of the Banque du Peuple in Quebec was made up mostly of dissatisfied customers of La Banque Nationale.

Mr. Edouard Couture was in favor of liquidating the affairs of the bank.

The discussion was continued by Messrs. Garneau, Angers, Pouliot and Fremont, who all seemed to wish to get Messrs. Gaboury, Kirouac and Ledroit to resign. The three gentlemen did so, and the election of directors for the current year was proceeded with, resulting as follows: R. Audet, 15,019 votes (re-elected); R. Turner, 14,712 (re-elected); A. B. Dupuis, 14,620 (re-elected); H. M. Price, 14,508 (re-elected); Judge Chauveau, 7,167; V Chateauvert, 5,700; J. Bilodeau, 4,047.

WATER AT FIRES.

Editor MONETARY TIMES:

SIR, I like to see somebody come out and say what they think of *too much* water at fires as well as too little. And you did not overstate the matter when you said, on page 1581 of your last week's paper, "The needless loss often occasioned to proprietors and insurance companies by the senseless deluging of premises with water, is enough to make a spectator tear his hair."

Mr. Editor, I have seen, really and truly seen, a *poor woman* tear her hair because the stock in her little shop—her all—was mostly destroyed by water by headlong firemen. And this was in a city, by regular firemen, who could have put out the smouldering fire in the little shop with an overcoat or a blanket, for there was no flame in the place. But no; they must pour water all over the place, ruining part of the stock, injuring the rest. It was enough to anger a saint to see it.

When loss is caused to people uselessly and unpardonably in such a way, should not some one be made to pay for it? Why should this poor woman, or any other merchant or property-holder, be ruined, or half ruined, by foolish people who profess *to save* property, but do really destroy it. I feel that common justice ought to see that they have the loss made good somehow.

SYMPATHIZER.

Kingston, June 10th, 1895.

THE BRITISH CANADIAN LOAN AND INVESTMENT CO., Ltd.

DIVIDEND NO. 35.

MONTREAL MARKETS.

MONTREAL, June 12th, 1895.

ASHES.—The market has assumed a quiet phase, and is perhaps a shade easier, though the quotation for first quality pots is still $4.10 to 4.15, seconds $3.80; pearls $5.50 to 5.60. Receipts, which for the first week of the month were rather more liberal, have fallen off somewhat. Shipments are reported of some small lots to Glasgow, Liverpool and London. One lot of 36 brls. of pearls was received a few days ago.

CEMENTS AND FIREBRICKS. — Receipts of cement last week were quite heavy, being 5,100 brls. of English, 9,200 brls. Belgian. No heavy transactions are reported, but a fair aggregate of business is being done in moderate lots. We quote English $1.90 to 1.95, Belgian $1.80 to 1.85. Firebricks range from $15 to $20 per thousand.

DAIRY PRODUCTS.—Shipments of cheese last week amounted to 57,029 boxes, as compared with 65,162 boxes at the same period of last year. The shipments of butter were only 82 packages. The price of cheese remains about as quoted last week, dealers paying from 7¼ to 7½c, the English market does not improve.

Tanneries for Manitoba

A committee of the Winnipeg Board of Trade will supply information to persons who desire to establish and operate tanneries in the city of Winnipeg. Circulars and detailed information sent on application to

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

Why Gendrons Are Best Bicycles

Their frame construction is such that it is not possible for a break to occur at the joints—where all other bicycles are weakest.

Their bearings are perfect, because every Cone and Ball Cup is ground accurately true after being hardened.

Try One

Butter continues to drag, and 15 to 16c is a full quotation for choice creamery

Dry Goods.—Assorting business in summer goods is now pretty well over, and travellers are home preparing for the first fall trip, in fact quite a few of them are already out on their routes with pretty full lines of fall samples. There is a good deal more doing in these lines of dry goods at this time than at the corresponding time in 1894, doubtless owing to the general feeling that an advance is probable in woolen goods generally. Bradford advices are to the effect that the Americans have bought up the product of all the mills of that city in mohairs and other kinds of bright goods, up to September. Fine cotton goods, made from Egyptian cotton, are reported advanced. In domestics there have been no advances within the week.

Groceries.—The first little assortment of new Japan teas that came to hand last week has been jobbed out at prices ranging from 25 to 31c per lb. The second consignment, by the "Victoria," is now unloading at Tacoma, and will be here in about ten days. The estimated shortage in settlements to date, as compared with last year, is about 27,000 piculs, and the advance in prices may be calculated at from 10 to 15 per cent. There is quite a fair enquiry for cheap old teas, which are, however, all cleared out, and nothing below 13 to 13½ cents is now available in this market. No samples of new blacks are yet to hand. There are no changes to be noted in sugars. Outside lots are now pretty well cleaned up, and refiners will accept nothing below 3¾ and 4¼c. for yellows or refined. They report a fair outgo in yellows, but granulated rather quiet. Molasses occupies a very strong position, and 37c. per gal is now the fixed price for Barbadoes in single puncheons. Some fine lots of Porto Ricos are being jobbed at 36c., and are claimed superior to Barbadoes. Dried fruits are very dull, apart from some little demand for California loose muscatels, at 7½c. for four crown and 5½c. for three crown. Quotations have been received for new pack salmon, at about $4 25 on the coast. Packers report heavy orders from England, and calculate on a short supply. Quotations for new pack lobsters are still lacking.

Hides.—Suplies of green are not coming in any better; butchers are not killing many animals this hot weather, and, besides, cattle are really scarce. What hides are coming in are taken by tanners as fast as offered. Dealers are paying 8½c. per lb. for No. 1, and they sell to tanners at 9½c. Lambskins bring 25c., calfskins 8c. only.

Leather.—The actual movement is a moderate one, but tanners still talk big, and there is slackening off in prices, and one large western sole leather tanner wired his selling agent here, since last writing, to put up prices another cent. Some dealers are asking 30c. per lb. for No. 1 slaughter, and sales are reported at 28c. Comparatively little is doing in upper leather. The advance in dongola stock noted last week is confirmed. We quote:—Spanish sole B.A No. 1, 26 to 27c.; do. No. 2 to B.A., 25c.; No. 1 ordinary Spanish, 24 to 25c.; No. 2. 22 to 23c.; No. 1 slaughter, 28 to 30c.; No. 2 do., 26 to 27c.; common, 22c.; waxed upper, light and medium, 35 to 40c; do. heavy, 33 to 36c.

grained, 38 to 40c.; Scotch grained, 38 to 40c.; western splits, 26 to 28c.; Quebec do., 20 to 22c.; juniors, 16 to 19c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 15 to 16c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 13 to 16c.; extra heavy buff, 17c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Business is hardly as active as it has been during the past few weeks, and the usual mid-summer dulness is probably setting in. There is however, no going behind in values, all the recent advances being well maintained, and further stiffness has developed in other lines. The Londonderry Iron Company has advanced No. 1 Siemens pig iron to $16 to 16 50 per ton, and it is presumed Ferrona will follow suit. Very little Scotch iron is being sold. Finished domestic bars are firm at the advanced price, namely, $1.60. Canada plates are firmer in Britain, $2 being the lowest figure for lots, and it would take very little to cause an advance. Antimony is easier at 9 to 10c., but copper and tin are pretty steady at the late advance, and lead is firmer. There is a probability of galvanized sheets being shortly put up. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $19.00 to 20.00; Eglinton, $18.00; Gartsherrie, none here; Carnbroe, $18.00; Shotts, none here; Middlesboro, No. 3, $17; Niagara, No. 2, $18.00; Siemens, pig, No. 1, $16.00 to 16.50; Ferrona, No. 1, $16.00 to 16.50; machinery scrap, $14.75 to 15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00, 52 sheets to box, 60 sheets $2.10 to $2.15, 75 sheets $2.20 to $2.25; all polished Canadas, $2.50; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, according to finish; P. D. Crown, $3.75; do., I.X., $4.50; Coke I. C., $2.70 to 2.80; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4½ to 4¼c.; No. 26, 4c.; No. 24, 3⅞c., in case lots; Morewood, 5½ to 5¼c.; tinned sheets, coke, No. 24, 5¼c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3 to $3.25; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 18 to 19c.; ingot copper, 10½ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25: American do., $4 to 4.25. Antimony 9 to 10c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in. 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Linseed oil is still scarce on spot; a 500-brl. lot that arrived last week was speedily distributed. There are some further supplies on the steamer "Dominion" now in the river. Fish oils are dull and easy at quotations. Castor oil is rather firmer at 6½ to 7c. as to lot. Red and white dry leads are reported firmer in Britain. We quote:—Turpentine 47c. per gal. for single brls.; two to four barrels, 46c.; 5 brls. and over 45c. Linseed oil, raw, 57c. per gallon.; boiled, 60c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½c.; tins, 7c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4½c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, in bulk, 16 to 17c.; in small packages, 18 to 19c; window glass, $1.10 to $1.15 per 50 feet for first break; $1.20 to $1.25 for second break; third break, $2.70.

WOOL.—The market is quiet at the moment. Dealers report only small sales, and say that the woolen mill men have apparently not made up their minds yet as to what their wants will be. With regard to values there is really nothing new. We quote greasy Cape 13½ to 15c.; Natals, 15 to 16c.; Australian, 14 to 14½c.; B.A. scoured, 26 to 31c.; domestic fleece, 18 to 21c.; pulled supers, 20 to 21½c.; extra, 23 to 26c. per lb.

TORONTO MARKETS.

TORONTO, June 13th, 1895.

DRUGS.—A better feeling exists in most branches of the drug trade. Nearly all staple chemicals and drugs have upward tendencies, although there are some prices moving the opposite direction. Camphor is firm and advices from abroad strong. Cream tartar is quoted higher. Glycerine is strong Paris green continues to advance, and is now worth 19 to 20c. per lb., an advance of 5c. over prices of the same date a year ago.

GRAIN.—Following the American market, wheat locally is weaker, and as compared with last week, there has been a general decline of 1 to 2c. per bush. The quotations now stand:—Winter wheat, No. 1, 98c. to $1; No. 2, 96 to 98c.; No. 3, 94 to 96c.; Spring, No. 1, 98c. to $1; No. 2, 96 to 98c.; No. 3, 93 to 95c. Manitoba hard, No. 1, $1.05 to 1.06; No. 2, $1.03 to 1.04; No. 3, $1 to 1 03. Oats are at 41 to 42c.,

These prices are wholesale by the car load.

a turn lower. This decline in values has been occasioned by the arrival at Owen Sound of 100,000 bushels of oats within the last ten days. Barley is quiet. Peas are weaker, and quotations 1 to 2c. per bush. lower. Rye is dull. Corn remains nominal.

THE VISIBLE SUPPLY.

	June 8, '95. Bush.	June 9, '94. Bush.
Wheat	49,739,000	58,211,000
Corn	11,582,000	7,514,000
Oats	8,749,000	2,764,000
Barley	102,000	87,000
Rye	203,000	206,000

GROCERIES.—There is seldom anything of marked interest to be noted in the grocery trade at this time of the year. The general distributive movement of goods throughout the country is only fairly large, while prices hold steady and unchanged. Nothing has occurred in the tea markets beyond the news noted last week, or elsewhere recorded in this issue. Sugar continues steady. Retailers are not disposed to buy stock until present supplies are exhausted. New milled rice is in the market, and quoted at 3⅛ to 3¾c. The breaking up of the selling agreement of the Packers' association coming as it does so near to the season's close, has not seriously affected prices. Corn and peas are 2½c. lower, and in other goods the feeling is, of course, a shade weaker. We have reason to believe that canners are not carrying any excessive stocks. British Columbia salmon packers are quoting at $4.50 on the coast.

HARDWARE AND METALS.—While the distributive movement is satisfactory, there has been a falling off as compared with the trade of last week. Prices of hardware are unsteady and tending upwards. The association has arranged prices on wire nails, and jobbers are quoting a discount of 75 and 10, and 1 lb. papers 75 and 5. Barn door hinges are up ½c. per lb. An advance equivalent to 12½ per cent. has been made in the price of wire by reducing the discount from 22½ to 25c; terms and delivery have not been altered. Shot is now at a 17½c. discount instead of 20c. All quotations on iron pipe and barb wire, as noted last week, are for the time withdrawn. Horse nails command a discount of only 55 per cent. instead of 60 per cent. as formerly. Prices on tacks, clouts, and shoe finders' supplies are advancing. Black and tinned rivets are now sold at a discount of 55 instead of 55 and 10. The movement partakes of much the same character as last week. Wire nails, ordinary fence wire and barb wire are in demand. Galvanized iron, ingot tin and tin plate are moving freely, without material change of price. Ingot tin is slightly easier and is quoted in ton lots at 17c. and 17½c. in small lots.

HIDES AND SKINS.—There is, so far as we can see, absolutely no change in the hide situation. Hides are well maintained; values do not stiffen, but, on the other hand, we can see no signs of weakness. The gossips of the street are now busy making out the fortunes hide merchants have made by the recent advances. Green hides are quoted at 8c., and cured 9c. The cattle receipts at the four great American centres to May 31st were 1,929,909, as compared with 2,302,443 in the same period, 1894, and 2,364,286 in 1893, 2,169,724 in 1892, and 1,869,216 in 1891. This has every appearance of strength. *Hides and Leather*, Chicago, 8th inst., says: "At one time it was thought that the early June kill would drag somewhat on account of no grubbing privileges, but probably 25,000 Texas and 5,000 butt-branded and Colorado steers, of June slaughtering, were contracted. These transactions imparted additional strength to the market, and some packers are talking of the possibilities of hides selling for still higher figures. The last of the May salting is now supposed to have been disposed of." Trade in pelts is active at 15c., while lambskins bring 25c. Calfskins are in good demand. The tallow market is disappointing, and has, in the face of receipts from Australia, failed to move upwards as was expected.

PRODUCE.—The trade in provisions and farm produce is not active. Receipts of butter are ample, quotations remaining unchanged; 11 to 12½c. is being paid for selections, and 13 to 14c. for pound rolls. The drouth which is reported to exist in some parts of the province has not as yet had any effect on curtailing supplies. In sympathy with outside markets the local trade in cheese is a turn firmer. The trade in hog products is quiet, prices remaining unaltered over those of last week. Chicago receipts of hogs last week were 162,640; shipments, 26,092, the proportion of latter to former being unusually small, owing to light demand for hogs and products east. Eggs are quiet and steady. Dried apples are dull at 5 to 5½c.; evaporated excite but little attention. Beans are scarce, and firmly held at $1.70.

WOOL.—The situation is a very interesting one. Local dealers at the beginning of the season began an active canvass for wool; this developed into excessive competitive bidding, and extending into the country, has filled the merchants and growers of Western Ontario with extravagant ideas as to the value of the new clip. Nominal quotations are: Merchantable fleece, 20c.; rejects, 16c.. unwashed, 12c.; but actual transactions have been made at prices ½ to 1½c. in advance of these prices. A local firm that has been paying some of the highest prices, received a very large shipment of foreign wools this week, and it is a question in the minds of some whether the market has not been "bulled" for the purpose of selling this stock to good advantage. An American buyer was in the city this week, but could not buy on this market. He states that several weeks ago he was offered 50,000 lbs. of fleece, at 19½c., but, arriving here, found it had been purchased at 20 to 21c. per lb.; he refused to take wool on this basis plus a buyer's profit. We elsewhere refer at length to the wool market.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company that has from its inception given its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low-priced PAY AS YOU GO" plan to the shortest single premium endowment.

DANISH BUTTER IN ENGLAND.

In the *Fortnightly Review* an English lady, Mrs. Tweedie, asks her fellow countrymen why they do not make their own butter, instead of buying it in Denmark. Her question may well be changed slightly to adapt it to ourselves, and we may ask why is it, with all of our facilities for the production of butter, that England spends about $65,000,000 a year for foreign butter, and the value of the butter we sent to England and Scotland was only $675,762 in 1893 and $941,523 in 1894? Danish butter is not imported into England because it is cheap, but because it is good; it ranks with or above the best English butter. That Denmark is nearer to England than we are is no explanation of our exclusion from this trade, because the most mortifying part of Mrs. Tweedie's article, for us, is her statement that the competition which Denmark has begun to suffer from lately is that of Australia, whose butter has to cross the tropics, and is carried through the Red Sea in refrigerating chambers in order to reach England in marketable condition. Enough Australian butter is going into England to affect the price of Danish butter. Yet we, only a week from England, have not sent her much more than a million and a half dollars' worth of butter in the past two years, and our farmers are complaining that there is not a sufficient market for their products.

The Danish butter does not make itself. No manufacturing industry is carried on with a nicer regard for quality and thoroughness. The company whose work Mrs. Tweedie describes, and which she says is a fair sample of all the butter making companies in the little kingdom, maintains veterinary surgeons who inspect every two weeks the herds whose milk is bought. If disease breaks out between these visits, the farmer has no motive for concealing it, because the company will pay him for his milk just as usual, but it will throw the milk away. Any farm hand who has been exposed to a contagious disease loses nothing by reporting the fact and keeping away from his work, for his wages go on just the same. Every farmer keeps a quantity of ice, and the milk is promptly cooled He strains the milk with a care that very few American farmers can be induced to exercise, but the milk is scientifically filtered when it reaches the factory. Every can of milk is tasted at the factory by an expert, who sets aside every can that is suspicious for chemical examination. The milk is cooled with ice till it reaches 40 degrees, and stands till the cream is risen, when the cream is skimmed by hand Mrs. Tweedie speaks of some of the farmers having separators and delivering to the factory only the cream, but she gives the impression that at the factory there is only hand skimming, The cream is raised to a temperature of 68 to sour it, and then cooled to 50 for churning. Mrs. Tweedie gives the details of the working and packing, and draws a fascinating picture of the butter factory and the women and girls who do the work in it. The prices of milk she mentions are low compared with the prices paid by people in our cities for their quart a day, but they are not low compared with what farmers in the vicinity of our great cities generally net for their milk, and the butter brings a high price in England.

In a recent address ex-Governor Hoard, of Wisconsin, one of the leading dairymen of his State, said that the price of Wisconsin butter had been raised in a few years from 15 to 25 cents a pound by improving the herds and the processes of butter making. This corroborates the experience of Denmark that it pays to make a good thing.

The trouble with the American farmer on a general average is that in the past he was too prosperous; it was too easy to make a living to make it worth while to take much pains about anything. There is no reason why he should not make as good butter as there is in Denmark and Australia, and as compared with the latter he certainly has an enormous advantage in being so much nearer England and on the same side of the equator. If he raises sheep he ought to pack his fleeces as well as the Australians do, instead of ruining his market by trying to see how much dirt and how much of the inferior portions of the fleece he can work off on to the Eastern buyer without detection. If he raises cotton he ought to see to it that his cotton reaches market in as good shape as the cotton of Asia and Africa. The English people eat great quantities of bacon, but they do not like our bacon so well as they do that cured in Denmark and some other parts of Europe. Our packers, however, are making more effort to teach the English to like our bacon than they are to cure bacon to suit the English taste. Here and there is an exception, but as a whole we are not half trying to find a market for our productions. We have an idea that England must buy our wheat and cotton and it is useless to bother about anything else.—*N. Y. Journal of Commerce and Com. Bulletin.*

FISH OF ATLANTIC STATES.

This work of the United States fish commission is a very elaborate document, perfect of its kind, representing an astonishing amount of labor, and for accuracy is cited abroad as a most creditable performance.

The group of States treated in this report are New York, New Jersey, Pennsylvania, Delaware, Maryland, including the District of Columbia, and Virginia. That group takes in a big area, some 159,700 square miles. The area of water is 7,635 square miles. It has altogether, when you follow water frontage, taking in indentations of bays and sides of rivers, a coast line of 5,400 miles. In 1890 these States contained a population of 15,798,055, and today there are certainly over 16,000,000 of people. Of these 16,000,000 you might say that one-half might, if they wished, engage in fishing as a business But how many are there who catch fish, take oysters, or who find their living by working on the water? The answer is, about 91,000. Maryland has the most, 40,000; Virginia the next, 24,000 (the approximate figures); New York, 12,246, and Pennsylvania and New Jersey about the same number, 2,275

Beginning with an albecore and ending with a yellow-tail, there are seventy kinds of fish, all of recognized food value, which are to be caught at various times and seasons along our neighboring coasts or in our rivers and lakes. While there are so many to pick and choose from, the shad and the oysters are most valuable, and bring in more money than all the remainder of the fish of the section.

Looking in a general way to catches, taking only pounds, the menhaden would figure first as to total weight, the bluefish coming next. The catch of menhaden in New York and New Jersey waters amounted in weight to 125,530,650 pounds, the bluefish to about 13,000,000 pounds. Shad would be represented in the two States as a catch of 13,269,411 pounds. While the menhaden were worth $352,579, the value of the shad was $604,647. Now it will be understood how important is the shad fishery, and why Fish Commissioners pay most attention to the propagation of shad and their introduction into our rivers. Taking all together, the shad represents to the fishermen a value of $1,216,000 in the Middle States, but it is in oysters where there is the largest return, and this alone has an estimated value of $12,400,000. Taking New York alone, her oysters were worth in 1891, $2,748,509.

Maryland has more persons employed in the fisheries, with a larger capital invested, and turning out a bigger value in products, than any other of the Middle Atlantic States. She enjoys the most favorable physical conditions. She has a water frontage of 2,170 miles, for Chesapeake Bay is the largest inland body of salt water on the coast of the United States. All the best features are to be found, for migratory fish, crabs, terrapins, and, above all, for oysters. As to her oyster fishery, it represents 81 per cent. of the value of the fishery products. The State has invested a capital of $7,649,904 in fisheries, and her product is valued at $6,019,165. In 1891 the oyster output alone was worth $5,295,866, and after oysters came crabs, worth $303,716. It might have been supposed that the terrapins would have been worth more than $22,333, but there are many terrapins in the northern market, so-called Maryland diamond backs, coming from very much further south. It is, then, the oyster business which is so important.

Virginia makes a fair showing. She has, too, many physical advantages. A portion of Chesapeake Bay is hers, with large sounds and fine rivers. As in Maryland, it is the Virginia oyster business which overshadows all her other water products, and in this respect she stands second to Maryland. With Maryland she has the greatest number of vessels engaged in oystering and hands employed in the packing of oysters. Her total production in 1891 was $3,647,845, and of this oysters represented $2,524,344. Norfolk has the largest capital invested in the general fishing business.

As far as has been ascertained, according to the latest compilations, the total take of fish, oysters, everything available for food or to be used for making oil or as fertilizers, represents a grand total weighing 590,454,369 pounds, and worth $19,023,474. The proportion of capital invested to the returns makes an excellent showing. The money put into vessels, wages, cost of apparatus, is close to the earnings, which shows that the entire amount in stock comes back to the investors once on an average in the year.

It may be usful to know by those studying alimentation, that in a bushel of oysters there are seven pounds of meat, eight pounds in a bushel of round clams, ten pounds in long clams and mussels, and four and a half pounds in the eye or heart of a scallop, which eye or heart in a scallop is neither one nor the other, but a sweetish muscular tissue. A common crab will weigh in meat one third of a pound, and for manurial purposes the horseshoe crab is rated at two pounds.

Under any circumstances, save abnormal ones, the production of fish in any ten years, taken as a whole, appears to be the same as for any other ten years. If there may be scarcity of cod this year off New York Bay, there may be more cod off Nantucket. The average catch is then the same—that is, for nomadic fish For anadromous fish, this will by no means hold good. The shad go down the river where they were born or introduced. When old enough, they launch boldly to the sea, to return when the time of reproduction approaches Salmon do the same thing, as these anadromous fish must ascend the rivers.

It is then perfectly possible for man, with his many engines of capture, to catch any shad or salmon descending a stream, or he might block them by the building of dams. Then, in time, there would be no shad or salmon. Of course oysters, being fixed to their beds, might all be dredged, or their spawning capacities hindered.

There are not less cod caught on the banks than at the time of Sebastian Cabot, but certainly more. In the sixteenth century, only one race or so, with a few badly equipped boats, caught cod. Now all the world engages in cod fishing. The chance of there coming about an exhaustion of the nomadic fish is remote. The United States may be said to be far in its infancy, as far as relates to the fish products of the Pacific coast.—*N.Y. Times.*

GOLD YIELD FOR 1894.

The estimates of gold production given out by President Valentine, of the Wells-Fargo Express Company, for 1894, turn out, as director of the mint Preston maintained, to have been too large. Mr. Valentine included the yield from British Columbia with the mines of the United States and "lumped the whole lot" at $42,000,000. The bureau of the mint has been making a careful inquiry into the matter, and finds that the production of our mines probably did not exceed $40,000,000. More gold has been handled by the refineries, but it seems that $2,700,000 came from Mexico, and that only $700,000 had been returned among the imports. Mexico lays an export duty on her gold, and it was to the interest of the producer to smuggle it across the border, since he would be paid the same price by American refineries.

The revised figures make no difference in the world's yield of gold, which is still placed at $170,000,000 for 1894. Gains in Africa and elsewhere made up for the $2,000,000 reduction in the United States. The increase from our mines over 1893 is 11 per cent., as they produced $35,955,000 that year. The nature of the miscalculation that will be most unwelcome is that some of the mining states that have been crowing so loudly will have to revise their claims.

This year promises a gold crop of $180,000,000 for the world. The South African mines continue to be developed and to make rich yields. Old mines in this country are being reopened and worked with profit with new methods, and fresh "prospects" are being continually discovered.

—Mr. Edmond Dupre has been elected president of the Levis Board of Trade.

—A judge of Milesian extraction charged the jury as follows: "Gentlemen of the jury, you must find that the defendant is guilty beyond a reasonable doubt. A *reasonable* doubt is *such* a doubt as will *convince a reasonable man* that the defendant is *not* guilty."

MONTREAL, TORONTO & VICTORIA

JUNE LETTER, 1895

MONTREAL, June, 1895.

We feel it due to our constituents to address a brief acknowledgment and explanation in reference to the somewhat unusual pressure of business during May.

In our January letter we gave notice of our increased appliances and preparedness for extended business, and had our statement verified by a prompt handling of the volume of trade entrusted to us up to the end of April.

The sudden rush of business in the very beginning of May, which continued throughout the month, tried our resources to the utmost, and during a part of the month we were unable to keep pace with orders, so that many shipments were not made with our wonted promptitude. By way of explanation, we venture to submit report of our Auditor, John Hyde, Esq., Public Accountant and Secretary of the White Lead Association of Canada, certifying that during the month we turned out 233,695 packages of goods, representing 8,988 per working day, during the entire month.

The month closed with only one average day's work on order files, so that our friends have herein an assurance of our ability to maintain our reputation for prompt and careful shipment.

IN VARNISH GUMS we bought heavily before the recent advance, and although this department has advanced more than any other, our tankage of fine Varnishes is more than sufficient for all demands.

IN WHITE LEAD, notwithstanding unprofitable prices, we never issued finer paint. Those of our friends who have been testing our product will not object to pay the small advance in price which we hope to announce shortly.

IN READY MIXED PAINTS our plant has never turned out so large a quantity, and our testing system has enabled us to give thorough satisfaction. Alike in Villa Paints, Floor Paints, Coach Paints and all ready mixed goods, we claim to make the hardest and most durable Paints sold in the Dominion.

IN CARRIAGE COLORS our success has been complete. Notwithstanding the great increase of business in this department, every batch of Ground Work, Primer, Fine Color, and Japan has been proved before shipment. As a result, the leading Carriage Builders have said some pleasant things to us, which we will shortly repeat for the information of any who have not taken advantage of our manufacture in this department.

OUR 93 p. c. CANADIAN IRON OXIDES & INDIAN REDS are asserting themselves, not only over the Dominion, but in England, Scotland and the United States. They are the finest goods in any market; they are purely Canadian Bog Iron Ore products, which have never reflected beauty until developed by us.

We introduce this month as a new feature our **TRIPLE STRENGTH COMPOUND TINTING COLORS,** on the same lines as have been so successfully adopted by the National Lead Association of the United States. Our selection opens with twenty of the choicest tints in triple strength, by means of which a desired shade in Pure White Lead Paint can be arrived at with certainty and without any trouble. Special illustration cards will be ready on 1st July for issue to all enquirers.

Another new feature of much importance is our **GRAPHITE PAINT FOR STRUCTURAL IRON WORK,** a paint which cannot be duplicated outside our factories. Our tests indicate that this paint will rival our Magnetic Oxides for this department of work. For the frames and plating of Iron Vessels in course of construction, we have entrusted the agency for Graphite Paints for the Clyde, to our friends, Messrs. Alexander, Fergusson & Co., of Glasgow. All manufacturers of exposed structural iron will find our tests interesting.

The list is too long to admit of special mention of our specialties in a single letter. We labor earnestly and unceasingly to produce, under every heading, thoroughly excellent goods, at the every-day low price of ordinary manufactures, and we invite our friends to continue their confidence, while we give the continued assurance of our best services.

THE CANADA PAINT CO., Ltd.

AUDITOR'S CERTIFICATE

"The sales books of The Canada Paint Co., Ltd., for the month of May, 1895, as audited by me, show the number of packages of merchandise sold and delivered by them during that month to be (233,695) two hundred and thirty-three thousand, six hundred and ninety-five."

HUDDERSFIELD, England.

LONDON, Eng. GLASGOW, Scotland. BELFAST, Ireland

IMPORTANT NOTICE

Owing to expiration of lease of our Toronto warehouse on June 30th, we have decided to clear our entire stock of

Woollens and Tailors' Trimmings

and will offer special inducements to purchasers until above date.

Merchant Tailors and Woollen Buyers

Will find it to their interests to call early and avail themselves of this opportunity to stock up at greatly reduced prices. Sale will not continue after above date.

TRADERS' BANK OF CANADA.

Proceedings of the tenth annual general meeting of shareholders in the Traders' Bank of Canada, held at its banking house in Toronto, on Tuesday, the 18th June, 1895.

The president having been requested to take the chair, Messrs. Stuart Strathy and J. A. M. Alley were appointed scrutineers, and Mr. H. S. Strathy secretary, when the following report and statement were read:

REPORT.

The following is a statement of the result of the business of the bank for the year ending 31st May, 1895:

After making full provision for all bad and doubtful debts, crediting interest to date on all interest-bearing accounts, and reserving accrued interest on outstanding deposit receipts, the net profits for the year amounted to		$37,418 56
To this is added balance at credit of Profit and Loss last year....		6,558 03
Making in all		$43,976 59
Appropriated as follows, viz.:		
Dividend No. 18, three per cent., payable Dec. 1st, 1894	$18,225 70	
Dividend No. 19, three per cent., payable June 1st, 1895	18,252 00	
		$36,477 70
Balance at credit of Profit and Loss carried forward.....		7,498 80
		$43,976 59

The depression in trade—now happily passing away—which has been so general during the past two years, has made caution in granting credits more than usually necessary, resulting in a large portion of the bank's funds being lent upon bonds and stocks at comparatively low rates of interest.

The large amount of funds available at short notice which the bank now has, will enable it to take advantage of returning prosperity, and employ its funds more profitably.

As compared with the figures of a year ago, the deposits show an increase of over $300,000.

The directors recommend the purchase of the premises now occupied by the bank in Toronto, at a price representing the original cost, the rentals on which yield a moderate return, and will improve as the demand for offices increases.

All the branches of the bank, including the head office, have received the usual thorough inspections.

The officers of the bank have performed their respective duties to the satisfaction of the board.

WM. ELLIOTT,
President.

H. S. STRATHY,
General Manager.

Toronto, 31st May, 1895.

—Inland revenue collections at Victoria during May were $12,710.

—Platinum wires, made white hot by electric currents, are now used as saws for felling trees.

—There are 70,000 acres given up to the cultivation of oysters along the Long Island Sound front of Connecticut, and the land and plant are valued at $4,000,000. But the Chesapeake Bay plant is probably worth $8,000,000.

THE Prince Edward Island board of fire underwriters have agreed not to accept any insurance on buildings to be erected on the site of the premises in Summerside recently destroyed by fire, unless the buildings are of brick or stone.

—Gambling has declined considerably at Monte Carlo during the past year. At the annual meeting of the Casino Company the total receipts from the tables for twelve months were returned at 19,000,000 francs. This shows a decrease of over 3,000,000 francs compared with the working of the previous year, and almost 5,000,000 francs less than the sum received in 1892-93. This decrease is explained in several ways, such as the scarcity of money in Italy, and the competition set up by Aix-les-Bains, Ostend, Dinard, and other summer resorts.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, · · · · $22,326,622.16

Itsgreat feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE Iroquois, Ont., firm of C. & M. Mills, general merchants, whose unexpected failure we chronicled a few weeks ago, have secured the signatures of their creditors, with a few unimportant exceptions, to a cash compromise at 50c. on the dollar. The liabilities are something over $30,000.——Thomas Phillip, of Ottawa, a tentmaker, is reported assigned, with small liabilities.——P. McEvoy, dealer in teas, at the same place, has been closed up under chattel mortgage.

G. W. EDGAR, of Fredericton, N.B., who has been doing a confectionery business for the last eighteen months, has made a transfer of his stock, fixtures, &c. to one Lester, and is reported to have left the country.——Another reported absentee from the same province is Wm. Gibson, of Benton. He has been a merchant long, and quite successfully, but having endorsed heavily for a party in the foundry business in Houlton, Maine, he is understood to have made a transfer of all his property, and to have left the country.

CHIEFLY by enlarging a creek into a canal, the waters of Hudson river and Long Island Sound have been united. But the canal is not large enough to pass first-class vessels, and if this object is to be obtained future enlargement will be necessary. To the railways this improvement is an obstruction, necessitating the building of enlarged bridges, and therefore not welcome. Both the State authorities and the general Government took sides against the railways and aided the canal. New York gets by this means a considerable addition to its available dockage.

MANY thought when the statement appeared that W. R. Callaway was leaving Toronto, that the story was one of that genial humorist's practical jokes, and that there was no foundation for it. But upon enquiry we learn that Toronto is to lose him, for he has resigned his position as district passenger agent for the Canadian Pacific Railway, to be succeeded by Mr. Charles E. McPherson, an old Toronto boy, who for a number of years has been assistant general passenger agent at St. John. Mr. Callaway, it appears, has accepted the general passenger agency of the Soo line, with headquarters at Minneapolis. The C. P. R. office, in Toronto, will not seem the same place with Mr. Callaway out of it. We hope the West will agree with him, and that he will come back to Ontario, at least once a year—to go fishing.

IN 1879, J. G. Staebler began business in Tavistock. At the start he took in a partner named Landreth, and they twain continued together until 1882, when the latter went out and one McTavish came in. This partnership continued until 1885, when it was again dissolved, and a Mr. Morelock embarked on life's business sea with Mr. Staebler. They made things go until 1887, when this combination was broken, and Mr. Staebler decided to stay commercially single. This he did until the present time, and now he has gone out, and the business is in the hands of an assignee. During the last few months he has been trying to keep afloat by borrowing money, but so far as we can ascertain, he has not succeeded in getting a great deal.

ON Wednesday last David L. Layton, the pioneer merchant of Meaford, aged 77 years, departed this life. About fifteen or twenty years ago, during a period of almost insane competition among the traders of that town, the deceased wisely wound up his store business. Since then he has devoted his attention to his duties as postmaster, which he discharged honestly and faithfully and to the general satisfaction of the public. For several years past his daughter, a very worthy woman, had assumed the responsibilities of the office, and we understand it is the wish of a very large number of the residents of the town that she should retain the charge of the post office there.

Mercantile Summary.

THE population of Brockville, according to the last assessment, is placed at 9,134

THE annual meeting of the British Columbia Pharmaceutical Association was held last week, and delegates were in attendance from all parts of the province.

A PRESS dispatch from Hong Kong states that the Japanese are administering the customs on the island of Formosa, and trade is proceeding upon normal lines. No further trouble is expected.

AN extension of time is asked by J. H. Cavanagh of Calgary, owing to dull times and slow collections.——The feed, etc., stock of McLaughlin Bros., at Victoria, will be sold by the mortgagee, who has foreclosed.

PIERRE TREPANNIER, a tanner at Louiseville, Que., who also went into store-keeping a few years ago, has got into bad shape, and his affairs are being investigated by an accountant on behalf of his Montreal creditors. Liabilities are about $3,000, and Mr. T. claims to have a surplus of about $2,000.——A Quebec shoe retailer, Alfred Pepin, has made an abandonment of his estate; liabilities are altogether local.

IN the autumn of 1893 Margaret J. Reed, of London, bought in the furniture stock which had been owned by her husband, J. H. Reed, at 50 cents on the $. She had no money, but raised a sufficient sum to make the purchase by giving a chattel mortgage Now the mortgage has been foreclosed, and Mrs. Reed's career as a merchant is closed for a time.

IN addition to the list of those business men who are ruined through endorsing for another, is included the name of the liquor firm of Jos. White & Co., Windsor, of which Jos. White is sole owner. It appears Mr. W. has been endorsing for his brother Solomon. On the 7th instant he called a meeting of his creditors and offered a compromise at 50c. on the dollar unsecured, which was not accepted. A feature in the matter is said to be that Mr. W. has been transferring his real estate to other hands, but this action will be contested by his creditors.—— The second failure at Windsor this week was that of Lambert Bros., shoe dealers. At a meeting of creditors held the other day they made an offer of 55c. on the dollar, which their creditors refused. The reason they refused was because the firm wished to assign to a local party, while the creditors want them to assign to some one whom they may appoint

THE Hamilton Changemaker Company has been incorporated, with a capital stock of $20,000. The company will manufacture cash registers.

AT a meeting of the cheese board held in Brockville on 13th inst., 2,425 boxes were boarded, of which 350 were white and balance colored; none sold; 7½c. offered for both white and colored. Salesmen kicking.

THERE has been a lack of harmony in the directorate of the Dominion Rubber Reclaiming Company, organized within the year at Montreal, and it is reported that a petition for a winding-up order will come before the judge this week.

MR. HODDER, of the English publishing firm Hodder & Houghton, who was out here the other day, said, speaking of Y.M.C.A. work in London in the great mercantile houses, that Sir George Williams, for example, has five hundred men in his establishment who dine on the premises every day.

A RECENT letter from Coaticooke to the St. John's *News* says: "Our town begins to look less like a heap of ruins. Some of the new buildings are completed and others are nearly so. Piles of lumber and brick still obstruct the sidewalks, but order is gradually being evolved from chaos. In some instances the exteriors are not as handsome as before the fire, but the interiors are more convenient and quite as handsome."

BEFORE Mr. Chief Justice Killam, at Winnipeg last week, a summons was applied for on behalf of T. T. Smith, the auctioneer, aiming at the quashing of the early closing by-law, No. 893, on the ground that the petition was not signed by three-fourths of the shopkeepers within the meaning of the statute, and that it is *ultra vires*.

THE New Brunswick Telephone Company held its annual meeting last week at Fredericton, at which Mr. L. B. Macfarlane was present, representing the Bell Telephone Co. The former board of directors was re elected. Although a heavy loss was sustained by the storm in St. John, during the year it was more than offset by the gains in other districts. The report showed a total gain of 135 instruments, 52 of which were put in at St. Stephen, 70 at St. John, 5 at Fredericton, 12 at Woodstock and a number at Moncton. It was decided to push along the through line from Moncton to Hopewell as fast as possible.

THE creditors of Creed & Small, plumbers, Montreal, lately reported as failed, have granted John Creed a settlement at the rate of 40 cents on the dollar, cash.

AT a meeting of the Markham merchants it was unanimously decided to close all stores at 6 o'clock every Monday, Wednesday and Friday night, except upon the eve of legal holidays.

AT Windsor the vote of ratepayers on the by-law to grant $40,000 towards the erection of public buildings for Essex, in that city, instead of Sandwich, was carried by a vote of 610 to 146. It is now time for the county to move in the like direction.

Two or three years ago, Edouard Morency began storekeeping in a small way at St. Mathieu de Rimouski, Que. He has assigned on demand, owing $1,524.——M. Duguay, general dealer at Gentilly, Que., reported insolvent recently, has been refused a settlement, and the stock has been sold.——Mrs. M. Rioux, who has been doing a small general business at Bic, Que., died recently. Her son is now offering the creditors 50 cents on the dollar, half cash.

THERE seems to be no doubt that gold exists in the country northeast of Winnipeg in many places, says the Winnipeg *Free Press*. Indeed, it has already been found on the shores and islands of Lake Winnipeg. The discovery of gold in the Lake of the Woods district has moved the Ontario Government to the construction of a road from Ignace to Seine River, about ten miles above Sturgeon Falls. At present the work done on the road consists of chopping, the intention being to make it at first a winter road.

WE find in an eastern exchange a sketch of an "old-timer" among the business men of the Eastern Townships in Mr. Ozro Morrill. This gentleman came to Rock Island in 1833, and in 1844 erected the dwelling he now lives in. He is a native of Stanstead. He was for some time a clerk, and then went storekeeping along with a Mr. Holmes under the firm name of Holmes & Morrill. He next formed a partnership with a Mr. Kilborn, and while in the firm of Kilborn & Morrill was largely engaged in the purchase of hops. Mr. Morrill once ran the Jondro boot and shoe factory. He has experienced largely in the ups and downs of a business career, having met with large gains and also having been reduced by great losses. Ozro Morrill is now a man past 75, a kind and courteous man.

A BUTCHER in Hamilton named G. H. Hill owes $500, and has assigned. His assets are few.——Very little business has been done by Jos. Rochon at Schrieber, who is engaged in hotel keeping. He obtained some money through a chattel mortgage, which has been foreclosed, and now he has assigned.

G. W. HOLDENBY was once a butcher and then a policeman at Toronto Junction. He afterwards went to Islington and embarked in keeping a general store. But it appears that the amount of his annual turnover has been very small, so small indeed that he has barely made a living out of it. Now he assigns.——At the village of St. Williams, Lachlan McKinnon has been carrying on a grocery and drug business for a number of years, but never made much. He has assigned.

CARLOADS of chairs of their own manufacture have been shipped during some months past by the North American Bent Chair Co., to the New York and Chicago markets, and this has aroused the opposition of some of the large chair manufacturers in the United States, who complained to the Treasury Department of alleged undervaluation. Several carloads of chairs were for this cause stopped at the boundary, and detectives and Treasury officials visited Canada to investigate. It is said these officials went through the factory the other day and found everything satisfactory. This Owen Sound company has customers in Australia, Africa and China, as well as in England and the States.

THE following group of failed traders are all in Montreal. The Tiger Tea Company, which asked an extension, was unable to carry that arrangement through, and are now proposing to pay 40 cents on the dollar. They owe $5,000, with assets nominally the same.——Hermenegilde Legault, who began a small grocery business less than a year ago, has assigned; he owes only about $800.——J. R. Kyle, shoes, has had to assign, owing to pressure through the failure of J. & T. Stephens, manufacturers. The liabilities are $4,312.——L. Falardeau, another shoe dealer, a practical workman, who started retailing four or five years ago, has also turned his estate over to the assignee, owing $3,862.——V. Rapario, a *restaurateur*, is another insolvent. Liabilities are not yet ascertained.——S. Z. Lebœuf, grocer, doing business under the style of Monette & Lebœuf, has been served with a demand in insolvency. The assets are listed at $5,318.

57 Bay Street
Toronto

We have received the first issue of "Property," a monthly devoted to land, buildings, and stocks, issued from Montreal.

Insurance companies of Australia are experiencing a steady falling off in business. The amount written in 1890 was £9,201,925; in 1891, £9,119,915; in 1892, £8,677,055; in 1893, £7,697,285; in 1894, £6,751,343 or about $33,750,000.

Mr. George W. Hamilton has tendered his resignation as vice-president of the Montreal Stock Exchange. This, it is said, was due to a misunderstanding while Mr. Hamilton was acting as presiding officer. The hope is expressed that the existing differences may be settled.

A Parkhill painter named J. B. Willard has worked fifteen years without getting money enough ahead to make him easy. Upon being sued by one of his creditors he assigns.——The assets of the Mooretown Salt Company, in Lambton county, which went into liquidation a few weeks ago, are now advertised for sale.

In April, 1880, the general store firm of Way & Keech at Tamworth dissolved partnership, the former continuing the business without success. In January, 1888, he was obliged to assign, with liabilities of $9,000. His wife bought the stock and continued under the style of Way & Co. She has a large family to support, and her customers gradually falling off she now makes an assignment.

Letters patent have been issued incorporating the Quebec Coal Company, with an authorized capital of $12,000. The provincial directors are Messrs. O. Kenndy, W. Jalbert, John R. Webb, Geo. Jalbert, Wm. Byrnes and Wm Kelly.——Pontbriand & Frere, Limited, machinists, Sorel, Que., have also been incorporated, with a capital stock of $50,000. The promoters are Messrs. Hyacinthe Beauchemin, P. Beauchemin, A. E. Pontbriand, J. B. O. Pontbriand and N. A. Monarque.

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for the week. During the warm weather there will be no Saturday boards held until further notice. Therefore the week consists of five days. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. Total for the week was 5,667 shares; last week, 5,958. Ontario Bank, 1 at 82; Bank Toronto, 44 at 242, 245; Commerce, 251 at 137⅞-138½; Imperial, 97 at 179⅞-180½; Dominion, 60 at 263½; Standard, 40 at 161½-162; Hamilton, 61 at 157-157½; British America Assurance, 280 at 120½-121; Western Assurance, 2,093 at 164⅛-166½; Consumers' Gas, 26 at 200½ 201, Dominion Telegraph, 3 at 120½, Can. TORONTO, FRIDAY, JUNE 21, 1895.

THE SITUATION.

In offering £500,000 of its bonds to the public, the Atlantic & Lake Superior Railway Company, according to a cable report, states that the Dominion of Canada guarantees and will pay interest on the bonds during their currency. The Ottawa Government being questioned on the subject, replied, through Mr. Foster, that the alleged guarantee had not been, and would not be given; that all the Government had done was to consent to receive £800,000 as a loan, for which it would pay 3 per cent. interest, and would make payment, as asked by the company, to the coupon holders of the bonds. It would have been better if the Government had not mixed itself up with the affair at all; and if we may credit the report, it looks as if the trnasaction was being represented in a light not quite justified by the facts. We trust there will be no excuse for any one to say that he subscribed under the impression that the responsibility of the Government is other than what it is; but in such cases fine distinctions are not observed, if disappointment in repayment comes, and the Government is blamed for what it does not deserve. If the lenders knew, as they ought to have known, that the so-called guaranteed interest would come out of borrowed capital for twenty years, they would have better understood their chances of repayment.

The opening of the Kiel Canal, 64 miles long, which connects the North Sea with the Baltic at Kiel, has been celebrated by the participation of the maritime nations. Its course is along the old Eider canal, from Holtenau, and after deviations from a straight line it reaches the Elbe a little east of Brunsbattel. The width of the canal is 196.85 feet at top by 72.19 feet at bottom. Along its course there are half a dozen side stations, which will admit of the passage of the largest war vessels. The saving of distance, as compared with the voyage round the Danish coast through Skager Rack, will depend upon the point of departure. A vessel at the north of Scotland, being as far north as the Callegat, would go through that natural channel to reach the Baltic, while a vessel starting from the English Channel would gain about 22 hours by going through the canal. All trade between the Baltic and Canada will gain a considerable advantage by making use of the new route. Between Hamburg and Kiel the saving is estimated at about 45 hours. These estimates are based on a progress through the canal at a little over five knots an hour. The real saving is, of course, in distance; the slowness of canal, as compared with ocean navigation, is a drawback which the gain in distance more than overcomes, and the net gain has to be counted in time. Against the tolls may be set down the savings in fuel, wages and whatever time counts for, and here again the net gain is the desired result. To Germany, which has the ambition to become a considerable maritime power, was due the initiative of a work which has suggested itself to many minds for centuries. The Emperor had in view the strategic purposes to which the canal can be put; and as the originator of the work, the large part of the glory belongs to him. France joined in the celebration, though she has no heart in it. Alsace and Lorraine protest, and the Socialists lose their balance, never stable, over the event.

As was foreseen, the Government of Manitoba declares its inability to accept the responsibility of carrying into effect the terms of the remedial order, issued by the Dominion Government, in the matter of separate schools. In its reply, the local government pointed out that even under a united school system, the school taxes press heavily on the population; that the restoration of separate schools would emasculate the efforts that are being made to educate the people, and would mean the right of the separatists to levy school taxes, and to participate in the legislative school grants. A doubt whether the right to collect such taxes is subject to appeal to the Governor-General-in-Council is expressed, and the ground is taken that any Act of the Parliament of Canada assuming to restore this right to the separatists would be *ultra vires*. It is assumed that no part of the public funds could be made available for the support of separate schools without the voluntary action of the legislature. The local government suggests a commission of enquiry into the whole matter; and volunteers the statement that if any private funds have been invested in buildings now used by the public schools, compensation will, on the fact being ascertained, be made. According to this view of the case, Dominion interference might lead to a deadlock, and instead of restoring harmony, produce strained relations between the Province and Parliament. The Ottawa Government, in issuing the order, would seem to have precluded itself from entering on the enquiry proposed, since it has assumed to have all the information necessary to justify its intervention. Otherwise, enquiry might be in order. The Legislature of Manitoba has sustained the Government in the attitude it has taken on the Remedial Order.

By a decision of the Supreme Court of Illinois, the Whiskey Trust, which embraced 82 distilleries, has been declared illegal. This decision comes after reconstruction, the object of which was to get round the anti-trust law. In this process the trust certificate was issued in exchange for the stock of the several companies to the amount of $85,000,000. But, says the court, "There is no magic in the trust certificate that can purge the trust scheme of its illegality." The defendant urged that there was no limit to the amount of distillery property which it was authorized to purchase and own. The court points out that though the defendant was authorized to hold property necessary for the carrying on of its business in Illinois and elsewhere, it could acquire no more; and that "grants of powers in corporate charters are to be construed strictly, and what is not given is by implication denied." This is taken to mean that the Trust could not purchase distilleries for the purpose of closing them. The question then is, what

is necessary to the business? The answer is. that "in accumulating properties in the manner, and for the purpose shown, the defendant has not only misused and abused the powers granted by its charter, but has usurped and exercised powers not conferred by, but which are wholly foreign to, that instrument. By doing so, it has rendered itself liable to prosecution by the State by *quo warranto*, and the judgment of ouster is clearly warranted. The object of the combination, opponents say, was rather to raise the price of whiskey than to extend the business of distillation, but to this question there are two sides. The State has meanwhile taken possession of the property of the defendant company. If this judgment should be sustained by the Supreme Court of the United States, there is an end to combinations brought about by the usual methods. It is confidently predicted that the decision in the Pullman car case, now before the courts, will, on the principle of this decision, be adverse to the company.

A bill presented to Parliament by the British Government for the treatment of inebriates is of interest wherever inebriety exists. It gives a relative or friend the right to produce evidence before the county court that a person is an "habitual drunkard," and the court is empowered thereon to send him to a licensed inebriates' resort for a term varying from six months to two years. At last it would seem that the true method of dealing with the drunkard has been found. It treats his case as one justifying restraint for curative purposes. The implication that he is suffering from disease, or is incapable of self-restraint, is justified by the fact. A definite term of confinement, unless it implies that no less than six months will suffice for a case, is an anomaly. The term should be indefinite or limited by the actual cure. Such retreats, too, are properly put under the regulation of a license, to prevent imposters working their will on these unfortunates. People differ as to the advisability and effectiveness of prohibition; but that the habitual drunkard should be treated as invalid or irresponsible, is a conclusion which ought to secure general acceptance. In Ontario, legislation looking in this direction was proposed some time ago; if the English bill should become law, the example is likely to be followed here. The right to legislate in this sense belongs to the provinces, and its exercise may now, perhaps, soon be looked for. The previous proposal broke down because it involved the establishment of a government institution, which is not necessary, except for persons who have no friends to support them.

CANADIAN BANK MEETINGS.

The reports of the various Canadian banks whose meetings have been held this week tell pretty much the same story of depressed business and decreased earnings. The conditions during the past year were such that bankers were deprived of several of their accustomed means of profit. Not only had the fall in prices of commodities lessened the volume of transactions, and as a consequence the bankers' margins on them, but in addition to this shrinkage there was a further shrinkage arising from lessened imports from abroad, and restricted credits at home. Then the rate of interest paid for deposits part of the year was more than could be afforded, for discount rates were extremely low. And in the case of the larger of our banks doing business in the United States, the business conditions over there were in a marked degree unfavorable for large banking profits. There is now expressed, however, the opinion that a better state of things is likely, since during the last month or two an improvement has been perceptible.

The Canadian Bank of Commerce, which in the previous year showed earnings of $528,000, earned last year only $441,000, or nearly one and a-half per cent. less. The usual dividend of seven per cent. was paid, $10,000 transferred to the pension fund, a sum written off bank premises, and $22,685 carried forward. The addresses of the president and general manager gave interesting explanation of the direction in which profits were cut down, and suggestions of the different ways in which the business of banking is affected by such a year as last year on both sides of the boundary line. We had, all over North America, says Mr. Walker, a year in which credit was restricted by the wholesale dealer through caution, but by the retail buyer because of falling prices and small sales—where the public submitted to rigid economy either of necessity or choice—leading to "that kind of hand-to-mouth trade which renders profit impossible and contracted the volume of all transactions, legitimate or speculative, to narrow limits." This was the character of the year all over North America, "but," he frankly adds, "to an extent we quite failed to foresee; and, looking back, it seems scarcely less a subject for wonder than congratulation that the business community, including the banks, has been able to maintain its position successfully and without any serious proportion of failures." Here we have the very same sentiments as those expressed by the general manager of the Bank of Montreal two or three weeks before. Canada came well through the ordeal, said Mr. Clouston, "indeed it has been a great surprise to me how well we have stood it." And Mr. Hague of the Merchants now adds, "It is to the credit of our mercantile and banking system that we passed through such a year with as few failures as took place."

At the same time, none of our bankers appear sanguine that activity of business is at once to be expected. Their general tone is on the contrary as a rule cautionary. We recall that a year ago the report of the Bank of Toronto, noting the dulness and depression of general trade, stated that "no immediate signs of improvement are apparent"; while that of the Bank of Hamilton said, in June, 1894, "the return to normal conditions must necessarily be slow." This year the Bank of Montreal authorities have told us, until the coming crop is assured—and to this the prevailing drought is a menace that we cannot overlook—we must not rely too confidently on active and prosperous business. And Mr. Walker now warns us that the volume of business will only be restored very gradually, and we had better be prepared for moderate results for some time to come.

In one of his paragraphs dealing with United States affairs, Mr. Walker touches upon a matter not without significance for Canadians. Referring to railway building and the marked improvement in railway earnings, he says: "Excessive competition by railroads may be a very good thing for trade, but the other result in the shape of inadequate earnings is ruinous to the financial credit of all North America, and indirectly does far more harm than the benefit by competition to trade. There is some ground for hope that . . . the building of railroads in the United States, under a general railroad Act and without reference to public requirements, may be gradually checked." And he notes that an Act passed in 1892 in New York State, intended to prevent the paralleling of lines or the building of railroads in localities where they are not required in the public interest, has been in one case actually put into force. Again, with reference to the enormous iron production of that country, resulting in the fall of iron prices to 54 to 60 per cent. of what they were in 1890, he makes the point that it [the price] is still so low, and the power of production so great, that the profit to the miners and iron manu-

facturers of the United States must be trifling in relation to the enormous investment of capital.

Last Saturday's gathering of the shareholders of the Bank of Hochelaga was their twenty-first annual meeting. In view of this fact—the coming of age of the bank—the report partakes of a strain rather more sprightly than is usual in such documents. Admitting, apparently, that the infancy of the institution was stormy, the directors urge that "its youth became more calm, and with the experience and wisdom of years, we are permitted to entertain modest hopes for its mature age." By the issue of new stock, the paid capital now stands at $800,000, and the Reserve is forty per cent. of that sum. It has deposits of $3,300,000, and out of total assets amounting to $5,231,000 there is no less than $1,874,000 readily available.

Again, as at the meeting of 1898, the manager, Mr. Prendergast, refers to a prominent folly of Canadian traders, viz.: the launching into business of a great number of persons without the capital necessary for their operations. Certain of our merchants and manufacturers, wishing to show an exaggerated volume of business compared with their capital, "fall into the abuse of obtaining several lines of credit at different banks, and thus making the latter furnish the capital they themselves do not possess." Using an apt, though not original figure, Mr. Prendergast compares the result of such folly to an inverted pyramid. He concludes with the common sense advice that we should gather from the crises that we pass through lessons of prudence, and, above all, of economy. "Let us learn to regulate our expenses according to our means and to proportion our business to our capital."

The general manager of the Merchants' Bank of Canada—which bank, by the way, made a good showing of profits this year, in spite of the opinion to the contrary of Mr. John Crawford, who is occasionally hard to please—devotes a paragraph or two to the function and influence of bankers in the business world of Canada. He is "inclined to think that the banks, as a whole, are exercising more and more of a conserving influence over their customers, thus developing habits of prudent forethought, discouraging rash speculation, bringing about a better system of giving credit, and generally promoting a more solid, reliable and lasting prosperity." He does not pretend that they can control prices, or prevent losses always, but they can "so regulate the amount of money borrowed, that losses, if suffered by their customers, shall bear a reasonable proportion to the means of the borrower, and not involve him in ruin."

Some other paragraphs of Mr. Hague's address are pungent. Our readers will have an opportunity of perusing it in full next week. "This whole business of exporting live animals," he says, "is little better than a lottery in its result to the shipper under the present conditions of the trade in Great Britain." Again, as to lumber making, he is down upon the exporting of saw-logs as being "an unwise business, and I am not sure but we have sent out a vast deal too much square timber in an unmanufactured state." As to importing he says, with his usual directness: "Importing . . for the last year or two has fallen into a condition of unprofitableness. I believe radical changes in the methods of carrying on the leading branch of this business are necessary to a return of prosperity."

There is nothing apologetic in the statement or report of the Bank of Toronto. The depressed condition of trade everywhere, and the shrinkage in value of commodities combining to cause a falling off in business, "the demand for money was lessened, and the resources of the bank could not be employed to advantage." This is the whole story, and it is sufficient to account for the lessened earnings. But these earnings were by no means small; they amounted to $204,000, and enable the amount carried forward to be increased over last year, after paying 10 per cent. dividend.

The reduced earnings—$110,000 instead of $125,000 last year—of the Bank of Hamilton are "fully accounted for," says the report, "by the prevailing dulness of trade and consequent inactive demand for money, the effects of which have been universally felt." A slight decline is shown in circulation and one more pronounced in the amount of current discounts, but there is a marked advance in the total of call loans, debentures, and other readily available assets. The usual dividend is paid. The former board of directors was re-elected.

The annual meeting of the Imperial Bank of Canada, held on Wednesday last, appears to have been more numerously attended than usual. This was, doubtless, to mark the appreciation by the shareholders of the virtual completion of the bank premises, so long under alteration and extension. It must prove a great source of satisfaction to the staff of the bank, who have worked in an atmosphere of brick dust and sawdust, amid odors of paint and turpentine, to have at last, as a reward for discomfort, so complete, beautiful and convenient a banking premises as now exists on the corner of Wellington street and Leader Lane.

The statement of the bank for the year just closed exhibits a strong position. There is observable, indeed, the unusual fact that the call loans, debentures and other quickly available assets, viz., $6,669,000, exceed in aggregate amount of the current loans, whichare $6,480,000. Earnings are reduced, but they were sufficient to pay nine per cent. to stockholders, to place $25,000 to bank premises account, contribute to officers' guarantee fund, and increase the balance carried forward. The directors recommend that the small amount of unsubscribed stock of the bank be disposed of at an early day. A branch is to be opened in Vancouver shortly.

Considering the low value of money during the year under review, the directors of the Standard Bank of Canada consider the profits of that bank satisfactory. And well they may, for the rate earned on capital is as great, within a fraction, as that of the Toronto and the Imperial; all three earned over ten per cent. Eight per cent. was divided by the Standard, and the sum carried forward is increased. The report refers to the death of Dr. Morton, one of the directors, and to the appointment of his successor. Also to the erection of a building for the Chatham branch.

A very considerable reduction of net profits is shown this year by the Union Bank of Canada. Instead of 8¼ per cent. on capital, as in 1898, they are less than seven. The reason is the universally prevalent one, the depressed condition of all sorts of business during the year. Branches of the Union have been established at Virden, Manitoba, and at Norwood and Shelburne, Ontario.

The circulation of the Traders' Bank, which last year exhibited a decline, shows this year an increase as great. The deposits, too, have gone up from $3,375,000, to, including interest, $3,681,000. And the totals of liabilities and assets show a growth of more than half a million. Net earnings, however, were smaller, in common with those of other banks. This arose in part from the lending of a larger portion of the bank's funds on bonds and stocks at comparatively low rates. The net earnings were about 6·15 per cent., and a somewhat larger sum than last year was carried forward.

—At a meeting of directors of the London and Ontario Investment Company, held last week, it was decided to declare the current half yearly dividend at the rate of six per cent. per annum, instead of seven as heretofore.

MONTREAL HARBOR.

A striking feature of the report for 1894 of the Harbor Commissioners of Montreal, is the statement that while there was a marked decrease in the export of grain from that port, there was an increase in shipment of nearly all the principal productions of the country. Of lumber, for example, the increased shipment has been some 49 million feet over 1893. The total was 187,871,000 feet, of which there went to British [U. K.] and continental ports 177,405,000 feet, and to the River Plate, South America, 10,466,000 feet, board measure. Flour showed an increase of 361,664 barrels, the total being 896,536 barrels; cheese exports were 1,695,292 boxes, an increase of 59,484 boxes; apples, an enormous increase, 273,496 barrels as compared with 61,926 barrels; cattle, 87,604 head against 83,004 head; sheep (130,663), an increase of 127,014 head; horses, 5,579, an increase of 3,927. But of grain, phosphate, butter and hay, the exports decreased. Compared with the large figures of 1893, which exhibited a total of 21,700,000 bushels, the aggregate for last year was but 8,746,000 bushels, made up of

Wheat	5,392,125	bushels.
Corn	2,035,970	"
Peas	1,189,414	"
Oats	87,113	"
Rye and barley	48,863	"
Total	8,753,485	"

The quantity of coal imported approached a million tons. The actual figures were 961,759 tons, an increase of more than 17,000 tons over 1893. There was less British and American coal, but more Canadian. From the Maritime Provinces was received 733,338 tons; from the States, 208,267 tons, and from Great Britian 21,154 tons. Cement, 142,000 barrels, and scrap iron, 18,677 tons, were both less than in the preceding year. The new wharf, Sec. 26, giving an extra berth for sea-going steamships, proves of very great advantage to the trade of the harbor. Next season the harbor master hopes to see the new pier at Hochelaga finished, and also the new wharf at Windmill Point.

The number of sea-going vessels arrived in port during the year was 734, and their aggregate burthen 1,096,909 tons, a decrease of 54,868 tons from the large figures of the previous year. The world-wide depression in the mercantile and shipping trade of course accounts for this. Then the inland vessels arriving showed a marked decrease also, the figures being 4,666 of an aggregate burthen of 979,809 tons, where in 1893 there were 5,244 of 1,153,600 tons. Thus there was a total decline of tonnage equal to 228,659 tons in the arrivals at the harbor. Of the sea-going craft 670 were built of iron, and only 64 of wood.

A word now as to the revenues of the harbor of our chief city. While in the opinion of Mr. Bulmer, the president of the Commission, "the general depression in business has affected this harbor in a less degree than other places of like character," there is yet a decline of total revenue from $318,936 in 1893 to $272,068 last year. The cost of management, interest and repairs, apart from expenditure on capital account, shows a slight increase to $248,840, leaving a surplus of $22,228, which has gone into the expenditure on new works. There was expended last year on the guard pier, Windmill Point basin, the new Hochelaga wharf and new plant, $250,721.

The total sum expended on capital account from the surplus revenue of past years is $1,135,000, and the bonded indebtedness of the harbor remains at the same figure as in the previous year, namely, $2,711,000. But a small portion of this now bears interest at 6 per cent., some $330,000 of bonds having been converted from 6½ to 4 per cent. The bulk now bears ($1,272,000) 4 per cent. and something over a million 5 per cent. interest. When the guard pier is finished and the improvements at the canal end and the lower end of the harbor completed according to the plan, we shall be able to take additional pride in Montreal as one of the most convenient of harbors for sea-going ships.

CROPS IN MANITOBA.

We have received a bulletin from the Manitoba Department of Agriculture, dated 7th June, containing the information as to the acreage and condition of the crops, live stock, etc., the supply of farm and domestic help in that province, etc., etc. This is summarized from the returns received from 350 correspondents of the Bureau. The total area under crop in Manitoba is this year 1,887,796 acres, distributed thus: In wheat, 1,140,276 acres; in oats, 482,658 acres; in barley, 153,839 acres; in flax, 82,668 acres; in rye, 2,855 acres; in corn, 1,004 acres; in peas, 970 acres; in buckwheat, 125 acres; in potatoes, 16,716 acres; in roots, 6,685 acres. There is here an increase of 295,402 acres over the area in crop last year, equal to sixteen per cent. The subjoined statement for convenience of reference gives a comparison with the acreage of 1894:—

	1894.	1895.
Area under Wheat	1,010,186 acres.	1,140,276 acres.
" Oats	413,686 "	482,658 "
" Barley	119,528 "	153,839 "
" Flax	30,500 "	82,668 "
" Potatoes	13,300 "	16,716 "
" Roots	7,880 "	6,685 "
Total crop area	1,595,080 acres.	1,882,842 acres.

The Manitoba wheat crop of 1894 is estimated to have been 17,172,883 bushels, which is within a fraction of seventeen bushels to the acre. The home consumption is put down at about three millions, as follows:

Seed for 1895 crop	1,812,102	bushels
Fed to stock	270,322	"
Required for consumption (flour)	855,000	"
Still in farmers' hands	84,000	"
Total home consumption	3,021,424	"

This quantity, deducted from the estimated yield of 17,172,883 bushels, would leave the quantity of wheat exported from the province 14,151,459 bushels.

DECISIONS OF BOARDS OF TRADE SUBJECT TO REVISION BY THE COURTS.

Heretofore the Board of Trade of Chicago considered its decisions as immutable as the decrees of the Medes, not even subject to question by the highest court in the State. It is now decided by the Supreme Court of Illinois that "when property rights are involved the courts have power to so far supervise the action of a tribunal like the one in question, as to determine whether they have proceeded according to the rules and regulations provided for their action, and if they have failed, in a substantial manner, correct abuses which may result from their unwarranted procedure." Valuable results will flow from this judicial rebuke to that autocracy of cunning that has so often dominated the conduct of the board and exercised such a pernicious influence upon the morals of the markets. The judgment lays down for the government of the Exchange the same code of common honesty and impartial settlement that is recognized and obeyed by all reputable men in the humble walks of traffic.

A bill of complaint by T. J. Ryan against John Cudahy, the Chicago Board of Trade, the firm of Norton & Worthington, brokers, the firm of Roloson & Co., brokers, and others, alleged that all these parties were members of the Board of Trade. In August, 1892, Cudahy and Wright induced Ryan to sell 5,000,000 pounds of short ribs, which

he had in store in Chicago, and also 1,450,000 pounds of the same commodity which, he did not have but which he was to buy in a falling market for delivery on October 31st. During September and October the price never exceeded $7.85 per 100 pounds till the last day of the latter month, when Cudahy, Wright and the two firms of brokers entered into a conspiracy to "corner" the market and forced the price up to $12, by shipping 15,000,000 pounds of ribs to various southern points, first slitting them and mutilating them so as to render them undeliverable under the rules of the Board of Trade. On November 1st short ribs sold again at $7.85. Ryan had deposited with the Merchants' Loan and Trust Co., on account of such sales, $26,500 for margins, for which certificates of deposit had issued, which certificates the secretary of the Board of Trade in the usual course of business would endorse to the proper party to receive them.

A dispute arose between Norton and Worthington and Ryan as to their respective claims to the margin certificates, and at the request of the former the president of the Board of Trade appointed a committee of three under the rules of the Board to decide the differences. Ryan appeared before the committee and offered to prove, and could have proved, the legitimate market value of short ribs deliverable October 31st, as well as their value in other markets, and their value for consumptive purposes in Chicago; but all such offers of proof were by the committee rejected and not considered, and the decision of the committee was that the margin deposits of $26,500 were payable to the brokers, basing their decision upon the manipulated corner price of $12 per hundred pounds.

The Board of Trade of Chicago has statutory power to make such rules and by-laws as they may think proper for the government of the corporation. The rules provide that members are to abide by the rules and by-laws, and that in case of failure between contracting parties to settle their disputes, on application of either party to the contract, the dispute is to be submitted to a select committee of three disinterested persons, which committee shall, without unnecessary delay, summon the parties before them, and hear such evidence under oath as either may wish to submit touching their claim to the deposit, and shall by a majority vote decide, and report to the president of the Board in writing, in what manner and to whom the deposit is payable, either wholly or in part; whereupon the president shall endorse on either the original or duplicate certificate an order for the payment, and such order shall be a sufficient warrant to the party holding the deposit to pay the same in accordance with such order.

Such sales of short ribs on the Board as purported to be made by parties on October 31st, 1892, at 12c. per pound, were insignificant in number and quantity, and were purely colorable, and were made for the purpose of establishing a fictitious price to govern the measure of damages on contracts unfulfilled by "short" sellers, and were in some instances sales for that purpose by one broker to another broker of the same principal, engaged and interested in, or taking advantage of, and thereby becoming a partner to the "corner."

Ryan, not satisfied with the decision of the Board, filed a bill in which he asked an injunction to restrain the secretary of the Board of Trade from endorsing the margin profit receipts over to the brokers. The various defendants demurred to the bill, thereby admitting the truth of the statements made by the complainant, but relied on the immutability of the decrees of the Board of Trade. The case finally reached the Supreme Court of the State of Illinois, which decided that the Board should have received the evidence offered by Ryan, and as that evidence was admittedly true in the manner stated by Ryan, the transactions of the 31st of October did not establish the value of short ribs on that day.

Judge Craig, giving the judgment for the court, said: "The committee, engaged as it was to determine a question between the two parties involving, as it did, over $26,000, had no right to confine their investigation to the mere difference between the contract price of the short ribs and the price at which sales were made in the Board of Trade on the day of delivery, closing their eyes to the fact that these sales may have been false, fraudulent and fictitious, sales brought about by a fraudulent combination and a violation of the statute of the State. If the committee is to be confined to a mere calculation of the difference between the contract price and a figure established by a combination on the Board of Trade on the day of delivery, regardless of the fact whether such figure is real, fictitious, or manipulated by a corner, then a tribunal of that character is but a device for legalizing acts prohibited by the common law of the State." For years the courts have refused to interfere with the decisions of the Board on the ground that members joining signify their willingness to submit to such decisions, but the court concludes: "If the allegations of complainant's bill are true, and they are admitted to be true by the demurrer, we are inclined to the opinion that he made a case by his bill which entitled him to relief."

WATER PRESSURE.

Another warning not to trust solely to gravity pressure for fire purposes has been given, too, in the devastating fire in St. Albans, Vt., last month. People in St. Albans boasted of the efficient gravity waterworks which supplied the fire hydrants with such a pressure that it was equal to a dozen steam fire engines as a protection against fire. But when the emergency came, the waterworks of St. Albans were of no avail to prevent the most disastrous conflagration which ever visited Vermont. The companies have thus again learned by bitter experience that the boasts of local waterworks and the "best fire department in the land" are not to be depended upon. There are, says an American contemporary, many small towns and probably several moderate-sized cities where the same boast is heard, but in the fatal day the fire department and waterworks will be found wanting. The recent test at the west end of Toronto, shows how futile is the expectation of safe fire pressure there with the present inadequate fire mains.

LAND IN ENGLAND.

In England the rateable value of land, as shown by a parliamentary paper, has fallen from £39,835,000, in 1870, to £33,654,000, twenty-four years later. At the first of those dates land counted for one-third the rateable value of all property; at the latter it had fallen to a little more than one-fifth, the value of other forms of property having increased. But the decrease of the assessments does not represent the full extent of the decline in the value of land. If the state had been the owner of the lands, the loss would have fallen on it. If the state be, as some contend, entitled to the "unearned increment," it would also, as a correlative, be called upon to bear the burthen of the decrement, which in England, as shown by the assessment, was $30,000,000 in less than a quarter of a century; and the real decrease in value was probably $10,000,000 more. Then there are other increments besides those on land, which, in the same sense, are "unearned." The high rates which land in England can no longer bear have had to be made up by other forms of property. Rail-

ways have come in for a considerable share of the burthen. In some unions they constitute between 30 and 50 per cent. of the rateable property, and in two unions the latter figure is exceeded.

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of May, which bears date Ottawa, 19th June. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

Canadian Bank Statement.

LIABILITIES

	May, 1895.	April, 1895.
Capital authorized	$ 73,458,685	$ 73,458,685
Capital paid up	62,222,152	61,699,493
Reserve Funds	27,143,799	27,328,174
Notes in circulation	28,429,134	29,152,152
Dominion and Provincial Government deposits	7,826,895	8,416,046
Public deposits on demand	65,643,844	65,578,633
Public deposits after notice	115,058,980	114,457,027
Bank loans or deposits from other banks secured	121,046	105,153
Bank loans or deposits from other banks unsecured	2,021,755	2,415,699
Due other banks in Canada in daily balances	91,808	137,409
Due other banks in foreign countries	247,043	237,263
Due other banks in Great Britain	4,696,026	4,711,184
Other liabilities	902,657	360,341
Total liabilities	$225,039,194	$225,570,990

ASSETS.

Specie	$ 7,669,575	$ 7,914,449
Dominion notes	14,044,513	14,106,055
Deposits to secure note circulation	1,812,892	1,810,736
Notes and cheques of other banks	7,502,348	6,915,332
Loans to other banks secured	121,045	106,153
Deposits made with other banks	2,881,600	3,067,974
Due from other banks in foreign countries	19,320,837	19,949,220
Due from other banks in Great Britain	3,853,444	4,448,161
Dominion Govt. debentures or stock	2,706,189	2,690,779
Other securities	18,338,780	18,032,609
Call loans on bonds and stock	16,818,764	16,566,271
	$ 94,039,987	$ 95,507,739
Loans to Dominion and Provincial Governments	1,344,297	1,598,603
Current loans and discounts	203,572,324	203,273,500
Due from other banks in Canada in daily exchanges	121,045	131,137
Overdue debts	2,283,272	2,928,751
Real estate	1,052,521	1,088,091
Mortgages on real estate sold	595,181	559,349
Bank premises	5,448,489	5,501,983
Other assets	1,795,553	2,051,483
Total assets	$311,287,952	$312,740,834
Average amount of specie held during the month	7,484,083	7,870,885
Average Dominion notes held during the month	14,016,340	14,686,247
Greatest amount notes in circulation during month	30,142,474	30,755,003
Loans to directors or their firms	8,441,590	8,443,637

NATIONAL BANK OF SCOTLAND, LIMITED.

The annual report of this bank for 1894 has been submitted. The directors state that, owing to a restricted demand for banking advances and a long continuance of abnormally low rates of interest for money, the profit of the year has been less than for some years past. After making full provision for all bad and doubtful debts, the net profit amounts to £156,828; adding the balance from last year, they have £177,666, which is to be applied to paying dividend at the rate of 13 per cent. per annum, £130,000; and bonus at the rate of 2 per cent per annum, £20,000; and £27,666 is carried forward to next year.

The bank's circulation at date of report was £779,955. Current accounts and deposit receipts amount to £13,379,735, a sum which, if translated into dollars, means just about $65,000,000. The assets, outside of coin, bank notes and cash to the amount of £1,284,000, consist in round thousands, of British Government securities and call or short date loans in London, £4,856,000; bills discounted, £2,679,000; short loans on railway stocks, etc., £1,650,000; advances on cash credit and current account, £3,602,000; other assets to form a total of £16,798,733.

This important bank, whose head office is in London, has one hundred and six branches. Its gross profits for the year under review, after making provision for all bad and doubtful debts, deducting interest due not paid, rebate on bills current, income tax, license and stamp duty, etc., were £292,172, and the charges of management £135,344. The reserve fund is £785,000, or, say, 78½ per cent. of the capital stock of a million sterling.

COLD STORAGE.

Canadians were told some months ago by Professor Robertson, the Dairy Commissioner, that we need cold storage room in this country for creamery butter. As a corollary to that there should be refrigerating cars to carry it, cold chambers on ship board, cold storage in British ports. Cold storage is needed for other articles than butter, too. Cold storage is now-a-days, in fact, an international need. We observe that a move is being made to erect premises in Montreal Harbor for this purpose. The Dominion Cold Storage Company (Ltd.) is being formed, to be incorporated under the Joint Stock Companies Act, with a capital of $300,000, in $100 shares. It is stated that one-third of the stock has already been subscribed. The business has been tested in both New York and Chicago, and has not only shown that perishable products can long be kept in prime condition in a scientifically arranged modern cold storage warehouse, but that money can be made at it by those that provide the warehouse. The promoters estimate they can make 16⅔ per cent. per annum. If they can they will not be long without opposition. But whether they make sixteen per cent. or six, the enterprise seems to us a necessary and legitimate one, an important help, indeed, to our export trade.

OUTLOOK IN THE COTTON STATES.

The misfortunes of last season weighed heavily upon the mind of the Southern planter when seeding for the 1895 yield, and the acreage under cotton in the United States is consequently much less than a year ago. The carefully compiled reports of the New York *Chronicle* show the area covered by the growing crop to be but 17,767,663 acres, as compared with 20,107,247 acres in 1894, or a decrease of 11.6 per cent. But in addition to the reduced acreage there are other bear elements in the outlook. The crop is a late one, and up to May 27th the weather was unfavorable for planting; while after the seeding was finished drouth in some districts and frost in others damaged the growing plant. Cultivation has not been kept up as thoroughly as last year. The condition of the plant was "on the whole less satisfactory at the close of the month than at the same date last year. The States of least promise are apparently the Carolinas and Georgia, but the plant is late almost everywhere and so is farm work. It does not necessarily follow that the condition is really unpromising, but rather that more depends upon future development than has been the case in some other productive years."

COFFEE.

The estimate of the coffee situation made by W. H. Crossman & Bro., New York, is not calculated to inspire one with a belief in high values for the immediate future. The 1894-95 crop is estimated: Rios and Santos, 6,750,000 bags; all other crops, 5,250,000 or 5,500,000 bags. This total of twelve or twelve and a-half millions exceeds the previous largest yield of 1891-92 by nearly 500,000 bags. A comparison of the market values during these two years, however, does not give results in accord with the statistics of supply. The markets, June 1st, 1895, were quoted: Havre, Frcs. 96; Hamburg Pf. 76½; New York, 14-25c.; as compared with June 1st, 1892, Havre, Frcs. 81¾; Hamburg Pf. 63¾; New York, 12.05c. The high values of the present market are due to discounting the ensuing smaller crops in Rio and Santos, and manipulation in Havre by the Paris bull syndicate. The European and American deliveries have averaged for three years 10,600,000 bags, and taking this as sufficient quantity to meet the world's demand, the estimated falling off of the Rio and Santos crop to 5½ or 5½ million bags will not bring supplies below the amount usually required. Coffee is now being grown at enormous profits, and it is natural to look for an increase in production. The coming crop is expected to be of better quality than the present. Supplies in the hands of dealers both in Europe and the United States are thought to be much larger than usual, as a result of the almost general opinion that prices were likely to advance. "It must be acknowledged, however," say the Messrs. Crossman, "that the situation of coffee from now until October is very clouded and difficult to anticipate. The clearing up of the monstrous deal in Havre, either by liquidation or settlement in some form or another, would do more towards inspiring confidence in the immediate

future than anything else but while the heavy holdings and manipulations are held over the market, the trade fear disaster, whereas if the merchandise were dispensed to the trade as needed, instead of being consigned from one point to another, confidence would return, and the question of higher or lower values would not remain in enforced suspense.

PATENT RECORD.

The following list of United States patents, granted to Canadian inventors, May 28th, 1895, is reported for this paper:

Rufus P. Redmond and W. Wythe, Toronto, Canada, combined whip-socket and rein-holder.

George H. Millen, Hull, Canada, match box for advertising.

GRANTED JUNE 4TH, 1895

James H. Byrne, assignor of one-half to G. W. Booth, Toronto, Canada, hand fire extinguisher.

Frederick P. Thompson, Fredericton, Canada, dust guard and oil-saver for car axle boxes.

Helen B. Leadbetter, Kincardine, Canada, supplemental stopper for ink bottles.

William Harding, Orangeville, Canada, wrench.

FIRES IN CANNING FACTORIES.

From British Columbia comes the report in our recent exchanges of the burning of three salmon canneries and a serious loss of property. The first one was the Windsor on the Skeena River, which took fire on 1st June, causing a loss of nearly $40,000. This concern was managed by W. H. Dempster, and is the property of the British Columbia Canning Company, London, England. The greater portion of the wharf was saved. It is said that the property was insured in the Northern Insurance Company, and that a plumber repairing the roof caused the fire.

On the 12th inst. the Western Fisheries and Trading Company's packing house at New Westminster took fire, and before it was got under control this building, with Youdall & Sinclair's warehouse and McLellan's sturgeon packing house adjoining, were totally consumed. The buildings were all wood, and 80 tons of hay in Youdall & Sinclair's warehouse made food for the flames The brigade had a desperate fight to save the whole block between McKenzie and Begbie streets from being wiped out. They succeeded in confining the fire, however, at last to the three above named buildings, but it was only the splendid water service that saved half a million dollar blaze. The losses are: Western Fisheries Company, $8,000, no insurance; Youdall & Sinclair, $5,000, no insurance; M. D. McLellan's, $2,500, no insurance; fishermen's nets, $1,200; Charles McDonough, damage to stock, $700; Armstrong & English block, $600, both insured. Other smaller losses will aggregate $2,000.

Costello & McMorans' new cannery at Steveston was the scene of another serious blaze, supposed to have been caused by sparks from a pile driver, which took effect in the net loft. The cannery, which had only just been completed, is said to be not only the largest in the province, but also one of the best fitted, the machinery being of the latest and most improved pattern. Preparations for the fishing season were being carried on, in fact all the cans had been made. Costello values the buildings and plant at $35,000, and the stock at $10,000. The insurance only amounts to $21,000. The ferry steamer "Surrey," with Chief Ackerman and other members of the New Westminster fire department, were dispatched, and the blaze was finally quenched. We have never before heard of three such sweeping cannery fires so close to one another in point of time.

FOR GROCERS AND PROVISION DEALERS.

There is talk of a cold storage building for Galt.

Winnipeg has prospects of having three cold storage warehouses.

The Chilliwack, B.C., cheese factory has marketed its first cheese.

Ottawa merchants believe that citizens are not yet educated up to the Saturday half-holiday idea.

A telegram from St. Petersburg announces that: "The National Millers' Congress now sitting here has decided to establish an agency in London for the sale of Russian flour."

An Ohio paper declares that the establishment of canning factories in country districts bids fair to equal "the indiscriminate building of creameries in the west a few years ago."

The Quebec bakers' annual picnic is arranged to take place on Wednesday, the 10th of July. This excursion organized by the "Union of Bakers," is to be to Crane Island, in the St. Lawrence, below the ancient city, a delightful place for such an outing

By latest mail advices British Columbia salmon canners were paying 75 cents each for fish The season began at 50 cents and canners say that the rise in price places fish beyond their reach

Messrs F Boutilier & Co's new salmon cannery New Westminster B C, began operations on the 4th The firm have a large fleet of boats fishing for the canners, and expect before the spring salmon season closes, to have a good pack made The sockeye run will also be packed

The grocery firm of Dean Brothers St John N B engaged a young man named Samuel Myles well known at the North End to do some collecting for them. He left town last Saturday night, with about $75 or $100, which Messrs. Dean say is theirs. They have reported the matter to the police.

A letter received from the Niagara district reports the fruit crop as having suffered severely by reason of the spring frosts and present drouth. Peaches are about one-third crop, pears half crop, grapes half crop, plums one-quarter crop, strawberries three-quarter crop, raspberries three-quarter crop, sweet cherries one-quarter, sour cherries half a crop.

The outlook in continental markets for American provisions is thus commented on by the *National Provisioner*: "In the European market we are confronted with a three-cornered conflict for supremacy between England, Ireland and Denmark. Granted that all the three bow to the inevitable so far as American product is concerned, they have now the battle of their life on, believing that there is not room for all, and that that country which gets second place gets a good share of the trade. All this has created an acute competition among European producers, and has brought prices down to such a level meantime that the demand for American products has temporarily gone off."

The *American Agriculturist* says The following shows the condition of apples and peaches by States, the figures representing a percentage proportion of what might be called a full yield. Nowhere, except in Oregon, is a full yield deemed likely. The average appears to be in the eighties:—

	Apples.	Peaches.		Apples.	Peaches.
New York	72	70	Illinois	85	60
Pennsylvania ..	75	70	Wisconsin ..	65	..
Texas	95	88	Minnesota ..	75	
Arkansas	92	84	Iowa	78	75
Tennessee	92	90	Missouri	92	85
West Virginia.	90	75	Kansas	86	78
Kentucky.....	90	60	Nebraska	85	75
Ohio	84	50	California....	95	85
Michigan	75	70	Oregon	100	88
Indiana	88	35	Washington..	90	95

METALS AND HARDWARE

Among the latest rivals of hardware producers in Birmingham and district in certain classes of goods is Sweden. Steel hinges, machine made, and of excellent design and finish, are being sent into Britain at 30 to 40 per cent. below the list of Birmingham and South Staffordshire producers.

The Birmingham *Hardware Journal* says Axes, equal in finish to the best American makes, are being sent into our colonies at prices which the States producers cannot at present compete with "A desperate fight for the axe trade of the world, between Sweden and the States, is impending, and the result will be awaited with great interest."

California is a decided victim of the bicycle craze. It is estimated that wheels to the value of $2,000,000 have been imported into the Golden State from the east during the present season. There are no bicycle manufactories yet established in the Pacific coast States.

An Old Orchard man down in Maine, who ran a needle in his foot, extracted the same by placing his foot near the dynamo in the local electric light plant.

It is stated that the Illinois Steel Company will erect a construction mill in Chicago at a cost of about $1,000,000.

Electricity was turned on Tuesday in the new Baltimore & Ohio tunnel at Baltimore. It will be the sole motive power, and the tunnel will be made as light as day from the same source.

Wages advanced: Chicago, Ill., pipe works, 2,300 men, 10 per cent.; Lewiston, Me., cotton mills, 7 per cent.; Allentown, Pa., iron works, 10 per cent.; Knoxville, Tenn., iron works, 10 per cent.; Utica, N.Y., cotton mills, 10 per cent.; Oswego, N.Y., iron works, 10 per cent; Bessemer, Ala., iron mill, 7,500 men, 10 per cent.—*Bradstreets*.

It is rumored that a plant for the manufacture of cold drawn weldless steel tubing is soon to be erected in Newcastle, Pa.

The schooner "Ada Medora" last week left Chicago for Owen Sound, Ont., with the first cargo of steel rails ever shipped by lake from that city to a foreign port. The whole cargo amounts to 2,370 tons and is consigned to the Canadian Pacific Railroad Company. The rails were shipped by the Illinois Steel Company

LUMBER TRADE PARAGRAPHS.

Quite a quantity of sawn lumber from mills between Roberval and Chicoutimi is now being shipped at the latter mentioned port upon vessels in the River Saguenay.

A large saw mill is being erected at Pointe aux Trembles for Dr. LaRue, one of the proprietors of Beauport Asylum.

The eight hours' day is, at the instance of the Italian Minister of Marine, about to be introduced into all the navy workshops of Italy. This system has already been on trial for some time at the Spezzia and Naples dockyards.

At Owen Sound, Judge Creasor has sentenced a fire-bug to fourteen years in penitentiary. Ottawa is interested, the *Journal* thinks, in having this fact noised abroad, the lumber here being tempting.

Business on the Ottawa end of the Rideau Canal is now pretty lively. The Ottawa Transportation Company is shipping some lumber through to Detroit. Merchandise in considerable quantities is constantly passing through the locks for our wholesale men, and large lots of cordwood for Contractor Heney and other dealers.

The saw-mill at Braeside, of Gillies Bros., is to be in operation this week. This mill is one of the best on the continent. Outside of Arnprior there is none so large in the Ottawa Valley. It is fitted with a new engine, which is the handiwork of John Gillies & Co., Carleton Place, a 1,600 horse compound with a 49-inch cylinder. Of boilers there are eleven. In addition to others there will this season be two band saws.

Quite a trade is done in sawdust. In New York city there are about five hundred vendors of that article doing a business of $2,000,000 annually. Twenty-five years ago sawdust could be bought for 50 cents a load; now it brings $3.50 a load at the mills. It is used at hotels, eating houses, groceries and other business places, being wet and spread over floors in order to make the sweeping cleaner work. Plumbers use it also about pipes and buildings to deaden walls and floors. Soda-water men and packers of glass, &c., use it, and dolls are stuffed with it. Yellow pine makes the best sawdust, as it is the least dusty and has a pungent, healthy smell. Black-walnut sawdust will not sell, and is burned.

BOOKS RECEIVED.

CANADIAN SUMMER RESORTS.—This illustrated souvenir and guide book of some of the principal resorts of Ontario has reached a second edition. It was written to enlighten the public as to our summer resorts—to tell Canadians or Americans where they may find the best fishing and hunting, the most healthful camping spots, the most comfortable hotels or boarding houses, and how to get to them. And the new edition is an improvement on the old. Mr. Smily and Dr. Adams have done their part well; so has the printer. The book is a handsome one. Send a quarter to your bookseller, or to the Murray Printing Company, Toronto, and get a copy.

THE LADIES' JUGGERNAUT.—A Canadian edition of this attractive novel is issued this week by the Toronto News Company. It will be sold by the trade in paper at 50 cents. The story is told with his usual knowledge of the world and happy facility in description by Archibald Clavering Gunther. It concerns a young woman whose wealthy father's name is Bulger (a patent medicine proprietor and a good fellow), but who writes her name Evelyn Vallé Bulgée—with an accent on the é, and has desires to be fashionable, refined and *distinguée*, all of which her father is not. How she falls in with an Englishman and his flunkey, and how this meeting influences her life, is told in the story.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, June 20th, compared with those of the previous week:

CLEARINGS.	June 20.	June 13.
Montreal	$13,220,049	$12,294,656
Toronto	6,338,403	7,404,456
Halifax	1,202,184	1,367,170
Winnipeg	829,341	680,503
Hamilton	742,112	736,203
Total	$22,332,089	$22,482,988

Aggregate balances this week, $3,214,503; last week, $3,297,930.

—It is the intention of the Merchants Bank of Canada to open a branch at Dresden, Ontario, shortly, under the management of Mr. A. V. Spencer, of the St. Thomas branch of that bank.

—Considering the great number of publications devoted to nearly ever conceivable subject which exist on this continent, it is not strange that we hear, now and then, of the amalgamation of certain pairs or groups of them. The most noticeable event of this kind is a consolidation just effected between the *Banker's Magazine*, the oldest bankers' publication in the United States, and *Rhodes' Journal of Banking*, one of the most widely circulated American bankers' periodicals. It will be found possible, by uniting these two, to furnish subscribers with a better magazine than could possibly be furnished by either one of them separately. We have quite recently had pleasure in noticing the enlarged and improved *Banker's Magazine*, and now that Messrs. Bradford Rhodes & Co. assure us that the distinguishing features of each publication will be retained, we assume that a very comprehensive magazine may be looked for as a result of the amalgamation under the title of the *Journal of Banking*, New York.

—With respect to what it styles "The Coming Chinese Loan," the London *Economist* of June 8th says it is somewhat ludicrous to observe the struggle which is going on among European financiers for the privilege of supplying China with the money she requires to pay the indemnity demanded by Japan. "Indeed, the Chinese Government would be more than mortal if it missed such a brilliant opportunity of getting all the assistance it requires, not only for the indemnity but for other national purposes. The latest form taken by the rumors, which have varied more or less from day to day, is that the Russian Government is to guarantee a 5 per cent. loan for £15,000,000, and that Parisian financiers are willing to take the bonds on a 4 per cent. basis at 93 per cent."

—The new Toronto quarters of the Manchester Assurance Company, to which the staff removed on Monday last, are not only a great improvement on the old, but are really handsome and commodious. The suite consists of six offices, besides the main office for the use of the public, and each is separated from the other by glass partitions. The room of Mr. Boomer, the Canadian manager, though very much secluded, is bright and airy, while Mr. Jaffray, the city agent, has had a room partitioned off from the main office. The lighting and ventilation have been carefully looked after. The whole will presently be lit by electric light.

—The latest Ontario point to establish a Board of Trade is the village of Embro, in the rich district of Oxford county. The following were chosen its first officers: President, Col. Munroe; vice-president, Wm. Stewart; treasurer, E. Cody; secretary, J. G. Anderson; executive committee, D. R. Ross, A. Brand, J. W. Gordon, T. W. Tate, R. A. Duncan; finance and advertising committee, Dr. Adams, Ross McLeod, James Brand, John Kay and A. E. Campbell.

—The annual meeting of the Winnipeg Bankers' Association was held last week. Mr. Angus Kirkland, manager of the Bank of Montreal in that city, was elected chairman, and Mr. F. H. Mathewson, manager of the Canadian Bank of Commerce, was re-elected secretary. Messrs. Wickson, of the Merchants, Patton, Monk, Phepoe and Mathewson were elected as the board of management of the clearing house for the ensuing year.

—We learn from the Quebec *Chronicle* of Saturday last that the mayor of Montreal, Mr. Villeneuve, M.P.P., has been made a director of La Banque Nationale. We also understand that Mr. Turner has resigned from the board, and that it is now composed of Messrs. A. R Audet, president; Judge Chauveau, V. Chateauvert, M.P.P., A B. Dupuis, N. Fortier, J. O. Villeneuve, M.P.P., and N. Rioux.

—The Michigan Bankers' Association will hold their annual meeting at Detroit, on the 10th and 11th September. The Illinois bankers have already held theirs. Next week, on 26th and 27th instants, the Iowa Association will meet at Storm Lake. The New York State Bankers' Association is to meet at Saratoga, on Wednesday and Thursday, 10th and 11th July.

—Half-yearly dividends have been declared by different loan companies as follows: The Ontario Loan and Debenture Company, 3½; the Home Savings and Loan Company, 3½; the Agricultural Savings and Loan Company, 3 per cent.

—It is resolved by the St. Thomas Board of Trade to petition the Dominion Parliament to grant the Lake Erie & Detroit River Railway $3,500 per mile for the proposed extension from Ridgetown to a point south of St. Thomas.

Meetings.

CANADIAN BANK OF COMMERCE.

The annual meeting of the shareholders of the Canadian Bank of Commerce was held in the banking-house, Toronto, on Tuesday last, at 12 o'clock. Among those present were:—Messrs Geo. A. Cox, John I. Davidson, W. B. Hamilton, John Hoskin, Q.C., LL.D., Matthew Leggat (Hamilton), Robert Kilgour, James Crathern (Montreal), W. R. Macdonald (Hamilton), R. Wilson Smith (Montreal), H. A. Massey, Frederick Wyld, Henry Beatty, J. K. Osborne, Rev. E. B. Lawler, Hugh Ryan, John Scott, A. V. Delaporte, James Neilson, George Robinson, Philip Browne, N. B. Gash, Æmilius Jarvis, R. H. Temple, Samuel D. Mills, Robert Somerville, Alexander McGee and others.

On motion, the president, Mr. Geo. A. Cox, was requested to take the chair, and Mr. J. H. Plummer, the assistant general manager, was appointed to act as secretary.

It was moved by Mr. W. B. Hamilton, seconded by Mr. R. Kilgour, that Messrs. Philip Browne, Æmilius Jarvis and R. H. Temple act as scrutineers. Carried

The president called upon the secretary to read the annual report of the directors as follows

REPORT.

The directors beg to present to the shareholders the twenty-eighth annual report, covering the year ending 31st May, 1895, together with the usual statement of assets and liabilities.

The balance at credit of Profit and Loss account, brought forward from last year, is		$ 19,157 02
The net profits for the year ending 31st May, after providing for all bad and doubtful debts, amounted to		441,028 50
		$460,185 52
Which has been appropriated as follows:—		
Dividends Nos. 55 and 56, at seven per cent. per annum		$420,000 00
Transferred to Pension Fund		10,000 00
Written off bank premises and furniture		7,500 00
Balance carried forward		22,685 52
		$460,185 52

Your directors regret that the results here shown are less favorable than those of recent years, but this is mainly due to the very great decline in the profits of banking, which has been universal during the past year. There is now a reasonable prospect of a return to normal earnings, but it is only during the last month that this improvement has been perceptible.

The usual careful revaluation of the entire assets of the bank has been made, and all bad and doubtful debts have been amply provided for.

The various branches, agencies, and departments of the bank have been inspected during the year.

Two years ago the shareholders authorized the creation of a Pension Fund, and the payment by the bank annually of $10,000 as its share towards the fund. Last year the directors reported that the labor incident to establishing the fund had been concluded, but not in time to actually open the account before the closing of the books. The directors have now to report that the fund is in operation, and the first payment by the bank appears in the accounts of this year. The fund assumes all pensions previously granted by the bank.

The directors have again pleasure in recording their appreciation of the efficiency and zeal with which their respective duties have been performed by the officers of the bank.

GEO. A. COX,
President.

GENERAL STATEMENT, 31ST MAY, 1895.

Liabilities.

Notes of the bank in circulation		$ 2,280,880 00
Deposits not bearing interest	$ 2,869,280 02	
Deposits bearing interest, including interest accrued to date	14,767,209 08	
		17,636,489 10
Balances due to other banks in Canada		2,119 20
Balances due to agents in Great Britain		1,054,729 41
Dividends unpaid		1,371 32
Dividend No. 56, payable 1st June		210,000 00
Capital paid up	$ 6,000,000 00	
Rest	1,200,000 00	
Balance of Profit and Loss account carried forward	22,685 52	
		7,222,685 52
		$28,408,274 55

Assets

Specie	$550,367 67	
Dominion Notes	894,737 80	
		$ 1,445,105 47
Deposit with Dominion Government for security of note circulation		151,000 00
Notes of and cheques on other banks		829,260 10
Balances due by other banks in Canada		81,739 36
Balances due by agents of the bank in the United States		2,590,927 02
Balances due by foreign correspondents		30,576 54
Canadian Government securities, municipal and other bonds		2,643,193 45
Call loans on stocks and bonds		2,088,496 44
		$ 9,860,298 38
Time loans on stocks and bonds		980,617 92
Other current loans and discounts		16,317,833 33
Overdue debts (loss fully provided for)		249,041 28
Real estate (other than bank premises)		38,647 72
Mortgages		132,074 65
Bank premises and furniture		738,057 01
Other assets		91,704 31
		$28,408,274 55

B. E. WALKER,
General Manager.

The report having been read the president said:—

PRESIDENT'S ADDRESS.

As the report, the adoption of which I am about to move, is of a less favorable character than those of recent years, a few explanatory words in addition to the report itself may be expected, although the brief statements therein made clearly cover the situation.

At the beginning of the year the rates paid for deposits were much too high, and the difficulty in changing the rate in Canada is so great that the year was more than half spent before we succeeded in getting our interest-bearing deposits down to a basis of three per cent. While this rate was justified by the rates obtainable for mercantile loans, the rates for money loaned on stocks, bonds, and such securities did not justify the payment of any interest whatever on deposits. We did not feel, however, that it was in the ultimate interest of the bank to risk the loss, by a further reduction of the rate, of any portion of that volume of steady deposits on which the business of the bank is so largely based, but this policy entailed very large loss for the moment, because while the tendency of deposits was to steadily increase, the volume of mercantile loans diminished, in consequence of the condition of business, with extraordinary rapidity, quite in excess of any former experience

Ordinarily we look to the United States for the employment of that portion of our loanable capital which we feel should not be lent in Canada, indeed should be regarded as a reserve to protect our mercantile interests in Canada, and for any further capital we are unable at the moment to loan here, either to mercantile customers or on stocks and other collaterals. During 1893, in order to take care of our customers in Canada, a large part of our funds then invested at high rates in the United States was withdrawn and lent out here. During 1894 the liquidation in Canada in consequence of the general contraction in business, to which I have already referred, caused not only the excessive advances of 1893 to be repaid, but an exceptionally large reduction of all mercantile advances from the normal volume, and when we sought to lend this surplus in the United States we were met with two difficulties. First, rates for even time money were unprecedentedly low, and second, the usual contract given by borrowers in the United States to a foreign bank to repay in gold was obtainable because there were plenty of banks there ready to lend all the money required without such a contract. There have been times when we would have lent our money without insisting on this feature, but it seemed unwise to do so when Congress was actually discussing what should be done, and showing so little disposition to do anything effective, and when rates obtainable for time money were so low. It would have been taking the risk at the most critical moment, and for a very small return in interest. In consequence we had at times several millions of money absolutely idle, and while in richer countries this is not such an uncommon thing, in this country it was in our particular experience unprecedented, and completely upset all ordinary calculations as to profits.

In looking over the balance sheet you will notice no striking changes in the liability side, but the changes on the asset side indicate the difficulties of the past year, although during the past month or two great improvement has been effected. The changes may be summed up in a few words. The cash assets, and those immediately convertible into cash, amount to 48 per cent. of our liabilities to the public, and are two million dollars larger than last year, while our mercantile loans are two millions less; this exhibits a very strong position for our depositors, but is not so profitable for the shareholders as we could wish, and we must hope that the returning activity in general business will enable us to improve the earning power of our investments. We have, I think, good reason to expect that result. There are certainly indications of improved confidence and returning prosperity, but I shall not anticipate what the general manager may have to say upon that subject by any further reference to it.

The business of the year has required more than ordinary watchfulness and care upon the part of the executive officers and the entire staff, and it affords me pleasure to say that it has had their unceasing attention. Looking to the unfavorable circumstances to which I have alluded, the diminished profits of the past year are regarded by the directors, and will be, I am sure, by the shareholders, as even more satisfactory than the larger profits of more prosperous years.

I now beg to move the adoption of the report, to be seconded by the vice-president, and the general manager will then address you.

GENERAL MANAGER'S ADDRESS.

In addressing the shareholders last year we had, as you will remember, little to say which indicated the hope that we could look forward to a satisfactory year of business. We were able to take comfort in the fact that in Canada the contraction of business was not relatively so severe as in the United States, and the idle establishments and men out of employment not so many proportionately; but the enormous fall in the prices of almost all commodities had to be borne here as well as elsewhere. If credit is not only restricted by the wholesale seller through caution, but by the retail buyer because of falling prices and small sales, and the public is submitting to rigid economy either of necessity or choice, we have that kind of hand-to-mouth trade which renders profit impossible, and contracts the volume of all transactions, legitimate or speculative, to narrow limits.

STATE OF TRADE

We had such a year all over North America, but to an extent we quite failed to foresee, and, looking back, it seems scarcely less a subject for wonder than congratulation that the business community, including the banks, has been able to maintain its position successfully and without any serious proportion of failures.

If the improvement which has taken place during the past six weeks or so is permanent, we have passed through the period of depression sooner than we expected, but it is almost certain that the margin of profit which had almost disappeared in so many lines of business, and the volume which had shrunk so seriously, will only be restored very gradually, and while we may congratulate ourselves on a much improved outlook, we had better be prepared for moderate results for some time to come. As far as our own business of banking is con-

cerned, the president has indicated some of our difficulties. In addition to the heavy loss in interest to which he referred, we suffered proportionately even more from the loss of profits from foreign and inland exchange operations, due wholly to the contracted volume of business and the excessive competition for what business there was. When the price of a manufactured article falls it does not always follow that the percentage of profit to the manufacturer falls proportionately. When the price of a raw product falls the railroad freight does not always fall proportionately, but in banking the principle works with painful certainty, as we are dealing with the money which represents the cost and not with the article itself. If a bushel of wheat is worth 50c., the interest, inland exchange and foreign exchange earned by the bank during the transit of the wheat from the farmer's hands to the point of consumption in Europe, is just one-half of what it would be if the wheat were worth a dollar a bushel. This is a matter of little moment, if there are commodities enough being manufactured or moved to employ our money, but if a tremendous fall in prices comes in one year the quantity of all commodities to be dealt in for that season is already fixed, or nearly so, the money represented by the fall in prices of all commodities is suddenly not required, and the result in bank profits must be felt at once. It is not strange, therefore, that in a year when wheat, cotton, and other great staples touched the lowest recorded prices, the rate of interest also made its lowest record.

In bearing, as we have been obliged to in America, our share of the burden arising from that series of financial events beginning with the Baring panic in 1890, and culminating, let us hope, with the low prices just referred to, our load has not been made lighter by the tariff changes in the United States and Canada, because whether the changes be good or not in their ultimate result, the immediate effect was to add still further to the losses already arising out of the general fall in prices, at least as far as holders of some classes of imported goods were concerned.

In Canada we are fortunately out of the mad current of discussion about silver, but the Canadian banker who deals as we do largely in the United States, has not only been since 1878 an anxious observer of the great questions of bi-metallism and free coinage, but he has been peculiarly perplexed during the past year as to the problem of keeping the funds of his institution invested in that country on a gold basis. If, during the panic of 1893, we treasured one hope of good to come out of that great time of trouble, it was that the folly of the free coinage of silver in the United States was forever ended; but we counted altogether too readily on the good sense of the people in those sections of the United States where unsound views have been held. Unfortunately increased difficulties in trade between Europe and the East, arising from the closing of the Indian mint, the general depression, and the great industrial growth in the East, have brought up for discussion again the subject of international bi-metallism. Perhaps, however, even this excuse was not needed to stay the hand of Congress from doing anything to promote banking reform, and remedy the chaotic condition of currency in the United States, and to remove the constant menace to trade and the national credit involved in the weakness of the treasury. In any event Congress did nothing, and having done nothing, a pamphlet or two, devoid of serious argument, but cleverly adapted to the ignorance of those who would probably read them, fanned as it were in an instant the flame of free coinage into as great a heat as ever. Perhaps all this is only a species of national education, and it is pleasant to see that business men and bankers are organizing with a determination to remove this national disgrace, and thus enable the United States to take the full advantage of the rising tide of prosperity in trade. It is strange that with the fact before them of Chili returning to a gold basis after struggling with a depreciated currency for seventeen years (just about the length of time of suspension of gold payments in the United States), public men can be found in the west and south willing to see their nation fall to the financial level of Asia.

The activity of the last month or two would seem to indicate that the tide of trade is already rising, but we want many evidences, still lacking, before we are quite convinced of this. One of the most hopeful and significant of the changes between April and June is in the employment of labor. We learn from *Bradstreet's* that in the United States 227 establishments, closed during the depression, opened up for work, that 53,400 wage-earners obtained work who were before idle, and that the wages of 178,000 employees were advanced. During this period about 36,000 employees joined various strikes, and of these about 25,000 demanded higher wages, but on the whole there has not been serious trouble from that source. The next most significant change has been the improvement in both gross and net railroad earnings. This has already been experienced to a satisfactory degree, but if the tide has really turned a much greater increase will develop during the ensuing year. Excessive competition by railroads may be a very good thing for trade, but the other result in the shape of inadequate earnings is ruinous to the financial credit of all North America, and indirectly does far more harm than the benefit by competition to trade. There is some ground for hope that the era of free railroad building in the United States, that is, building under a general railroad Act and without reference to public requirements, may be gradually checked. An Act passed in 1892 in New York State, intended to prevent the paralleling of lines or the building of railroads in localities where they are not required in the public interest, has been in one caseactually put into force.

Of less importance, because a less reliable index of the growth of actual trade in commodities, is the increase in clearing-house exchanges. The activity of the last month or two is, of course, largely speculative, and speculative transactions where no commodities change hands often swell the clearings, so that real movements in commodities cannot be traced accurately. But bearing this in mind, the improvement in the United States for the month of May, amounting to nearly 27 per cent. of an increase over the same month in 1894, the figures being only seven per cent. less than in 1893, is very gratifying. The increase for the same month in the five Canadian cities possessing clearing houses amounts to a little over ten per cent., a very satisfactory showing, as the percentage of loss from the high figures of 1893 was much less than in the United States.

When we turn to the prominent staples we cannot but be much encouraged. Wheat, which within a year touched the lowest recorded price in 250 years, is again comforting the farmer with the old charm of a dollar a bushel, an advance almost unprecedented for rapidity. Doubtless the pace has been too rapid, but there seems little reason to doubt that the new crop will be marketed at remunerative prices. Iron of all kinds had fallen a few months ago to an average of 54 per cent. of the prices of October, 1890, and had risen at the close of May to 59 per cent. It is still, however, so low, and the power of production so great, that the profit to the miners and iron manufacturers of the United States must be trifling in relation to the enormous investment of capital. Petroleum has settled back somewhat after its great advance, but the present price is stimulating production all over the world. Hides, leather, boots and shoes, and beef have all gone up together, and doubtless to some extent from the same cause. While the leather industries of all kinds sadly needed the aid of better prices, perhaps no advance is of so much importance to our own provinces as that in the price of cattle. The past few years, what with British restrictions and low prices, have been hard on the Canadian grazier, and now that there has been a substantial recovery, it is to be hoped that for the future we will have steadier and more adequate results. At the moment, however, prices have again receded somewhat Still it is fair to presume that as horses have also lately shown a decided change for the better, and attempts are being made at raising better animals, we can count on profitable returns from cattle, pigs, sheep and horses, which means a great deal for Ontario.

While the advance has not been universal, many other leading staples such as cotton, wool, etc., have participated in the change, and there can be little doubt, even if present values are not quite maintained, that the turn has come.

LUMBER.

Turning to industries in which we are more largely concerned, we have little to report of interest in connection with lumber. Those who understand the business thoroughly and have sufficient capital are thriving about as usual. In the Ottawa and other eastern districts large sales of deals have been made at good prices, and the trade in thin lumber for the same markets continues to grow rapidly. At the moment the market in England is not very satisfactory to the middlemen, but on the whole that branch of our lumber trade is fairly prosperous. The trade with the United States is not so satisfactory, for while many dealers have made large sales at average prices, there is undoubtedly some holding back by buyers until prosperity is more generally assured. Meantime our manufacturers are unwilling to make concessions in price, and stocks will doubtless move off a little slowly. Lumber in these districts has been produced at about the same cost as in recent years. There has been trouble again with low water, and estimates as high as 15 per cent. of the whole output have been made of the logs which will not come down this season. The quantity required for sawing will be readily supplied, however. It is thought that the Ottawa and Nipissing cut will be about 660 million feet board measure.

AGRICULTURAL INTERESTS.

I am sorry that for the first time we cannot speak with positive encouragement of the dairy interests of Canada. We have had rapid growth in volume and satisfactory prices for cheese for many years, but it looks as if we are to have something in the nature of a check. Owing to the severe drought of last summer the shipments, which for the first half were much larger than for the former year, fell off in the last half so that we only scored a total of 147,039,000 lbs. against 146,595,000, with a value of $14,683,000 against $14,647,000, a very trifling increase. In the United States, a slight increase, the first in some years, is shown, but they evidently still eat nearly all the cheese they make, as the total value of their export was only $6,609,000. Our success has caused the building of many new cheese factories during the past year, and in several districts where cheese was not made heretofore. This will ensure a large product, but it will be very disappointing if in these new districts lower prices should bring about discouragement. The farmer did well enough last year as to price, but the English buyers lost heavily, and still have large stocks of old cheese on hand. We are also destined to meet serious competition from New Zealand. At the moment quotations have recovered somewhat, and the dry weather in England and here may improve the price at the cost of the quantity manufactured. In cheese and pork the farmers must have prospered last year. In almost all other products the experience was very disappointing, but the changes of the last month or two have caused a feeling of great cheerfulness throughout our farming community, notwithstanding the damage by frost and dry weather. In the fruit districts the frost has certainly done very serious damage, but as far as we can learn there is likely to be no such general failure in yield as was at one time feared. Our people, however, are apt to overlook the great money value of the fruit crops in this province as a whole, and the extent to which it exceeds all other agricultural interests in the district specially adapted to fruit-growing. The outlook in this province is not uniformly good, even apart from fruit, frost having done damage to fall wheat and some other crops, but it is too early to form a definite opinion as to the general results of farming in Ontario. At the moment the prospect for hay is not good in many parts, and hay and grass are perhaps our most valuable crops. In Quebec and in the parts of our province which were not advanced too much by the early warm weather, the whole outlook is excellent.

In Manitoba and the Northwest we are experiencing one of those rapid, favorable changes which should make us less ready to grow despondent about that great country, when the changes happen to be of an unfavorable character. It is unfortunate that our feelings about this part of Canada are apt to be either unduly elated or unduly depressed. It may take more than one good crop to make the farmers easy as to debt, but one can hardly resist the conviction that their prospects were never better than at the moment. The enforced economy of the last few years has, of course, had a most damaging effect on trade for the time being, the sales by Winnipeg jobbers being twenty-five per cent. less than for the previous year. No money was made, and many lost money, as a natural result, but the benefits arising from the drastic policy which has been applied are that credits have been very much shortened as to time, and re-

stricted as to amount, that weak traders have been diligently weeded out, and stocks of goods, both in first and second hands, are very light All this has been accomplished without serious failures, the total liabilities of insolvents between Port Arthur and the Rocky Mountains being $604,984, less by $155,668 than in 1893.

During the discussions of the proposed Insolvency Bill, the merchants of Ontario and Quebec sought to introduce a section in order to prevent the sale of the stock of a failed retail shopkeeper, *en bloc*, but such things cannot easily be accomplished by legislation. It is cheerful to notice that the Winnipeg merchants have dealt with the matter in a practical manner by refusing to compromise and by reshipping such stocks to Winnipeg, where they are resold in a warehouse established for the purpose. The honest trader cannot, therefore, complain of his next door neighbor being his competitor on the unfair basis of one paying 100 cents in the dollar, and the other, perhaps, only 50 cents.

While the merchants of Manitoba are learning how to manage the problem before them, it is not to be supposed that the farmers fail to do likewise. They harvested altogether about thirty-two million bushels of wheat, oats and barley, and for about 22,000 farmers this evidences enough on the score of energy. But the prices were so low that but for their exercise of economy they would be little better off than a year ago. The manner in which they are doing their share in managing the problems before them is in diversifying farming as rapidly as possible. We had occasion last year to notice the first large shipments of cattle and the feature this was sure to make in the future. In 1894, in addition to about fifteen million bushels of wheat, about four million bushels of which took the form of flour, there were shipped east 26,826 cattle, 9,739 hogs, and 3,286 sheep. Thus far 1895 largely exceeds 1894, and the trade is already become so important that efforts are being made to establish a cattle market in Winnipeg where animals can be properly graded and fair prices and ready sale assured. Four years ago Manitoba imported pork largely. Now cattle, sheep and hogs are increasing very rapidly, and as they have had a favorable winter, we need no longer think of that part of Canada as merely a wheat country. The area of flax has trebled this year, and with the help of the unusually early spring the acreage of nearly all grain has been largely increased. In Manitoba the added acres in wheat amount to 295,380, making a total in wheat of 1,140,276 acres. Butter and cheese factories are growing in number, and the check in the price of dairy products is the only unhappy feature in the situation this season. The great milling companies are increasing the number of their country elevators, while a large elevator is being erected at Winnipeg. What with one of the most favorable seasons, thus far, on record, larger acreage, greater increase in cattle, and better prices, Manitoba is likely to prosper again, and wants population more than anything else.

Last year we took occasion to refer to the question of canals and cheaper transportation from the North-West to the seaboard. We are sorry to learn that by far the largest proportion of the wheat shipped from Manitoba went abroad by way of Buffalo during 1894. We have finished at great expense our canal at Sault Ste. Marie, and, according to a recent article in an American newspaper, while we have 2,384 miles of continuous waterway from the head of Lake Superior to the ocean, less than 3½ per cent. of the freight which, in 1894, passed the Sault was carried by Canadian vessels. The extent to which this statement may be exact is not so important as the fact that we are doing nothing to retain the carriage control of our own North-West products.

The motion for the adoption of the report was then put and carried.

Moved by Mr. H. A. Massey,

"That the thanks of the meeting are due and are hereby tendered to the president, vice-president and other directors for their careful attention to the interests of the bank during the past year."

In moving the adoption of this resolution, Mr. Massey said that he did so with more than usual pleasure. Considering the conditions under which the board has had to act during the past year, the satisfactory report they were able to present showed that they had given the conduct of the bank's affairs more than ordinary care and attention, and he was sure the shareholders appreciated their services. He had listened with much pleasure to the address of the general manager, which set forth the condition of the business of the country with great clearness.

Mr. Frederick Wyld seconded the resolution. He was glad that Mr. Massey had urged that it should not he regarded as a stereotyped vote of thanks, or as an empty act of courtesy merely, but as a vote which the shareholders felt they truly owed to the board of management. The position of a director in a bank of this magnitude is not a bed of roses, and had the board not dealt with the affairs of the bank courageously, and at the same time cautiously, the shareholders would not have been presented with so satisfactory a report.

Mr. Cox thanked the meeting for the resolution, and expressed his obligations for the kind and cordial manner in which it had been moved and seconded. The directors, he was sure, appreciated it, but he thought many of the remarks made by the mover and seconder were due to the general management and the staff rather than to the board.

Moved by Mr. R. Wilson Smith,

"That the thanks of the meeting be tendered to the general manager, assistant general manager and other officers of the bank, for the satisfactory discharge of their respective duties during the past year."

In moving the resolution, Mr. Smith said that as in the case of the preceding resolution, this vote of thanks should not be regarded as a matter of form. The past year had been a time of great depression, and was a severe test of the skill with which the affairs of the bank were managed, concerning which there could be only one opinion. He regretted the keen competition which now prevailed in banking, and which had kept the rate of interest on deposits at a higher point than it should have been. In the matter of the fidelity of bank employees, he drew a contrast with the United States, where every day witnessed defalcations of bank officials, while in Canada it was an almost unheard of thing. He thought we had reason to be proud of our record in this respect.

Mr. Hugh Ryan, in seconding the resolution, remarked that among the many things of which Toronto has to be proud were the men at the head of its banks.

Mr. Walker acknowledged the resolution. He thought that the remarks of the president, repeated year after year, regarding the share of the general management in the conduct of the bank, were altogether too flattering, since without the counsel, assistance and encouragement of the board it went without saying that no such results could be produced. There were difficulties enough to employ the minds and energies of all the members of the board, as well as of the chief executive officers. In a year like the past the staff had to work harder than ever, with less pecuniary reward than usual, and with less prospect of advancement. He had pleasure in reporting, as he hoped he always would be able to report, that there was among the membets of the staff a most satisfactory spirit, as well as a high regard for the bank, and a high ideal of the business of banking. Referring to a remark made concerning the fidelity of bank men, he thought the shareholders would be interested in certain facts respecting the Bank's Guarantee Fund, which has been in operation for some seventeen years. It was based upon a payment of one-half of the customary charge made by guarantee companies, and that for only five years instead of indefinitely, and yet the fund had grown to an extent which permitted $100,000 being taken from it a year ago for the establishment of the pension fund of the bank

Moved by Dr. Hoskin, seconded by Mr. Jas. Crathern, and carried, that the meeting do now proceed to elect directors for the coming year, and that for this purpose the ballot box be opened and remain opened until three o'clock this day, the poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered, the result of the election to be reported by the scrutineers to the general manager.

The meeting then adjourned

The scrutineers subsequently reported the following gentlemen to be elected directors for the ensuing year: Messrs. Geo. A. Cox, James Crathern, John I. Davidson, William B. Hamilton, John Hoskin, Q.C., LL.D., Robert Kilgour and Matthew Leggat.

At a meeting of the newly elected board of directors held subsequently, Geo A. Cox, Esq., was re-elected president, and John I. Davidson, Esq., vice-president.

BANK OF TORONTO.

The thirty-ninth annual meeting of the stockholders of the Bank of Toronto was held on the 19th inst. in the banking house, Wellington St.

On motion, George Gooderham, Esq., was called to the chair, and Mr. Coulson was requested to act as secretary.

Messrs. Walter S. Lee and Thos. G. Black stock were appointed scrutineers.

By request of the chairman the secretary read the following

REPORT

The directors of the Bank of Toronto beg to present to the stockholders the thirty-ninth annual report, accompanied by a statement of the affairs of the bank.

The depression in trade referred to in the last report continued throughout the year, and, combined with a steady shrinkage in the values of commodities, caused a large falling off in the volume of business. The demand for money was lessened, and the resources of the bank could not be employed to advantage. In consequence of this the statement shows a decrease in the earnings for the year.

The following is a summary of the result of the year's business:—

The net profits for the year, after making full provision for all losses, and deducting expenses, interest accrued on deposits, and rebate on current discounts, amounted to the sum of		$201,325 54
Add balance from last year.....		71,166 76
		$275 492 30
This sum has been appropriated as follows:—		
Dividend No. 77, 5 per cent. $100,000 00		
Dividend No. 78, 5 per cent. 100,000 00		
		$200,000 00
Carried forward to next year		75,492 30
		$275,492 30

The general manager and other officers of the bank have performed their duties to the satisfaction of the Board.

The whole respectfully submitted.

(Signed) GEORGE GOODERHAM,
President.

(Signed) D. COULSON,
General Manager.

The report was adopted, and the thanks of the stockholders were tendered to the president, vice-president, and directors for their careful attention to the interests of the bank during the year.

The following-named gentlemen were elected directors:—

George Gooderham, Henry Cawthra, Robt. Reford, William H. Beatty, William George Gooderham, George J. Cook, Charles Stuart.

At a meeting of the new board, George Gooderham, Esq., was unanimously re-elected president, and Wm. H. Beatty, Esq., vice-president.

IMPERIAL BANK OF CANADA.

The twentieth annual general meeting of the Imperial Bank of Canada was held in pursuance of the terms of the charter, at the banking house of the institution, Toronto, on Wednesday, 19th of June, 1895. There were present:

H. S. Howland, Thomas R. Merritt, Wm. Ramsay, of Bowland, Robt. Jaffray, T. Sutherland Stayner, Hon. John Ferguson, Rev. E. B. Lawlor, R. N. Gooch, John Stewart, David Kidd (Hamilton), G. McLean Rose, R. L. Benson, Anson Jones, N. Merritt, Jos. Whitehead, Geo. Robinson, Richard Donald, Jas. J. Foy, Q.C., Lieut.-Col. James Mason, Wm. Hendrie (Hamilton), E. B. Osler, Robt. Thomson, J. Harry Paterson, L. S. Oille, M.D. (St. Catharines), Arthur McFall (Woodbridge), Chas. Forrest (Fergus), J. G. Ramsay, Ald. John Hallam, Clarkson Jones, Charles O'Reilly, M.D., H. Sintzel, Wm. Gordon, Prof. Andrew Smith, W. B. Hamilton, J. Kerr Osborne, etc., etc.

The chair was taken by the president, Mr. H. S. Howland, and Mr. D. R. Wilkie was requested to act as secretary.

The secretary, at the request of the chairman, read the report of the directors and the statement of affairs.

REPORT.

The directors have much pleasure in meeting the shareholders, and beg to submit the twentieth annual balance sheet and statement of profits for the year ended 31st of May, 1895.

Out of the net profits of the year, after making full provision for all bad and doubtful debts, maintaining the fund to cover rebate on unmatured discounted bills, and after laying aside the annual contribution to the officers' and employes' guarantee fund (authorized under by-law 15).

(*a*) Two half-yearly dividends at the rate of eight per cent. per annum, and a bonus of one per cent. for the second half year have been paid.

(*b*) Bank premises account has been credited with $25,000.

The profits of the bank for the past year have suffered somewhat from a long spell of easy money and from a general dullness in trade, accompanied by low prices for almost all commercial products, particularly for those of the soil; it is gratifying to know that an improvement has set in both in trade and in prices. The bank, as is evident from the subjoined statement of its affairs, is in an excellent position to avail itself of any further revival in business.

Your directors would recommend that the unsubscribed capital stock of the bank, amounting to 364 shares, be disposed of at an early date, and in accordance with the provisions of the Bank Act.

Premises have been secured in Vancouver, and a branch of the bank will be opened in that city in the course of two or three months.

All of which is respectfully submitted.

H. S. HOWLAND, President.

STATEMENT OF PROFITS FOR THE YEAR ENDING 31ST MAY, 1895.

Balance at credit of account, 31st May, 1894, brought forward		$ 32,638 27
Profits for the year ended 31st May, 1895, after deducting charges of management and interest due depositors, and making full provision for all bad and doubtful debts		203,600 88
		$236,239 15
From which has been taken:		
Dividend No. 39, 4 per cent. (paid 1st December, 1894)	$78,469 60	
Dividend No. 40, 4 per cent. (payable 1st June, 1895)	78,544 00	
Bonus of one per cent. (payable 1st June, 1895)	19,636 00	
		176,649 60
		$ 59,589 55
Written off bank premises and furniture account		25,000 00
Balance of account carried forward		$ 34,589 55

Rest Account.

Balance at credit of account, 31st May, 1894		$1,152,252 00
Premium received on new capital stock		4,548 00
Balance of account carried forward		$1,156,800 00

TWENTIETH ANNUAL BALANCE SHEET, 31ST MAY, 1895.

Liabilities.

Notes of the bank in circulation		$1,133,544 00
Deposits not bearing interest	$1,476,594 45	
Deposits bearing interest (including $42,502.22, being amount of interest accrued on deposits receipts to date)	7,932,885 25

D. R. WILKIE, Cashier.

The scrutineers subsequently reported the following shareholders elected directors for the ensuing year: Messrs. H. S. Howland, T. R. Merritt; Wm. Ramsay, of Bowland; Robert Jaffray, Hugh Ryan, T. Sutherland Stayner, Hon. John Ferguson.

At a subsequent meeting of the directors, Mr. H. S. Howland was re-elected president, and Mr. T. R. Merritt, vice-president for the ensuing year.

By order of the board,

D. R. WILKIE, Cashier.

Toronto, 19th June, 1895.

BANK OF HAMILTON.

The twenty-third annual general meeting of shareholders was held in Hamilton on Monday, the 17th inst. There was a good attendance. The president, Mr. John Stuart, occupied the chair.

The following report and statement were submitted to and adopted by the shareholders:—

REPORT.

The balance and credit of profit and loss account, 31st May, 1894, was		$5,109 79
The profits for the year ended 31st May, 1895, after deducting charges of management and making provision for bad and doubtful debts, are		110,709 59
		$115,819 38
From which have been declared:—		
Dividend, 4 per cent., paid 1st December, 1894	$50,000 00	
Dividend, 4 per cent., payable 1st June, 1895	50,000 00	
Written off bank premises account	5,000 00	
		$105,000 00
Balance of profit and loss carried forward		$10,819 38

The reduced earnings are fully accounted for by the prevailing dullness of trade, and consequent inactive demand for money, the effects of which have been universally felt.

JOHN STUART,
President

Hamilton, 8th June, 1895.

J. TURNBULL,
Cashier.

Bank of Hamilton
Hamilton, 31st May, 1895.

The customary votes of thanks to the directors and officers were unanimously passed.

The board was re-elected as follows: Messrs. John Stuart, A. G. Ramsay, John Proctor, George Roach, A. T. Wood, A. B. Lee (Toronto), and Wm. Gibson, M.P. At a subsequent meeting of the directors, Mr. John Stuart was re-elected president, and Mr. A. G. Ramsay, vice-president.

UNION BANK OF CANADA.

The thirtieth annual general meeting of shareholders of this institution was held at the banking house, Quebec, on Saturday, June 15th, 1895.

There were present: Messrs. A. Thomson, Hon. E. J. Price, D. C. Thomson, Edmond Giroux, James King, M.P.P., John Breakey, E. J. Hale, W. H. Carter, Hon. John Sharples, John Shaw, T. H. Dunn, C. P. Champion, Arthur R. Henry, J. H. Simmons, Gaspard Lemoine.

The president, A. Thomson, Esq., took the chair, and requested Mr. J. G. Billett to act as secretary, and Messrs. C. P. Champion and John Shaw as scrutineers, which was agreed to. The chairman read the report of the directors, which was as follows:

REPORT.

The directors beg to submit a statement of the liabilities and assets of the bank at the close of the financial year, ending 31st May last—also the following statement of the result of the business for the past year

PROFIT AND LOSS ACCOUNT, MAY 31ST, 1895

Balance at credit of Profit and Loss account on June 30th, 1894	$1,196 67	
The net profits for the year after deducting expenses of management, reserving for interest and exchange and making appropriations for bad and doubtful debts, have amounted to	79,486 91	
	$80,683 58	
Which has been appropriated as follows		
Dividend No. 56, three per cent	$36,000 00	
Dividend No. 57, " "	36,000 00	
Balance carried forward	8,683 58	
	$80,683 58	

Owing to the depressed condition of trade, the profits of the past year show a considerable decrease from those obtained in the previous year.

Branches have been established at Virden, Manitoba, and at Norwood and Shelburne, Ontario, from which satisfactory results have been obtained.

The usual inspection of the head office and branches of the bank has been made during the year.

A. THOMSON,
President.

Quebec, June 15th, 1895.

E. E. WEBB,
General Manager.

Quebec. May 31, 1895.

The adoption of the report was moved by Mr. A. Thomson, seconded by Hon. E. J. Price, and carried.

Moved by W. H. Carter, seconded by T. H. Dunn, "That the thanks of the shareholders be given to the president and directors for their valuable services during the year."—Carried.

Moved by J. H. Simmons, seconded by John Shaw, "That the thanks of this meeting are due and are hereby tendered to the general manager, managers and other officers of the bank, for their careful attention to its affairs."—Carried.

On motion of Hon. John Sharples, seconded by Gaspard Lemoine, the meeting proceeded to the election of directors for the ensuing year. The scrutineers reported that the following gentlemen were elected directors of the bank for the ensuing year: Messrs. John Breakey, E. Giroux, E. J. Hale, James Hale, James King, M.P.P., Hon. E. J. Price, A. Thomson, D. C. Thomson.

Votes of thanks to the chairman for presiding, and to the scrutineers, terminated the proceedings.

J. G. BILLETT,
Secretary.

At a subsequent meeting of the new board of directors, A. Thomson, Esq., was re-elected president, and Hon. E. J. Price, vice-president of the bank.

STANDARD BANK OF CANADA.

Report of the directors submitted to the shareholders at the twentieth annual meeting, held at the head office of the bank, 19th June, 1895.

REPORT

The directors have pleasure in presenting the statements of the bank for the year ending 31st May, 1895

Considering the low value of money the profits were satisfactory, and after paying the usual half-yearly dividends of 4 per cent each, the sum of $21,520 43 is carried forward at credit of Profit and Loss account, making the balance of that account now $24,463 61.

Your directors have to regret the removal by death during the past year of one of their colleagues, Dr G. D. Morton, who had been a director of this bank since its inception

The vacancy on the board caused by the death of Dr. Morton, was filled by the election of Mr. James Scott, of the Georgian Bay Lumber Company

A neat and substantial building has been erected at Chatham, Ont., where the increased business of the bank, and the difficulty of obtaining suitable premises, made this outlay necessary.

The head office and agencies have been carefully inspected during the year, and the directors are pleased to express their satisfaction with the manner in which the various officers of the bank have performed their duties

Mr. George P. Reid, late assistant manager, who has been in the service of the bank for 20 years, was appointed in June last to the position of chief officer of the bank, made vacant by the death of Mr. J. L. Brodie. All of which is respectfully submitted

W. F. COWAN,
President.

GEO. P. REID,
General Manager

Toronto, 31st May, 1895

The usual votes of thanks to the directors and the various officers were passed.

The scrutineers declared the following directors unanimously re-elected for the ensuing year: Messrs. W. F. Cowan, John Burns, W. F. Allen, Frederick Wyld, A. J. Somerville, T. R. Wood and James Scott.

The directors at a subsequent meeting re-elected Mr. W. F. Cowan, president, and Mr. John Burns, vice-president.

HOCHELAGA BANK.

The twenty first annual meeting of the shareholders of the Hochelaga Bank was held in Montreal, at noon on Saturday, 15th June, 1895.

Mr. F. X. St. Charles was called to the chair and Mr. M. J. A. Prendergast was requested to act as secretary.

The twenty-first annual report was then read as follows:—

REPORT.

In submitting the result of the operations of the fiscal year, ending on the 31st of May last, your directors are happy to congratulate you on the Bank of Hochelaga having attained its majority

If its infancy was a little stormy, its youth was more calm, and with the experience and wisdom of years we are permitted to entertain modest hopes for its mature age.

In short, for about five years the bank has been able not only to continue to pay reasonable dividends, but it has been able gradually to extend its field of operations, carrying in all $220,000 to its Reserve fund, which is now $320,000, being 40 per cent. of its capital of $800,000. In the same period it has created a fund of $20,000 for the guarantee of its officers and employees.

Also, we may mention in passing, that the new stock, issued in August last, was promptly subscribed, all by our shareholders, and the premium realized on this stock has contributed to the Reserve fund.

This issue of stock was rendered necessary by the fact that for several years we were forced to periodically restrict the expansion of our circulation in order to keep within the limits prescribed by the Banking Act.

Last year we announced to you the opening of a new branch for Notre Dame street west. This branch has been in operation several months, and we have reason to believe that it will make satisfactory progress in the near future.

In order to meet a desire expressed in a petition signed by a number of the leading citizens of the St. Louis ward, we have decided to open at an early date another branch on St. Catherine street, near Sanguinet street, making the total number of branches ten.

You will see by this that your bank, although it has barely attained its majority, has already established a sufficiently numerous family, of which the different branches do their best to consolidate the bank's position, and extend its business.

The accounts, as well as the securities of all sorts, not only at the head office, but also at the branches, have been verified in the course of the year.

A glance at the profit and loss statement, as well as at the statement of affairs which we present, will advantageously prove the actual position of the bank.

STATEMENT OF PROFIT AND LOSS FOR THE TWELVE MONTHS ENDING 31ST MAY, 1895.

Credit.

Balance to the credit of profit and loss, 31st May, 1894	$ 3,922 78

ADDRESS OF THE GENERAL MANAGER.

The general manager said: Gentlemen, the president having discussed about every question that has any bearing upon the official report of the bank, I will limit my remarks to a few observations of equal interest on the state of affairs in general. During the past two years we have passed through a crisis of extreme gravity; this is admitted by all. In times of commercial and financial crisis, as in times of war, each one gives the main cause, if not the one cause of his financial troubles, that which he feels most directly. It is needless to say there is a variety of causes given, but if this proves that in general the causes of the different crisis are many, we are not less in a position to realize that the immediate cause of the greater number of failures in the Dominion of Canada is the want of sufficient capital, viz., that a great number of persons engage imprudently in business without possessing the necessary capital for the operations they are going to engage in. At the time of your general meeting in 1893 I submitted for your consideration the following reflections: "I will undertake the liberty of pointing out an abuse against which we should do all in our power to counteract. I refer to the abuse into which certain merchants and manufacturers fall in wishing to show an exaggerated volume of business compared with their capital, and which consists in obtaining several lines of credit at different banks, and thus making the latter furnish the capital they themselves do not possess. An eminent American banker compares the inevitable result of such a state of things as that which an attempt to construct an inverted pyramid would obtain. It is quite evident that for stable business, as for stable construction, a solid foundation is required, and for business a sufficient capital."

Bradstreet's Commercial Agency, in its remarkable work of compilation, establishes that during 1894, out of 1,490 failures that took place in Ontario and Quebec, 1,141, that is seven-tenths, are the result of a want of sufficient capital.

Having the honor to speak before a body of men where capital and influence are very considerable, I have thought it would not be out of place to call their attention once more to this point in order that they might use all their power to counteract an abuse the consequences of which are becoming more and more serious.

The statement of the bank shows once more that your direction continues its policy of prudence in holding a strong reserve, not only in the treasury, but in assets that can be realized at will. Besides the want of confidence which we meet with in our local business, we still feel the effects of the American crisis, as in fact we expressed the fear of it at our meeting of 1893. It is true that certain authorities, perhaps optimistic, see in the recent rise in wheat, cattle, metals, etc., indications of a near return of prosperity. I must also admit that the amount exchanged between the banks and the Montreal Clearing House from the 1st of January, 1895, to date, is $247,000,000, against $232,000,000 for the corresponding period of 1894, or an increase of $15,000,000 in favor of 1895. Therefore, this gradual and constant expansion which appears in the United States, as well as in Canada, is generally regarded as of good augury, inasmuch as a like recovery of activity in industrial life is remarked. I would like to be able to say that I share this confidence entirely, but it is impossible to ignore the fact that the rise in the price of articles of first necessity, instead of being caused by the firm demand of these articles, might only be the result of the manipulations of certain speculators, who for a number of years bring about a rise and fall according to the exigencies of the moment.

At all events let us gather from these crises that we pass through lessons of prudence, and above all of economy. Let us learn to regulate our expenses according to our means, and to proportion our business to our capital. Lastly, as a grain of consolation, let us not forget that if we cannot avoid these periodical crises, caused altogether by the instability of human character, and of human affairs (for, as the American humorist expresses it, there is a good deal of human nature about man), these crises are always followed by a period of recuperation of greater or less length, which are followed by a period of prosperity. This march is constituted by means of statistics collected by careful observers. Have we passed through the first two periods, and are we on the eve of entering the third? Let us hope so.

Moved by Mr. F. X. St. Charles, seconded by Mr. R. Bickerdike, that the report just read be adopted. Carried.

Moved by Mr. R. Forget, seconded by Mr. James Price, that the thanks of the shareholders are due to the president, vice-president and directors for their excellent administration of the affairs of the bank during the financial period which has just terminated. Adopted.

Moved by Mr. A. David, seconded by Mr. E. Hurtubise, that a vote of thanks be also tendered to the general manager, the assistant manager, and the other officers of the bank for the zeal which they have displayed in the accomplishment of their respective duties. Adopted.

Proposed by Mr. J. P. Lebel, seconded by Mr. J. L. Coutlee, that the meeting proceed to the election of directors for the bank. Carried.

After counting the ballots, the scrutineers reported as follows:

"We, the scrutineers duly named at the annual meeting of the shareholders of the Bank of Hochelaga, this day declare the following gentlemen elected directors of this bank for the current year, namely: Messrs. F. X. St. Charles, R. Bickerdike, Chas. Chaput, J. D. Rolland, J. A. Vaillancourt.

"Montreal, 15th June, 1895.

"(Signed)

"E. Cunningham,

"F. Dubreuil,

"Scrutineers."

Moved by Mr. Cunningham, seconded by Mr. F. Dubreuil, that the report of this meeting be printed and distributed to the shareholders for their information. Carried.

The meeting then adjourned.

At a meeting of the directors held subsequently, Mr. F. X. St. Charles was re-elected president, and Mr. R. Bickerdike was re-elected vice president for the current year.

NEW GEORGIAN BAY STEAMER.

"A magnificent steamer," was the general verdict of about eight hundred guests, more than a car load being from Toronto, who had enjoyed the trial trip of the new steamer "Majestic," from Collingwood, and who were handsomely entertained by the Great Northern Transit Company while she coasted around the Christian Islands. The sail was a delightful one of nearly six hours. A feature of the trip was the presentation by Mayor Callary, on behalf of the citizens of Collingwood, of a complete set of colors consisting of some fifty flags. In reply President Keogh expressed the thanks of the company for the very handsome gift.

[We are compelled to hold over until next week the report we had prepared of the steamer and her trial trip.[

LIFE AGENTS' PHYSIOGNOMIES.

While we do not say there is nothing in physiognomy, we do remember that one of the loosest rascals we ever knew had a face like an angel. Ever since that experience it has often occurred to us that it was best to "go slow" when disposed to choose people on good faces alone. But a certain Mr. James B. Edmeston writes to a London insurance journal offering reference and advice to inspectors of agents. He considers it "very beneficial for a canvasser for fire and life business, and inspector of agents, to have a knowledge of physiology and physiognomy. By being well versed in this science you have an opportunity of summing up your man and finding whether you can talk him over, or to the contrary, when you need not waste your time over him. In trying to obtain his insurance, or in appointing agents, you can soon see by his face if he is a likely man to persevere for business. To make a good agent, he must have the following points prominent: Hope, language, perseverance and suavity. The physiognomy definitions are: Hope elevates the centre of the eyebrow, opens the eyes wide and turns them upward. Language, a development is indicated by prominent eyes. Perseverance, if the eyebrows are well arched at the outer end. Suavity, agreeableness, corners of the mouth inclined upwards. After having found these points in a person's face, you want a man you can trust; you invariably find it in one whose eyebrows are straight over the bridge of the nose."

Now, as to the man who possesses "steam" *or motive* power, so important in an agent, Mr. Edmeston says: "The crowning point of all, you must have an energetic man. Well, you will find it in the motive temperament; the figure is generally tall, the face long, the cheek bones high, the front teeth large, the neck rather long, and complexion sallow. Persons in whom this temperament predominates possess great energy, physical power, and capacity for work. They are men for the field rather than the council chamber; as speakers they use strong expressions, emphasize many words, and talk to the point, hitting the nail on the head with a heavy blow. In appointing an agent of this description he cannot help working for the benefit of his employer, and as there is plenty of scope for the right man, he should not be restricted to any redtapeism, which the large insurance companies are gradually getting into; but, if a capable man, allowed to work his own way, and nine times out of ten he will be successful. With these tips brought forward, it rests entirely with the inspector whether he gets good business from an agent or not for his company." Our readers may believe as much of this as they please.

THE CANADIAN SAULT CANAL.

The opening of the new Canadian canal at the St. Marie rapids, between Lake Superior and Lake Huron, took place on the 13th inst., and instead of a great gathering of legislators, etc., the proceedings on the occasion were of mere formal character. The contracts for the canal and lift locks were let in November, 1888, and those of the entrance works in January, 1889. Water was first admitted to the lock on September 25, 1894. The total length of the canal across St. Mary's Island is 4,000 feet, or from eastern to western extremities of the piers, about 6,000 feet. With the approaches the total distance is about three and a half miles. The lock chamber is 900 feet long, 60 feet wide, with depth of water sufficient to pass vessels of 20 feet draught at the lowest recorded stage of water below the lock. The lock fills in nine minutes, and can be emptied in seven and a half minutes. The canal proper has a surface width at low water level of 152 feet, and a bottom width of 145 feet. At a point about 1,500 feet above the lock it is crossed by a swing bridge, over which the railway systems of Canada and the United States find accommodation. The works, altogether, cost about $4,000,000.

—A society for the suppression of scandal has just been started at Insterburg, in East Prussia. Every scandalous story spread in the town will be traced, and the originator prosecuted by the society.

—Two million francs is the appropriation for sports at the Paris Exposition of 1900 The events will include athletics, fencing, shooting, ballooning, and horse and bicycle racing.

WHEN TO SHOOT A BURGLAR

In the *Barrister* is an article on "The right to shoot a burglar," which is summed up in concluding, with these words: To justify a person in shooting a burglar—First, it must be necessary; or, in other words, the only way of preventing the felonious intent. Second, to shoot without first inquiring his purpose, "there must be circumstances calculated to arouse the fear of a reasonable man, indicating a danger so urgent or so pressing as to excuse the instantaneous use of a deadly weapon."

LA BANQUE NATIONALE.

As the condensed statement of the Profit and Loss Account of this bank given on page 1,622 of our last issue may not show with sufficient clearness its operations for last year, we give herewith the Profit and Loss account in full, taken from the Quebec *Chronicle* of 23rd May:

PROFIT AND LOSS ACCOUNT.

Balance at credit of Profit and Loss Account, on 30th April, 1894		$7,337 08
Rest Account		30,000 00
Rebate on discounts		30,000 00
Profits for the year, after providing for accrued interest on deposits		122,239 85
		$189,576 93
Appropriated as follows:		
Bad and doubtful debts	$140,412 80	
Contingent account	31,250 00	
		171,662 80
Balance at credit of Profit and Loss		$17,914 13

—The annual meeting of the Parrsboro Shore Telephone Company was held at Port Greville on Wednesday, and the business showed very satisfactory results for the year.

THE Stratford Board of Trade had a monthly meeting the other evening, when a communication regarding the establishment of a wagon factory was referred to the committee on manufactures. The following compose the standing committees of the board: Finance—Messrs. Plummer, W. C. Young, Hopkirk, Barnsdale. Railways, etc. — Messrs. Dufton, Caven, Hodd, McLagan, McIlhargey. Manufactures—Messrs. McLagan, Dufton, Gordon, J. R. Macdonald, Thiel. Mercantile Interests—Messrs. Duggan, W. J. Ferguson, Walsh, Jeffrey, Scott. Local Improvements—Messrs. Barnsdale, Buckingham, Young, Burritt, Gadsby. Industrial Fairs, etc.—Messrs. Caven, D. Ferguson, Gordon, McPherson, O'Donoghue.

BRITISH WOOD MARKET.

The monthly Liverpool circular of Farnworth & Jardine, dated 1st June, 1895, says that the arrivals from Canada during May were 14 vessels, 14,842 tons, against 8 vessels, 3,929 tons, during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1893, 1894 and 1895 has been 87,750, 72,626 and 75,406 tons respectively. The circular goes on to state as follows: "We have little change in our market to report; imports generally have not been heavy, and the deliveries about an average at this season of the year; values of most articles continue low, although there is a slightly better feeling.

"Canadian Woods.—Of waney the arrivals have consisted of a large steamer shipment, which has gone direct up to Manchester and is all going into consumption; there is no change in value to report. *Square Pine*—The demand is very limited, and the stock is moderate. Red pine moves off very slowly, and prices rule low. Oak has been in fair request, but there is no change in value, and the stock is sufficient. *Ash*—The arivals have again been large from the United States ports; the deliveries have been fair, but the stock is accumulating, and is now too heavy. *Elm*—There has been little enquiry, prices are steady, and the stock is moderate. Pine deals have come forward too freely, and prices have given way, owing to the extreme low rates of steamer freights; the stock is much too heavy.

"New Brunswick and Nova Scotia Spruce and Pine Deals.—Of spruce the arrivals have been 2,980 standards, against 441 standards same time last year; most of the import is going direct from the quay into consumption, and although the stock is still too heavy there is rather a better feeling, and prices are steady.

"Birch.—Of logs the import has been too heavy; however, there has been a fair enquiry, and prices are steady; the stock is ample. Birch planks have not been imported; prices still rule exceedingly low, and the stock still too heavy.

"United States Oak.—The arrivals have consisted of a few small parcels by steamer; it is difficult of sale, and prices rule very low. *Oak Planks*—The arrivals continue on a large scale, but the deliveries continue fair and prices are unchanged; the stock is moderate.

"Pitch Pine.—The arrivals during the past month have been 5 vessels, 4,879 tons, against 4 vessels, 5,406 tons, during the same time last year. Of hewn there have been two parcels; there has been a good consumption, but values are rather easier and the stock is ample. Of sawn the arrivals have been by six different vessels from various pitch pine ports; there has been an improved consumption; the stock has been considerably reduced, though prices are still very low. Planks and boards have arrived freely and there has been a fair consumption; stocks are too heavy.

"Sequoia (California Redwood). — The large cargo recently arrived is sufficient to supply the market for some time to come; the demand is very quiet, and no recent sales have taken place.

"British Columbia and Oregon Pine.—The demand continues very languid; there is no change in value to report; the stock is still too heavy.

"United States Staves.—The arrivals have again been on a large scale; stocks are ample, and values unchanged.

"Baltic and European Woods.—The arrivals during the past month have been 23 vessels, 11,290 tons, against 25 vessels, 13,898 tons, during the like time last year. Of fir timber two cargoes have arrived from Danzic, which are going fairly into consumption; the stock, however, is too heavy. Red and white deals continue in dull demand, without change in value; the stock is still much too excessive; flooring boards have come forward more moderately; the deliveries have been large; the stock is now in a more moderate compass; there is no change in value to report. Mast and spars have not been imported."

—"The rulings of the courts on questions of insurance are getting to be about as varied as are the opinions of the doctors, medical and theological." So says the *Investigator*.

—A bulletin just issued says that there are 174,579 agents (claim, commission, insurance, real estate, etc.) in the United States. Of this number 4,875 are women.

CANADIAN FIRE INSURANCE BUSINESS FROM AN ENGLISH POINT OF VIEW.

The following letter from a general manager of a fire insurance company in England to the general manager of another company, is printed by the *Insurance and Finance Chronicle:*

Dear Sir,—We are favored with your letter of the 25th inst., and note with interest that you are expecting a visit from your Canadian manager, and your kind promise to advise us of the results of your deliberations with that gentleman, for which we are obliged.

We should like, however, to avail ourselves of this opportunity to express our general feeling of uneasiness in regard to Canadian business as a whole. We find from our own experience, which is only confirmed by comparison with the figures of other offices, that the business even in favorable years is not of that particularly remunerative character that it will stand the strain of the disastrous years which recur from time to time with an alarming regularity. We consider that a business so exposed to conflagration hazard that losses of abnormal dimensions have to be reckoned with as certain to recur every few years, should produce an income commensurate to the liabilities involved, and that such is not the case implies, in our opinion, a rottenness in the whole system of insurance, as practised in British North America generally, which can only lead to final and serious loss for the companies engaged there.

With regard to Toronto, which has recently proved such an unfortunate ground for the fire insurance companies, we sincerely trust that notwithstanding any argument which your representative there may advance to prove the eligibility of the city from his point of view, you will bear in mind the fact that companies doing business there have seen their premium income of that place wiped out for many years by the recent frequent and disastrous fires.

Trusting that the consultations you are about to have with your Canadian manager may be productive of future benefit, and that the companies doing business in the Dominion will combine to improve matters generally, we await the favor of your promised communication in due course, and remain,

Yours very truly,

* * *

A LONG BUSINESS CAREER.

Hiram Walker, the veteran distiller, has at last laid down the reins of business government, and will cease to have any controlling interest in the mammoth concern at Walkerville built up by his indomitable energy in thirty or forty years. He is in his seventy-ninth year, and rather than make a will which might cost the estate thousands of dollars in law costs, he has deeded all his property to those whom he would name in his will. A deed was filed for record in Detroit on Saturday, 8th June, which conveys all the vast property of Hiram Walker in that city, amounting to a million, to his three sons, Franklin H., J. Harrington and E. Chandler, the consideration being $1. The conveyance, which is by joint deeds, includes everything the grantor possesses, including household furniture, and is absolute. Mr. Walker, however, retains a life lease in the whole. To his nephew, ex-mayor H. A. Walker, of Walkerville, who has always been a prime favorite with the old gentleman, he has given the Labadie farm of 145 acres, estimated to be worth $45,000. The property lies just outside Walkerville proper in Sandwich East, and each of the twenty acres on the river front is valued at $1,000. Mr. Walker's possessions in Essex county are valued at from seven to eight millions of dollars, and are also similarly dealt with. He has one daughter, Mrs. Buhl, of Detroit, and she is as liberally provided for as the sons.—*Amherstburg Echo.*

—"I wondher," said Mr. Dolan, "is it thrue that whisky'll cure a shnake boit." "Av coorse it's thrue," replied his companion. "An' there's no doubt at all about whiskey makin' a mon see shnakes?" "Divil a bit." "Phat's the matter wid yez?" "Oi've dishcovered perpetual motion!"—*Washington Star.*

MONTREAL MARKETS.

MONTREAL, June 19th, 1895.

ASHES.—Receipts of pots are small, and no lots of any consequence are known to be in the interior to come forward; several fair lots of pearls have come to hand recently. We quote first quality pots, $4.10 to 4.15; seconds are scarce and a little firmer at $3.85. Pearls are easier, sales having transpired at $5.40. The stock at date is 93 pots, 38 pearls.

CEMENTS AND FIREBRICKS.—In cements values are stiffer this week, European makers having advanced quotations. The local asking prices now are $1.90 to 2.05 for British, and $1.80 to 1.95 for Belgian. While no large lots are moving, but a fair aggregate of moderate orders is reported. Firebricks are in good request at $15 to 20 per M.

DAIRY PRODUCTS.—Shipments of cheese across the Atlantic continue to show a material falling off from last year's figures. Last week's shipments were 44,753 boxes, as compared with 74,443 boxes for the corresponding week of 1894. The shipments of butter last week amounted to only 157 pkgs. Prices of cheese are, if anything, a shade easier than a week ago, buying being done at 7 to 7½c. Butter values do not improve, 15 to 16c. being the quotation for choice creamery; townships dairy 13 to 14c. Eggs, 10½c. per doz.

GROCERIES.—We hear of nothing very startling to be noted, and a steady, moderate movement is about the general experience. Circular advices from Japan just received report a fairly active market, but business done is much behind last year at date. The total shipments from Yokohama and Kobe at date of writing are reported at 1,610,426 lbs., as compared with 2,403,484 at same date last year, while the shipments for Canada were 132,271 lbs., as compared with 214,465 last year at same date. A consignment of 47,800 lbs. by the "Tacoma" is now on the rail for Canada. The quality of the crop is perhaps not so good as last season, the leaf is poorer, and has been somewhat

Greatest variety of patterns and largest stock in Canada

affected by the weather, but cup quality is fairly good. Freight rates are easier at one cent per lb. gross by steamer, and some agents of Japan houses here are consequently not quite so stiff in prices. Sugars are quiet at last week's figures. Outside lots have not been wholly used up yet, and refiners do not report much demand, but expect a livelier enquiry by the 1st prox. Factory prices are stiff at 4¼c. per lb. for granulated, and 3¾c. lowest for yellows, but aforementioned outside lots of granulated are still offering at 4⅛c. Granulated in New York is quoted at 4 7-16c. Molasses rules firm at 37c. per gal. for Barbadoes in a jobbing way; Porto Rico 34 to 36c., as to quantity, and reported very good value. The first cargo of new rice arrived last week. The paddy is reported of excellent quality, and deliveries of new milled rice will be made in a few days. Quotations are, standard B., $3.45; Japan standard, $4.25 to 4.40; crystal Japan, $4.75 to $5; Patna, $4.50 to $5. Quotations for new pack salmon have been received as follows: B.A., $4.50; Clover Leaf talls, $4.65, prices rather stiffer than the opening figures last year. The circular says the run is expected to be light.

HIDES.—The situation is not greatly changed since a week ago; prices keep up stiffly, and it is claimed that sales have been made of No. 1 hides to tanners at rather more than 9½c. per lb., but there are a few who profess to believe that the limit has now been reached, and these are not so anxious to hold as heretofore. Dealers continue to pay 8½c. for No. 1, light and heavy; calfskins, 8c.; lambskins, 25 to 30c. each; sheepskins, 75 to 80c. each.

LEATHER.—June is generally a dull month in the leather trade, and dealers find it hard to do business at the advanced prices, which, however, are pretty firmly adhered to, though some commission men think that tanners who hold their splits at 30 cents, and slaughter sole at similar figures, are extreme in their views. An American leather man from Milwaukee has been in town for a few days past, feeling the way to make sales, and though it is not generally known what his figures are, it is thought in some quarters that certain lines of American leather can be sold here at something under our quotations. A large shoe manufacturer is said to have recently bought some moderate lots of American calf and grain, the quality of which he reports as superior, and price satisfactory. We quote:—Spanish sole B.A., No. 1, 26 to 27c.; do. No. 2 to B.A., 25c.; No. 1 ordinary Spanish, 24 to 25c.; No. 2, 22 to 23c.; No. 1 slaughter, 28 to 30c.; No. 2 do., 26 to 27c.; common, 22c.; waxed upper, light and medium, 35 to 40c.; do. heavy, 33 to 36c.; grained, 38 to 40c.; Scotch grained, 38 to 40c.; western splits, 26 to 28c.; Quebec do., 20 to 22c.; juniors, 16 to 19c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 15 to 16c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 13 to 16c.; extra heavy buff, 17c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c

METALS AND HARDWARE.—A fair assorting business is reported in harvest tools and other seasonable goods, but in heavy metals the hot weather has apparently caused slackening of the demand, and no important transactions are to be noted. Pig iron is firm at quotations, also domestic bars at the recent advance. Terne plates have been sold at $5.50 in fair quantity, but Canadas and tin plates are very steady here, and firmer in Britain. Galvanized sheets also will cost more to lay down, but local quotations have not yet been altered. Hoop iron is dearer at $2.15. Spelter is advanced, and $4.25 is now the lowest price. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $19.00 to 20.00; Eglinton, $18.00; Gartsherrie, none here; Carnbroe, $18.00; Shotts, none here; Middlesboro, No. 3, $17; Niagara, No. 2, $18.00; Siemens, pig, No. 1, $16.00 to 16.50; Ferrona, No. 1, $16.00 to 16 50; machinery scrap, $14.75 to 15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00, 52 sheets to box, 60 sheets $2.10 to $2.15, 75 sheets $2.20 to $2.25; all polished Canadas, $2.50; Terne roofing plate, 20x28, $5.50 to 5.75. Black sheet iron, No. 28, $2.10 to 2.15; No. 26, $2.00 to 2.05; No. 24, $1.90 to 1.95; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, according to finish; P. D. Crown, $3.75; do., I.X., $4.50; Coke I. C., $2.70 to 2.80; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4¼ to 4⅜c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, 1.50; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 9½ to 10c.; lead, per 100 lbs., pig, $3 to $3.25; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 9 to 10c.; toe calk, $2.25; spring, $2.50; tire and sleigh shoe, $1.85 to 1.90; round machinery steel, $2.50; ingot tin, 17c.; bar tin, 18c.; ingot copper, 10½ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4.25; American do., $4 to 4.25. Antimony 9 to 10c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—A fair steady business is still reported, and prices are pretty firm generally. Linseed oil is stiff at quotations, and supplies are still limited. The cutting in turpentine in the west is not so bad as it was, but is still complained of. Stocks of castor oil are low on spot, but some new supplies are near at hand. Fish oils are seldom heard of and rule dull. Receipts of glass are far behind the usual figures, two steamers now in port having moderate lots. Dry leads are firmer, owing to advance in England. We quote:—Turpentine 47c. per gal. for single brls.; two to four barrels, 46c.; 5 brls. and over 45c. Linseed oil, raw, 57c. per gallon.; boiled, 60c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6¾c.; single cases, 6¾c.; tins, 7c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. These prices are wholesale by the car-load.

WOOL.—Manufacturers have not yet been booking many orders for next spring's goods, and are consequently light buyers of wool. Some moderate lots of domestic are said to have been sold to the United States. We quote: Cape, 13½ to 15c.; Natals, 15 to 16c.; B. A. scoured, 25 to 31c.; Australian, 14 to 14½c., but very little here; domestic fleece, 18 to 21c.; pulled supers, 20 to 21½c.; extra, 23 to 26c. per pound.

TORONTO MARKETS.

TORONTO, June 20th, 1895.

DRUGS.—Trade has been very good throughout the week. The outlook is hopeful amongst the retailers. No general advance in prices can be reported, but rather a reduction in most staples. Camphor is very firm, and so is Paris green. Both are at advanced figures. Glycerine has advanced. Opium is easy and dull. Collections are said to be coming in fairly well.

GRAIN.—The decline in wheat still continues. Quotations average about three cents per bushel less than they did last week. Oats also show a decline of three cents. Prices for barley and peas remain unchanged.

The stocks of grain in store at Port Arthur on June 8th were 184,498 bushels. During the week there were received 86,532 bushels, and shipped 10,433 bushels, leaving in store on 15th June, 260,597 bushels.

New York, June 19.—Special cable and telegraphic despatches to Bradstreet's, covering principal points of accumulation in the United States, Canada and Europe, together with supplies afloat for Europe from all sources, indicate the following changes in available stocks last Saturday as compared with the preceding Saturday:

Available Supplies.	Bushels.
United States and Canada, east of Rocky Mountains, wheat decrease.	2,727,000
United States, Pacific coast, wheat, decrease	570,000
Total decrease, wheat, both coasts	3,297,000
Afloat for and in Europe, wheat, increase	1,000,000
Total decrease, world's available wheat	2,297,000
United States and Canada, east of Rocky Mountains, Indian corn, decrease	775,000
United States and Canada, east of Rocky Mountains, oats, decrease	161,000

GROCERIES.—Shipments of teas have arrived during the week. The quality is fully better than it was last season, and prices are somewhat higher; in choice teas is this especially so. Russian buyers went in early and bought largely at what are thought to be extravagant prices. Advices from Japan give out that the tea crop there is improving as the season advances, and the price for medium and lower grades will be lower. There is but little doing in sugars, prices of which remain unchanged. The refiners appear to prefer waiting for the demand, which will likely be when fruit is plentiful, before making any concessions whatever. Canned goods are moving fairly well.

HARDWARE & METALS.—Trade is not quite so active as it has been lately in this department, but continues fairly steady. The demand for the ordinary fence wire has not greatly decreased, but in barbed wire has fallen off considerably. Prices of the latter are advanced to 3c. per lb., with terms and discounts same as before. Trade in wire nails is exceptionally good and cut nails are in fair demand in ten-keg lots. Very few car lots are being called for. A change has been made in the matter of bolts, the manufacturers having adopted a low list on carriage and machine bolts and also coach screws the discounts being respectively 60 and 10, 60 and 5 and 70 and 5. A change in rivets is also made by the manufacturers. Present ruling prices for tinned, black and coppered are now 55 per cent. On iron pipe jobbers are still resolving quotations, not any special prices having been advanced as yet The figures being offered now are 67½ per cent. discount off ¼, ⅜ and ½ inch; 70 per cent off ¾ and 1 inch; 7 and 5 off 1¼ and 1½, and 70 and 10 off 2 inch. In metals business continues fair with very little change in prices. The import orders are also fairly satisfactory in this line.

HIDES AND LEATHER.—The situation is unchanged from that recently described. Receipts of hides are barely sufficient for the demand. The same remark applies to calfskins. Tallow is dull and in slow request.

PROVISIONS.—As was the case last week, the supply of butter is sufficient for the demand, and prices are unchanged. Cheese is a shade firmer. In hog products the market is steady with a fair demand, at unchanged prices. Eggs are quoted at 10½ to 11c.; receipts have been somewhat limited; dried and evaporated apples are dull and prices only nominal. If the drouth continues it will have, no doubt, some effect on the prices of dairy products.

A Chicago despatch of 19th says: Provisions were extremely dull and steady until the last hour, when selling orders poured in from all sides, causing a moderate break. Ribs suffered most because there are no shorts in them. There was some cash trade in hams at very low comparative prices, but none for ribs, pork, or lard for shipment. Without a material falling off in receipts of hogs or a much improved consumptive demand for product, the speculative situation favours declining markets.

WOOL.—The movement in domestic wool is pretty free this week. Buyers are paying on the street from 20 to 21 cents, and seem anxious to get it at these quotations. The price paid to country dealers is 21 cents. The market for pulled wools is very quiet.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company

First—It is the only Canadian company that has from its inception given its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low-priced PAY AS YOU GO" plan to the shortest single premium endowment.

MORTALITY EXPERIENCE OF THE CANADA LIFE OFFICE.

In our introductory notice of the report on the mortality experience of the Canada Life, we referred to the general scheme of the investigation, and briefly summarized the conclusions arrived at by Mr. Sanderson from consideration of his exhibition of the experience. The important details of compilation and construction, which we propose to touch in the present notice, possess, perhaps, even greater interest for students of the report in this country than its vital statistics. As a life insurance field it appears clear that the Dominion is now practically won for Canadian enterprise, and that, while established British companies may successfully maintain the respectable position they have long held, the Canadian offices, with the Canada Life at their head, will—as their Canadian constitution, satisfactory financial position, and vigorous administration fairly entitle them to do—transact the bulk of the life insurance business in the Dominion. The results, therefore, of the experience under consideration are chiefly of importance to Canadian insurance men, but the method by which they are arrived at is of cosmopolitan actuarial interest in this country at a time when a new experience of British life offices is in course of compilation.

We have already remarked upon the scrupulous care with which the principle of homogeneity has been observed in the compilation of the Canadian experience, and this scientific laying of a good foundation is almost a guarantee of masterly building. So far as our reading of the report has gone, it would in our opinion be difficult to improve—with a data at command—upon the method followed by Mr. Sanderson. We say, "with the data at command," because the absence of dates of birth in the case of a number of older policies was partly responsible for the adoption of the "office age" (*i. e.*, age "next birthday," not, as in American practice, "nearest age") as a basis of classification. We gather that, notwithstanding this difficulty, mean or nearest ages might have been adopted, had not some uncertainty existed at first as to whether a calendar or policy year method would be employed—an uncertainty excusable in view of the fact that the latter method was ultimately decided upon. The adoption of the office ages necessitated, of course, a somewhat troublesome adjustment to pass to completed years of age, but we should doubt whether the results finally obtained are in any way inferior to those that would have been obtained by the adoption of nearest or mean ages. From the brief particulars we have given, it will be gathered that the method of compilation was substantially Galloway's method, but with these improvements:

(1) That the observations were carried to the anniversaries of the policies in the final year of the experience (1893): (2) That the average duration of the policies before attainment of the office age, at entry, was found by various trials to be about four months, and the necessary adjustment based upon that average: (3) That Galloway's unsatisfactory method of passing to completed years of age was replaced by a method of interpolation applied to the life table for the fractional ages; (4) That withdrawals were treated by the nearest duration method.

A most interesting feature of the construction of the final table is, that the graduation was made by Makeham's formula (the constants being derived from the original values of l at fractional ages), the resulting table thus lending itself to the calculations that assume Makeham's law. It is noteworthy that the value of log C comes out at over ·0425. It would be interesting to know whether the graduation did much violence to the original observations in any sections of the table.

In addition to the general table, of which we have described the construction, the appendix of the report contains a graduated mortality table for years of assurance after the first five, and an analyzed table for the first five years for ages at entry 20 to 50. For this purpose the materials are not weighty, but the system of grouping adopted appears to preserve the character of the original facts. Upon the results deduced, an exhaustive comparison with former exhibitions of the influence of selection is based; other points touched upon by Mr. Sanderson in this connection are the question as to whether the effects of selection are appreciable after five years, and the question of the effect of withdrawals; Mr. Sanderson finds that the rates on the whole experience after ten years in the Canada Life, were almost identical with these after five years, but also that the second quinquennium of assurance shows on the average higher rates than the third and fourth for the same ages of exposure. We have mentioned above as an improvement upon Galloway's method, the plan of "nearest duration" adopted in dealing with the withdrawals. In expressing an opinion in favor of this method rather more than a year ago, we went somewhat fully into the question, and we need say no more on the present occasion than to observe that Mr. Sanderson brings out clearly the character of the functions which he tabulates as rates of discontinuance, and that the original observations in table I. throw some light on the comparative weight of withdrawals at the first and second quarters. The section of the report, and the tables dealing with discontinuances, appear to us among the most valuable fruits of the investigation. In conclusion, we may renew our congratulations to the Canada Life on a report which possesses the great merits of presenting the facts of the experience in an admirably definite and intelligible shape.—*Insurance Record, London, Eng.*

THE YIELD POINT OF IRON AND STEEL.

From a paper recently contributed to the Royal Society, by Professor W. C. Unwin, it appears that the yield or breaking down point of iron and steel was first observed in the experiments made on very long bars of iron and steel by the committee of the Institute of Civil Engineers in 1870. As the yield point is only found in rolled materials, it has been supposed to be due to the mechanical work expended on the material, causing a state of constraint, but as annealing, if anything, makes it more marked, this hypothesis is untenable, especially as it does not disappear on repeated loadings of the test piece.

Osmond suggested that the yield point was due to the re-arrangement of the atoms within the molecules of the metal, and some experiments made by Prof. Unwin on alternate straining and annealing of test bars could be explained on this hypothesis. In these experiments a steel test bar was alternately loaded somewhat beyond the yield point and then annealed in a gas oven, being protected from direct contact with the flames by an iron muffler. The operation was repeated seven times, and the range of stress at which the bar broke down was always between 17 16 and 18.71, the point being as clearly marked in the first test as the last. Very similar results were obtained with a wrought iron bar treated in the same way, and with other steel bars. It thus appears that the change produced in iron or steel by straining beyond the yield point is completely reversed by annealing, the bar being brought back to nearly its original condition.

Hence it would appear that there really is a molecular change produced in a bar by straining it beyond the yield point, the iron being changed into some allotropic modification similar to one of those it passed through in being cooled down from a high temperature. Similarly, when bars are broken by alternate stresses, as in Wohler's experiments, the material, Professor Unwin suggests, may have had its molecular constitution modified, as would indeed appear from the peculiar characteristics of the fractures in such cases. In fact, it is not ordinary iron or steel as we know it that gives way, but the iron or steel in one or other of its allotropic modifications.—*Chicago Jour. Com.*

"LET SLIP THE DOGS."

The New York *Press* adorns a tale and points a moral from a recent decision in a Lachute court of justice. The particulars of this case may not be unfamiliar to all of our readers. The suit was over a dog which was claimed by two farmers. There being doubt as to the ownership of the animal, even after a great deal of testimony and eloquent summing up by counsel, His Honor applied a practical test. The plaintiff and defendant were placed in opposite corners of the room and the dog was then let loose. In response to the defendant's invitation the dog approached reluctantly, but when the complainant called, the dog sprang to him with demonstrations of the liveliest delight, wagged his tail joyfully, licked the hands of the plaintiff eagerly, and in every possible manner known to a dog showed its affection and devotion. Our New York contemporary makes use of this incident to illustrate the alleged attitude of certain State senators of that commonwealth, about whom there is considerable doubt as to what party they belong. When the Republicans call, they respond sullenly, but when the Democrats signal, they leap out "barking joyfully and sporting with glee." We have nothing to do with this application of the story among our neighbors; but we submit it is quite apropos of certain aldermen in the Montreal city council. These pretend to be economists and reformists, but when the mayor appeals to them, they answer sullenly, but let Aldermen Prefontaine and Herteau signal and they will leap forth with joy.—*St. John's News.*

IMPROVEMENT IN THE STATES.

A general expansion of demand is reported this week from all iron and steel centres, growing out of the presentation of orders for early deliveries on new work to hand. The locomotive works that have been running less than full time have recently started on full time. Two eastern and three or four western car shops have lately done the same. Quite a number of the larger manufacturing concerns have within a few days placed orders for iron and steel material, to see them through the summer. There are symptoms of advancing prices, and to some extent this accounts for the liberal placing of orders. All the tin-plate mills in the country are crowded with orders. From Swank's iron and trade statistics, just published, it appears that the production of pig iron last year was 6,657,388 tons, against 7,124,502 tons in 1893, of which production last year 57 per cent. was Bessemer. The production of steel ingots last year was 3,571,313 tons, against 3,215,636 tons, 1893. Production of rails, 1894, 1,021,722 tons; 1893, 1,136,458 tons. Ore production 1894, 7,748,932 tons; 1893, 6,060,492 tons. Coke shipments, 1894, 5,454,451 net tons; 1893, 5,054,797 tons; average price of coke in regions last year, $1; in 1893, $1 50. *R. R. Review.*

BUYING A PIG IN A POKE.

A sale of unclaimed goods and baggage was held by Messrs. Rae & Donnelly at their rooms, St. James street, under the authority of the Grand Trunk Railway, last week, when fair fair prices were received. Great fun was experienced in the opening of some of the lots; in all 130 pieces of baggage and 169 pieces of freight were sold, the average price being about $3.25 per piece. All were sold without inspection. The following are some of the bargains purchased: A box of feeding bottles, 35c.; a harrow, 60c.; 7 bags of rags, 35c.; a table, 30c.; a bale of white duck, $40; a roll of shoe leather, $38.50; a hat box, 40c.; a box with about 20 lbs. tobacco, $2.40; a box of drugs, $1; a box containing two splendid engravings of the Derby, $3.70; a small valise, 75c.; when opened a magnificent gold watch was found amongst the contents; three new suits, $2.50; a number of silver prayer beads, $1.05.—*Montreal Gazette.*

HONEST ADVERTISEMENTS.

If it were necessary to be dishonest in business in order to succeed, then there would be no premium on honesty, as there is everywhere today. If the dealers only knew how rapidly their people absorb every influence that tends to pull down rather than elevate the standard of commercial integrity, they would slow up on such methods from policy, if not for conscience's sake. There are, fortunately, conspicuous examples of very successful houses who will not allow an advertisement of any sort, be it newspaper or placard, that contains any untrue statements. Such firms say there is no need to deal in any misrepresentations, as sufficient enthusiasm can be aroused with the truth in their advertisements, for "truth is stranger than fiction," and wisely served up, does the business.—*Dry Goods Economist.*

—At the annual meeting of the New England Woman's Club, held the other day, the president, Mrs. Julia Ward Howe, said, in her opening address: "It was once eccentric to belong to this club. Now the eccentric woman is the one who does not belong to any club."

N. B.—This company having re-insured the Canadian business of the Royal Canadian Insurance Company, assumes all liability under existing policies of that company as at the 1st of March, 1892.

IT IS WELL

To have a Supplementary Catalogue if your large one be very expensive.

Push the circulation of the smaller one and announce in it that you have a larger and more expensive one which you will send upon certain conditions.

If both are well printed, and they will be if done at this office, you should have the best results.

The Monetary Times Printing Co., Ltd.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents or to

HON. EDWARD BLAKE, Q.C., M.P., President.

E. A. MEREDITH, LL.D. / JOHN HOSKIN, Q.C., LL.D. } Vice-Presidents.

The Company acts as **Executor, Administrator, Receiver, Committee, Guardian, Trustee, Assignee,** and in other fiduciary capacities, under direct or substitutionary appointment.

The Company also acts as **Agent for Executors and Trustees,** and for the transaction of all financial business; invests money, at best rates, in first mortgage and other securities; issues and countersigns bonds and debentures; collects rents, interest dividends, &c. It obviates the need of security for Administrations, and relieves individuals from responsibility as well as from onerous duties.

The services of Solicitors who bring estates or business to the Company are retained. All business entrusted to the Company will be economically and promptly attended to.

J. W. LANGMUIR, Managing Director.

DECISIONS IN COMMERCIAL LAW.

SINCLAIR v. REGINAM.—Steel rails weighing twenty-five pounds per lineal yard, to be temporarily used for construction purposes on a railway, and not intended to form any part of the permanent track, cannot be imported free of duty under item 178 of the Tariff Act of 1887. According to the Court of Exchequer, by virtue of s. 13 of the Customs Act, such rails should under 50 and 51 V., c. 39, item 88, pay duty at the same rate as tramway rails, to which all the enumerated articles in the tariff they bore the strongest similitude or resemblance.

DOMINION BAG CO. v. REGINAM. — In construing a clause of a Tariff Act which governs the imposition of duty upon an article which has acquired a special and technical signification in a certain trade, reference must be had to the language, understanding, and usage of such trade. By item 673 of the Customs Duties Act, "jute cloth, as taken from the loom, neither pressed, mangled, calendered, nor in any way finished, and not less than 40 inches wide, when imported by manufacturers of jute bags for use in their own factories," was made free of duty. By item 261 of such Act, it was provided that manufactures of jute, not elsewhere specified, should be subject to a duty of twenty per cent. *ad valorem*. The claimants, who were manufacturers of jute bags, had for a number of years imported into Canada jute cloth cropped after it was taken from the loom. It was, amongst others, a reasonable construction of item 673 that the jute cloth so cropped should be entered free of duty, and in this construction, the importers and the officers of Customs had concurred during such period of importation. Held by the Court of Exchequer, that notwithstanding the provisions of the interpretation clause, the Customs Act, inasmuch as the cloth in question had been, in good faith, entered as free of duty, and manufactured into jute bags and sold, and it would happen that if another construction than that so adopted by the importers and Custom officers was now put upon the statute, the whole burden of the duty would fall upon the importers, the doubt as to such construction should be resolved in their favor.

COOMBS v REGINAM.—The suppliant, who was a manufacturer's agent and traveller, purchased an excursion ticket for a passage over the Intercolonial Railway between certain points and return within a specified time. On the going half, printed in capitals, were the words, "good on date of issue only," and immediately thereunder, in full-faced type, "no stop-over allowed." He knew there was printing on the ticket, but put it into his pocket without reading it. He began the journey on the same day he purchased the ticket, but stopped off for the night at a station about half way from his destination on the going journey. The next morning he attempted to continue his journey to such destination by a regular passenger train. Being asked for his ticket, he presented the one on which he had travelled the evening before, and was told by the conductor that it was good for a continuous passage only. On his refusal to pay the prescribed fare for the rest of the going journey, the conductor put him off the train at a proper place, using no unnecessary force therefor. Held by the Court of Exchequer that issuing to the suppliant a ticket with the condition plainly and distinctly printed upon the face of it, was in itself reasonably sufficient notice of the conditions upon which such ticket was issued, and if, under the circumstances, he saw fit to put the ticket into his pocket without reading it, he had nothing to complain of except his own carelessness or indifference.

REGINA v. ST. JOHN GAS COMPANY.—The harbor of the city of St. John is not one of the public harbors which by virtue of section 108 and schedule 3 of the British North America Act, became at the union the property of Canada. It is vested in the corporation of the city of St. John, who are the conservators thereof, and who have certain rights of fishing therein for the benefits of the inhabitants of the city.

REGINA v. MISSISSIPPI AND DOMINION STEAMSHIP COMPANY.—Upon demurrer to an information for the recovery of moneys paid out by the Crown for the removal of an obstruction to navigation, heard before the Exchequer Court, held that where a ship has become a wreck, and, owing to her position, constitutes an obstruction to navigation, it is not necessary, in an information against the owners for the recovery of moneys paid out by the Crown, under the provisions of the Wrecks and Salvage Acts, for removing the obstruction, to allege negligence or wrong-doing against the owners in relation to the existence of such obstruction. Under the Acts above mentioned, it is only the owner of the ship or thing at the time of its removal by the Crown who is responsible for the payment of the expenses of the removal. The right of the Crown to charge the owner with the expenses of lighting a wrecked ship during the time it constitutes an obstruction was first given by the Public Works Act, and such expenses could not be recovered under the Wrecks and Salvage Act.

MCCARTHY v. TRAVIS. — In an action for libel the plaintiff on examination of the defendant for discovery, attempted to examine him as to the contents of the document containing the alleged libel. The defendant refused to answer questions as to the contents until the document itself was produced or its loss strictly proved. Roulean, J., of the North-West Territories, on reference to him, held that the objection was well taken, the *ipsissima verba* of the document being in question, and the proof of the libel required in such actions being of the strictest nature.

Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Mercantile Summary.

A BOSTON bicycler has been given three months in the House of Correction for running over a child.

THE barristers of Fredericton have agreed to close all law offices in the city on Saturdays at ten o'clock for the day.

MR. HENRY HICKSON, of Winnipeg, has been appointed manager of the Hudson's Bay Company's stores at Battleford, Sask.

THE second new car built at the Canadian Electric Company's works, Peterborough, for the Galt street railway, is ready.

THE financial wants of the Winnipeg school board for current expenses for 1895 are $102,000. This is exclusive of $65,000 debentures issued.

THE Portland Rolling Mills Company, Ltd., has been formed under the Joint Stock Companies' Act, for the purpose of acquiring the old and established businesses of J. Harris & Co.'s rolling mills, Strait Shore, established in 1828, and S. R. Foster & Son's nail and tack works, Georges street, St. John, established in 1858. The consolidated business will be practically under the same management as heretofore. The officers of the new company are J C. Robertson, president; S. Hayward, vice-president, and J. Mowat, treasurer.

The above cut represents our **PIE AND CAKE COLLARS**, a fancy substitute for the old style of crotched pudding dish collars. They require no laundrying and are always ready for use. As they can be used several times, they are less expensive than the old style and make a very much prettier effect on the table.

To each customer we give away with these collars a window show case to display them to the public. We have them in plain assorted colors and also striped. Send us a trial order for an assortment of one gross.

Mercantile Summary.

WE learn from the *Commercial* that R. B. Rogers & Co., Winnipeg, have purchased the clothing stock of Lang, Morphy & Anderson, of the same place.

JOSEPH GRYMONPREZ, of Belgium, and J. LeRoy, of Montreal, have been in the Calgary district purchasing horses for the Belgian Government. Ninety horses were bought.

LETTERS patent have been issued to the Gurney Stove and Range Co., Winnipeg. The directors are Charles Gurney, J. H. Tilden. Oswald Gurney Carscallen, J. Burridge and T. W. Martin. Capital stock of the company $50,000.

AN official referee is investigating the affairs of the Mercer Manufacturing Company, of Alliston. The company's assets, amounting to $60,000, will be sold next month, as a result of actions against the company on promissory notes.

ALTHOUGH the shipping business of the port of Montreal is more active than it was last month, it is still behind last year. The arrivals in port this season to date number 175 vessels against 199 for a corresponding period in 1894. The departures are 152 against 188 last year. There were on Monday last twenty-three ocean going vessels getting ready for sea.

CANADA PAPER CO.

TORONTO and MONTREAL.

Mercantile Summary.

A STATEMENT of the weekly receipts of Manitoba wheat at, and shipments from Fort William and Port Arthur, on Lake Superior, for this crop to date, is given in bushels week by week, in a table published by the Winnipeg *Commercial*, for forty-one weeks, beginning 1st September and closing 8th June. The total receipts were 9,753,934 bushels, and the total shipments 10,688,244. Stocks on hand at the lake ports on June 8th were 253,418 bushels, as compared with 1,294,299 bushels a year ago. The corresponding week last year stocks decreased 65,606 bushels. Two years ago stocks were 2,136,000 bushels.

HAPPILY, the post offices of Canadian cities generally are not in the condition of the Quebec post office, as described in the *Chronicle*. Heading the item, "Our Dirty Post Office," it goes on to say that it appears to be "the business of nobody to sweep even the front steps, while the scrub lady and her little pail have not been seen for almost months. The windows would look very well if they were washed now and then. Smoking is prohibited in the lobby, and yet, somehow, the atmosphere is full of vile tobacco smoke. Every door is closed, and the air in the passageway is positively noisome." A more sweeping indictment than this we have not lately seen.

Mercantile Summary.

B. W KELLY, of Ottawa, who has been doing a limited business in groceries, crockery, etc. for the last three years, is included in this week's list of insolvencies.

R. ELLIS, jr., of O'Leary Station, P.E.I., was originally a carriage maker, and a few years ago branched out into a general store business. He credited freely, and a couple of years ago built himself quite an expensive house, and for some time past has been reported very slow in payments. His assignment is now announced.

A GENERAL dealer at Maxville, Ont., named Wm. McEwan, is reported insolvent, and the estate will likely result poorly, as for twelve months past there has been a pretty steady record of suits against him. He contracted in 1893 to supply the Patrons of Industry, and his troubles seem to have begun very shortly after that.

THE assignment is reported of J. P. Durand, druggist, Hull, Que. He began business only last year, but he has been unfortunate in being laid up a considerable time through sickness, and he has also had trouble with his clerk. The liabilities are placed at $4,400.——G. M. Marcoux, of Chicoutimi, Que., who has been doing a limited business in groceries and confectionery for a few years past, has made his creditors an offer of 40c. on the dollar.

THE Montreal grocer, S. Z. Lebœuf, reported in trouble a week or two ago, is offering 25 per cent., cash, on liabilities of $4,496.——W. F. Smardon, retail shoes, Montreal, lately assigned, makes an offer of 35 cents on the dollar, in payments spread over nine months, secured.——D. Fortin & Co., a small grocery concern, owing about $1,500, have made an abandonment of their estate.——A demand of assignment has been made upon E. Heroux, Montreal, who began a drug business about a year ago.

IN 1888 J. W. Perkins succeeded Perkins Bros. as a general storekeeper at Gorrie. Their father, to whom J. W. has now assigned, always being their chief support, will no doubt be the principal creditor.——E. H. Brooks, carriagemaker and furniture dealer at Mount Albert, and his brother V. Brooks, who is a builder, are both in financial trouble, and have assigned. The former has been in business since 1877, and is well reported. —Thomas Dunn, a Peterborough saloon keeper, has been sold out for taxes and a chattel mortgage, and there were not sufficient assets to satisfy the latter. —An assignment has been made by John Reiley, contractor at Owen Sound.

Loan societies at Vernon, B.C., have refused to pay the trade license imposed on them, and will fight to the last.

The Elgin Loan & Savings Society has declared a half-yearly dividend at the rate of six per cent. per annum, payable July 2nd.

The contract for the construction of the St. Stephen and Milltown railroad is not likely to be made so long as land owners make such exortionate demands for land damages.

The business hitherto done in the manufacture of chocolates, cocoa, etc., in Montreal and Boston, by Messrs. Walter Baker & Co. and Josiah Webb, have been amalgamated into a joint stock company, under the style of Walter Baker & Co., Limited.

A Three Rivers shoe concern, Thomas Bedard & Co., assigns in trust, owing some $3,500. Mr. B. failed only last year, and has since been doing business in the name of his daughter, Miss Clementine Bedard.

H. A. Bolton, of Iroquois, Ont., was a farmer, and less than a year ago started a grocery business. His entire lack of experience caused a general distrust of his success, which has been fully justified, as he is now offering his creditors 35 per cent., cash, on their claims.

Building is active at Moosomin, Manitoba. A brick store, 75 feet by 35, is being erected on Main street for M. Narovlausky. Next month the Lake of the Woods Milling Co. is to begin the erection of its grain elevator here, and three brick dwellings are now under way.

One of the pioneers of the cigar manufacturing trade in Canada passed away on Sunday last in the person of Mr. Henry Jacobs, of the firm of Henry Jacobs & Co., owners of the Stonewall Jackson Cigar factory, Montreal. Deceased was a native of London, Eng., and was 68 years old at the time of his death. He came to Canada over 30 years ago.

On the subject of good roads and their importance to the growth and progress of the country, Professor Lord, of Dartmouth College, says to the Good Roads Association: "I wish you all success in your attempt to improve the highways of our country. Good roads are an index of civilization, and he who sets forces in motion that tend to produce them is a public benefactor. I believe," he adds, "that the extended use of the bicycle will do more than any other thing to show the necessity of good roads, and that the bicycle may therefore be reckoned as a promoter of civilization, as it certainly is of health."

The creditors of Gaspard Brouillet, a Montreal manufacturer of shoes in a moderate way, had a meeting the other day, at which he proposed to pay 40 cents in the dollar cash, but creditors think he should offer 50 cents. He owes some $18,000 to $20,000, direct and indirect, with estimated assets of about $15,000.

At the top of the programme is "willkommen alle," and in every other page is some other form of invitation, or attraction or welcome, from the girl in the front cover to the trophy on the back cover, seventy pages. What we are talking about is the programme of the 13th annual meet of the Canadian Wheelmen's Association, to be held at Waterloo on July 1st and 2nd, 1895.

The auditors have finished examining the Windsor waterworks' books for 1894. During the year $26,681.45 was collected in rates, and the total receipts amounted to $33,542.19. The expenditures were: Salaries, $4,521.75; fuel, $4,670.80; city treasurer, $20,623.03, and small amounts bringing it up to $31,606.69, leaving $1,935.50 on hand. Water rates to the amount of $8,438.07 are still uncollected.

Quebec letters patent have been issued incorporating David W. McLaren; A. Cummins Walker, wife separated as to property of Alexander Walker; Alexander Walker, agent; Barnard S. Sharing, clerk; Joseph Ryan, accountant, and Gerdon W. McDougall, advocate, of Montreal, to make and deal in belting and general mill supplies, by the name of "The J. C. McLaren Belting Company." Total capital stock $99,000, in $100 shares.

About fourteen years ago Miss Eliza Holland opened a millinery store in Toronto, with a capital of $500, and for some years she prospred, but in September, 1890, she assigned and settled with creditors at 42½ per cent. This she paid. Evidently she undertook to do too much with her small capital. At one time she had a stock of $6,000, but this was finally reduced to $3,000, when the bailiff disposed of it on Saturday last.

At the meeting of the American Seed Trade Association, which embraces the leading seedsmen of this continent, held in Detroit last week, Mr. S. E. Briggs, of the Steele, Briggs Seed Company, of this city, was elected president of the association. Mr. Briggs' paper on root culture, read at the gathering of the association in Toronto in 1894, aroused very great interest in the members of that body, whose visit to the "Queen City" of Canada proved so novel and delightful to most of its members

Not a few will learn with regret of the reported suspension of Wm. Shaw & Co., dealers in wholesale woolens, of Huddersfield and Montreal. They were seriously crippled some few years ago by the failure of R. Tyler & Co., Montreal, of whom they were creditors for some $60,000 to $70,000, and have been handicapped ever since. A meeting of their creditors was held in Huddersfield last week, and was adjourned for ten days. They have no Canadian liabilities of any consequence.

Application is made in the *Canada Gazette* of Saturday last by S. D. Davis, M. E. Davis, M. H. Davis, manufacturers, and Harry Abbott, Q.C., Montreal; James B. Duke, George Arents and William H. Butler, of New York, for incorporation as the American Tobacco Company. The objects of the company are to cure leaf tobacco, to buy, sell and manufacture tobacco and smokers' goods in Canada. The chief place of business of the said company is to be in Montreal, and the proposed amount of capital stock is $1,000,000.

At a meeting of 150 to 200 townspeople held in Sarnia last week, the building of a railway from Sarnia to Florence, passing through Petrolea and Oil Springs, was discussed. Mr. Campbell, the promoter of the scheme, was manager of the city and suburban roads at Portland, Oregon. He said the road proposed could be built for $10,000 a mile, and suggested that $3,200 a mile government bonus could be got, and also something from municipalities He and his friends would subscribe the stock or would leave it open for others. Judge Mackenzie, Mr. Thos. Symington, Mr. T. Kenny and Mr. James King spoke in favor of the project. The chances are that the road will be built

We have heard of the death, on Sunday last, of a gentleman well known in Canada for many years, Mr. Henry F. J. Jackson. The deceased came from England to Montreal in 1847 and was superintendent of the St. Lawrence and Canada Atlantic Railway. He built a part of the Grand Trunk Railway running through the county of Waterloo, and took up his residence in Berlin, from where he again removed to Montreal in 1876. He was president of the Economical Fire Insurance Company and of the Berlin Tobacco Company, also for many years auditor of the Ontario Mutual Life Insurance Company. In 1879 he took up his residence in Brockville and has lived there ever since.

In Wellington, B.C., E. W. Bickle & Co. are asking their creditors for an extension of time. Two years ago they failed as general dealers, with liabilities of $16,000. This sum was compromised at 65 per cent, secured by Andrew Bryden and Robert Watson, miners. Since that time these men have guaranteed the firm's account.

The new store to be erected on the corner of Bannatyne avenue and Rorie street, Winnipeg, by J. H. Ashdown, will be a handsome one. It is to be five stories in height, 80 x 135 feet, with frontage on Bannatyne avenue. The material to be used is Selkirk cut stone to the first story, and above that white brick. The *Free Press* says the cost will probably run about $40,000.

The other evening, at a meeting of the Quebec corporation, Mayor Parent took a manly stand on the question of the name of Dufferin Terrace. He said that nobody in the council or on the committee desired the change of name to Frontenac, but that it occurred in the by-law through error, which he explained. His worship made quite a eulogy upon Lord Dufferin and the splendid souvenir he left behind him at Quebec.

The Winnipeg Industrial Exhibition will open on Monday, July 15, and continue all week. The grounds and buildings will be open for exhibits on Friday and Saturday, July 12 and 13th, but the exhibition will be fully open to the public on Tuesday morning. The railways have again agreed to carry all exhibits from Manitoba and the Territories free of charge both ways. Exhibits from the east will be returned free of charge. Low passenger fares will also be given for visitors to the exhibition.

Nixon & Bell opened a men's furnishings store in Toronto, in September last, with a capital of $700, and have already come to grief. Henry Barber is in charge of their affairs.—— An offer of compromise at 25 per cent. is made by the *North-Ender* Publishing Co., and with one exception, the kind-hearted creditors, mostly Toronto men, have consented to the proposition. Anybody can get credit for type, ink and paper. Real estate losses here are said to be the cause of trouble. If true, it is not the first time that the owners of the paper have suffered in this way. Apparently experience does not teach them much. This company publishes other papers representing the eastern and western portions of the city.

An assignment has been made by Minnie Howitt, milliner, at Owen Sound. She will not owe much.——Early in the year Henry Benoit opened a men's furnishing store in Tilbury Centre with but little available capital. He now sells out and creditors are offered 50 per cent. He owes about $1,400.

The sporting goods stock of the Charles Stark Co, in Toronto, was not disposed of as advertised to be on Wednesday last. The principal creditors decided to pay off the mortgage held by John Stark & Co. on the stock. This they did. Later on the stock will, it is understood, be sold. We are informed that a new company, the Charles Stark Bicycle, Gun and Jewellery Company, has been organized and will begin doing business in the same premises immediately, as successors to the Chas. Stark Company.

A. E. Rondot succeeded Demeau & Rondot, in dry goods and clothing at Amherstburg. In 1886 a branch store was opened in Stoney Point. Two or three years later Mr. Rondot failed with $25,000 liabilities. The stock was then bought by his former partner, when they continued under the old style. Early last year Rondot bought the interest of his partner in the business for $1,500. Of this sum $1,000 was borrowed from his mother's estate, and a note given for the balance. His methods of business are not of the most approved type, and now we hear of his assignment. He must owe a considerable sum.

A Brooklyn gentleman who occasionally visits Toronto, and who admires its surroundings, writes to the editor as follows: "We spent a pleasant time to-day at Howard Park. You call it High Park, but I will write it Howard's because a man who had the nobility of soul to hand over to this city such a fortune for such a loving purpose deserves to be remembered for centuries. While, as I understand, he obtained the property for a small sum, yet he possessed this place for long and handed it over, feeling that it was intended for such a purpose by Nature. Certainly I never saw a more perfect area of ground used to create such happiness as this."

Situation Wanted

Young man, age 28, having had fourteen years experience in commercial life with Scottish firms desires employment. Best references. Address "W. M., Box 459, Monetary Times.

THE SITUATION.

In acting upon the suggestion of THE MONETARY TIMES, the Mayor of Toronto, by inviting tenders for the new city loan, both here and in England, till a day named, has taken the proper course. It would have been better if this had been thought of before the City Treasurer left for London, on a mission in connection with the sale; but as timely notice has been given, complications ought to be avoided. Unless all tenderers are to be subjected to the same conditions, questions as to which is the best tender may arise after they have all been received. It would make a difference whether the bonds were payable in London or in Toronto, and on this point all tenders ought to be uniform. There is a better chance of the home market absorbing these bonds than there was some time ago. It would cost less to pay the interest here than in London; and on that account it would have been well if the tenders called for had required an alternative offer, one requiring payment in London and the other in Toronto. This point ought still to be attended to if it be not too late.

"Death by inanition" might truthfully be written on the tomb of the Rosebery Government. The incident which caused it to stumble, for the last time, was a mere straw, of which no account need be taken. The Government had used up its store of political capital and become bankrupt. The final defeat leaves nothing to fight over, no question of policy being involved. But, on the general policy, the lines between the two parties are distinctly drawn, especially on the Irish question and on disestablishment in Wales. The Irish Parliament on College Green, which O'Connell in his day used to promise within a year, once more vanishes from the optics of the imagination. Disestablishment in Wales will receive a set-back till the turn of the Liberals comes round again. On the foreign policy there will be no real change, though the unity which was previously presented to foreigners on international questions will be broken by party lines. On colonial questions it is not probable that there will be any marked change. The Canada-Australian cable continues an unsolved question. Where there is any real work of administration to be done in the Colonial Office, Mr. Chamberlain is likely to prove a good administrator.

Of the railway motors the trolley at present has the lead. In Philadelphia, while a cable put down at a cost of nearly eight millions of dollars is being raised, and its machinery has been sold for old iron, the New York, New Haven and Hartford Railway has been experimenting, successfully, with two electric locomotives, one of which is estimated to have attained a speed of 75 or 80 miles an hour, and might have realized 90 but for the overheating of a box. This trial is held to have proved the success of the venture. The change of motive power from steam to electricity has been made on the Nantasket branch of this road. Though the rate of speed attained was satisfactory, the capacity of the motors has yet to be fully tested before it can be known how many cars can be run in a train. On the capacity of this motor, the question whether electricity will supersede steam on railways generally seems now to depend. Gas as a motor for wagons is now among the things in which experiments have been made in France, and the success attained has caused the project to be taken up in New York, and in Long Island some wagons are being built of which the cost of running by a small gas engine is put at only a cent an hour.

In Canada two Governments are manufacturing binder twine, and a third is said to be anxious to go into the business. The Patrons are also making twine for themselves. Prison labor cannot be permitted to go to waste, and the prison can best be made a school of discipline by teaching prisoners to work at something useful. Binder twine is one of the things which the farmers believed was made artificially dear through the tariff, and when the Patrons went into the business they did so avowedly to bring down the price. Now the statement is made in Parliament, but not proved, that the Patron manufacturers want to form a combine to raise the price of twine to farmers who have no stock in the factory. This would be Patron against Patron. Whether the United States Cordage Company, a colossal combine, is or is not insolvent is a question on which people who have the best means of forming an opinion are not agreed. But however this may be, the position of this company proves that the largest combinations are not always successful, and that in buying up competitors the chief operators sometimes give too much to carry their point. The United States Cordage Company is seeking reorganization, and the plan offered for the acceptance of the shareholders is opposed by a protective committee on the ground that it is not necessary.

Three years from the present time it is expected that the drainage canal, now in course of construction, which will connect Chicago with La Salle, on the Mississippi, will be completed. The first question which this work suggests is, what will be the effect on the lowering of the lakes, of a drainage of 5,000 cubic feet per second, at first, to be afterwards increased to 10,000 cubic feet? This question has so startled the Cleveland Board of Trade that an answer to the enquiry is to be sought by the investigations of army engineers. Engineers who have given some attention to the point are not agreed in opinion. The Drainage Board engineers, who would naturally desire to minimize the effect of the canal, undertake to show that the diminution will be only about 2½ inches. They base this opinion on the fact that the ordinary flow through the Detroit River is about 225,000 cubic feet per second, and that the drainage of the canal will be only 4½ per cent. of this amount. In a commercial point of view the Chicago people expect great things from the canal. It will afford a practical extension of lake navigation of about 88 miles to the Mississippi, in which there is a descent of 149 feet. The expectation is that a large amount of trade will be diverted from New York

to New Orleans. As an earnest of what may be done, the fact is mentioned that, in the last five years, the freight on corn from St. Louis to Liverpool *via* New Orleans has been fifty per cent. less than from New York. This route to the south will be closed by ice on average of 70 days in the year; that by Mackinaw is closed to the east on average of 140 days. No favorable opportunity should be lost to secure for Canada the right to navigate this canal and its connecting waters below, though to obtain it no great sacrifice would be justifiable.

Light is beginning to break through the threatening cloud which overshadowed the Separate school question of Manitoba. A settlement, by way of compromise, appears now to be within sight. Col. Ouimet, speaking for the Catholics, says that no demand has been made by them of a "right to share in the funds provided for education by the Government or by the local authorities." He adds that if the Catholic "schools are not up in secular teaching to the Public schools, all they ask is to be at liberty to add to the secular education required in the Public schools such religious teaching as will meet their religious views." Assuming that Col. Ouimet speaks by authority, Mr. Joseph Martin, author of the Manitoba School Bill, expresses the opinion that no need for remedial legislation for Parliament exists, since, in his opinion, "the people of Manitoba would be willing to give to the Roman Catholics all that is asked." Almost the only question remaining to be settled would seem to be as to the times and the mode of imparting religious instruction. At present, according to Mr. Martin, the law provides for religious instruction in the schools by Protestants, but not by Catholics, and he goes so far as to say that the law of which he is the putative father, "is most unjust to Roman Catholics." This may be the work of the hidden hand of Mr. Laurier. Many will regret, with Mr. Martin, that the State should be required, in any way, to interfere in matters of religion; but if the majority of the people of Manitoba be, as he assumes, opposed to purely secular education, it cannot be doubted that the proposed settlement is the best attainable. It remains to be seen whether the Manitoba Government will accept the view of Mr. Martin.

In passing the new revenue laws, the Government of New South Wales has met a check. The Legislative Council has thrown out the land tax and the income tax bill. The Government has decided to dissolve the House and to reform the Legislative Council. Should the Government succeed in the elections, it will still have to get the consent of the Legislative Council to the alteration of its own constitution: a sort of triumph which is seldom achieved without difficulty.

FINANCIAL REVIEW.

Our readers have had almost a surfeit of financial and banking articles of late; we shall not, therefore, enter much at length into a general review of the Bank Statement for the preceding month.

The banks at this moment are somewhat in the position of a navigator, who having finished a journey round the world which has occupied him a whole year, is about to set out on another voyage over much the same ground. Under such circumstances the careful navigator will look well to the condition of his ship in the first place; and then revise his acquaintance with the seas and shores he expects to meet with during another twelvemonths cruise.

So far as the condition of the respective ships is concerned (if we may carry out the simile), we fancy that in general they are in good trim, well provisioned, well manned, well ballasted, and able to stand a good deal of weather without material damage. Some of them which suffered heavily by storms of bygone years are now in as good a shape as the best sailing-master could desire them to be.

In other cases there has had to be a good deal of trimming and readjustment, with a certain amount of cutting away of useless spars and encumbrances. However, taken altogether, our banks may be said to be well equipped for whatever the future may have in store for them. But as to the seas they will have to navigate it is more difficult to speak with anything like certainty. There is a general air of hopefulness abroad, it is true, and in many respects the winds are favorable enough, and the course over which the ships will have to travel has of late years been well marked out by buoys and beacons and lighthouses, so that the dangers that formerly beset our financial navigators, and which caused the total wreck of more than one noble vessel, have been very much diminished.

But, dropping metaphor, let us speak more in the language of business, and say that bankers may enter upon another year with better prospects than have prevailed for some time back. The great recovery in the price of leading staples will have far-reaching effects that cannot fail to redound to the benefit of business generally.

In only one of our great articles of export, that of cheese, has there been a contrary movement. Possibly if pastures during the summer turn out abundant, an increased quantity may make up for a diminished price. But if, as there are some threatening signs at present, there should be a scarcity of pasture, owing to dry weather both here and in England, there is almost certain to be a corresponding advance in price. There ought to be far fewer mercantile failures this year than of late. Time only will show whether this desirable state of things will present itself; if it does, it will prove of immense value to the sorely-tried importers of the country.

If those who are carrying on this important branch of business would only make up their minds to enforce reasonable *terms* of *credit*, one-half the trouble of recent years would pass away. It is in this direction, we are convinced, that any genuine amelioration in the conditions of the importing business will come. But we are well aware that all forecasts are liable to be falsified by events which cannot be foreseen, and of which it is impossible to foretell the issue.

Who, for example, can be sure what may transpire in the United States with regard to silver legislation? Time only will show. In the meantime our banks no doubt are prepared to enter upon another year guided by the lessons of the past, and determined rather to follow a policy of prudence, caution and moderation, than of pushing and enterprise: seeking mainly to guard and conserve what they already have attained, and to meet the legitimate requirements of customers from time to time as they arise. This, we are convinced, will bring out better results at the end of the present banking year than rash projects for outstripping competitors and endeavors to increase profits by encouraging speculation.

Referring to the present banking return, the most striking feature of the month's figures is the remarkable steadiness shown all along the line, compared with the previous month. In this respect a more stagnant state of affairs is suggested than a similar comparison for last year would indicate, deposits having increased then nearly a million during the month, and discounts two million dollars.

In trade centres generally, however, the stimulating effects of the revived markets are more clearly shown.

The large increase in clearing-house figures in the United States is reflected in our home clearing-houses by an increase for the month of about eight millions and a half.

Both of our leading railways show a considerable increase in their earnings, and there is no disputing the fact that an air of hopefulness pervades the business atmosphere, which is in danger of being too pronounced as usual at the beginning of such periods of recovery. The full effects for Canada will not be fully apparent until after our crops have been housed. So far, a fair average is promised for the older provinces, and reports from Manitoba continue to be of a cheering description. But the conditions in that province are proverbially treacherous.

From many of the Western States a converse state of affairs would appear to be threatening. Whether this is due to some extent to Chicago operators or not, it will tend to keep prices more favorable than for the last year or two, a factor which Manitoba farmers would greatly appreciate,

The indications in the United States are all in favor of the supposition that a new era of prosperity has set in; but it would be well to remember steadily that the influences of the various Trusts in that country are such that a sharp increase in the price of commodities should not be altogether taken as a sign of renewed trade activity. The effects of this artificial mode of stimulation are not quite understood, and a sudden rise may be followed by a fall quite as sudden.

The diversion of producing capital at this time into so many avenues of speculation, must of necessity make it scarcer for legitimate industry, and curtail production in many ways. This may, for the present, advance the price of stocks on hand, but the limitation so placed on production will eventually make the country so much the poorer. to the extent of that contraction.

ABSTRACT OF BANK RETURNS.

31st May, 1894. [In thousands.]

Description.	Banks in Quebec	Banks in Ontario.	Banks in other Prov's.	Total.
Capital paid up	34,728	17,672	9,712	62,112
Circulation	14,102	9,467	4,898	28,467
Deposits	89,364	69,147	23,977	182,488

Gold held, $7,770,505, or 39.79 per cent.

BANK MEETINGS.

Not in banking alone, but in almost every line of business carried on in Canada, the year ended with May has been one of dulness and low profits. The smallness of profits in banking, in the opinion of the general manager of the Merchants' Bank, is lamentable. So keen is the competition between banks, says this gentleman, that an enormous amount of business which costs Canadian banks money is done by them for nothing. The business of banking, as transacted in the United Kingdom, is a remunerative one. But in Canada it is not so. Talk about a banking monopoly, says Mr. Hague: "If that can be called a monopoly in which 38 institutions are competing against one another to earn six per cent. for their stockholders, the word monopoly must have changed its meaning of late."

In a paragraph upon the aspects of business generally, Mr. Hague finds satisfaction in the fact that our exports are constantly increasing, and that leading exports received last year very good prices. At the same time, we are reminded, it is quite possible for producers to receive good prices while the buyers and exporters of those products lose money. It is too much to say that our exporters all lost money last year, though it would seem that the cattle shippers were in that condition. With earnestness and much force this banker urges upon our manufacturers and producers that the time has gone by when we can send any commodity to the English market in a haphazard and careless style. "It is not only good quality but good make-up that tells in the markets of Great Britain." His paragraph about butter making, contrasting our achievement in that respect with Denmark, deserves to be reproduced in the farm journals of the country. Farming, he adds, requires in these times to be carried on with as much intelligence, practical knowledg, assiduity *and capital* as any other branch of business. The rule of thumb can no longer be relied on by the Canadian farmer. A change for the better amongst the cultivators of Quebec is remarked with satisfaction.

A circumstantial statement of the connection of this large bank with the failures of the year among traders possesses interest. During the last twelve months, we are told, 65 of the bank's customers owing it $504,000 in all, failed or got into difficulties. In four of these cases, the securities held brought the bank out without loss; but by the other 61 the bank lost money, though less than the average. Seeing that the aggregate of loans and discounts passed through the bank's books in the year was over $9,000,000, represented by probably more than a thousand customers, this is hardly a matter to cry over. The "Beacons on the Sea of Trade" which Mr. Hague plants, *apropos* of this object lesson, may appropriately be cut out and pasted in the hat of every ambitious trader or over the desk of every sanguine banker. His conclusion is that mercantile failure can be avoided by common sense and intelligence 99 times in 100. "The talk we sometimes hear about old conditions having passed away and new ones come to the front, is trash. One might as well talk about these modern times having upset the laws of gravitation."

A remark made in the course of the discussion that arose at the meeting upon the report, merits some attention. Mr. John Crawford, amongst other suggestions as to the conduct of the bank, contended that it would be well if the directors were less generous to the officers than they had been, considering the unfavorable times for profits. With this hint Mr. T. D. Hood, another of the shareholders, disagreed. Reducing salaries, said he, was the worst

thing that could be done; it disheartened the men, and made them lose interest in their work. "Pay them what is just and right, and look to them for the work, and you can be sure you will get it." We venture to think that Mr. Hood's idea is the more correct one. It is hardly consonant with an accurate observation of human nature to expect some hundreds of men to work, as bank officers must work, harder in a time of depression than usual, and have their remuneration cut down besides.

In addition to the difficulties of the year common to all bankers, the authorities of the Ontario Bank had to contend, some months ago, with injurious rumors, some with no basis of fact, some very much exaggerated, as to the relations of the bank with certain manufacturing and other concerns. These rumors precipitated a run upon the bank, which, however, was soon stopped without going outside of its own resources. A contraction of loans and the holding of increased reserves were consequences which interfered with earnings. But the bank has been able to earn 6.52 per cent. upon its capital, and the dividend for the year has been 6½ per cent.

It was deemed necessary by the board to examine and re-value the bank's assets, and accordingly the president and inspector visited the branches and sifted the accounts at these and the head office with minute care. The result has been that $305,000 is written off Rest account to provide for bad and doubtful debts, realizing real estate and other securities and assets. This in pursuance of a belief that "it is more to the true interest of the stock-holders to show a smaller Reserve fund and less unproductive assets." "If we have written off too much," says Mr. Cockburn, "the money is not lost—you still have it and it will come back." The board chose Donald Mackay, Esq., of the firm of Gordon, Mackay & Co., as vice-president. Since the annual meeting of the bank last week, Mr. Holland, the general manager, has resigned, and Mr. C. McGill, who has a good record as manager of the Peterborough branch, has been appointed to succeed him.

While the bank's operations have been extended, the increase of deposits at interest is referred to by the report of La Banque Jacques Cartier as absorbing the profits of the institution. This same feature, doubtless, has troubled other banks. The net profits were nearly the same as in the previous year, namely, over nine per cent. Seven has been divided and $10,000 added to reserve. We observe a reduction in "credits in liquidation, unsecured," but the other items of real estate, secured debts and overdue notes have not been reduced. The bank has now a branch at Edmonton in the North-West Territories.

THE WOOL OUTLOOK.

The lapse of a fortnight has developed a stronger undertone in the wool market. The extreme views of American and Canadian growers have at last made an impression upon manufacturers, and sales have been made at an advance over former transactions. This strength is by no means marked, and we should not care to predict its continuance. Stocks of foreign wools are very large, and the stocks available for the next London sales, beginning on 2nd July, have reached 345,000 bales, made up of 110,000 bales New Zealand, 5,000 bales Swan River, 32,000 bales Queenslands, 8,000 bales Tasmania, 56,000 bales Port Philip, 20,000 bales Adelaide, chiefly red earthy sorts such as the French use for combing purposes, 23,000 bales Cape and Natal.

Although at an advance over last offers, the transactions of the present week did not prove very profitable to the seller. Some 200,000 pounds of selected combing were sold f.o.b. 22c. The shipment was made direct from country points, and could not otherwise have been made at this figure. Several American buyers have visited Toronto and Hamilton during the week, but this is the first sale of which we have obtained knowledge. The majority of buyers return as they come, empty handed. The ideas of growers are constantly growing larger, and many say that they intend to hold their stock until merchants are willing to meet their views. Quotations at various points in the country vary, but better prices are being paid in the west than in the eastern part of the province; the wool of eastern Ontario is softer than that of the western peninsula, and at present is worth at least ½c. per lb. less. Toronto merchants quote 21 to 22c., but have paid higher prices for large lots of choice selections.

Basing an estimate upon government returns, we should say that there were in the Province of Ontario 9,000,000 pounds of fleece wool. These figures will probably be thought an exaggeration by merchants, but nevertheless have every foundation of truth. It must be remembered that scarcely half this quantity passes through the hands of dealers, the bulk of the clip passing direct from the grower to the manufacturer. The small mill and the barter system are still strongly entrenched in Canada. At a rough estimate one-fifth of the Canadian clip is unwashed, and this proportion, under the influence of the American market, will probably be increased.

FIRES IN MASSACHUSETTS.

Six millions was the Massachusetts fire loss last year. So states the report of Fire Marshal Whitcomb. That document says that during 1894 there were 3,821 fires in the State, from which the loss was $6,107,500. The causes were various. Kerosene occasioned almost 10 per cent. of them, and matches in the hands of children, ignited by rats, or carelessly used by grown people, 12.80 per cent. altogether. Incendiaries are charged with 8.11 per cent. of the fires; defective chimneys with 5.20 per cent.; overheated stoves or furnaces with 5.10 per cent. Next among the causes of fires is placed spontaneous combustion, which was accountable for 3.11 per cent. of the whole. Minor causes were, smoking, lightning, locomotive sparks, ashes in wooden vessels, electric wires, tramps, and bonfires.

It is stated that since the office of fire marshal was established in that State no less than 30 arrests have been made for incendiarism; 10 persons have either been convicted or have confessed, while a number are still awaiting trial. The report states that the records of the Boston fire marshal's office, which was in operation seven years before it was superseded by the present department, show that three-fourths of the criminal fires were set from motives of gain, and that nearly two-thirds of these insurance defrauders had attempted to burn property and collect insurance several times—one as many as 22 times. If such is the case in a model State, such as Massachusetts is supposed to be, how much worse must human nature be in less favored quarters of this continent.

ACCIDENT ASSURANCE.

Popular opinion declares that since the advent of the bicycle, or rather since its arriving at such general use, the risk of accident in the street has increased enormously. This may be rectified in part by the greater skill or the increasing care of riders, in part by municipal regulations. But it is true that the accident-hazard arising from the use of bicyles is becoming a question of interest to the casualty companies. Attention is called by the *Travellers' Record*

to the fact, quite generally overlooked, however, that "every well-to-do man on a wheel is likely to be one less man around a horse. which means removed from considerable risk to comparative safety." Few people realize the extent of the injuries, fatal or otherwise, sustained by people using horses for business or pleasure. It is asserted by those who ought to know that accidents by this mode of locomotion are many fold greater, in proportion to the number involved, than by railway or any other kind of public conveyance. This is a hard doctrine for some, doubtless, who regard the horse as a perfectly safe and docile animal. But even if the horse be trusty, his driver is by no means always so.

Bearing in mind the free-and-easy way that bicyclists use the streets now-a-days, the speed at whch they ruin, and the carelessness of the rights of pedestrians that they show, a good story is told of a well-known resident of the west end who was run down from behind by a cyclist, both the man on foot and the man on the wheel coming crash to the ground. The Parkdale man had a cane in his hand, and when he had felt himself all over and looked at his clothing, he went up and laid the cane soundly on the shoulders and back of the cyclist, using his tongue vigorously at the same time, thus: "Confound you, sir, I'll make your bones so sore that you'll think twice before you run a man down in front of his own door."

REST FOR RAILWAY TELEGRAPHERS.

During the recent session in Montreal, of the Association of Railway Telegraphers, papers upon a variety of subjects were read and discussed. Most of them dealt with scientific or mechanical matters, such as are commonly looked upon as immediately practical. Of these were papers upon "Trolley Currents," and other interferences with telegraph circuits; "Storage Batteries in Telegraph Works," and "The Electrical Accumulator." But there were others which dealt with a phase of the life and character of the human machine without which all the other mechanism of telegraphy would be but as sounding brass and a tinkling cymbal—the operator himself. When the great responsibility resting upon railway telegraphers is considered, it will be apparent that besides being intelligent men, as they usually are, they should be men of principle, of courage, and of sobriety. If they are Christians, so much the better, for the genuine Christian possesses the qualities we have named.

One paper, entitled "Things worth Knowing," prepared by Mr. G. C. Kinsman. of Decatur, Ill., was read at the gathering. It dealt with the engaging, training, and promoting of railway employes. But we have not seen its full text. Another, by a Kansas gentleman, R. B. Gemmell, of Topeka, gave suggestions upon the social and moral condition of railway telegraphers. This paper dealt with questions which should have weight in the estimation of those responsible for the prudent working of a railway. Train despatchers and telegraph operators fill most important positions in the railway working, positions which require skill, judgment, and clear-headedness in those occupying them. It is proper, therefore, that the environment of these men shall receive from the higher authorities of the railroads more consideration than is usually given to it. The physical well-being of such employes, to begin with, is not a matter of slight import, since the average man's mind and spirit are affected in no small degree by the condition of his health. To overwork such a man is therefore dangerous to the interests of the road and of the public which it serves. A man needs one day's rest in seven; and the example of the Erie Railway in restricting the movement of its trains on Sunday, and thereby lessening the strain upon its despatchers and operators, is one which should be generally adopted.

Exhaustion of the physical strength by long hours of anxious labor at the key brings with it a disposition for stimulus that is apt to lead to a resort to the drinking saloon. Nature craves for something to restore the tone of the fatigued system. Therefore, argues Mr. Gemmill, "whenever possible, social and intellectual privileges should be provided by the railway company of such a character that the demoralizing influence of the saloon shall be rendered ineffective." Some counter attraction should be available for a man who is physically and mentally tired.

A discussion ensued, in which the opinion was very generally expressed that on those railways which had adopted the plan of assisting the Y.M C.A.'s much good had resulted in all departments. It was stated that the Denver and Rio Grande railway had employed a minister to visit the distant country stations and hold meetings for spiritual conference, and that much good had resulted. We can conceive that, to certain temperaments, such ministrations might be beneficial, if only as a relief to the monotony of duty at remote stations. But if the average man is overworked and "run down," it needs something more than sermons or the singing of hymns to brace him up for his duty. Spiritual exaltation is not a safe substitute for the physical tone which brings about "the equal mind" that should characterize the man upon whom the lives of hundreds of fellow employees and passengers may depend at any hour of night or day. Therefore the due proportioning of hours of work and stress of duty for their operators, the alternation of reasonable rest and pastime with toil and strain, is a subject which may well occupy the attention of railway superintendents.

ONE-MAN COMPANIES AND LIMITED LIABILITY.

Ingenious devices resorted to by unscrupulous men to obtain the advantages of limited liability are not allowed, in England, to prejudice creditors' interests, if we may judge from the case of Broderip *vs.* Salomons recently decided in the Court of Appeal in confirmation of a judgment of Mr. Vaughan Williams. The matter is one of great importance as regards the validity of a "one-man company." We find the facts stated as follows in the London *Economist*:

"One Aron Salomons had carried on business as a boot manufacturer and leather dealer. About May, 1892, he decided to convert his business into a limited company, but obviously with a view only to procure for himself limited liability, whilst carrying on the business himself and for his own benefit. He accordingly registered a company, the seven signatories to the memorandum being himself, his wife, his daughter, and four sons, each signatory signing for one share. All the other shares of the company were allotted to him, the result being that, with the exception of the six shares held by his family in order that the literal requirements of the Companies Acts might be conformed to, the whole beneficial interest in the company was vested in himself. Still further to strengthen his position, he caused debentures to be issued to himself, containing a floating charge over the assets of the company. Thus armed, he—or the company—commenced to trade, with the result that in fifteen months the company went into liquidation, with a deficiency of some £8,000 as regards creditors. Mr. Salomons then claimed to stand in this position. He disclaimed responsibility for the liabilities of the concern on the ground that they were the liabilities of the company. On the other hand he claimed all the assets

of the company to the exclusion of the trade creditors, on the ground that they were caught by the charge contained in his debentures.

"The matter came before Mr. Justice Vaughan Williams, who, with characteristic boldness, altered the form in which the action was presented to him, so as to enable him to hold that the company so created by Mr. Salomons was a mere agent or *alias* for himself, Salomons being in reality the principal who was thus, on the ordinary law of principal and agent, liable to creditors for debts contracted on his behalf by his agent. This decision has just been the subject of review by the Court of Appeal, by whom it has been affirmed on substantially the same grounds. The Court of Appeal hold the company formed by Mr. Salomons to be a mere device to procure for himself the benefit of limited liability under circumstances in which the Legislature never intended that liability should be accorded to an individual trader.

"The judgment of the court is a most important one," says the *Economist*, "and it is impossible to read it without seeing that in effect it declares to be illegal no inconsiderable number of the so called 'private companies' which are daily springing into existence. Lord Justice Lindley stated, 'There can be no doubt that in this case an attempt has been made to use the machinery of the Companies Act, 1862, for a purposse for which it was never intended. The Legislature contemplated the encouragement of trade by enabling a comparatively small number of persons, viz., not less than seven, to carry on business with a limited joint stock or capital, and without the risk of liability beyond the loss of such joint stock or capital. But the Legislature never contemplated an extension of limited liability to sole traders or to a fewer number than seven.' If this is sound law it would appear that the decision in question affects not merely 'one-man companies,' but two men, or any number up to six inclusive. It is, of course, common knowledge that firms who number less than seven persons have frequently turned themselves into limited companies, clerks or relatives becoming signatories of the memorandum of association, not because it is intended that they shall have any substantial interest in the company, but for the sole purpose of giving the signatures without which the firm could not register under the Act. 'We are fully alive to the danger of arguing from particulars to generals, in the case of legal decisions more especially; but it would appear, from the remarks quoted above, that such a proceeding is an improper one, or, as lawyers call it, a fraud on the Act. The result of such a proceeding, it is clear, from the judgment in the case, is that the parties, who are really the company, can be fixed with personal liability for the debts of the company, which is, of course, the very liability from which they imagined that they had freed themselves.'"

MUSHROOM BANKING.

Shareholders of the Union Bank, Newfoundland, are reported to be preparing to cause the arrest of the directors of that bank. Should this happen we may expect to hear of everything which goes to criminate them. A year ago this bank was described by the Rev. M. Harvey, in a book on Newfoundland, as "a prosperous and well managed institution." The facts which he gave regarding it might seem to have justified the eulogium. They were to the effect that in the first eighteen years of its existence the bank paid a dividend of 11½ per cent. per annum. Besides this, the reserve fund of undivided profits was so large as to warrant a bonus of 50 per cent., which was put in the form of paid-up shares. At the close of the year 1893 the directors alleged that a new reserve of $800,000 had been piled up after paying a dividend of 15 per cent. for the year. Subsequent events have thrown the gravest doubts upon this statement. For many years after the capital was increased by the 50 per cent. bonus, the original shareholders received, in one form or another, not less than 27 per cent. per annum on their investment. Whatever impression such statements were likely to make on sober-minded people, there can be but one of the country in which such things were possible: they were unerring signs of decadence which pointed to total ruin such as we now know was in progress. Nothing but an utterly unsound condition of commerce could render such things possible in a poor fishing island like Newfoundland. The ruin which the boastful figures portended has in fact arrived. The affairs of this bank from its inception to its fall ought to be thoroughly probed by an independent public officer.

THE HIDE MARKETS.

The local situation in hides has remained without practical change during the month. Prices are maintained at the high-water mark attained several weeks ago, and are beyond the reach of tanners for purposes of manufacture. In the local market, business is at a standstill, and unless tanners throughout the country have been carrying larger stocks of hides than they were generally credited with, operations must be subject to serious curtailment. This must have a telling effect upon the prices of leather soon, although there has not yet been that anticipation of the future that is usually witnessed in an advancing market.

We took occasion to canvass, this week, the opinions of Toronto hide merchants and tanners as to the future of hides. It appeared to be almost the unanimous opinion that the top notch had been reached. One or two were inclined to look for slightly higher prices and no one would be surprised to see moderate fluctuations either up or down. The statistical position in Chicago is strong. Last week 50,000 packer hides, or 16,000 more than the take-off, were sold in Chicago, and these large sales brought about a ¼c. advance in all kinds. There has been a great deal of talk about importing hides from England, but the following from the London *Meat Trades Journal* will show the trend of the cattle trade in that country:

In 1894 the number of cattle in the United Kingdom was 426,758 fewer than in 1893, and 638,621 fewer than in 1892. In 1894 the proportion of cattle to each 1,000 persons was 114, in 1893 it was 123, and in 1892, 128, so that for each 1,000 persons there are 14 cattle fewer than there were two years ago. Here are the very latest returns for last year and two previous years:

	1894.	1893.	1892.
Cattle	10,780,796	11,207,554	11,519,417
Sheep	30,037,818	31,774,824	33,642,808
Pigs	3,794,043	3,278,030	3,265,898

It would appear to be unwise to count upon any decline in hides for some time yet. The quality is improving, and values in consequence are getting better each week. The deliveries during the months of July and August will naturally be small, and unless the drouth, now so severe in many parts of the country, grows more intense, there will be little inducement for the farmer to market his cattle. Butchers are receiving at Toronto nominally the following prices: No. 1, 8c., No. 2, 7c., No. 3, 6c., while selected cured weights are selling at 9 to 9½c. The advance in the American hide markets last week has caused local dealers to pay increased attention to the market here, and every nook and corner is being searched for hides.

LEATHER, BOOTS AND SHOES.

The month's trading in sole leather promises to be active only so far as the export movement is concerned. Up to the 10th of the month there was every prospect of an active demand for sole, but from this date trade fell off, and tanners now complain of dulness. As this is the last month of the half year, in pursuance of their agreement stocks must be lightened by export, and a number of large shipments are being made. We hope to be able to give the export figures for the half year next week.

In the remarks in another column on the hide situation, we wish to point out that while we believe hide prices do not correspond to hide values, from a consumer's point of view, there is no prospect of an immediate abatement of the conditions which brought these excessive prices into being.

Manufacturers have not entered, at least the Toronto market, for fall supplies in a general way. Trade in consequence is a little slack,

and must remain so for several weeks. Some of the tanners, however, have on hand orders to fill for summer goods, and are not complaining.

The feeling in England, as revealed by letters to dealers here, is firm, although it is not up to the tone of American markets. Many of the largest leather houses and manufacturers in Britain have bought heavy supplies on future delivery, and this is probably the keynote of the situation. July 15th is the date dealers pick out for a general resumption of business, and we trust their hopes may be realized.

Retailers, in their own interest and for the good of the trade, must begin to educate the public up to higher prices for footwear. In buff goods, grain and splits, prices will range from 25 to 50 per cent higher than last fall. Advertise the fact, give it publicity, and when the fall trade sets in selling goods will be all easier.

Boot and shoe travellers are in a quandary these days. If orders come in too slowly they are subject to reprimand, and if too quickly there is the same likelihood of dissatisfaction in the house because of an advance on the price lists. Combined with hot weather these troubles are more than some can bear.

A comparison has been made of hide and leather prices in 1895 with the prices of 1894. In the 12 months there has been an average advance of 55 per cent. on 21 descriptions of staple leathers. The rise in country hides and skins has been about 142 per cent. on the average, as compared with 146½ per cent. in the packer market. So strong an advance in so short a period is probably without parallel in the history of any trade. There will be low-priced shoes next fall, let no one mistake this fact. But their sale will give no satisfaction to either retailer or customer.

Shoes of lighter colors are being worn more this summer than in any previous season, says the *Shoe and Leather Reporter*. There are show cases and windows of stores in New York that have nothing else in them but lemon and manilla colored shoes. Two years ago dark chocolate was the favorite tint; the shoes turned black in a few weeks. Last year medium shades were popular, but even then the shoes darkened before the summer was half over. This year consumers are determined that they will have a colored shoe that will be a colored shoe all through the season, and this accounts, to a great extent, for the large demand for the extremely light colors.

GROCERS ATTEMPT THE IMPOSSIBLE.

Fredericton grocers are apparently in earnest in their desire to form a grocers' association. Twenty-five grocers, out of a possible forty, assembled at a preliminary meeting and discussed organization. The principal grievance to be remedied is the peddling of vegetables and fruit from door to door by producers and vendors. The grocers rightly think that in the town's interest this trade should be carried on at a central market. A committee was appointed to wait on the council to this end. The subject of delinquent debtors was discussed by the gathering, but no action taken. If our informant, the *Gleaner*, gives an accurate report of the meeting, "the prices of different articles were dealt with, and if all grocers can be got into the association an agreement will be made by which all grocers will have the same price on all articles. There will therefore be no cutting of prices." A retailers' association can accomplish much in the way of securing early closing, prompt payments, honest fruit and vegetable packages, and a score of things essential to profitable trading, but failure must mark any attempt to fix prices. The failure of the Canadian Packers' Association along this line is very fresh in the minds of Canadian grocers, and a dozen other disastrous attempts, by producers and wholesale men, to regulate prices, might be cited. That which is so exceedingly difficult for the wholesale trade is impossible for retailers. The evils of price-cutting may, however, be lessened by frequent and honest discussions.

THE PAN-AMERICAN CONGRESS.

At last we have the programme of speeches and deliberations at the Congress of Religion and Education which is to meet here next month. The list of speakers includes names from Montreal to Vancouver, from Boston and New Haven to Mississippi and Minnesota. In it we remark two features especially worthy of note. One is the unusual degree in which the Roman Catholic Church is represented on the occasion, the other the extent to which the proceedings are to be participated in by women.

One of the distinguished men of the Church of Rome, Archbishop Ireland, of St. Paul, is to deliver an address in the Pavilion on the Rights and Duties of Labor. It will be an excellent opportunity for His Grace to enforce upon the men of labor, with all the weight of his authority, the fact that laboring men in any sphere have duties towards their employers and the state, as well as rights to obtain from employers and the state; and that they have no more right to refuse the one than to demand the other. Another paper is by Rev. Francis Ryan, of St. Michael's Cathedral, Toronto, on the Organization of Charity. If needs a man with a broad mind, as well as a large heart, fittingly to advise upon so wide a subject. And we are justified in regarding this gentleman likely to do justice to his subject.

Those who have made a study of economy and reform of philanthropy and penology, are among the speakers and debaters at this congress. The heads of eight universities in the States and of two in Canada are announced to be present, and as many more college professors, besides State superintendents of schools, editors of well-known journals and magazines, politicians and publicists. We may indicate some of the subjects and some of the speakers:

"Municipal Reform," by Rev. D. M. Beach, Cambridge, Mass.

"Christianity and Labor," by H. W. Bennett, D.D., Akron, Ill.

"Education and Citizenship," by Hon. Geo. E. Foster, Ottawa.

"Relief by Work," by Cornelius Gardner, Commandant U.S.A., Detroit

"Insanity as a Factor in Crime," by E. H. Stafford, M.P., Toronto.

"The Magazine as a Social Force," by Albert E. Shaw, Ph. D., editor *The Review of Reviews*, New York.

"Christianity and Education," by Hon. H. W. Rogers, LL.D., Evanston, Ill.

"Our Christian Duty to the Poor," by C. G. Truesdale, D.D., Chicago.

"How to Save the Boys," by Rev. M. McG. Dana, Brooklyn

"Correlation of Intelligence," "Religion and Morality," by N. Burwash, D.D., Toronto.

Here is a brief list, selected from the forty or fifty different topics to be presented, which should illustrate the nature and range of this important conference. The first address, after the opening ceremonies and the president's inaugural, will be given in the Pavilion on Thursday evening, 18th July, by Rev. Prof. Clark, D.C.L., of Trinity University, his subject being "Religious Congresses and their Responsibilities." Besides the gatherings each day in this building, forenoon and night, there will be meetings of sections in St. James Square Church, the Metropolitan and New St. Andrew's, on King st., on the afternoons of Friday to Tuesday inclusive.

Since we have mentioned the share women are taking on this occasion, we may give some of the subjects on which they are to speak: Mrs. Charles Henrotin, of Chicago, prominent in the World's Fair Congresses, will hold forth on "Women's Clubs"; Mrs. Lydia Mountford on "American Christianity"; Dr. Ella Jennings, of New York, "Heredity and its Possibilities"; Mrs. S. N. Derby, of Elmira, on "Practical Helpers"; Mrs. H. W. Rogers, wife of the president of the North Western University, has for her subject "Recent Progress in Philanthropy."

FOR GROCERS AND PROVISION DEALERS

Advices from Smyrna indicate a large crop of figs this coming season.

The movement in wholesale grocery circles is a trifle slow and uninteresting this week.

The Western Fisheries and Trading Co., New Westminster, B.C., will erect a new building.

A by-law to expend $9,000 in the erection of a market building in Woodstock has been carried.

The hay crop in many parts of Western Ontario has been entirely ruined by the continued drought.

A "working dairy" will visit British Columbia in July under the charge of Professor Robertson.

Samples of new Moning Congous are in the market and supplies are expected almost immediately.

Prince Albert, N.W.T., rejoices in the prospect of home brewed beer, the product of a $60,000 brewery.

Prof. Robertson, Dominion Dairy Commissioner, is in Montreal superintending the construction of cold storage apartments for the shipment of butter on steamers to Liverpool.

Mail advices from Messina place the new crop of Sicily almonds at one-third less than last year. A Palermo letter reports prospects for the new crop rather unfavorable, and says that it will yield only about one-half of last year's.

Recently the Vancouver Customs officials confiscated quite a heavy consignment of smuggled goods, which the Chinese crew of the "Empress" had on board. There were 600 packages of Chinese tobacco, a quantity of cheroots, and some Chinese wine

Messrs. Costello & McMorran, New Westminster, B.C., have already begun work on a new factory, to replace the one recently destroyed by fire. The firm have only a month in which to complete everything, but they expect to be ready for packing when the sockeye run comes.

A large steamer load of Barbadoes molasses reached Montreal last week, the first for some years. Two sailing vessels also brought cargoes, bringing the receipts up to nearly 4,000 puncheons. But most had been sold to arrive. The market continues firm at 37c. per gallon in a jobbing way.

On the 19th inst. the first shipment of packed salmon in the season of 1895 was made from British Columbia. A carload of 576 cases of canned spring salmon, weighing 27,500 lbs., was sent from Ewen's cannery. It is understood that this is an extra choice assignment, all packed in flats and ovals. The salmon will be, it is expected, laid down in London by July 15th.

The New Westminster, B.C., Cold Storage Company sent for shipment to Hawaii, Australia, France and England, 80,000 lbs. of frozen salmon, going forward in the Australian liner "Warrimoo." The fish for Europe is to be transhipped into another cold storage steamer at Sydney, N.S.W. It seems a long way round; let us hope that it will be a safe way home. Should the shipment prove a success, a regular trade will be established.

"Say, mister," he called, with his head in the door of a Michigan avenue grocery, "do you own a hoss?"

"Yes, I own a horse," replied the grocer, as he looked up from his paper.

"And a wagon?"

"Yes—what of it?"

"Nuthin', 'cept you are mistaken about the wagon," drawled the boy. "Your hoss took a skate down the street about five minutes ago, and there hain't nuff of that wagon left to make a club of."—*Detroit Free Press.*

Messrs. W. J. and H. Thompson, tea brokers, London, in their annual review on "Indian and Ceylon Tea," write: The result of the year's work has been exceptionally good. Among the features that have marked the season now closed, two stand prominent, viz., that the United Kingdom has taken a larger quantity of British-grown tea than ever before, and that a higher price has been obtained for it than for the previous crop. But we are approaching the limit of consuming power at home; there only remains a margin of 14 per cent. to be gained, and we cannot expect the other kinds in use to be entirely displaced. Seeing that since 1887 we have lost 10,000,000 lbs. of the annual re-exporting trade of the United Kingdom, the gain since then of five or six millions in the quantity of British-grown tea that we yearly send abroad is the more significant. The progress of the Ceylon trade is shown by the following statistics:

	Imported.	Sold in Auction.	Average price per lb.
1895	74,000,000 lbs.	870,000 pkgs.	8⅜d.
1894	72,500,000 "	850,000 "	8½d.
1892	64,000,000 "	790,000 "	9½d.
1890	34,000,000 "	450,000 "	11d.

METALS AND HARDWARE.

Making glass caskets is among the enterprises talked of to be established at Wallaceburg.

It is understood that the Canadian rolling mill men and makers of nails are to have a meeting in Toronto in the early part of July, on which occasion an effort will be made to advance the price of bar iron and cut nails.

The rolling mill business of J. Harris & Co., and the tack and nail works of S. R. Foster & Sons, at St. John, N.B., have been amalgamated, and hereafter will be operated under the name of The Portland Rolling Mills Co., Ltd. The business will be practically under the same management as heretofore. J. C. Robertson is the president of the new company; S. Hayward, the vice-president, and James Mowat, the treasurer.

It appears that the Canadian Government has decided to offer a bonus of fifty cents a ton in aid of the silver-lead industry. Mr. Foster gave notice of the following resolution: That it is expedient to provide for the payment of a sum not to exceed $150,000 in five years to encourage silver-lead smelting in Canada, the payment for each ton of ore smelted not to exceed fifty cents. This concession will be of special value to British Columbia.

A deputation reached Ottawa on Monday, whose object it is to get aid from the Dominion Government towards a large railway and coal enterprise in New Brunswick. The Secretary of that province and its Surveyor-General, the recorder of the city of St. John and others are energetically backing up Mr. R. G. Leckie, the energetic proprietor of large coal areas at Gerard Lake. They propose to construct a railway from the coal fields to the village of Gibson, opposite Fredericton, and have made an arrangement with the Provincial Government for certain guarantees.

At the semi-annual meeting of the New Vancouver Coal Mining and Land Company, Ltd., a balance dividend of 2 per cent. was declared, making 4 per cent. for the year 1894, carrying forward nearly £18,000 to the credit of profit and loss. The net output in the half year ended December 31st, was 169,183 tons, making a total for the year of 345,283 tons, while the sales in the half year were 171,973 tons, making the total for the year 347,573 tons.

The advances in leather and iron are affecting the implement trade in the advancing prices of vehicles. Manufacturers have begun to notify the jobbers that on account of the rise in leather, from 7 to 10 cents a pound, it will be necessary to advance vehicle prices. There are about 25 to 30 pounds of leather in a top buggy, and the difference amounts to considerable on the factory's output. The upward tendency is also assisted by appreciating iron and steel values. Harness manufacturers have already increased their prices, and the trade need not be surprised to see them go up another notch within a short time.—*Farm Implements, Minneapolis.*

ABOUT BOOKS AND STATIONERY.

"The Railway Agent and Station Agent" for June, published in Cleveland, devotes two pages to the excursion of the passenger agents by the steamer "North-West."

Things that are familiar to us are, therefore, equally familiar to others, is an axiom we unconsciously assume, writes "Faith Fenton," and half the difficulties of life arise from the false assumption. The rarest art of writing is to make the matter real to those who read.

"A Ramble and a Rest" is the attractive title under which some forty pages of description by pen and ink, as well as photogravure, tells of the beauties of the lower St. Lawrence. Pure air, picturesque scenery, sea bathing, botanizing, fishing, loafing, yachting, and observation of human nature. The Intercolonial Railway offers a programme which embraces all this.

The Copp Clark Company of Toronto announce a new book on Canada by J. G. Bourinot, D.C.L. Its title is to be "How Canada is Governed," and it will give in plain language a short account of the executive, legislative, judicial and municipal institutions of the country, together with a sketch of their origin and development. The book will be illustrated with numerous engravings and autographs.

ANSWERS TO ENQUIRERS.

E. T., Hamilton, writes: "Will you inform me through the news columns of your valuable paper who were the successful candidates at the recent examinations of Institute of Chartered Accountants."

[We reply: O. R. Rowley, Bank of B. N. A., Hamilton; Geo. L. Blatch, public accountant, Ottawa; Alexander Hart Smith, accountant, Toronto, were the candidates who passed.]

SOURIS, Prince Edward Island, asks that we express our opinion upon an assessment life association, some of whose literature he encloses. We shall reply to him probably next week.

BROKER, Montreal.—The appointment was not made at that time. We are not, indeed, aware that it was contemplated. But it is a good one, so far as we can judge.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, June 27th, compared with those of the previous week:

CLEARINGS.	June 27.	June 20.
Montreal	$11,596,666	$13,220,049
Toronto	5,552,606	6,338,403
Halifax	1,019,323	1,202,184
Winnipeg	859,860	829,341
Hamilton	632,524	742,112
Total	$19,660,979	$22,332,089

Aggregate balances this week, $2,950,144; last week, $3,214,503.

—The American companies doing accident business and employers' liability business have about reached the conclusion that a revision of policy forms and a revision of rates would be a good thing for the business. Their representatives held a meeting, therefore, and appointed a committee consisting of Messrs. Endicott, Batterson and Seward, to prepare a policy form to be submitted to the various companies for consideration. This revised form has been agreed upon, it is said.

Meetings.

MERCHANTS BANK OF CANADA.

The annual general meeting of the shareholders of the Merchants Bank of Canada was held in the board room of that institution, Montreal, on Wednesday, 19th June, at noon, when there were present Mr. Andrew Allan, Sir Joseph Hickson, Messrs. Jonathan Hodgson, Hector Mackenzie, T. H. Dunn (Quebec), J. P Dawes, John Cassils, John Crawford, John Morrison, J. H. R. Molson, T. D. Hood, Capt. W. H. Benyon, James Williamson, M. S. Foley, James O'Brien, F. S. Lyman, William Francis, M. Burke, James Gardner, Captain Ritchie, John McConnell and J. S. Murray.

The proceedings were opened by Mr. Andrew Allan, president, taking the chair, and requesting Mr. John Gault to act as secretary.

The president then submitted the following report of the directors;

REPORT.

The directors, in meeting the stockholders of the bank on this occasion, beg to present the following report:

The results of the business of the year have not been so large as those of last year.

But the stockholders will, no doubt, understand that the year which has just closed was one of exceptional dulness in trade, and of a low range of profits generally, not only in banking, but in nearly every line of business carried on in the country.

The net profits of the year, after payment of charges, rebate on discounts, interest on deposits, and making provision for bad and doubtful debts, have amounted to		$551,849 51
The balance brought from last year, ended 31st May, 1894, was		5,428 28
Making a total of		$557,277 79
This has been disposed of as follows:		
Dividend No. 52, at the rate of 8 per cent. per annum	$240,000 00	
Dividend No. 53, at same rate	240,000 00	
		$480,000 00
Added to contingent account		20,000 00
Leaving a balance at the credit of surplus profits account of		57,277 79
		$557,277 79

The stockholders will note that the profits made this year amounted to nearly nine and a quarter per cent. on the capital.

Although the business of the country generally was dull, the business of the bank has been well maintained in every department, excepting circulation. This important item has shown a smaller average of figures than for many years back, largely owing to the low prices prevalent for nearly all agricultural products.

The bank this year has suffered no large loss. But a considerable number of small failures have taken place in the circle of its customers. From a number of these failures no loss resulted to the bank; but it is impossible to bring out this result in every case.

The total amount of loss, however, for the year, was smaller than the average. But in view of possible depreciation in certain assets, it has been thought desirable, instead of carrying the whole of the profits forward, to add $20,000 to Contingent Fund. Amongst the losses of the year was one of a very exceptional character, viz., that incurred by the failure of the Commercial Bank of Newfoundland. The amount, however, was only small.

The board have decided to open a new branch at Hespeler, Ontario, the bank having a considerable connection there, which it is important to conserve.

All the branches of the bank have been inspected during the year, and its various officers have discharged their duties efficiently and with fidelity, and to the satisfaction of the board.

The whole respectfully submitted.

(Signed) ANDREW ALLAN,
President.

Montreal, June 11th, 1895.

THE STATEMENT OF LIABILITIES AND ASSETS AT 31ST MAY, 1895, IS AS FOLLOWS.

Liabilities.

1.—To the Public,—	1895.	1894.
Notes in circulation	$2,352,684 00	$2,259,012 00
Deposits not bearing int'st	$2,135,188 40	2,388,260 32
Deposits bearing interest	8,157,448 09	7,362,937 42
Interest due thereon to date	71,668 29	68,728 88
	$10,364,304 78	
Balance due to Canadian banks keeping deposit accounts with this bank	654,827 40	556,273 04
Balance due to Canadian banks in daily exchanges	816 87	..
Balances due to agents in Great Britain	182,107 47	666,769 44
Dividend No. 53	240,000 00	240,000 00
Dividends unclaimed	2,015 00	1,683 50
	$13,796,755 52	$13,543,664 60
2.—To the Stockholders.—		
Capital paid up	$6,000,000 00	$6,000,000 00

	$22,928,248 31	$22,605,572 88

The president then moved, seconded by Mr. Hector Mackenzie:—

"That the report of the directors as submitted be and the same is hereby adopted and ordered to be printed for distribution among the stockholders."

The president called upon the general manager, Mr. George Hague, for a few remarks on the financial outlook.

THE GENERAL MANAGER'S ADDRESS.

To judge by what we hear, Mr. President, the report just presented will be regarded as fairly satisfactory, considering the times. But I must confess to disappointment that we have realized so little out of so large a business as we have done. For though we have made over nine per cent on the capital, we have only realized a little over six per cent. on our total surplus of capital and Rest.

We have earned only little more than *bare legal interest*, yet in this we have done about as well as our neighbors, for all show about the same rate of profit on capital and surplus funds. But to say that they have made bare legal interest shows that the banks have made a mere nothing out of their banking business proper. For myself, I feel sometimes vexed that the enormous amount of transactions, amounting to hundreds of millions of dollars a year, in which we ourselves serve the public, and pass money over our counters, yields us such a miserable modicum of profit.

I shall not waste time in lamenting what may be inevitable (if it is inevitable), but it is only fair to banking interests in general to point it out. Competition between banks has been carried to such lengths of late years that an enormous amouut of business, which actually costs the banks money, is done by them for *nothing*.

It has been said that banking in Canada has now come to be somewhat of a monopoly. If that can be called a monopoly in which thirty-eight institutions are competing against one another, to earn six per cent. for their stockholders, the word monopoly must have changed its meaning of late. Banking in England and Scotland, and Ireland, too, is a remunerative business. It is certainly not in Canada, as I was once told by an eminent London banker, in looking over the low range of our profits.

We have been fortunate this year, as the report informs you, in escaping any large loss, and the total we have had to provide for has not been large. But it is impossible to go through such a year as the last without being affected by some of the numerous failures that have taken place.

During last year 65 of the customers of the bank failed or got into difficulties. The amount they owed us was $504,000. In 42 of these cases our securities bring us out without loss. By the balance we shall lose a certain amount of money, which, as the report tells you, is less than the average.

I don't think this an unsatisfactory record, considering that the total amount of loans and discounts passed through our books during the year footed up to over ninety millions.

It is always of interest to us to note the causes of mercantile embarrassment, and it may be well for me to point out the causes of last year's failures, so as to plant a few buoys, or beacons, for the guidance of those who are navigating the sea of trade at present:—

Branching out into lines of business *other than a man's own*, was one cause.

Attempting a wholesale business on a retailer's capital was another.

Attempting to make money out of buying property and building, instead of sticking to a man's own trade, was another

Pushing and driving, in a reckless style, of a business which a man did not understand was another.

Engaging in the export trade across the Atlantic without practical knowledge and experience was another

(A very favorite notion of people up in the interior, is that there is a mine of wealth in the export trade. People in Montreal know better.)

Neglecting business in order to attend to politics was another.

Reckless and thoughtless giving of credit was another.

And last, but by no means least, was too great facility of borrowing money, and borrowing from more than one bank.

Last year's experience only confirms that of thirty years back, that mercantile failures in ninety-nine cases out of a hundred are *avoidable* by prudence, common sense, industry and intelligence.

The old maxims of trade are just as true today as ever they were. The talk we sometimes hear about old conditions having passed away and new ones coming to the front is trash. One might as well talk about these modern times having upset the law of gravitation.

NEWFOUNDLAND.

During the past year we have had no bank crisis in Canada, nor have we had any failure of a joint stock bank. But our sister colony of Newfoundland has been convulsed, and its business brought almost to a total stand by the failure of the only two banks doing business on the island.

Respecting these, it is to be remarked that had Newfoundland been included in the Canadian confederation, its banks would have come under the operation of a banking law and system which is admitted to be the best on this continent.

The effect of this could hardly have failed to be conservative and preventive. Its influence would have been far-reaching, not only on banking methods, but on the commercial interests of the island. And the influence would have been of such a character as, in my judgment, to have developed the resources of the colony to the best advantage, promoting sound commercial enterprise, introducing and keeping alive sound business methods, and rendering it all but impossible that such a calamity as has lately happened could have transpired.

I am aware that there have been failures amongst the banks in Canada, and that no law can prevent bad management and its results. But banking failures in Canada have been few and far between in proportion to the whole, while the notes in circulation have been rendered so safe that no one has lost by them, even in the worst cases of failure, for many years back.

With regard to other aspects of union between Newfoundland and Canada, though the matter may verge upon the domain of politics, I must take the liberty of saying that though the entry of Newfoundland into Confederation would no doubt have been of advantage to Canada, the balance of advantage (in every respect) would have been immensely in favor of Newfoundland.

With all the defects of our Government, and our institutions, there cannot be a question in the minds of any who have impartially considered the subject, that the Dominion of Canada is the best governed portion of the

American Continent, having the best constitution, the most equitable laws, the best judicial system, the most solid prosperity, and the most rational liberty.

One of the banks of Newfoundland—the Commercial—had kept its account with us for a number of years, and in a perfectly satisfactory manner. By its sudden stoppage, without the slightest premonitory symptom, we shall make, I am sorry to say, a small loss.

ASPECTS OF BUSINESS GENERALLY.

The report of the directors has touched upon a well-known fact, that last year was a year of great dulness in business, and of exceptionally low profits, or no profits at all, in most branches of trade. It is to the credit of our mercantile and banking system that we passed through such a year with as few failures as transpired.

I am inclined to think that the banks as a whole are exercising more and more of a conserving influence over their customers, thus developing habits of prudent forethought, discouraging rash speculation, bringing about a better system of giving credit, and generally promoting a more solid, reliable, and lasting prosperity. I am sure they ought to do this, and generally I think they are

Banks cannot control prices, nor prevent losses by the continuous fall in commodities.

But they can, when asked to furnish means for carrying on mercantile operations, so regulate the amount of money borrowed, that losses, if suffered by their customers, shall bear a reasonable proportion to the means of the borrower, and not involve him in ruin. Of course, I can only speak in general terms, and of a general conserving influence continuously operating. Instances of individual rashness will take place, in spite of all the efforts made by a bank to prevent them And, like other men, bankers sometimes fail to carry out their own rules.

As to the various lines of business in the country, it is satisfactory to see that our exports are constantly increasing. The leading staples in exports last year realized very good prices. It is quite possible, however, for producers to receive good prices and merchants and exporters to lose money. On the whole, however, these latter have not had much to complain of, although the vexatious and unreasonable restrictions upon our *live cattle* trade made it very unprofitable. In fact, for the last year or two, it has been a losing business, though the prospects are somewhat better at present. But this whole business of exporting live animals is little better than a lottery in its result to the shipper, under the present conditions of the trade in Great Britain.

LUMBER AND OTHER MANUFACTURES.

With regard to the products of our forests, it should be an aim constantly to have them sent out with as much of our own manufacture put upon them as possible. The exporting of saw logs is an unwise business, and I am not sure but we have sent out a vast deal too much of square timber in an unmanufactured state.

It is certain that our logs and timber go through various processes of manufacture before they reach their ultimate destination. Why, then, with our unrivalled facilities for manufacturing woodenwork, should we not do all this at home?

Our various lines of

MANUFACTUES

in Canada have been as profitable as they have been either in England or the United States.

Our manufacturers generally are getting to have a command of their business and a thorough understanding of its wants and conditions.

But it is perfectly true here, as it is of manufacturers everywhere else, that unless a manufacturer can make a specialty or specialties of some kind, and conduct his business with extreme attention to detail, he can scarcely hope to make a reasonable profit.

This applies to some extent even to such business as importing, which for the last year or two has fallen into a condition of unprofitableness.

I believe radical changes in the methods of carrying on the leading branch of this business are necessary to a return of prosperity.

DAIRY PRODUCTS.

In dairy products we have thoroughly established ourselves as producers of good cheese; but nothing except constant attention to quality will enable us to hold that position against competition.

Competition now is not only between merchant and merchant, farmer and farmer, but between country and country.

In respect of quality, we might do even more in our manufacture of cheese for the English market. Nothing pays like good quality. Nothing is so ruinous as bad quality in exports. And a point not to be overlooked is that it is not only good quality, but good *make-up*, that tells in the English market.

The time has gone by when we could send anything whatever out of this country to the English market, whether it be fruit, cheese, butter, flour, or any other commodity, in a haphazard and careless style, trusting to luck for it to bring a good return. This is especially the case with regard to butter. It is simply discreditable to us as a country that we cannot make butter of such a quality as to command a large sale in England. Denmark does it; but then Denmark goes about it in a thoroughly business-like and scientific style, manufacturing high-class butter, as men manufacture high-class cottons and woolens.

Denmark has a well organized system of inspection of herds, constantly kept up; the best machinery is employed in manufacturing, the utmost care is constantly taken as to cleanliness, temperature, ventilation, and handling of the article, making it up, packing and shipping, the result being that the article, on the whole, brings double the price that would be obtained by haphazard methods.

What farmers in Denmark can do our farmers can do undoubtedly, if they set about it.

The Government of this province sent over a commissioner last year to Denmark to investigate the matter. The report he made, or extracts from it, ought to be in the hands of every farmer, not of this province, also, but of the whole Dominion.

This leads me to say just one word about

FARMING.

Farming in these times requires to be carried on with as much intelligence, practical knowledge, capital, industry and assiduity as any other branch of business.

This is becoming increasingly appreciated, and the appreciation is leading to the best practical results, especially in our own province. A quiet revolution has been going on for some time, and is in progress still, amongst the cultivators of the Province of Quebec, and its fruits are seen in the generally sound condition of business in Lower Canada.

INSOLVENCY.

It is yet uncertain whether a general insolvency bill can be passed during this session, although it is desirable to have a law which would prevent the gravest abuses which exist in some provinces.

This in reality is the principal reason why a general insolvency law would do good. An Act is *not* urgently required for the relief of insolvent debtors. That was the old style of insolvency laws, but the circumstances of Canada call for no such legislation. All that is required is that when a man does honestly become insolvent, his creditors shall be fairly treated, and his estate equitably divided.

The technical provisions of the Act, lately before the Senate, would be found generally most wise and well considered, provided the right of ranking be properly adjusted. But any Act of Parliament which will give a man his discharge on paying fifty cents on the dollar, will operate as an encouragement to insolvency. You may guard it as you will, but it will have this effect. Experience shows it to be the case wherever it has been tried. Every insolvency law in England has had this effect, though some of the very ablest men in Parliament endeavored to guard against it. That has been our experience, too. Canada does not want an Act to promote insolvency; nor an Act to enable contracts to be broken; nor an Act to compel creditors to act toward their debtors in a manner contrary to their own judgment. Any honest and competent, but unfortunate debtor, has no difficulty in settling with his creditors without an Act of Parliament. What an Act of Parliament is really wanted for is to make void improper preferences, and also to make the procedure in case of insolvency uniform all over the Dominion. Divers Acts in different provinces are not desirable.

PROSPECTS OF BUSINESS.

There is a general air of hopefulness abroad as to this, and I think it is justifiable. The rise in the value of some great staples is undoubtedly having this effect. Increased railway earnings, clearing-house returns, and high values of stocks are all significant. But do not let us expect too much.

Business in the United States is not on a settled basis yet by any means. Notwithstanding the fact that all the bankers and capitalists of the Eastern and Middle States, together with a good proportion of those in the South and West, and the Pacific slope, are a unit in favor of the gold standard, and have presented hitherto a solid front (highly to their credit) against the plausible clap-trap of the silver party, this party is undoubtedly strong and determined, and if the question can be made one on which political lines will be followed, very serious mischief may ensue

The whole financial and commercial business of the United States will be thrown into chaos if the silver advocates have their way. As to bimetallism, or a double standard of value, it is simply a delusion. I venture to think that no man who has the practical handling of money, and the actual dealing with monetary affairs, can possibly imagine that there can be two standards. You might as well have two yard measures, one twelve inches long, the other fifteen; or two bushel measures, one of four pecks, the other five, to be used at buyers' option.

A law that wheat shall always be dealt in at a dollar a bushel, no more, no less, under all the changing conditions of harvests, would be as rational as a law that there shall always be the same ratio between gold and silver.

If there is only one standard it should unquestionably be gold. England has always stood upon this. So have we in Canada. And so has the Government of the United States so far, and so we trust it ever will, to our mutual advantage.

What is the use of getting from a foundation of rock to a bed of quicksand?

But as to business prospects. It should be remembered that individuals may suffer disaster and banks heavy losses, even when times are generally good. In fact it is always the case that seeds of losses are sown in times of prosperity. But, I repeat, that banks can exercise—and are exercising—a moderating and conserving influence by judiciously using that enormous power of dispensing credit which is put into their hands.

When I tell you that the banks as a whole are dispensing credit to the people of Canada at this moment to the amount of over two hundred millions, you may form an idea of the importance of this great function.

In respect of progress, there is one department in which the country is steadily gaining ground, and I think nothing demonstrates more plainly how steadily this country is improving—and not retrograding—than the constant increase in the deposits made with the banks and the Government.

When I first entered a bank in Canada, in 1856, the whole deposits of the country were about $15,000,000
In 1878 these had increased to .. 89,000,000
1890 210,000,000
1891 230,000,000
1892 and 1893 254,000,000
1894 270,000,000

These figures include, of course, the deposits in loan companies and savings' banks, both Government and incorporated. The mercantile loans and discounts of the banks have grown during the same period from about $35,000,000 to $203,000,000, and demonstrate that the increase of deposits has not been the consequence of stagnation and want of enterprise, but has been accompanied by an equal mercantile development

And, further, this steady and extraordinary rise in deposits and discounts has been accompanied by just as steady a development in the way of opening up of lands, improvement of farms, construction of railroads, public works, development of shipping and navigation, improvement of harbors and lighting of our coast, the growth of settlements into villages, and of villages into towns, and of towns into cities; all of which many of us here present have seen with our own eyes. If this statement is not enough to convince the most obstinate pessimist amongst us that the country steadily progresses, in spite of all drawbacks, he must be hard to convince.

As to foreign detractors, we can generally afford to treat them with the contempt they deserve. Their ignorance is generally on a par with their unscrupulousness.

Yet may I be pardoned for a word of caution Canada needs to be careful of maintaining her

high standard of credit at all times. The Dominion cannot afford to trifle with it by allowing its great name to be used in connection with dubious enterprises.

This, I think, is enough for the general manager to say, but if any stockholders desire to ask questions, he will be glad to answer them so far as he may be able.

THE DISCUSSION.

The president having invited remarks from the shareholders, Mr. John Morrison spoke at some length.

Mr. John Crawford, while admitting that in most banks throughout the Dominion, with probably the exception of the Dominion Bank, which paid quarterly dividends, business had not been so good as could be desired, was disappointed that the Merchants Bank, which had made very marked progress during the past few years, had not earned more than 9¼ per cent. He then went on to speak in favor of banks declaring to the shareholders the amount of the gross losses, and said that the best banks in London, Eng., did this, being compelled to do so by royal charter.

The General Manager—Oh, no.

Mr. Crawford—Do you mean to say some of them are not?

The General Manager—Nearly all the joint stock banks of England are organized under a deed of settlement. Whenever a bank is to be organized it deposits certain deeds showing who are the shareholders, how much capital it is proposed to subscribe, and so on.

Mr. Crawford—It is practically the same; they are bound to give it.

The General Manager—No; they give it voluntarily.

Mr. Crawford was pleased to hear that the managers of London banks had so much discretion as not to leave anything to be desired by the shareholders; the information was given voluntarily. He contended that it would be well if the directors, in view of the fact that times had not been so good during the last few years as previously, were not quite as generous to the officers as they had been in the past. He advocated the placing of parallel columns on the financial statement, showing the business of one year as compared with that of the preceding one. It would enable the shareholders, without much inconvenience or exertion, to see at a glance whether the institution had progressed or retrograded. He also considered that it would be well if shareholders were made acquainted with the amount of interest due on interest deposits.

In reply to Mr. Crawford the general manager said the bank received from 3½ to 4 per cent. for the Dominion Government bonds; it gave more than par for them.

Mr. T. D. Hood disagreed with Mr. Crawford as to the advisableness of reducing salaries; it was the worst thing that could be done, as it disheartened the men and made them lose interest in their work. "Pay them," he said, "what is just and right, and look to them for the work, and you can be sure you will get it."

The General Manager—It has been the practice of this and other banks when there has been a really good year, and profits have been good, to let the employes participate in them by giving them a bonus. You may have noticed it over and over again in our own reports, for, fortunately, we have had a number of fairly good years, when the board conceived that it was a very proper thing to allow the officers a bonus. Meddling with salaries, however, is a different matter altogether; it is a matter of bargain, and the employe gets what the rate of the market will give him. You cannot possibly deal with salaries by making them go up one year and down the next. If you did you would never get good service. Mr. Hood is quite right in what he says. The first year after the capital of the bank was reduced, which were exceptional times, and exceptional things had to be done, the whole salaries from top to bottom were cut down about 25 per cent. The officials cheerfully acquiesced in this, because they saw that it was necessary under the pressure of the times. By and by times improved and salaries were restored again. Last year was not a very good year, and the officers felt the effect of it; they got no bonus.

Mr. John Morrison having expressed himself as being opposed to the giving of bonuses the general manager, replying to some remarks by Mr. John Crawford, said: "We have a fund as a guarantee against any losses we might suffer through our officers by fraud, etc. It amounts to about $40,000, which we consider is about sufficient. In addition, we insure our officers in the Guarantee Company for less than would be necessary if we had no guarantee fund of our own. Again, there is a Pension Fund accumulating year by year, and which now amounts to about $20,000. We hope that by and by it will grow, and be a respectable Pension Fund."

The motion for the adoption of the report was then carried unanimously.

It was moved by Mr. John Crawford, seconded by Mr. James O'Brien, "That Messrs. F. S. Lyman and James Williamson be appointed scrutineers of the election of directors, about to take place; that they proceed to take the votes immediately; that the ballot shall close at 3 o'clock p.m., but if an interval of ten minutes elapse without a vote being tendered, the ballot shall thereupon be closed immediately."

This was concurred in, after which Mr. J. H. R. Molson moved: "That the thanks of the stockholders are due and are hereby tendered to the president, vice-president and directors for the manner in which they have conducted the institution during the past year, and to the general manager for his efficient management during the year."

In making the motion, Mr. Molson said that, though such a resolution was annually passed, this year he did not consider that it was a mere matter of form. Since the bank was reorganized, many years ago, it had been steadily progressing. It had a good board of directors, and the shareholders knew how efficient the general manager had been as well. He thought it might be said with truth that they had done their duty very well. The earnings of all banks had during the past year been very much interfered with, owing to the plenitude of money. He was surprised that Mr. Crawford, who might know better, because he knew what was going on in the world, was disappointed at the earnings of the Merchants Bank being only a trifle over 9 per cent. It was better than he (Mr. Molson) had expected. A short time ago he was reading an extract from a banking paper which gave a statement of the average earnings of the banks in the United States for the past 25 years. Beginning 1840 the average earnings that year were 8 8 10 per cent., and they had steadily declined, until last year they were 5 per cent., showing that all over the world there was a superabundance of money, and that banks had a difficulty in earning their dividends. He considered that the Mechants Bank had done exceedingly well, and the directors and the general manager were entitled to the thanks of the shareholders.

Mr. T. D. Hood seconded the motion, which was unanimously agreed to.

It was moved by Mr. John Morrison, seconded by Mr. M. Burke—

"That the thanks of the meeting are due and are hereby tendered to the chairman for his efficient conduct of the business of the meeting."

The motion was carried with cheers, and shortly afterwards the scrutineers reported that the following gentlemen had been duly elected as directors: Andrew Allan, Robert Anderson, Hector Mackenzie, Jonathan Hodgson, John Cassils, H. Montagu Allan, James P. Dawes, J. H. Dunn, Sir Joseph Hickson.

The meeting then adjourned.

The new board of directors met in the afternoon, when Mr. Andrew Allan was re-elected president, and Mr. Hector Mackenzie was elected vice-president, in place of Mr. Robert Anderson.

ONTARIO BANK.

The annual general meeting of the stockholders of the Ontario Bank was held at the banking house, Toronto, on Tuesday, the 18th day of June, 1895.

Among those present were:—Col. Sir C. S. Gzowski, A.D.C., K.C.M.G.; G. R. R. Cockburn, M.P., Hon. George A. Drummond (Montreal), Donald Mackay, D. Ullyot (Peterborough), W. R. Miller (Montreal), G. M. Rose, A. S. Irving, R. D. Perry, A. Harvey, C. S. Gzowski, jr., J. K. Macdonald, Thomas E. Fraser, F. B. Polson, H. B. Taylor, J. Richardson and others.

On motion, Mr. G. R. R. Cockburn was called to the chair, and Mr. Holland was requested to act as secretary.

Messrs. J. K. Macdonald, W. R. Miller and C. S. Gzowski, jr., were appointed scrutineers.

At the request of the chairman, the secretary read the following

REPORT

The directors beg to submit to the shareholders the accompanying statement of the accounts of the bank, made up to 31st of May 1895, including the Profit and Loss account for the twelve months ending at that date.

The net profits after payment of all charges of management, interest due depositors, etc., were		$ 97,816 05
Balance of Profit and Loss, May 31st, 1894		25,527 27
		$123,343 32
From which have been deducted:		
Dividend, 3½ per cent., paid 1st Dec., 1894	$52,500 00	
Dividend, 3 per cent., payable 1st June, 1895	45,000 00	
Written off bank premises	10,000 00	
		$107,500 00
		$ 15,843 32
Transferred from Rest account		305,000 00
		$320,843 32
From which the following appropriations have been made:		
For bad and doubtful debts	$145,000 00	
In reduction, and allowing for realization of real estate	100,000 00	
In reduction of other securities and assets	65,000 00	
		$310,000 00
Leaving to be carried forward		$ 10,843 32

The year just closed has been one of exceptional difficulty for the profitable conduct of monetary institutions. Trade of all kinds, not only in Canada but throughout the whole world, has been inactive and depressed, while the demand for money has been correspondingly limited, and its full employment was obtainable only with difficulty and at unremunerative rates.

From these causes the bank, in common with other institutions, has suffered a proportionate diminution of profits, necessitating a reduction of the dividend for the last half of the year to three per cent., but it had, in addition, to contend against a series of exaggerated and otherwise prejudicial rumors, which entailed, as a precautionary measure, a considerable contraction of the loans, and the holding of largely increased reserves.

While these influences have not affected the stability of the bank, or had any permanent influence upon its earning power, they have been prejudicial to its earnings during the period under review, and have depressed the quotations of the stock to a figure much below its real value.

In view of these circumstances, and the important changes which have taken place in the board, your directors deemed it advisable to make a careful examination and revaluation of the bank's entire assets, both at the head office and the branches, and after much earnest consideration they decided to take a more conservative view of a number of accounts in the bank's books, and to write off all ascertained losses (a portion of which it had been hoped, until within the present year, would not require appropriations) and to make due provision also for any debts deemed doubtful, as well as to provide liberally for any shrinkage in value or loss that might occur in disposing of the real estate and other securities.

To accomplish this it was necessary, as will be seen by the balance sheet appended, to appropriate a sufficient sum from the reserve, a step your directors regret exceedingly, but they deemed it, as well as the reduction of the dividend, to be the proper course to pursue under the circumstances.

They are also of the opinion, that as there are indications of a gradual and general revival of business, the present time was an especially fitting opportunity for making this appropriation, and of thus placing the affairs of the bank upon a satisfactory basis.

The business of the bank is good, and its earning power is substantially unimpaired, and your directors believe it to be more to the true interest of the stockholders to show a smaller reserve fund and less unproductive assets.

Your directors desire to place upon record their sense of the great loss sustained by the bank in the deaths of their esteemed colleagues, the late Mr. A. M. Smith and the Hon. C. F. Fraser, whose sound judgment and guidance were at all times so freely given in the interest of the stockholders.

Continued on page 1695.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st May, 1895.

CAPITAL. LIABILITIES.

J. M. COURTNEY, *Deputy Minister of Finance.*

The vacancies in the board caused by their deaths, and by the retirement of the late president, the Hon. Sir William Howland, have been filled by the election of Mr. A. S. Irving and Mr. R. D. Perry, both of Toronto, and Mr. D. Ullyot, of Peterborough. Mr. Donald Mackay was elected to fill the vacant office of vice-president.

The usual inspections of the head office and of the different branches of the bank have been continued throughout the year, and in order to familiarize himself with the position of the bank, the president has also visited the different offices, a policy which your directors recommend should be observed in the future.

All of which is respectfully submitted

GEORGE R. R. COCKBURN,
President.

GENERAL STATEMENT

Liabilities.

Capital stock paid up		$1,500,000 00
Rest	$ 40,000 00	
Balance of profits carried forward..	10,843 32	
		50,843 32

C. HOLLAND,
General Manager.

Ontario Bank,
Toronto, 31st May, 1895.

Before submitting the adoption of the report to the meeting, the president, Mr. Cockburn, spoke as follows —

"You have heard the report read, and in presenting it for your adoption, I propose to deal with it very fully, so as to anticipate, as far as possible, any questions you may desire to ask. It has now been in your hands for some time, and you have no doubt familiarized yourselves with its main features.

"As we state, the year has not been a profitable one, and in that regard we reflect the gene-

ral opinion expressed by other corporations—banks, loan companies, railways, etc., both in this country and elsewhere. Some have been fortunate enough to maintain their dividend without change, but not a few, like ourselves, have been obliged to reduce it. Our profits have not been up to those of former years, but I think we may reasonably hope that, as there are marked evidences of a revival in trade all over this continent, we shall share in its advantages, and reach better results in the future. Speaking generally, however, I should not like to hold out too bright a prospect in this particular, for it must be borne in mind that the tendency everywhere is towards cheaper money, and investors can hardly expect as large a return as they have been receiving in the past. This influence must have its effect upon us as well as upon others, and an equivalent must be sought for in other directions—in the rate paid for deposits and other borrowings, in economical and efficient administration, and in increased watchfulness to avoid loss. I have no doubt, however, means will be found to maintain the payment of a respectable dividend to you, and that our best efforts will be given to that end.

"The bank, as we state, has had this to contend against during the year, but it had other unfavorable influences as well. The news of the failure of several banks in Newfoundland, coupled with the statement that their collapse was precipitated by losses through the borrowings of their directors, gave rise to rumors that this institution had suffered heavily from similar causes. I need hardly state that this report was most unwarranted. These rumors, however, inspired others of an equally exaggerated character, some going so far as to attribute to us losses with accounts which never were in our books. From these influences, the inevitable consequences soon followed in the loss, as will be seen by the balance sheet, of a very considerable amount of our deposits, and also in a serious fall in the quotations of our shares. I need not say that this occasioned my colleagues and myself no little anxiety, but I am glad to say that we were able to meet any demands from our own resources promptly, and without restricting or depriving any of our customers of the means necessary to carry on their business, and yet, as you will see, we are stronger to-day in cash reserves than this time last year, when our obligations were very much larger. The reduction in deposits entails a diminution of earning power, but this, we are satisfied, is only temporary, and that the efforts now being directed to retrieve the leeway will be successful.

"The circulation of the bank shows a reduction of $64,794. It is not large, considering the state of trade, and the explanation of it is the same as I have given in the matter of profits Activity in business is the condition necessary to large issues, and when the opposite prevails notes do not remain out.

"Bills discounted, current and loans are represented by $4,808,647.77, a reduction of $1,070,386.20, arising partly from the contraction necessary to meet the withdrawal of deposits already referred to, and the lessened demands of our borrowers

"The other items of the balance sheet are detailed so fully that I need not dwell long upon them. You will, however, note the gross liabilities which can be asked for on demand are $5,331,721 23, as against $6,344,054.42 last year—while now we have $1,805,959.35 in gold and other liquid assets to meet them, as against $1,817,437.51 last year, when our liabilities were over a million dollars larger.

"I now come to the profit and loss side of our affairs, and if you will give me your attention I will deal with it at length, and so fully that you will thoroughly understand the position and the causes which led the board and myself to decide upon the policy we now submit for your approval. The profit I have already mentioned—we must now consider the loss.

"When you did me the honor of re-electing me as one of your directors, and my colleagues, at a meeting held subsequently, still further honored me, by choosing me as the president of the bank, I fully realized the importance of the trust committed to my charge, and I felt it my duty to at once familiarize myself with the bank's position and possibilities, in order that I might intelligently bring to its service my very best efforts in your interest. It was, however, very discouraging to be met at the outset with such wide-spread depression and inactivity in every branch of business at home, and a threatening financial horizon in a neighboring country, whose mercantile interests, in lumber especially, are so closely connected with our own. Values of all kinds, in Canada, had shrunk enormously, and while capital was but too abundant, its owners were timid, and the inception of new enterprises, or the extension of those already established, was impossible. These influences were, of course, immediately observable upon our earnings, and were implemented still further by the rumors to which I have already referred. Exceptional losses also fell to our lot. Two were met with of a very unusual character, which could not occur again; one through the decision of the courts cancelling our lien upon bonds we held collateral to a debt (our title to which, up to that time, we had every reason to consider undoubted)—a decision we had to bow to, however unjust, but we preferred to accept the fiat of the court and limit our loss, than involve ourselves further in vexatious and costly litigation—or build a whole railway, in the hope that, possibly with the profit, we might recoup ourselves. I need hardly add, we chose the former alternative, and wrote the debt off. The other loss, and at the same office, arose through the misrepresentation, I might almost say fraud, of a customer who succeeded in deceiving our agent, and leading him to depart from instructions and the established practice observed by us in foreign business. Fraud or misrepresentation, however, are contingencies it is not always possible to guard against. The amounts above referred to, and other contingencies of the year, made up a considerable sum, calling for appropriation out of earnings.

"The above have, of couse, received our most careful attention, as well as the value and condition of the other assets and accounts of the bank represented at the different branches throughout the country. As mentioned in the report, I visited them personally, in company with the inspector, and we spent over ten weeks in making a careful examination, not only of their accounts, but of their general condition and their prospects for business in the future; and, after full consideration with the members of the board, we decided, as shown by the statement submitted to-day, to write off $145,000 to provide for the exceptional losses already referred to, as also to provide for other bad and doubtful items among the assets and accounts of the bank, of which, considering the state of business in the country, we felt an especially conservative view of values should be taken.

"A further some of $65,000 was devoted in reduction of other assets and collaterals held by the bank, while the sum of $100,000 is applied in reduction, and to provide for any shrinkage in value that might occur in the realization of the real estate. That item, you will remember, appeared in our last year's report at $166,004.89, and it has now been written down to $57,027.04, represented by the following properties, which it may be of interest to you if I particularize: 15,700 acres in Manitoba; 23,000 acres mineral, farm and pine lands in Algoma; 52 acres, with buildings, in the town of Fort William; 200 acres, with buildings, in the county of Victoria; 200 acres, and a mine, in Haliburton, and small holding of city property in Montreal.

"Bank premises, $172,527.96, have been written down $10,000, and consist of safes, furniture, etc., and valuable buildings (freehold) at Montreal, Toronto, Bowmanville and Winnipeg—the last-named bringing a rental of $1,500 per annum; but efforts are now being made for its disposal, which, when accomplished, will bring this amount down to still lower figures.

"Other assets, $31,803.30, are represented by life policies of insurance and other assets which could not be specified under any of the usual headings.

"The advent of so many new members on the directorate who were entirely independent in their judgment, made this enquiry unusually searching and valuable, and it may possibly be thought by some shareholders that we have been too severe with the pruning-knife; but when the enormous shrinkage in property which has taken place during the past year is considered, I think it will be found we have erred, if at all, on the right side, in writing down as liberally as we have done, in order to place our assets in a position where their value will cease to be questioned. If we have overwritten, the money is not lost—you still have it, and it will come back.

"Another phase of the situation had to receive our consideration, I refer to public opinion, and the serious depression which had taken place in the quotations of our shares, evidencing but too clearly that our rest was doing us no good, in the face of such a large showing of unproductive assets, for the contingencies of their realization were being overdiscounted, and our stock in consequence depreciated to a figure much below its true value—a condition alike injurious to the credit of the bank and to the interests of its stockholders. Viewing the whole situation, therefore, from all points of view, I am convinced that the course decided upon by your directors was the best, both in your interests and the interests of the institution, and I trust it will receive your approval.

"I am glad to be able to state that I look with confidence to the future. The bank has an excellent earning power, and its offices are well-balanced and distributed in the most prosperous and best earning districts of the country. Already improvements have been introduced to equalize the diminished earnings of the past year. Considerable reductions have already been effected in expenses, and will be still further effected. Consideration is also being given to the extension of our operations in directions hitherto untried, and we have hopes, provided trade becomes active in the country, we shall from these sources equalize, to a considerable extent, any diminution in the earnings resulting from the reduced rates for loans to borrowers.

"I must also acknowledge the loyal support given by the stockholders to their property, in holding their shares—our records show that we have still 625 stockholders, as against 630 in 1894, a difference of but five, which, considering the wide fluctuations of the market, is an evidence of their confidence, and one which I think the future will prove was not misplaced.

"I have now dealt, and I trust fully, with the report and the different items contained in it, but if I have not been sufficiently explicit, or if I have omitted anything you would like to know, I shall be happy to supply it before moving its adoption."

After a few remarks and questions by some of the stockholders upon the business of the bank for the year, Mr. G. R. R. Cockburn moved, seconded by Mr. Donald Mackay, that the report be adopted, which was carried

The usual resolutions thanking the president and directors were then passed.

The scrutineers appointed at the meeting subsequently reported the following gentlemen duly elected as directors for the ensuing year, viz., G. R. R. Cockburn, M.P., Donald Mackay, G. M. Rose, Hon. J. C. Aikins, A. S. Irving, R. D Perry, D. Ullyot.

The new board met the same afternoon, when G. R. R. Cockburn, M.P., was elected president, and Donald Mackay vice-president, by unanimous votes.

C. Holland,
General Manager.

Toronto, 18th June, 1895.

STOCK TRANSACTIONS

The following are the stock transactions on the Toronto Stock Exchange for the week. During the warm weather there will be no Saturday boards held until further notice. Therefore the week consists of five days. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. Total for the week was 2,799 shares; last week, 5,667. Ontario Bank, 150 at 86-87; Commerce, 70 at 137½-137⅞; Imperial, 137 at 179⅝-180; Dominion, 12 at 263½-264; Standard, 51 at 163½; Hamilton, 12 at 157¾; British America Assurance, 97 at 121; Western Assurance, 650 at 165¼-166⅛; Consumers' Gas, 95 at 200-201; Dominion Telegraph, 4 at 121; Can. N.W. —The returns of the Canadian Post Office Savings Bank for May show that deposits amounted to $653,461 during the month and that withdrawals totalled $684,243. Balance on hand on 31st May was $25,861,854.

QUEBEC CENTRAL RAILWAY.

At the annual meeting of the Quebec Central Railway, in London, the chairman proposed the adoption of the report and accounts It would be seen, he said, that the gross earnings had been increased from $288,699 to $301,728, and the net earnings had been $97,339, against $90,519; including a small amount of interest, the net earnings of the year 1894 amounted to $97,752. Taking two lines with which they were connected, the Canadian Pacific showed a decrease of 20 per cent. gross, and 17 per cent. net, and the Grand Trunk a decrease of 10 per cent. gross and 8 per cent. net. Then, taking some of the American lines, the Boston and Maine showed a reduction of 7 per cent. gross and also a reduction in net; while the Maine Central showed a reduction in the same way. The increase from the branch they were building, owing to the traffic they were carrying over the main line, accounted for $7,500 gross and $2,500 net; so that leaving out that source of revenue, they still showed an increase over the earnings of 1893. The passenger traffic had been increased, chiefly owing to foreign travel increasing, as the local traffic remained the same. In July last an improvement took place in the demand for timber and minerals, which was helped by the United States Government reducing the duties on timber, pulpwood and ties. The asbestos traffic also increased. Then, about the middle of the year, a new mineral was discovered near Black Lake, about the centre of their line, namely, chrome ore. This led to a considerable export, 912 tons being exported from various parts of America in six months. The manager wrote that he thought this industry looked like a permanent source of revenue for them. The total increase in freight was $19,000 They commenced working on the Tring and Megantic branch last year. This branch would shorten the route to the eastern provinces by about 100 miles from Quebec and 150 miles to St. John (New Brunswick), while it would also open up a large timber country in those districts.

Mr Joseph Price seconded the motion, and remarked that it was just ten years since the affairs of the company were taken over by the real owners of the property. Up to that time it had been terribly used, and the committee then formed was face to face with very serious difficulties, the first being a floating debt of $289,000, while at the same time the line was in wretched order — so bad that the Government had actually ordered it to be closed. Fortunately the new board had some powerful assistants with regard to establishing the financial credit of the company—notably in Mr. Shepherd, and also in Mr. Norman. They had now not only placed the line in thorough good order, but had established very satisfactory connections with American railways. Speaking of the excellent credit the company was now in, he said a great deal of that was due to the admirable management of Mr. Frank Grundy, who had devoted his ability and energy to their interests with very good effect.

The motion was then carried unanimously. The directors were re-elected.

BANKERS WITH PERMANENT POSITIONS.

There are sixty-eight bank officials serving sentences in one penitentiary. That remarkable showing is made by Warden Hayes of the Kings county penitentiary, of New York. There are now within the walls of that penal institution seven men convicted of embezzlement, who were presidents of National banks; twelve men who were cashiers of National banks; and forty-nine other prisoners who were, when arrested, clerks or tellers in banks.

The Kings county penitentiary is one of the five institutions in the country under contract with the general government to keep in confinement prisoners convicted of felonies by the United States courts. Warden Hayes says:

"I have here in my population as able financial and expert accountants as ever lived. They came from all over the East and Southwest. We have them from Louisiana to Maine. If there should be a strike of tellers, cashiers and clerks in any one of the banks of greater New York, I could furnish a complete staff on one hour's notice. Yes, I could fit the bank out with a president and a full force down to, but not including, the janitor. It is a remarkable fact, which I have verified by looking over the records, that although there have been confined in this prison since it began to receive United States prisoners, twelve or fifteen years ago, a total of 130 bank officers and clerks, we have never as yet had a janitor or watchman or runaway messenger.

"The terms of this class of prisoners vary from five to twenty years. Of the sixty-eight prisoners but one is a Brooklyn man, and not over four of them are from New York city. Seeley is one of these. He robbed a National bank, and there was a vacancy here, and that is why he is with us. Had his offence been against a State bank, he would have gone to Sing Sing, Clinton, or Auburn. If there is a vacancy here, Seeley's brother-in-law, Aymar, may be near him."—*Bankers' Monthly.*

CONDITIONS IN THE STATES.

Henry Clews, in writing last week on the financial situation in the States, said, in seeking to account for the fact that London capitalists were not buying much American securities at present, says the Kaffir bubble is one reason, and "another obstacle to foreign buying is the stubborn prejudice of the financial press on the other side [of the Atlantic], which has a powerful influence among the mass of investors. Those journals are wofully behind in their appreciation of the changed condition of affairs here. Their positions are based upon the scandals formerly attached to American railroad management and the distrust of our monetary standard. They are almost stupidly ignorant of the fact that these matters now belong to the past, and that we are to have a reform in railroad management as well as in currency matters. Europe is slow to understand that the sound money crusade is sure to result in an overwhelming defeat of the dishonest silver inflationists. Our own great capitalists and bankers appreciate this fact.

"Crop reports are more favorable than a few weeks ago. There is every prospect of a bountiful corn crop, which is of chief importance to the railroads. The injury to wheat is likely to be compensated for by better prices. General trade continues to improve, and there is every prospect of a brisk fall trade when the time arrives for its commencement. . . The great staples of trade are generally quiet but steady. In the interior stocks of merchandise are much reduced. In the East wages are rising, and industries daily becoming more active. At the same time money is plentiful and easy, while credits are sound."

THE KIND OF DOG THAT PAYS NO TAX.

A large number of unlicensed owners of dogs were before the Recorder yesterday, and the majority of them were fined as well as required to take out licenses. Mr. Massé, of St. Roch's, however, was not one of these, though Constable Routier reported the defendant, because he had seen a dog very plainly seated a little way back from one of the windows in Mr. Massé's house. His Honor the Recorder asked the accused to step into the witness box and proceeded to question him. "You are the proprietor of a dog?" "Yes, your honor." "Have you taken a license for him?" "No, sir." 'Why?" "I do not believe it is necessary in my case." This answer created a little sensation in court, and his honor said, "I hope you don't imagine that the law can make any exception in your case. I shall be obliged to condemn you." "I think if your honor sees my dog you will not condemn me," said the accused, and he signed to a carter who advanced bearing in his hands the splendidly stuffed animal that the policeman had seen through Mr. Massé's window. The accused received a lecture from the court for the farce he had played, but escaped conviction.—*Quebec Chronicle.*

—A provincial charter is being sought for La Compagnie Electrique de Chicoutimi, of Chicoutimi, Que. The capital stock is to be $10,000, and the principal promoters are the mayor, Joseph D. Guay, Rev. L. Parent, P. H. Boily, merchant, Louis D. Boily, advocate, and F. X. Gasselin, advocate.——The Dominion Carriage and Wheel Co., of Ste. Therese de Blainville, Que., is also applying for a charter authorizing a capital of $15,000. The applicants are Messrs. T F. G. Foisy, T. Nadeau A. R. Archambault, Charles Desmarteau, and G. W. Foisy, all of Montreal.

—A blind beggar stationed near the Chateau d'Eau exhibited a card inscribed as follows: "Kind, charitable souls, don't be ashamed of giving me only a half-penny. I am blind"—*Le Petit Parisien.*

Tanneries for Manitoba

A committee of the Winnipeg Board of Trade will supply information to persons who desire to establish and operate tanneries in the city of Winnipeg. Circulars and detailed information sent on application to

CHAS N. BELL, Secretary.

Public Notice

IS HEREBY GIVEN THAT

(1) The Steele, Briggs, Marcon Seed Co., Limited, a company incorporated under the Ontario Joint Stock Companies' Letters Patent Act, will, after four weeks from the first publication hereof in *The Ontario Gazette* and in THE MONETARY TIMES, a newspaper published in the locality in which the operations of the said company are carried on, apply under the Act respecting the changing of the names of incorporated companies, to His Honor the Lieutenant-Governor of Ontario in Council for an order changing its corporate name to that of The Steele, Briggs Seed Co., Limited.

(2) That the said company is in a solvent condition.

(3) That the change desired is not for any improper purpose.

(4) That the name desired is not the name of any other company, incorporated or unincorporated, or liable to be unfairly confounded therewith, or otherwise on public grounds objectionable.

TOWN AND COUNTRY SCHOOLS.

In an open letter to the Amherstburg public school board, published in *The Leader*, of that town, Mr. C. M. S. Thomas, who signs himself Ex-pupil-teacher-and-trustee, gives some hard raps to the parsimonious spirit so often displayed by municipal councils and school boards in country districts. He heads his letter with a parody of one of the stanzas of Father Prout's "Shandon Bells," thus:

"With deep affection
And recollection
I often think of
That Malden school,
And some rich old farmers
With chock-full garners,
But their teacher on
A three-legged milking stool."

It may do good in some quarters if we reprint portions of this racy letter. After accusing the Board of indifference and neglect, apparently shared by the community, Mr. Thomas goes on:

"Now, I tell you straight, that I believe it is all owing to your parsimonious, cent-wise, dollar-foolish policy of economy. Year after year, it has been your custom to draw barely enough money to pay the teacher and janitor, making no provision for general repairs and modern improvements. It is all very well to economise, but while you are not spending any money for improvements you are going behind the times, and while you are not constantly repairing, the building and fences are going to pot.

"It will soon be time for you to make your annual demand on the town council, and for our perennial reeve to whisper 'make it low as possible, Tom' (which admonition 'Tom' does not require by any means.) But this year, I hope, you will ask for $1,000 extra. If you demand it they are bound to provide it. They can find plenty of money for prospective railroads, etc., and it should not be at the expense of our Public schools.

"Yes, I know, advice is like castor oil, easy to give, but hard to take; but there is no time for quibbling now, for in a few days the midsummer holidays will be on, and you should decide quickly on what you intend to have done, and have your contracts let and other arrangements made, and lose no time in getting to work. Don't wait until the holidays are half over and look around for a whitewash brush and barely clean up by time school reopens. But more than whitewashing is required this year.

"1st. Throw out those four antediluvian stoves and put in a modern coal furnace. Think of the children who roast on one side and freeze on the other.

"2nd. Remove the plaster (what is left of it) from the ceilings in the two lower rooms, and ceil with wood, or you will have some broken craniums to pay for soon.

"3rd. Lay a new maple floor throughout, not pine as before, which has worn thin as pasteboard in places, leaving knots and nail heads sticking up like the excrescences on an alligator's back.

"4th. Get four (4) water-taps, placed inside, one for each division. The idea of one awkward pent-stock placed outside in the fence between the two yards for two hundred pupils is an outrage, and should have been reported to the society for the prevention of cruelty to children long ago! Economy forsooth!

"5th. Common sense ventilation. Throwing open the windows for fresh air is too primitive. Noah did that in the ark.

"6th. Put a hand-rail on the stairs and hardwood steps.

"7th. A complete set of the latest maps is wanted. Those now on hand apparently came over with Columbus.

"8th. Two new water-closets on the dry earth system, large, artistically built, and well ventilated. Those now in use are shocking, demoralizing, and a disgrace to civilization. They would make even a Chinaman blush. Refined English fails to properly describe them. They require to be seen (at a distance) to be appreciated, and I have been informed that Borrowman's chickens roost in them every night.

"Now, gentlemen, do throw off your lethargy and raise the moral and physical standard of your school. The power lies in your hands."

Mr. Thomas pleads for the beautifying of the school surroundings, the encouragement of teachers by kind words, and he advises people to show an interest in the progress of the pupils. He is right. Many a child, and many a teacher pines, but pines in vain for a look or a word of kindly interest in school matters on the part of the parent. He compliments the board on having secured a good staff of teachers, and he closes by asking that a flag-staff shall be raised on which to hoist "our incomparable colors" on every historic day or national anniversary. 'Twere good to do so much for patriotism.

IMPROVEMENT IN BUSINESS.

He who sees a setback in business at this time must be gazing through a telescope pointed by mistake at some other country. From all parts of the United States, the best advices obtainable tell of a rising tide of trade and industry, which threatens here and there to mount too far and too fast. Daily payments through clearing-houses in June are 26.9 per cent larger than last year, though 8·6 per cent. smaller than in 1892, the last year of full business at this season. A rise of more than a quarter in a single year is the more significant because, in spite of recent advances, the prices of commodities as a whole average a fraction of one per cent. lower than a year ago. Two influences of tremendous power contribute to the rise, encouraging crop news and confident replenishing of stocks which have been for two years depleted to the utmost.

. . . Reports from spring wheat States and from the Pacific coast are so cheering that, although the loss of winter wheat was large, those whose estimates have been most accurate in recent years now vary in predictions from 430 to 470 million bushels. Atlantic exports for three weeks, flour included, have been only 3,758,718 bushels, against 6,006,232 last year, indicating no urgent demand at current prices. There has been a fall of 6 cents in wheat, with heavier sales than for three weeks past.

The rush for supplies in iron and steel resembles a "bear panic" in the stock market. Because prices are mounting everybody hurries to buy, so that they mount higher. Bessemer iron has reached $12 65 at Pittsburg, the Bar Association has advanced common to $1.15, the Wire Nail Association puts up the price to $1.50 per keg, the steel rail makers have raised the price to $24, Eastern and Southern furnaces have both raised prices again 50 cents per ton, and structural beams are $1.35, and angles $1.25. It is undeniable that works in operation are crowded with orders, and others which have been idle for years are preparing to resume. At the same time the most potent cause of the upward start in prices, the general belief that a combination of coke producers would raise the price to $1.50 after July 1, is apparently removed by war among the producers, and a fall to $1.25 in contracts for the last half of 1895.

Sales of wool at the chief markets, 3,113,700 lbs. domestic and 3,844,400 foreign, are larger than in any previous year for the same week, and in three weeks of June have been 19,516 065 pounds, of which 10,631,700 were foreign, against 16,933,600 in 1892, of which 7,764,800 were foreign. Orders for men's woolens are a little better, and the Washington mills have opened their Clay worsteds at an advance of about 2½ per cent., though some lower grades are reduced in price. Advances continue in cotton goods, and are sustained by unusual demand and scarcity at a time when the mills are generally anxious to clear off old stocks. Shipments of boots and shoes for the week have been the largest ever known in any week, 101,425 cases, according to the *Shoe and Leather Reporter*, and for three weeks of June have been 1 per cent. larger than in any previous year. Many shops are stopping, though most have orders to August or September.

Failures for the second week of June show liabilities of only $2,092,382, of which $702,357 were manufacturing and $1,329,625 were trading, against $2,917,535 in all for the same week last year, of which $688,137 were manufacturing and $2,220,766 were trading. Additions for the first week of June raise the aggregate for two weeks, including the Cordage concern, to $14,321,841, of which $10,517,325 were manufacturing and $3,684,116 were trading. Failures for the week have been 228 in the United States against 214 last year, and 31 in Canada against 25 last year.—*Dun's Review, June 22nd.*

MONTREAL MARKETS.

MONTREAL, June 26th, 1895.

ASHES.—Receipts have fallen off again, and as the steamer "Parisian" took out a moderate lot, and other small parcels have since been shipped to Bristol and Liverpool, the stock is very low. The demand, however, at the moment is slack, and prices of No. 1 pots are still quoted at $4.10 to 4.15; seconds scarce, and rather firmer at $3.85; pearls are easier at $5.25.

CEMENTS AND FIREBRICKS.—Cements continue steady at the recent stiffening, and a good round sale of 3,000 brls. of Belgian is reported at $1.85, the range for smaller lots going up to $1.95: English, $1.90 to 2.05. Recent receipts have been quite large. Bricks are only in fair demand at $15 to 20 per M.

DAIRY PRODUCTS.—The cheese shipments last week were pretty large, and show some gain on the corresponding week of 1894, but the total aggregate export to date is much behind last year, the deficiency being some 50,000 boxes. The figures for last week were 68,845 boxes, as against 66,481 boxes in 1894. Of butter only 313 pkgs. were exported last week. The cheese market is about half a cent better than a week ago, transactions in the country and on the wharf being reported at 8 to 8¼c. Butter is lifeless at old quotations. Eggs are in fair demand at 10 to 10½c. per doz.

DRY GOODS.—City retail men are better satisfied than they were earlier in the season, and for the last several weeks report a very fair seasonable business, customers who are going to country and seaside getting equipped for their summer outing. Some wholesale houses report quite a few July and August payments anticipated by city retail men. Travellers say that business in the country is also pretty good, and are sending in a fair proportion of orders, both sorting and for fall goods. Several authorities think they can note a disposition to buy fall goods earlier this season, and attribute this to a growing feeling that the chances favor a rise in values. All Bradford and French manufacturers of wool dress goods are reported to be very busy, and domestic makers of both cotton and woolen fabrics seem to agree that there are probabilities of a stiffening in values. Travellers just returned from the Lower Provinces report trade there as satisfactory.

MONTREAL GRAIN STOCKS IN STORE.

	June 17, '95	June 24, '95

Greatest variety of patterns and largest stock in Canada

from the country, showing that the larger than usual stocks laid in before the rise are getting low, and more activity is likely soon to become apparent. Factory prices are firm at 4¼c. for granulated, and for yellows, 3¾ to 3⅞c.; but an odd lot of granulated is still to be picked up at 4⅛c. outside. Molasses rules very firm, Barbadoes at 37c. per gal. in a jobbing way, and Porto Rico at 36c. the single package, round lots 33 to 34c. A large steamer cargo of Barbadoes molasses, the first for some years, reached port last week, and also a couple of sailing cargoes, bringing the receipts to nearly 4,000 puncheons, but most of this had been sold to arrive. Of teas, a certain amount is selling in a small way, but June and July are not tea months, and no special activity can be noted. New Japans on spot are selling at about 22 to 26c. The cheapest sample yet shown is about 15c., and stocks of this grade will not be here yet for five or six weeks. Coffees are quiet; we quote: Maracaibo, 20⅛ to 22c.; Rio, 18½ to 20c.; Java, 24 to 30c.; Mocha, 25 to 29c. Dried fruits are very dull; sales of Valencia raisins were reported last week at 2½ to 2¼c., and since then it is said sales have taken place at 50c. a box, a figure which must mean a serious loss for some one. A purchase by a local house of 3,500 cases of salmon is reported at $4.50 on the coast.

HIDES.—The demand is very fair, but supplies coming in are limited. A meeting of the dealers in the city was held on Monday afternoon, but no changes were made in prices. No. 1 hides, green, are being generally bought by dealers at 8½c., though it is said a shade more is being paid in some cases; the quotation to tanners for cured is 9⅛ to 9⅜c. Calfskins are quoted at 8c.; lambskins, 25 to 30c.; sheepskins, 75 to 90c. each.

LEATHER.—The American leatherman reported in town last week did not do much business, though a few shoemen are said to have ordered some sample lots. It is said, in some cases, his quotations were lower than the local market. The Boston market is reported a shade easier, and there is a feeling with some that prices have gone as high as they are likely to go, for the present at least. Some tanners who have been withholding quotations are now offering stock here. A good deal of common sole is being shipped to Britain, but no local transactions of any consequence are reported, beyond a few sales of Ontario splits at 25 to 28c., though some dealers hold at 30c. We quote:—Spanish sole B.A., No. 1. 26 to 27c.; do. No. 2 to B.A., 25c.; No. 1, ordinary Spanish, 24 to 25c.; No. 2, 22 to 23c.; No. 1 slaughter, 28 to 30c.; No. 2 do., 26 to 27c.; common, 22c.; waxed upper, light and medium, 35 to 40c.; do. heavy, 33 to 36c.; grained, 38 to 40c.; Scotch grained, 38 to 40c.; western splits, 26 to 28c.; Quebec do., 20 to 22c.; juniors, 16 to 19c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 15 to 16c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 13 to 16c.; extra heavy buff, 17c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c

OILS, PAINTS AND GLASS.—Business is assuming a quieter phase in these lines with the approach of midsummer. Linseed oil is still scarce, supplies coming to hand being only of a limited character, and quotations are firmly held. Fish oils are little enquired for; 35c. is talked as a price for new seal oil in lots. Leads are firmer; the trade are discussing an advance, and we hear that one or two firms have withdrawn quotations. Paris green remains firm at the advanced prices. Glass stocks are only moderate. The "Hispania," some weeks overdue, having had to put into Queenstown, on account of her cargo shifting, is now in port with some fair lots. We quote:—Turpentine 47c. per gal. for single brls.; two to four barrels, 46c.; 5 brls. and over 45c. Linseed oil, raw, 57c. per gallon.; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6¾c.; tins, 7c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4¾c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, in bulk, 16 to 17c.; in small packages, 18 to 19c; window glass, $1.10 to $1.15 per 50 feet for first break; $1.20 to $1.25 for second break; third break, $2.70.

METALS AND HARDWARE.—The volume of business in these lines does not vary greatly from last week. Values show no relaxation. Iron piping continues to advance, and 70 and 5 is now best discount from list, while a few weeks ago discounts were quoted of 70, 10 and 2½. Owing to the stiffer values in this line we hear of several import orders being lately placed for German pipe, which has for some time been shut out of the market. The nail-makers and rolling mill men are to have a meeting early in July, in Toronto, when an effort will probably be made to advance bars and nails. In other lines we hear of nothing new. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $19.00 to 20.00; Eglinton, $18.00; Gartsherrie, none here; Carnbroe, $18.00; Shotts, none here; Middlesboro, No. 3, $17; Niagara, No. 2, $18.00; Siemens, pig, No. 1, $16.00 to 16.50; Ferrona, No. 1, $16.00 to 16 50; machinery scrap, $14.75 to 15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00, 52 sheets to box, 60 sheets $2.10 to $2.15, 75 sheets $2.20 to $2.25; all polished Canadas, $2.50; Terne roofing plate, 20x28, $5.50 to 5.75. Black sheet iron, No. 28, $2.10 to 2.15; No. 26, $2.00 to 2.05; No. 24, $1.90 to 1.95; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, according to finish; P. D. Crown, $3.75; do I.X., $4.50; Coke I. C., $2.70 to 2.80; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3⅞c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, 1.50; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 9¾ to 10c.; lead, per 100 lbs., pig, $3 to $3.25; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 9 to 10c.; toe calk, $2.25; spring, $2.50; tire and sleigh shoe, $1.85 to 1.90; round machinery steel, $2.50; ingot tin, 17c.; bar tin, 18c.; ingot copper, 10⅛ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4.25; American do., $4 to 4.25. Antimony 9 to 10c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 22½ per cent. Barb

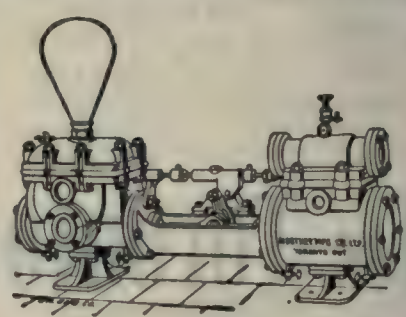
Fine Electric . . Street Cars

OUR SPECIALTY

We also manufacture **Horse and Trail Cars** of every description

PATTERSON & CORBIN
ST. CATHARINES, Ont.

Duplex
AND SINGLE
Steam
AND POWER
Pumps



Hydraulic Presses For all purposes.

Northey Mfg. Co.
Limited
TORONTO, ONT.

LAURIE ENGINE CO., Montreal, Sole Agents Quebec Province.

ELECTRIC WATER WHEEL GOVERNOR
(PATENTED)

Variations in speed detected by fast running, sensitive Governor Balls. Gate movement instantly set in operation by electric current. Quick and powerful action.
Thirty days trial.

and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in. 4¼c.; ½ in., 3½ to 4c.; ⅝ in., ½c; ¾ in., 3¼c., ⅞ in., and upwards.

TORONTO MARKETS.

TORONTO, June 27th, 1895.

DRUGS.—There is a fairly good distributive movement to country points, although trade is not probably as active as it was last week. Reports from retailers indicate a hopeful view of the future. Values of staples continue very steady. Opium is easier. Morphia shows weaker tendencies, while muriate of cocaine is lower in price. Camphor is advancing. Buchu leaves are firmer abroad. Foreign advices on cocoa leaves are strong. Norway cod liver oil remains unsteady.

FLOUR.—It was but to be expected that flour would decline in value in face of a weakening wheat market. Toronto prices are as follows: Manitoba patent, $5 to 5.10; strong baker's, $4.70 to 4.80; patent, $4.75 to 4.90; straight roller, $4.50 to 4.60. From Manitoba comes a story of a sharp decline in the price of flour, due to imports from Minnesota, but we have failed to confirm the report as yet.

GRAIN.—With the explosion of a number of the many crop scares that American market bulls have been industriously circulating, the markets there have declined, and with them the local situation is weaker. The visible supply of wheat in Canada and the United States decreased 1,492,000 bushels during the past week, corn decreased 1,285,000 bushels, oats decreased 685,000 bushels, rye increased 20,000 bushels, and barley increased 12,000 bushels. Local wheat quotations range 5c. lower, and stand now as follows: winter, No. 1, 90 to 92c.; No. 2, 88 to 96c.; No. 3, 85 to 87c.; spring, No. 1, 90 to 92c.; No. 2, 88 to 90c.; No. 3, 85 to 87c. Manitoba wheat has also weakened, and averages 3c. lower on the following basis: No. 1, $1.02 to 1.03; No. 2, $1 to 1.01; No. 3, 97 to 98c. Barley is dull. Oats are steady, the movement is quiet, and general feeling without change.

VISIBLE SUPPLY OF GRAIN

	June 23, '95. Bush.	June 24,'94. Bush.
Wheat	46,225,000	55,852,000
Corn	9,499,000	7,180,000
Oats	7,976,000	2,455,000
Barley	130,000	244,000
Rye	137,000	79,000

The stocks of grain in store at Port Arthur on June 15th were 260,597 bushels. During the week there were received 110,027 bushels, and shipped 184,529 bushels, leaving in store on 22nd June, 186,095 bushels.

GROCERIES.—The retail trade throughout the country have made but moderate demands upon wholesale stocks this week. There are few distinctive features to be noted. Sugars are commencing to move with the opening of the small fruit season, but this trade is not brisk. The raw sugar market is weak and unsettled, and retailers are unwilling to buy refined until present stocks are exhausted. The stock of raws in four ports of United Kingdom is 109,000 tons, against 81,000 tons same time last year. From Smyrna come reports of healthy growing crops. Samples of new Moning teas have been received and supplies will soon be at hand. Tomatoes are firm, and present stocks being in small compass prices are very stiff.

HIDES AND SKINS.—The situation is elsewhere considered at length. Toronto merchants are paying butchers for No. 1, 8c.; No. 2, 7c.; No. 3, 6c. Sales of cured have been made at 9 to 9½c. But trade is slow. Offerings during the hot weather are naturally very limited, while tanners prefer to wait and experience a genuine advance in leather before loading up with hides on the new basis. Pelts and lambskins are unaltered. Calfskins are dull. Tallow finds only moderate request.

LUMBER.—Trade in lumber circles is improving as the season grows older. The prospects are bright for the future. While prices have not advanced, an increased consumptive demand serves to give the industry a healthier tone. June shipments, 1895, will, we should say, total considerably larger than those of June last year. There is a continued and active demand for joisting and bill stuff. Some demand comes from the United States for good lumber. A scarcity appears to exist of 1 x 12 foot boards. Dealers are looking for better prices later in the season.

PROVISIONS.—The hot weather does not serve to give any unwonted activity to provisions. Receipts of butter continue rather large, the demand is slow and quotations unchanged. Trade in creamery is slack. In sympathy with outside markets the local jobbing trade in cheese is somewhat firmer. Hog products are quiet and the range of quotations unaltered. The feeling in eggs is easy; the outside price of fresh candled stock is 10½c., and at this figure there are large receipts. The season for dried and evaporated apples is over; we believe a considerable quantity of evaporated will be carried over in cold storage. Beans are scarce at $1.70. There is no change in hops; the demand for '94 is slow, while '93 are almost completely neglected.

WOOL.—The wool trade is in an interesting condition, and we have considered the week's news worthy of a prominent place in our columns. Dealers are quoting 21c. for selected combing, but are in reality paying higher prices. American buyers are at present in market, but are not inclined to purchase quotations. However, we are told that a lot of 200,000 lbs. was made at 22c. f.o.b. from outside points. Pulled wools are slow of movement. The next London auction opens on July 2nd.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company that has from its inception given its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low-priced PAY AS YOU GO" plan to the shortest single premium endowment.

BANQUE JACQUES CARTIER.

The annual meeting of the shareholders of the Banque Jacques Cartier was held on Wednesday, 19th June, in the rooms of the bank, Place d'Armes Square, Montreal, there being present Hon. Alphonse Desjardins, president; A. S. Hamelin, vice-president: Dumont Laviolette, A. L. de Martigny, A. Aumond, L. J. O. Beauchemin, J. E. Beaudry, G. N. Ducharme, Onesime Martineau, Thomas Gauthier and J. A. Labine. Hon. Mr. Desjardins being called to the chair, and Mr. A. de Martigny being asked to act as secretary, the report of the last annual meeting was read and approved of.

The president then read the following report, presented by the directors, of the business of past year:—

GENTLEMEN,—The board of directors has the honor to present to you the report of the operations of the bank for the year ending the 31st May, 1895:—

Balance to the credit of profit and loss the 31st May, 1894	$8,284 69	
The net profits for the past year, deductions being made for the working expenses, interest on deposits, and also amounts deducted for losses	45,323 84	
		$53,608 53
To deduct—		
Dividend 3½ per cent. Dec. 1st, 1894	$17,500 00	
Dividend 3½ per cent. June 1st, 1895	17,500 00	
Carried to Reserve Fund	10,000 00	
		45,000 53
Balance of profits carried forward		$8,608 00

The last, like the former years, was noted for an increased extension of the bank's operations. The proportion, however, of the increase of time deposits was nevertheless greater than the rest, which had the effect of augmenting in a corresponding degree the interest paid and also to absorb the profits of the bank. However, the period of stagnation in business due to hesitation caused by the commercial crisis which has been so generally felt, has, since the opening of the season, given place to confidence and more general activity, and in consequence capital has been more readily solicited and has found more easily a surer and remunerative employment. If, as everything seems to indicate, the symptoms of a complete return of business prosperity be verified, we have every reason to look for excellent results during the year that has just begun, and superior to the two last years, satisfactory though they may have been. For the first time since its existence the bank has gone beyond the limits of the Province of Quebec to establish a branch, but although the distance may be great, the new office is located in a centre where the French-Canadian element has its importance, and which, by its position, its climate, and the varied products of the soil, offers the best conditions for the future. Edmonton is in fact the *chef lieu* of a very important district, the development of which has surpassed considerably during the last few years that of any other portion of the Northwest territories. Established since last fall only, the new branch has not only met all expenses necessary to its installation, but has contributed in a satisfactory proportion to the profits of the year.

Against this we have decided to transfer to the St. Hyacinthe office the business of the St. Simon agency.

The head office, the different branches and agencies of the bank have been regularly inspected, and your administrators are happy to bear testimony to the zeal and intelligence with which the managing director, the assistant manager, and the other officers of the bank have all fulfilled the duties of their respective charges.

All of which is respectfully submitted.

ALPH. DESJARDINS,
President.

The following statement to 31st May, 1895, was also submitted by the general manager:—

A. L. DE MARTIGNY,
Managing Director.

The following resolutions were then adopted:

Moved by the president, seconded by the vice-president, that the report just read be adopted and printed for the use of the shareholders.

The president having asked Messrs. L. J. O Beauchemin and Alphonse Aumond to act as scrutineers, the election of the board of directors was then proceeded with, resulting as follows: Hon. Alphonse Desjardins, A. S. Hamelin, Dumont Laviolette, Joel Leduc and A. L. de Martigny.

Proposed by Mr. Thomas Gauthier, seconded by Mr. Alph. Aumond, that the thanks of the shareholders be extended to the president, vice-president and directors for the services they have rendered the bank during the past year.

Proposed by Mr. L. J. O. Beauchemin, seconded by Mr. J. E. Beaudry, that the thanks of the shareholders be extended to the managing director, the assistant manager, the inspector and the other officers of the bank for the zeal displayed in the discharge of their several duties.

Proposed by Mr. A. S. Hamelin, seconded by Mr. Dumont Laviolette, that the thanks of the shareholders be extended to the scrutineers, after which the meeting was declared closed.

(Signed),

ALPH. DESJARDINS,
President.

A. L. DE MARTIGNY,
Managing Director.

THE NEW NORTHERN TRANSIT STEAMER.

Continuing the account of the trial trip of the Great Northern Transit Company's steamer "Majestic," on the Georgian Bay on Tuesday 18th, Mr. Keogh, after thanking the mayor of Collingwood for the set of flags presented to the vessel by the citizens of that place, called upon the vice-president of the company, Mr. John J. Long, who proposed the toast of the "Banking, Manufacturing, and Mercantile Interests of the Dominion," to which Messrs. W. A. Copeland, of the Bank of Toronto, Collingwood; E. B. Eddy, of Hull, Quebec; Mr. Van Allan, of Chatham; ex-Mayor McLauchlin, of Owen Sound; H. Y. Telfer, C. E. Stephens, Thos. Long, of Collingwood; Alex. Turner, Hamilton, and others, responded.

The toast of the "Railway and Transportation Interests" was responded to by Messrs. Arthur White, John Earls, Dickson, Chas. Cameron, Stephens and Keogh. The health and success of the commodore and officers of the "Majestic" was received with three cheers and a tiger. The commodore is Capt. Campbell, formerly of the "Pacific."

Much credit is due this steamboat company for the enterprise it has shown in placing such a large and attractive boat for tourists on this favorite route. The "Majestic" is a screw steamer built of steel and white oak at a cost of $125,000. Her dimensions are 230 feet in length, 36 feet beam, depth of hold 13 feet 4 inches, 1,600 tons burden registered, with two water-tight compartments, with solid bulkhead fore and aft, without any openings whatever, making her perfectly safe under almost every condition. The equipment of the steamer is of the most modern type, being fully up to date in every respect. She is fitted with automatic bridge telegraph, steam capstans forward and amidship, steam steering gear, and steam windlass of ocean type for raising the heavy anchors. The machinery consists of fore and aft compound condensing engines of 1,200 h.p., with inverted cylinders, 28 and 54 inches in diameter, and 36-inch stroke; the pistons of the engines are of steel, the same as is now generally used in the navy. Consequently, there is much less vibration in the hull, an important factor in a passenger steamship. Her dining-room can seat 120 persons at a time. The main saloon, 200 feet long, furnished and decorated in the Victorian style, in white enamel and gold, fully furnished with mirrors, Wilton carpets, ottomans, lounges, etc., and a grand piano in the ladies' cabin. Large and airy staterooms run the entire length of the saloons, with bathrooms and lavatories attached, each room independently lighted with incandescent lamps, affording first-class sleeping accommodation for 200 passengers.

CHILD INSURANCE.

Ex-Governor Long gives his opinions on child insurance in Massachusetts as follows:

"People, however poor, will bury their children decently, and it is a question either of pauper funerals—which, as a matter of self-respect, nobody will encourage—or else of the alternative between an insurance fund and debt, with its heavy interest. There will be just as much economizing in food to save money to pay debt as to pay insurance.

"Since child insurance began in Massachusetts pauper funerals have diminished nearly one-half in number. Abolish child insurance, and you will either go back to an increase of pauper funerals or put a new drain on your charity funds, and pass the hat to meet the expense. You will stop the habit of saving, which of itself is an education in social economy among the poor that should be encouraged. The savings banks do not meet this need of five cent savings. There is no competition between the two systems. Each meets a different necessity; and, instead of one cutting into the other, both have been increasing in their business at the same time.

"There are hardships attending all the systems which our modern congestion and civilization make necessary. The railroad system, the electric car and lighting systems, the fire system, the machinery system all result in some cases of death, injury and suffering which are directly traceable to the systems themselves; and yet we do not abolish them. We remedy, as far as we can, but even at that we do not stop the evils.

"The remarkable thing in child insurance is that at the hearing, as also in the 1894 report of the Society for Prevention of Cruelty to Children, which I above cited, not a case of suffering is traced to the system. And yet we are asked to abolish it, and to deprive 100,000 children under ten years of age in Massachusetts, and the families they represent, of the privilege they now enjoy, without the slightest effort, even if there be fear of some attendant and occasional evil, to meet it by some amendment rather than by the wholesale destruction of the system. More than one-fifth of the population of the State are industriously insured, including the above 100,000, and it is significant that not one of them appeared at the hearing to support the bill."
